NARRATIVE REPORT OF ALBEMARLE COUNTY

S. S. TREL, COUNTY AGENT

1925

NARRATIVE REPORT OF ALBEMARLE COUNTY

S. S. TEEL, COUNTY AGENT

4- H Club Work-

Seven 4-H Clubs were organized with poultry, Corn, soy beans and Livestock as projects.

The baby chicks put out to the poultry club members were hatched from eggs from high producing, selected flocks, consequently the farms on which the chicks were raised will in most instances, start a flock of standard bred poultry. The father of James Shifflett, a club member of the Stony Point Club says, "James sold two broilers from the club chickens that paid for the twenty baby chicks and the pullets are so fine my wife is thoroughly convinced that the standard bred fowles are the most profitable to keep, and we would not have gotten them but for the club work."

Each corn club member was furnished with one peck of pure bred corn and although the drought cut down the yield in some cases most of the selected corn will be used for seed by farmers in the community. The father of Vender Wood, a club member of the Wigwood Club, said that his son had most all of his corn spoken for for seed another year by adjoining farmers.

Getting better seed, poultry and livestock on the farms by the boys and girls agricultural club work is a great help towards getting better methods adopted on the farms.

Agronomy-

Results of the Agronomy work this year have far surpassed our goals set. There are a very few farmers now that

cannot tell what variety of corn they are raising and why the variety was adopted. A visitor at the County Fair said he had watched the improvement of the quality of the corn in Albemarle County for two or three years and that he was convinced that the work done by the Extension workers in seed selection, testing and treating for diseases was the outstanding reason for the improvement. The large corn exhibit, notwithstanding the extended drought was the best ever held in the County.

Mr. George T. Omohundro, Glendower, Va. said, "The County Agent certainly did a good thing for me when he induced me to sow Certified wheat last fall. My yield was increased ten bushels per acre, which was a big investment in itself, but I sold all of the 700 bushels for \$2.50, except what I seeded myself.

I heard Mr. J. Y. Brown of the Brown Milling Co. Charlottesville, Va. remark recently that the quality of the local grain has very much improved in the last two or three years. "Lime and Legume" demonstrations are beginning to talk for themselves at last. The use of the soil testing outfit has been a great help, which shows very much the need of lime for various crops.

We had demonstrators raising soy beans any where from one hundred to two hundred acres for seed. Thrashing has been a problem. Some standard makes of grain thrashers have been properly adjusted but some communities are figuring on purchasing bean thrashers co-operatively for another year. Lots of beans are not thrashed at this date. There is already talk of an oil mill being located here. Therefore, we feel that the soy bean interest

is encouraging.

Mr. John T. Antrim, Charlottesville, Va. said the other day, "A few years ago I tried to get alfalfa and failed. These other fellows getting good cuttings three and four times a season looks so good, I believe I'll try again."

Major Owsley, Greenwood, Va. became disgusted with sowing alfalfa with no results. We induced him to purchase Grimm seed of the Virginia Seed Service and he has forty acres that looks like a Northwestern field of alfalfa. We can grow alfalfa profitably but it is like realizing God's promises only on conditions. We can get alfalfa by the use of humus, lime and native Northwestern grown seed.

Sweet clover is another legume that has led us a "Jack's Lantern" trail. But his "Phosphos" mystery is no more.

Mr. A. L. Lockhard, Barboursville, Va. said on one of our visits to him, "I'll have to exchange my cattle. I used to get sweet clover to grow on thin places to improve the land. Now my cattle wont let it grow."

Mr. W. B. Colthurst, Charlottesville, Va. a dairyman said, "You have solved my problem. I thought sweet clover would not grow on my farm, but after following your directions my sweet clover field is doing fine."

While our farmers are slow to conceive the idea of spending money on old pastures we have a few demonstrations with the use of lime applied in the fall or winter and acid phosphate in the spring that proves that the money thus spent is an investment, as the growing capacity has been greatly increased.

Another demonstration that has worked out very profitably when the season is favorable, that is, the use of a mixture consisting of 200 lbs. acid phosphate and 100 lbs. nitrate of soda, and apply to meadows at the rate of 200 lbs. per acre, in the spring season.

The yield and quality of the hay is not only very noticeable but the improvement of the sod that will be turned in the regular rotation and the increase of the microbe life in the soil will be more beneficial to crops which follow.

Dairying-

A few years ago the dairy business consisted of a few milk peddlers and one creamery or butter factory. We have now three creameries, one milk distributing plant, and all three creameries making ice cream. Last year there was manufactured about 750,000 lbs. of butter, 450 gallons of milk distributed daily and a large portion of the cream taken in was made up into ice cream. By the influence of the Cow Testing Association the dairymen are not figuring on the number of cows kept but the pounds of milk and pounds of butterfat produced per cow. Consequently better cows are kept and a more careful selection of sires being manifested. A goodly number of registered cows are being bought and raised and each breed has record making cows in the county. Therefore, the dairy industry is making good progress. Realizing that the standard of quality of the dairy products are too low the County Agent is beginning a campaign for a higher standard of products which will mean a higher quality of furnished products and better price to the producer.

4

Adult Poultry-

There has been more development in the poultry interest during this year than any two preceding years. The County Agent has been swamped with calls for culling house improvement, proper feeds etc. A campaign for better breeding stock and marketing will begin on December 12th, at which time there are plans being made to have a great poultry day. All poultry raisers of the county will be invited to participate and out of that gathering we hope to perfect an organization. The growing industry has passed the individual stage and the need of an organization is quite evident which will help bring into cation the present need of a commercial hatchery selected breeding flocks and a marketing system.

Livestock-

The extended drought during this year has caused a big decrease of the livestock on the farms, but we feel that when the farms are restocked it will be done with a better class of stock than that which has been sacrificed. Several times have we heard it said by farmers this fall, "Good stuff is bringing fair prices but I can't sell mine because they are not the right kind."

During a visit to one of our farmers, he complained because he could not sell anything. I asked what he had to sell, "My cattle, I can't sell my cattle." I said just see the cattle. We got up to the cattle, I said that he really did not have any cattle that were suitable for any market, breeders, butchers or for dairy purposes. I began to think how I could make him see his position and at the same time make him realize the necessity of raising the proper type of cattle either for beef or dairying. I said to him, "I want you to change your position as the owner of these

cattle and think in terms of a buyer. If you are a farmer put a value on those cattle that will allow you to take them home, feed your labor to them, for that is what it means when you feed the feed produced by you, and make a profit on them." He had to admit that he could not afford to buy himself the cattle that he was fussing with the other fellow for not buying. Then he said I can't sell any cows. I used to sell some cows to dairymen. "All right, I said, "You are a dairyman now, make me an offer on those cows to take to your dairy barn, feed high cost labor and feed to them and sell the products at a profit. He balked again. "Now, I said, Don't you see that you are spending your time and money producing something that the market does not want, In other words you are not doing your business with the proper thought and management. That incident happened in a community that a near neighbor was keeping a dairy bull and for convenience the party had a beef breed crossed with a dairy breed and expected beef and dairy results.

Getting communities to adopt one breed has greatly improved the cattle. Instead of seeing mixed bunches, the uniformity of the cattle is very noticeable. Consequently breeders are sold at a good price. The Peoples National Bank of Charlottesville has put out several registered bulls through the help of the County Agent, and that also has been a great help to improve the type of cattle in the County.

There has been fifteen registered rams and several ewes brought into the County and several flocks graded by the County Agent. Breating for stomach worm and better care generally is being done, and we hope to see a big improvement in the sheep industry. 6

Enough castrating and docking has been done to show its value and several calls have already come in for the work in due season. One of the largest dealers promised us to put a premium on docked and castrated lambs another season.

Trucking-

The campaign for the "year round" home garden met with good results. We got out a circular letter setting forth the necessity of a year round garden and gave a list of seed and time of planting. Next year we expect to feature a greater variety of small fruit for home consumption. Mr. E. B. Bowden, Red Hill, Va. said, "your assistance is helping me to specialize in crops and installing an irrigation system has made me several thousand dollars this year.

Miscellaneous-roads-

For some reason farm organizations have waned away the last year, but some of the "old faithful" have said recently that we will have to revive our organizations for we miss the meetings and the helpfulness of the organization.

The next move will be to federalize civic and community organizations. We feel that the organization work is too scattering and with a more nearly united effort better results may be obtained.

With the assistance of Mr. Cole of V. P. I. we found that Mr. C. E. Carter, Red Hill, Va. had a splendid spring twelve hundred feet from his dwelling that would put water five feet above the house. For about \$200.00 he has put in a gravity water system. He said a few days ago, "Just think, I've been carrying water for fifty years and could have saved all of that work for that small sum of money."

Charlottesville, Va.
November 30, 1925.

Mr. W. F. Moore, Assistant Director,
Blacksburg, Va.

Dear Mr. Moore:

As Assistant County Agent supplementing the annual report of Mr. Teel, our County Agent, I give an additional detail account of the work done with the fruit growers of our county for the last year.

After the harvesting of the 1924 crop our first effort with the growers was to assist in marketing their fruit throughout the winter, which by the way, was done to the general satisfaction of the growers, prices for their #1 or high grade fruit being very good. This we did by first getting list of growers who had apples for sale both in orchard and in storage, directing buyers to them, as they visited us, also to storage to look over fruit stored. In this the growers had a better line on prices so as to judge whether to store or sell at their stations.

I spent much time during the winter months with growers in pruning. Visiting something over sixty individual orchards, calling small neighborhood meetings for pruning demonstrations. Had representatives from Blacksburg with us for three days holding nine demonstrations, attendance five to fifteen at each demonstration. Growers in both home and commercial orchards are now looking to us either for information on pruning or actual demonstrations.

The spray information was carried through this office with the assistance of the Department at Blacksburg. This information was not only furnished through the mail but by personal visits to growers giving information on mixtures and times for spraying.

Special attention was given orchards as to cultivation, seeding and fertilizing through our Piedmont Virginia Fruit Growers Association we have been of financial value to the growers in helping them buy fertilizer

Mr. W. P. Moore:

to the extent of 255 tons of Acid Phosphate
86 tons of Sulphate of Ammonia
90 tons of Nitrate of Soda
12 tons of Muriate of Potash
and several tons of commercial fertilizers, also Grass
Seeds through the Virginia Seed Service, as well as
several hundred bushels of Soy Beans and Cow Peas as
cover crops. Also through the Piedmont Virginia Assoc-
iation we bought 120 barrels of Blue Stone
over 35000 pounds of Arsenate of Lead
100 barrels of Oil Emulsion
60 barrels of Oil for making Emulsion,
over one car wrapping paper and shroded paper for pack-
ing apples. Upwards of 200,000 corrugated caps and
500,000 barrel liners and three cars of apple box sheeks
from California. The distribution of the above materials
falling on me, this a saving of several thousands of
dollars to our growers.

Aside from the above the Piedmont Virginia Fruit
Growers Association have secured a Trademarked name on
apples to be used by all growers who will agree to have
their fruit State and Federal Inspected without cost to
the growers except their agreement to inspect.

The State and Federal inspection has again taken
much of my time, this work beginning in July and is not
yet completed. We secured with the help of the Division
of Markets and the Extension Service, contracts for in-
spection of 50,000 barrels of apples, estimated crops,
but unfortunate weather conditions reduced the actual
inspection to 30,000 barrels, which we feel was good under
the conditions.

Buyers are now quite in favor of inspection and in
some instances insist on it. As an example: One buyer
from Fort Wayne, Ind., seeing our advertisement of inspect-
ed fruit, corresponded with one of our growers and bought
his crop of Winesaps Apples, 1500 barrels, and was so
pleased with his buy, came here and bought two other
crops, total of something like 6,000 barrels.

I have been called on to act as Secretary for all
Inspection Rings in the county, hence it has been necessary
for me to look after the financing of the Inspection and

Mr. W. P. Moore:

have been ably supported by the Piedmont Virginia Fruit Growers Association.

We had a splendid fruit exhibit at our very successful County Fair, which caused some very favorable comments by visiting guests.

Also through the help of our County Supervisors and the Piedmont Virginia Fruit Growers Association, we had a splendid line of fruit at the State Fair last fall to the extent that we brought to the Piedmont District over 50% of the premiums awarded. I was told by Mr. Saunders, the State Fair Manager, they gave the Piedmont District the credit for the large Horticultural Exhibits they now have through our four years exhibits there.

Recently I have made two visits to Washington to appear before the Inter State Commerce Commission to help defeat a proposed raise of freight on apples from our state to northern points which would be a burden on our growers if allowed. This I was assisted in by our State Horticultural Society and our State Commerce Commission. Have not learned of the decision of the Inter State Commerce Commission on that proposed tariff, they having until sometime in January 1926 to make their report.

Yours very truly,

F. E. Merrifield
F. E. Merrifield,
Asst. County Agent.

COOPERATIVE EXTENSION WORK IN AGRICULTURE AND HOME ECONOMICS

U. S. Department of Agriculture
and State Agricultural Colleges
Cooperating

Extension Service,
Office of Cooperative Extension Work,
Washington, D. C.

ANNUAL REPORT OF COUNTY EXTENSION WORKERS

This report form is to be used by county extension agents, such as county agricultural agent, home demonstration agent, club agent, and negro agent, reporting on their respective lines of work.

State Virginia County Albemarle
 Report of H. H. Hill County Co. Agent Agent.
(Name) (Title)
 From Dec 1924 to Dec 7 1925.

If agent has not been employed entire year, indicate exact period. Agents resigning during the year should make out this report before quitting the service.

	DATE

State or District Supervisor.

State Extension Director.

SUGGESTIONS RELATIVE TO THE PREPARATION OF THE COUNTY EXTENSION AGENT'S ANNUAL REPORT.

The annual report should be a review, analysis, interpretation, and presentation to the people of the county, the State, and the Nation of the sum total of the extension activities in each county for the year and the results obtained by the county extension agent assisted by the subject-matter specialists. The making of such a report is of great value to the county extension agent and the people of the county in showing the progress made during the year as a basis for future plans. It is of vital concern also to the State and Nation as a measure of rural progress and a basis for intelligent legislation and financial support.

Separate statistical and narrative reports are desired from each county extension agent in charge of a line of work, such as county agent, home demonstration agent, boys' and girls' club agent, and negro agent. Where an assistant agent has been employed a part or all of the year, a report on his or her work should be included with the report of the leader in charge of that line of work. Where an agent in charge of a line of work has quit the service during the year, the information contained in his or her report should be incorporated in the annual report of the agent on duty at the close of the report year, and the latter report so marked. Where two or more extension agents are employed in a county, each in charge of a line of work, care should be exercised to avoid including the same data in the statistical report of more than one agent.

At least four copies of the annual report should be made: One copy for the county officials, one copy for the agent's files, one copy for the State extension office, and one copy for the Extension Service, United States Department of Agriculture. The report to the Washington office should be sent through the State extension office.

NARRATIVE SUMMARY.

The narrative report should be a statement in orderly fashion and arranged under appropriate subheadings, of the work done, methods used, and results obtained under each project, as well as of the general work accomplished. Every statement should be clear-cut, concise, forceful, and, where possible, reinforced with ample data from the statistical summary. In the preparation of the part of the report relative to each project, the results reported in the statistical summary for the project should be analyzed, conclusions drawn, and recommendations made. The report may well be illustrated with photographs, maps, diagrams, blue prints, or copies of charts and other forms used in demonstration work. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs, and reasonably good margins left. The pages should be numbered in consecutive order.

The following outline is suggestive of how the narrative report may be clearly and systematically presented:

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT.

- I. Cover and title page.
- II. Table of contents.
- III. Status of county extension organization.
 - (1) Form of organization—changes and development.
 - (2) Function of local people, committees, or project leaders in developing the program of work.
 - (3) General policies, including relationships to other organizations.
- IV. Program of work, goals established, methods employed, and results achieved.
 - (1) Factors considered and methods used in determining program of work.
 - (2) Project activities and results.

(a) Soils	}	(including diseases and insects).
(b) Farm crops		
(c) Horticulture		
(d) Home gardens		
(e) Beautification of home grounds		
(f) Forestry		
(g) Rodents, predatory animals, and birds.		
(h) Animal husbandry	}	(including diseases and insects).
(i) Dairy husbandry		
(j) Home dairy		
(k) Poultry husbandry		
(l) Home poultry		

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT—Continued.

IV. Program of work, etc.—Continued.

(2) Project activities and results—Continued.

- (a) Rural engineering.
- (b) Rural engineering—home.
- (c) Agricultural economics, including farm management and marketing.
- (d) Home marketing.
- (e) Foods.
- (f) Nutrition.
- (g) Clothing.
- (h) Home management.
- (i) Home furnishings.
- (j) Home health and sanitation.
- (k) Community activities.
- (l) Miscellaneous.

V. Outlook and recommendations, including suggestive program of work for next year.

VI. Summary of activities and accomplishments, preferably of one or two typewritten pages only, placed at the beginning or end of the narrative report.

STATISTICAL SUMMARY.

To supplement the narrative part of the report, and in order that comparable State and National summaries may be made, it is necessary to include a statistical summary of the work in each county. The following form has been prepared to insure uniformity of reporting. In addition to the questions asked under each subdivision of the report, space is provided to add further data if desired. The statistical summary will grow naturally out of the field and office records.

DEFINITIONS OF TERMS USED IN THIS REPORT.

1. A PROGRAM OF WORK is a definitely outlined plan for extension work.
2. A PROJECT is a definite, systematic, organized plan for carrying out some phase of the extension program of work, providing for what is to be done, how much, when, where, how, and by whom.
3. MISCELLANEOUS WORK includes work which has not yet become a regular part of the program of work—work other than project work.
4. A COMMUNITY, for the purposes of this report, may be any one of the several units into which the county is divided for purposes of conducting organized extension work.
5. A PROJECT LEADER OR LOCAL LEADER is a person, selected because of his or her special interest and fitness, who functions as a leader in advancing some phase of the local program of extension work.
6. A DEMONSTRATION is an example designed to show the practical application of an established fact. Demonstrations as contemplated in this report are of two kinds, method demonstrations and result demonstrations.
 - A method demonstration is a demonstration given by an extension worker or other trained leader to a group for the purpose of showing them how to carry out a practice. Synonym: Lecture demonstration. Examples: Demonstrations of canning, mixing of spray materials, and culling of poultry.
 - A result demonstration is a demonstration carried on by a farmer, farm woman, boy, or girl under the direction of the extension service, involving a substantial period of time, records of results, and comparisons. Examples: Child-feeding, corn-culture, and orchard-management demonstrations.
7. A DEMONSTRATOR is a farmer, farm woman, boy, or girl who, under the direction of the extension service, conducts a result demonstration.
8. MEMBERS COMPLETING should include those who have satisfactorily finished the work outlined for the current year.
9. A DEMONSTRATION MEETING is a meeting held to give a method demonstration or to start, inspect, or further a result demonstration.
10. A TRAINING MEETING is a meeting at which project leaders or local leaders are trained to carry on extension activities in their respective communities.
11. AN OFFICE CALL OR TELEPHONE CALL is a visit or call by a farmer or other person seeking agricultural or home economics information, as a result of which some definite assistance or information is given.
12. A FARM VISIT is a call at a farm by the agent at which some definite information is given or concrete plan of work outlined, or some valuable information obtained from the farmer regarding his work, or the better practice prevailing in his neighborhood.
13. A HOME VISIT is a call at a home by the agent at which some definite information is given or concrete plan of work outlined, or some valuable information obtained from the farm woman regarding her work, or the better practice prevailing in her neighborhood.
14. DAYS IN OFFICE should include time spent by the county agent in his office, at county agent conferences, and any other work directly related to office administration.
15. DAYS IN FIELD should include all days spent on official duty other than those spent in office.
16. LETTERS WRITTEN should include all single letters on official business.

4

DEFINITIONS OF TERMS USED IN THIS REPORT—Continued.

17. A **FARMERS' INSTITUTE** is one of a series of meetings of one to two days' duration, arranged by a central State farmers' institute agency, at which agricultural and home-economics problems are discussed, usually by outside speakers employed for the purpose.
18. AN **EXTENSION OR MOVABLE SCHOOL** is an itinerant school usually of two to six days' duration where practical but systematic instruction is given to persons not resident at the college. AN **EXTENSION SHORT COURSE** differs from an extension school in that it is usually held at the college or other educational institution and usually for a longer period of time, but not exceeding two weeks.
19. **RECORDS** consist of definite information filed in the county office that will enable the agent to verify the data on extension work included in this report.
20. **FARM OR HOME PRACTICE ADOPTED** is a new or improved practice adopted on a farm or in a home during the year as a result of extension teaching. Examples: Spraying of potatoes for disease, canning of fruits and vegetables, use of balanced rations, and hat making.

GENERAL ACTIVITIES.

Report only this year's extension activities and results that are supported by records.

If an assistant agent has been employed during the year, include his or her work with that of the agent.

1. List below the names, titles, and periods of service of the county extension agents whose work is included in this report.

<i>J. H. Keel</i>	<i>Co. agt.</i>	<i>12</i>
(Name)	(Title)	(Months of service this year)
<i>J. E. M. ...</i>	<i>Asst. Co. agt.</i>	<i>12</i>
2. Number of communities in county where extension work should be conducted 12 2
3. Number of above communities in which the extension program has been cooperatively worked out by extension agents and people concerned 5 3
4. Number of voluntary county, community, or local leaders actively engaged in forwarding the extension program with— 4
 - (a) Juniors 12
 - (b) Adults 4
5. Number of clubs carrying on extension work: 5
 - (a) Junior 7
 - (b) Adult
6. Membership in above clubs:

(a) Boys 47	(c) Men
(b) Girls 26	(d) Women
7. Number of club members completing: 7

(a) Boys 24	(c) Men
(b) Girls 12	(d) Women
8. Number of members in junior club work for four or more years: 8
 - (a) Boys
 - (b) Girls

GENERAL ACTIVITIES—Continued.

9. Number of junior judging or demonstration teams trained	_____	9
10. Number entering college this year who have been club members	_____	10
11. Total number of farm visits ¹ made in conducting extension work	552	11
12. Number of different farms visited	1711	12
13. Total number of home ¹ visits made in conducting extension work	277	13
14. Number of different homes visited	211	14
15. Number of calls ¹ relating to extension work	(a) Office 1799	15
	(b) Telephone 1940	
16. Number of days agent spent in office	124	16
17. Number of days agent spent in field	452	17
18. Number of individual letters written	1788	18

FARM-DEMONSTRATION WORK.

SOILS.

Report only this year's extension activities and results that are supported by records.

45. Number of method demonstrations given. (See definition 6, page 3.)	92	45
46. Number of result demonstrations started or under way. (See definition 6, page 3.)	2510	46
47. Number of result demonstrations completed or carried through the year.	1784	47
48. Number of acres involved in these completed demonstrations.	8668	48
49. Number of farms adopting improved practices in the use of commercial fertilizer this year	84	49
50. Tons involved in preceding question.	170	50
51. Number of farms taking better care of farm manures this year.	24	51
52. Number of farms using lime or limestone for the first time.	40	52
53. Tons of lime or limestone so used.	200	53
54. Number of farms plowing under cover or other green manure crops for the first time.	10	54
55. Acres of cover and green manure crops so plowed under.	150	55
56. Total number of different farms adopting improved practices, relative to the soils work reported on this page. (Include questions 47, 49, 51, 52, and 54 less duplications.)	1914	56

[Use space below to include other important data relating to soils.]

Testing soil for acidity has been a help to induce farmers to use lime on several occasions. It has been taken to fields that had an application of lime on a portion without my knowledge. The test usually affords an indication where the lime had and had not been applied. The demonstration usually encourages the farmer to use more lime, but the best demonstration is the noticeable results obtained by the use of lime on legume crops, especially alfalfa, sorghum and red clover.

CEREALS¹

Report only this year's extension activities and results that are supported by records.

340. Number of homes spraying or otherwise treating garden crops for diseases and insect pests for the first time.....		340
341. Number of individuals growing winter gardens for the first time.....	(a) Women.....	} 341
	(b) Girls.....	
	(c) Boys.....	
342. Total number of different homes adopting improved practices relative to the home-garden work reported on this page.....		342

[Use space below to include other important data relating to home gardens.]

¹ Homes which do not organize clubs or groups on a project basis should not report on this question but should report on enrollment and completion.

HOME POULTRY.

Report only this year's extension activities and results that are supported by records.

Do not list information which has been previously reported on pages 14 and 15.

343. Number of project clubs or groups	(a) Women	} 343
	(b) Juniors	
344. Number of members enrolled in home poultry	(a) Women	} 344
	(b) Girls	
	(c) Boys	
345. Number of members completing	(a) Women	} 345
	(b) Girls	
	(c) Boys	
346. Number of method demonstrations given		346
347. Number of result demonstrations started or under way	(a) Women	} 347
	(b) Girls	
	(c) Boys	
348. Number of result demonstrations completed or carried through the year	(a) Women	} 348
	(b) Girls	
	(c) Boys	
349. Number of birds in result demonstrations raised or managed by	(a) Women	} 349
	(b) Girls	
	(c) Boys	
350. Total profit on result demonstrations conducted by	(a) Women	} 350
	(b) Girls	
	(c) Boys	
351. Number of individuals culling flocks for the first time	(a) Women	} 351
	(b) Girls	
	(c) Boys	
352. Number of homes culling flocks for the first time		352
353. Number of birds in these flocks		353
354. Number of birds discarded		354
355. Number of homes feeding better-balanced poultry rations for the first time		355
356. Number of individuals assisted in obtaining standard-bred eggs for hatching this year	(a) Women	} 356
	(b) Girls	
	(c) Boys	
357. Number of homes assisted in obtaining standard-bred cockerels this year		357
358. Number of individuals adopting improved practices in early hatching and chick rearing this year	(a) Women	} 358
	(b) Girls	
	(c) Boys	
359. Number of homes directly assisted in increasing the family income this year through poultry		359
360. Number of homes controlling poultry insects for the first time		360
361. Total number of different homes adopting improved practices relative to the home-poultry work reported on this page		361

[Use space below to include other important data relating to home poultry.]

* States which do not organize clubs or groups on a project basis should not report on this question but should report on enrollment and completion.

HOME DAIRY.

Report only this year's extension activities and results that are supported by records.
Do not list information which has been previously reported on pages 14 and 15.

362. Number of project clubs or groups ¹	(a) Women	} 362
	(b) Juniors	
363. Number of members enrolled in home-dairy work	(a) Women	} 363
	(b) Girls	
	(c) Boys	
364. Number of members completing	(a) Women	} 364
	(b) Girls	
	(c) Boys	
365. Number of method demonstrations given		365
366. Number of result demonstrations started or under way	(a) Women	} 366
	(b) Girls	
	(c) Boys

	(b) Girls	
	(c) Boys	
368. Number of cows or calves in result demonstrations raised or managed by	(a) Women	} 368
	(b) Girls	
	(c) Boys	
369. Number of homes feeding better dairy rations for the first time		369
370. Number of homes adopting better practices in the sanitary production and care of milk this year		370
371. Number of homes adopting better practices in butter or cheese making this year		371
372. Number of pounds of butter made		372
373. Number of pounds of cheese made		373
374. Total number of different homes adopting improved practices relative to the home-dairy work reported on this page		374

[Use space below to list other important data relative to home dairying.]

¹ States which do not organize clubs or groups on a project basis should not report on this question but should report on enrollment and completion.

HOME MARKETING.

Report only this year's extension activities and results that are supported by records.

Do not list information which has been previously reported on pages 17 and 18.

375. Number of method demonstrations given..... 375

376. List below the cooperative-marketing associations organized during this year upon suggestion and counsel of 376
the Extension Service.

(a) Name of association or group.	(b) Number of members.	Products sold.		Supplies purchased.	
		(c) Value.	(d) Profit.	(e) Value.	(f) Savings.
Curb or bazaar markets.....		\$.....	\$.....	\$.....	\$.....
Egg circles.....					
TOTAL.....					

377. List below this year's results in connection with the cooperative-marketing associations in the county previously 377
organized and with which the Extension Service counseled or advised.

(a) Name of association or group.	(b) Number of members.	Products sold.		Supplies purchased.	
		(c) Value.	(d) Profit.	(e) Value.	(f) Savings.
Curb or bazaar markets.....		\$.....	\$.....	\$.....	\$.....
Egg circles.....					
TOTAL.....					

378. Number of homes standardizing and grading products for markets: 378

(a) Poultry and poultry products..... (d) Fruits and vegetables.....

(b) Canned goods..... (e).....

(c) Dairy products..... (f).....

378½. Total number of different homes adopting improved marketing practices (include entries for 378½
questions 376 (b) and 377 (b) less duplications plus other homes not in cooperative associations).....

[Use space below to list the principal products handled in cooperative marketing associations reported above.]

COMMUNITY ACTIVITIES AND MISCELLANEOUS—HOME.

Report only this year's extension activities and results that are supported by records.

Do not list information which has been previously reported on page 18.

Use this page to include work on any other home-economics project not included in the preceding pages, such as recreation, basket making, and similar work, i. e., any other information that can be reported statistically and that will help to give a complete account of the year's work.
