NARRATIVE REPORT FOR CAMPBELL CO.

Your agent began work on August 7, 1922, too late to secure demonstrations for most farm crops. Hence much time has been spent in getting acquainted with the farmers of the county and learning their problems.

I find that many influential farmers and business men of the county are whole heartedly in favor of Extension work. Their attitude is a most agreeable change from what I found to exist in Forsyth county, N.C., four years ago. Almost to a man they praise the former Agent, Mr. McDonald, who left the work two years ago. The county has had no agent for this time. Their goodwill is now given to me in so many words and they appear willing to cooperate in all forward projects.

Good proof of this spirit was secured in the beginning of a campaign for the central European Foul Breed of honey bees. I had hardly gotten into harness before it was found that the bees of one section of the county were all dying. With the cooperation of two of our largest beekeepers a hasty survey was made to locate diseased yards so that treatment could be given before cold weather. Twenty-five yards were inspected and disease found in all but five. The owners in all cases were shown the diseased brood, being told how to treat it. Badly diseased colonies were destroyed by burning while those mildly infected were requeened with Italians, the owners of the bees had known that something unusual was causing them to die but were not aware of its real identity. So they were partially prepared to cooperate in the campaign, readily agreeing to use of control measures.

The Tobacco Growers Association was largely responsible last Spring for the new appropriation by the county for Extension Work. Their organization covers the entire county with 23 locals, thus making it a logical one thru which to reach the largest number of farmers. As they were in the midst of an intensive campaign for membership I addressed as many of their meetings as possible. I now appear regularly before their county meetings to present Extension projects. Those of local nature are carried to its appropriate local. The Tobacco Growers Cooperative Association has a clear field for organization as the Farmers Union has expired and there is no Farm Bureau.

Tick eradication was assumed by your agent, that being a provision imposed when Extension Work was agreed upon. Five beef cattle farms had been quarantined for a year near Altavista. The work had been pushed poorly, with the state Veterinarian threatening to place the whole county under quarantine. The farmers were allowed to spray rather than dip. Three of these farmers were trying to spray with an atomizer, cattle very nervous and unconfined. The work was

COLLEGE AND POLYTECHNIC INSTITUTE  
AND UNITED STATES DEPARTMENT OF  
AGRICULTURE, WASHINGTON

very tedious and almost impossible of being there. Ticks were present. I secured a good force pump for them, which immediately changed their attitude from one of disgust to one of a task not disliked. Likewise the ticks disappeared from their herds. The quarantine has now been raised on these five farms but retained another one found to be infested.

The placing of lime houses in several sections of the county is another important project outlined for your agent for the coming year. I find that many farmers recognize the value of lime wishing to use more than they do. Those situated near stations buy it by the car lot, those with smaller farms farther from the railroad are clamoring for houses to satisfy their needs. A movement was started several years ago to place houses at two stations but it fell thru. The farmers at Concord Depot have been operating successfully a distributing lime house for two years. I hope to place them over the county as the farmers are ready to use them.

The Boys Clubs have been given consideration during the Fall. As there has been no agent here for two years the Club movement has lost touch with the boys and will have to be rebuilt from the bottom. The Clubs will be worked largely thru the schools while they are in session. Club projects during SUMMER 1923 will be limited to four; Corn, Pig, Second Tobacco. The Bee Club has been in operation for two years under the able management of the Home Demonstration agent, who has turned it over to me. Tobacco was included to reach those boys living in sections where tobacco is the main money crop. The Pig Club project will be confined to that of a Sow and Litter, with one breed if possible.

Campbell farmers are generally in poor financial shape. Various factors are responsible among which are, large farms, many being purchased at war time prices, very low prices for tobacco, corn, wheat and beef cattle for two years. Few farmers have productive farms. They generally have a definite rotation. I shall hinge all crop improvement around certified seed work. The livestock of the county, exclusive of hogs, are very poor. The Beef and dairy breeds are about evenly mixed with no definite use of the bulls of any breed, hence pure scrubs abound. An attempt to remedy this state of affairs will be made by placing Bull associations as fast as the farmers can be educated to the idea.

The field for farm improvement in Campbell county via Extension Work offers great opportunity for an agent, with enough opposition to keep up his morale.

Director of Extension Work

97-285

COUNTY ORGANIZATION

1. Is there a central county committee supporting your work? Yes.
2. If so, what is it called? Advisory Committee.
3. Who constitute its membership? One man from each District.
4. How is membership selected or appointed? Appointed by Supervisors.
5. Does this committee help you make a county plan of work? Yes.

How long has this county organization been in existence? 1922

6. Number of communities in your county Aug. 1, 1922
7. How many community farmers' clubs have you assisted in organizing this year?                       
Total membership
8. How many community farmers' clubs have you in your county?                       
Total membership 26  
1900
9. How many community farmers' clubs have ceased to exist during the year?                       
(Give reason)
10. How many of these Belonged to the Tobacco Growers Association.  
wife, children, and others, in their membership? 2

The Tobacco Growers Ass. include women only when they are growers of tobacco.

Space for agent's stamp

COUNTY ORGANIZATIONS (Continued)

11. How have these clubs been helpful to the farmer and his family? (Use extra pages if necessary)

The financial effect of the Tobacco Growers Assn. is just being felt as the second payment on delivery of tobacco is being made.

This benefit is a result of the Tobacco Growers Assn. which has been in process of organization for more than 18 months. It has united and welded over 75% of the tobacco farmers of the county into a cohesive working group. It has developed a loyalty among its members that amounts to a religious fervor.

12. Are these community farmers' clubs dependent on the county agent for their existence and the continuation of their efforts? No.

13. Does each club have a community plan or program of work? No

(Attach a copy of such plans for the past year)

The Tobacco Growers Assn. had a plan of work with mainly two objects in view:

1. To secure the largest possible membership.

2.

To keep all members loyal to their Selling contract,

The two Lime users Associations had only one program; the purchase of lime cooperatively.

**COOPERATIVE BUYING  
AND SELLING ORGANIZATIONS**

Space for agent's stamp

B. Anderson,  
Hustburg, Va.

1. How many of your farmers' organizations buy and sell cooperatively? 22
2. State the quantity and value of each farm necessity or product bought or sold cooperatively by these organizations and the approximate saving to the farmer. Make a separate list of purchases and likewise one for sales, and indicate which are purchases and which sales. Report all livestock in carload lots, keeping the different kinds of livestock separate, for example, cars cattle; cars hogs, etc. Report all grains and potatoes in bushels and carloads, making a separate report on each kind of grain, i.e., 10 carloads, or 8000 bushels of corn. Report all seed in bushels, all fertilizer and lime in tons, and wool in pounds. In the column headed "value", report the amount at which the commodity was actually sold, or for which it was bought. If more commodities have been bought or sold than can be listed on this form, use an additional sheet. A full report on this subject is urged.

Article	Quantity		Value	Savings
	Cars	Bu., lbs. or tons		
*Bought			\$	\$
Lime	10	400	1440.00	150.00
*Sold				
Various	Unable to make a statement.			

3. Have you attempted to keep a bulletin board in your office, listing things for sale and things wanted?
- No.
4. Have you used the market news service of the U. S. Department of Agriculture or your State market news service?

Yes.
