COUNTY AGENT WORK

NARRATIVE REPORT FOR THE YEAR 1925.

K. H. Ellis
County Agent

OFFICE

Chamber of Commerce
Petersburg, Virginia

SUBJECTS TREATED

Sweet Potatoes
Swine Sanitation

SUBJECT

SWEET POTATO PRODUCTION

A few years ago I was instrumental in organizing a sweet potato curing house in the county for the marketing of the potatoes to be grown under contract by the farmers.

The plan was to have a company who would build and operate a storage house of sufficient size to take care of the needs of the county and to contract with the growers at a fixed price per bushel crate for the potatoes as they were dug and delivered to the house.

This being done we set out to buy seed stock that was free from diseases and to find some way in which the seed could be improved from year to year.

To put across this last proposition, we called in for advice from the Gardening Specialist from the Extension Division at V. P. I. and with him we proposed a proposition along the following lines.

The Curing Company would buy ten bushels of the best seed produced from stock to be recommended by V. P. I. and these seed would be put into the hands of a grower selected because of his honest effort, careful and painstaking methods in the production of good seed stock. A farmer with soil especially adapted to Potatoes was selected, and this man was asked to produce these seed stock under the inspection system, and at a special price. All of his seed stock is selected each year from special hills, for his next year's seed. Then the seed planted and produced from this selection is used in planting his acreage. From this acreage we get sufficient seed stock to exchange crate for crate, one or two crates with each grower. He in turn after treating them properly, beds them in one end of his bed, and from the slips produced he sets out a few rows across his plot for his seed the following year. Under this method the seed is improving each year, and we have only one man to depend on to do the work properly.

This being the second year, I have had an opportunity to study the results, and during the digging operations, I visited the house, the farms, etc. to see what the results were in the increasing production and

in increasing the quality of the potatoes. I sent a number of my Demonstrators and we dug several rows side by side, and from the special seed in every case we got from a five to ten percent increase in yield. The farmers are gratified at the results and would not go back to the old methods for anything.

In addition to this work done in the county this past season, I expanded the territory of the house by getting the Manager to buy potatoes under contract over at Stony Creek.

At this point, the seed stock necessary was furnished to the farmers on an exchanging basis, thereby requiring no cash to start the project.

So well were they pleased with the results that they harvested their seed stock for 1926 and will increase their acreage.

SUBJECT

SWINE SANITATION.

When the subject of an appropriation came up in November 1924, before the Board of Supervisors of the County, there was voiced considerable opposition on the grounds that the work really was not getting results with anything except the use of Anti-Hog Cholera Serum.

However, after considerable argument and considerable work, the appropriation was made with the provision that a man qualified to do this work would be appointed. This was done, and after looking over the field, I found that what was needed was considerable educational work along swine sanitation lines, in order that the other losses which were very heavy might be eliminated as far as possible.

I decided to get out a circular letter each month, and in addition to timely information along general farming lines, I would each month add at least one paragraph on some phase of the sanitary measures necessary on the farms if we were to succeed as a hog producing county.

The advice of the Swine Specialist from the Extension Division was asked for, and his cooperation secured. We mapped out the necessary things that should be done around the farrowing lots, and in the farrowing pens, and a circular letter was put out. This has been followed up from time to time by a few minutes discussion in meetings, and always on every farm visited, this work is suggested and plans for changing and making these pens modern are also suggested.

I feel like we have gotten splendid results from this educational work, for out of one hundred and eighty nine calls from the farmers of the county, not a single case of Cholera has been found. In answering these calls, I have had an opportunity to observe the conditions around the farms, and in nearly every case I have found the trouble due to early infestation by the round worms. This has given me an opportunity to advise the farmers as to how they can prevent them, and I feel sure that we have gotten good results from this work.

The results secured are much better expressed through the Supervisors themselves for the Chairman, when I told them that there had not been a case of Cholera in the County, remarked, "That sounds good, it shows that your educational work is getting results." "That is just what we want to hear." The appropriation was made this year along different lines from last year, and I feel that we have won a victory in that county.

ANNUAL REPORT OF COUNTY EXTENSION WORKERS

This report form is to be used by county extension agents, such as county agricultural agent, home demonstration agent, club agent, and negro agent, reporting on their respective lines of work.

State Virginia County Smith
Report of D. W. Ellis County Agricultural Agent
(Name) (Title)
From Dec 1, 1924 to Dec 1, 1925, 1925.

If agent has not been employed entire year, indicate exact period. Agents resigning during the year should make out this report before quitting the service.

State or District Supervisor.

State Extension Director.

SUGGESTIONS RELATIVE TO THE PREPARATION OF THE COUNTY EXTENSION AGENT'S ANNUAL REPORT.

The annual report should be a review, analysis, interpretation, and presentation to the people of the county, the State, and the Nation of the sum total of the extension activities in each county for the year and the results obtained by the county extension agent assisted by the subject-matter specialists. The making of such a report is of great value to the county extension agent and the people of the county in showing the progress made during the year as a basis for future plans. It is of vital concern also to the State and Nation as a measure of rural progress and a basis for intelligent legislation and financial support.

Separate statistical and narrative reports are desired from each county extension agent in charge of a line of work, such as county agent, home demonstration agent, boys' and girls' club agent, and negro agent. Where an assistant agent has been employed a part or all of the year, a report on his or her work should be included with the report of the leader in charge of that line of work. Where an agent in charge of a line of work has quit the service during the year, the information contained in his or her report should be incorporated in the annual report of the agent on duty at the close of the report year, and the latter report so marked. Where two or more extension agents are employed in a county, each in charge of a line of work, care should be exercised to avoid including the same data in the statistical report of more than one agent.

At least four copies of the annual report should be made: One copy for the county officials, one copy for the agent's files, one copy for the State extension office, and one copy for the Extension Service, United States Department of Agriculture. The report to the Washington office should be sent through the State extension office.

NARRATIVE SUMMARY.

The narrative report should be a statement in orderly fashion and arranged under appropriate subheadings, of the work done, methods used, and results obtained under each project, as well as of the general work accomplished. Every statement should be clear-cut, concise, forceful, and, where possible, reinforced with ample data from the statistical summary. In the preparation of the part of the report relative to each project, the results reported in the statistical summary for the project should be analyzed, conclusions drawn, and recommendations made. The report may well be illustrated with photographs, maps, diagrams, blue prints, or copies of charts and other forms used in demonstration work. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs, and reasonably good margins left. The pages should be numbered in consecutive order.

The following outline is suggestive of how the narrative report may be clearly and systematically presented:

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT.

- I. Cover and title page.
- II. Table of contents.
- III. Status of county extension organization.
 - (1) Form of organization—changes and development.
 - (2) Function of local people, committees, or project leaders in developing the program of work.
 - (3) General policies, including relationships to other organizations.
- IV. Program of work, goals established, methods employed, and results achieved.
 - (1) Factors considered and methods used in determining program of work.
 - (2) Project activities and results.

<ol style="list-style-type: none"> (a) Soils (b) Farm crops (c) Home gardens (d) Forestry (e) Rodents, predatory animals, and birds. (f) Animal husbandry (g) Dairy husbandry (h) Poultry husbandry (i) Home poultry 	} (including diseases and insects).
---	-------------------------------------

3

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT—Continued.

IV. Program of work, etc.—Continued.

(2) Project activities and results—Continued.

- (i) Rural engineering.
- Rural engineering—home.
- (j) Agricultural economics, including farm management and marketing.
- Home marketing.
- (k) Foods.
- (l) Nutrition.
- (m) Clothing.
- (n) Home management.
- (o) Home furnishings.
- (p) Home health and sanitation.
- (q) Community activities.
- (r) Miscellaneous.

V. Outlook and recommendations, including suggestive program of work for next year.

VI. Summary of activities and accomplishments, preferably of one or two typewritten pages only, placed at the beginning or end of the narrative report.

STATISTICAL SUMMARY.

To supplement the narrative part of the report, and in order that comparable State and National summaries may be made, it is necessary to include a statistical summary of the work in each county. The following form has been prepared to insure uniformity of reporting. In addition to the questions asked under each subdivision of the report, space is provided to add further data if desired. The statistical summary will grow naturally out of the field and office records.

DEFINITIONS OF TERMS USED IN THIS REPORT.

1. A PROGRAM OF WORK is a definitely outlined plan for extension work.
2. A PROJECT is a definite, systematic, organized plan for carrying out some phase of the extension program of work, providing for what is to be done, how much, when, where, how, and by whom.
3. MISCELLANEOUS WORK includes work which has not yet become a regular part of the program of work—work other than project work.
4. A COMMUNITY, for the purposes of this report, may be any one of the several units into which the county is divided for purposes of conducting organized extension work.
5. A PROJECT LEADER OR LOCAL LEADER is a person, selected because of his or her special interest and fitness, who functions as a leader in advancing some phase of the local program of extension work.
6. A DEMONSTRATION is an example designed to show the practical application of an established fact. Demonstrations as contemplated in this report are of two kinds, method demonstrations and result demonstrations.
A method demonstration is a demonstration given by an extension worker or other trained leader to a group for the purpose of showing them how to carry out a practice. Synonyms: Lecture demonstration. Examples: Demonstrations of canning, mixing of spray materials, and culling of poultry.
A result demonstration is a demonstration carried on by a farmer, farm woman, boy, or girl under the direction of the extension service, involving a substantial period of time, records of results, and comparisons. Examples: Child-feeding, corn-culture, and orchard-management demonstrations.
7. A DEMONSTRATOR is a farmer, farm woman, boy, or girl who, under the direction of the extension service, conducts a result demonstration.
8. MEMBERS COMPLETING should include those who have satisfactorily finished the work outlined for the current year.
9. A DEMONSTRATION MEETING is a meeting held to give a method demonstration or to start, inspect, or further a result demonstration.
10. A TRAINING MEETING is a meeting at which project leaders or local leaders are trained to carry on extension activities in their respective communities.
11. AN OFFICE CALL OR TELEPHONE CALL is a visit or call by a farmer or other person seeking agricultural or home economics information, as a result of which some definite assistance or information is given.
12. A FARM VISIT is a call at a farm by the agent at which some definite information is given or concrete plan of work outlined, or some valuable information obtained from the farmer regarding his work, or the better practice prevailing in his neighborhood.
13. A HOME VISIT is a call at a home by the agent at which some definite information is given or concrete plan of work outlined, or some valuable information obtained from the farm woman regarding her work, or the better practice prevailing in her neighborhood.
14. DAYS IN OFFICE should include time spent by the county agent in his office, at county agent conferences, and any other work directly related to office administration.
15. DAYS IN FIELD should include all days spent on official duty other than those spent in office.
16. LETTERS WRITTEN should include all single letters on official business.

DEFINITIONS OF TERMS USED IN THIS REPORT—Continued.

17. A **FARMERS' INSTITUTE** is one of a series of meetings of one to two days' duration, arranged by a central State farmers' institute agency, at which agricultural and home-economics problems are discussed, usually by outside speakers employed for the purpose.
18. AN **EXTENSION OR MOVABLE SCHOOL** is an itinerant school usually of two to six days' duration where practical but systematic instruction is given to persons not resident at the college. AN **EXTENSION SHORT COURSE** differs from an extension school in that it is usually held at the college or other educational institution and usually for a longer period of time, but not exceeding two weeks.
19. **EXAMENES** consist of definite information filed in the county office that will enable the agent to verify the data on extension work included in this report.
20. **FARM OR HOME PRACTICE ADOPTED** is a new or improved practice adopted on a farm or in a home during the year as a result of extension teaching. Examples: Spraying of potatoes for disease, canning of fruits and vegetables, use of balanced rations, and hat making.

GENERAL ACTIVITIES.

Report only this year's extension activities and results that are supported by records.

If an assistant agent has been employed during the year, include his or her work with that of the agent.

1. List below the names, titles, and periods of service of the county extension agents whose work is included in this report.

TOTAL	X X X	X X X	5		

¹ The individual entries in this column should not exceed entry for question 2, page 4.
² The individual entries in this column should not exceed entry for question 4, page 4.

No definite time was kept on each project on account of the fact that on some days four or five things would be attended to in the same community.

FARM-DEMONSTRATION WORK.

SOILS.¹

Report only this year's extension activities and results that are supported by records.

46. Number of method demonstrations given. (See definition 6, page 3.)	56	45
46. Number of result demonstrations started or under way. (See definition 6, page 3.)	32	46
47. Number of result demonstrations completed or carried through the year.	30	47
48. Number of acres involved in these completed demonstrations.	590	48
49. Number of farms adopting improved practices in the use of commercial fertilizer this year.	63	49
50. Tons involved in preceding question.	315	50
51. Number of farms taking better care of farm manures this year.	17	51
52. Number of farms using lime or limestone for the first time.	4	52
53. Tons of lime or limestone so used.	9	53
54. Number of farms plowing under cover or other green manure crops for the first time.	2	54
55. Acres of cover and green manure crops so plowed under.	10	55
56. Total number of different farms adopting improved practices, relative to the soils work reported on this page. (Include questions 47, 49, 51, 52, and 54 less duplications.)	109	56

[Use space below to include other important data relating to soils.]

One of the main features of our soil work here has been the planting of Soy Beans and the Corn treatment. This has led to become a general practice on 100% of the farms in the county.

¹ For drainage, irrigation, land clearing, and terracing see "Road Engineering," page 26.

CEREALS¹

Report only this year's extension activities and results that are supported by records.

Item	(1) Corn	(2) Wheat	(3) Oats	(4) Rye	(5) Sorgho	(6) Other ²

164. Number of farmers directly influenced to vaccinate animals for blackleg this year			XXX	XXX	XXX	XXX	164
165. Number of farmers directly influenced to vaccinate swine for cholera this year	XXX	XXX		XXX	XXX	XXX	165
166. Total number of different farms adopting improved practices relative to the livestock work reported on pages 14 and 15.	189 4		70		39		166

[Use space below to include other important data relating to livestock.]

The greatest work done in livestock has been in answering calls from farmers as regards tick legs. Sanitary measures have been the first thing recommended especially for swarms, etc. No dog ticks were seen in the County.

*Indicate by name.

8-518

RURAL ENGINEERING

Report only this year's extension activities and results that are supported by records.

167. Number of method demonstrations given	1	167
168. Number of result demonstrations started or under way	1	168
169. Number of result demonstrations completed or carried through the year	1	169
170. Number of farms installing drainage systems this year	1	170
171. Acres drained	25	171
172. Number of farms installing irrigation systems this year	—	172
173. Acres irrigated	—	173
174. Number of farms constructing terraces or soil dams this year	1	174
175. Acres on which soil erosion was so prevented	15	175
176. Number of dwellings constructed this year according to plans furnished	1	176
177. Number of dwellings remodeled this year according to plans furnished	1	177
178. Number of sewage-disposal systems installed this year according to plans furnished	1	178
179. Number of water systems installed this year according to plans furnished	1	179
180. Number of heating systems installed this year according to plans furnished	1	180
181. Number of lighting systems installed this year according to plans furnished	—	181
182. Number of farms on which buildings other than dwellings were constructed or remodeled this year according to plans furnished	9	182
	(a) Barns	2
	(b) Hog houses	4
	(c) Poultry houses	3
	(d) Silos	—
	(e) Other	—
183. Number of buildings involved in preceding question		183
184. Number of farms clearing land of stumps or boulders this year	17	184
185. Acres of land so cleared	170	185
186. Total number of different farms adopting improved practices relative to the rural-engineering work reported on this page	25	186

[Use space below to include other important data relating to rural engineering.]

In account of the lack of capital very little of the above work could be carried on by the farmers.

AGRICULTURAL ECONOMICS—Continued.

Report only this year's extension activities and results that are supported by records.

206. List below this year's results in connection with the cooperative-marketing associations in the county previously organized and with which the extension service counseled or advised.

(a) Name of association or group	(b) Number of members	Supplies and products handled.	Supplies purchased.		Products sold.	
			(c) Value.	(d) Quantity.	(e) Value.	(f) Profit.
			\$	\$	\$	\$
TOTAL						

2064. Total number of different farms adopting improved marketing practices (include entries for questions 204 (b) and 205 (b) less duplications plus other farms not in cooperative associations) _____ 2064

COMMUNITY ACTIVITIES AND MISCELLANEOUS.

Report only this year's extension activities and results that are supported by records.

Use this space to include work on any other agricultural project not included in the preceding pages, such as bee-keeping, and similar work, i. e., any other information that can be reported statistically and that will help to give a complete account of the year's work.
