COUNTY AGENT WORK

Narrative Summary
of
Annual Report of County Extension Work 1925
for

Pittsylvania County 12.

by
Harry L. Moore, County Agent
C. E. Hall Assistant County Agent.

Extension work in Pittsylvania County for the year ending November 30, 1925 has been carried on through the county agent and assistant, with the assistance of an active advisory council and several interested club leaders. There was a change made in the agents the first of April when Gordon A. Elcan was made Assistant State Boys' Club Agent and the present agent came into the county. Soon after this change there was a meeting of the agricultural advisory council at which time was adopted a Five Year Program of Extension Work for the county. This program consisted of recommendations, made by committees previously appointed, from the members of the council, and dealt with the phases of work they thought should be stressed during the next five years.

The extension work in the county has been carried on largely through the Tobacco Growers Cooperative Marketing Association and the organized 4-H Clubs. Both the agent and assistant have spent considerable time lecturing and working with the association locals and whenever possible getting them to adopt an extension program and appoint one or two men to carry out some definite demonstration. The advisory council members have been of considerable aid in this part of the work as well as working with the agents in their respective communities, in helping to acquaint the agents with the people and the needs of the community.

There were twenty 4-H clubs organized in the county during the year with a total enrollment of 428 active members. Each of these clubs was under the leadership of a local leader who, in most cases was responsible for the very credible work done by the club members. In three communities these local leaders organized sewing classes for the girls and met with them throughout the summer once or twice a month and supervised the sewing.

Following are some of the activities of the clubs during the year; a county rally was held in July, and officers for the county organization were elected, it was also voted at this rally that there should be a County Club Council and that it should be organized in December. Two demonstration teams were trained and gave their demonstrations at the Rally and at the State Short Course. Twenty-four members and two leaders attended the state short course. Four clubs exhibited booths at the Danville Fair, and quite a few members made individual exhibits both at the Danville Fair and the Chatham Corn and Poultry Show. The club corn show at the former fair was said to be one of the best ever exhibited.

Agronomy--- The agents have stressed the use of lime and legumes, a more intelligent use of commercial fertilizers with a suitable crop rotation, at meetings in most communities, as well as with individual farmers from all parts of the county. Demonstrations with lime and legumes have been more convincing than any others, as treated plots outyielded untreated four to six times and in some instances untreated plots were complete failures while one or two tons of hay was harvested from treated plots. Many farmers have been convinced by these demonstrations that to sow clovers without lime is a waste of time and money.

The unusually dry summer caused a greater difference between good and poor farm practices than usual. One demonstrator with corn following crimson clover with an application of acid phosphate showed a yield of 32 bushels of corn, and on the untreated plot the yield was only about 15 bushels. Winter plowing, especially on heavy soils, showed a difference almost as great as the above.

The number of farmers using good seed has increased considerably during the year, especially is this true with corn. Last year club members who were furnished good seed through the banks and county agents won many of the prizes in the open classes on their corn at the Danville Fair. This year the farmers who exhibited at the fair had obtained good seed from the club members or else where, and from the stand point of freedom from mixture alone the corn was 100% better.

There was a great deal of smut in the county this year and a campaign for treating wheat was put on. As result of this a great many farmers treated their wheat for smut using copper carbonate dust.

Horticulture--- The planting of more orchards, the better care of orchards and gardens and a greater variety of fruits and vegetables have been emphasized by the agents throughout the year. Twelve pruning demonstrations have been held and instructions given in spraying and orchard care. Several farmers are preparing to prune, spray, and rid their orchards of insect pests as a result of the work done. Interest in good home gardens is gradually increasing. Several home orchards are being planted. Interest is being shown in the growing of grapes and a few pruning demonstrations, as well as grape culture has been discussed. Beautification of home grounds and especially the working over and seeding of lawns has met with great favor.

Animal Husbandry---- There has been some work done with dairy husbandry during the year. A census was taken of all dairymen in the county looking towards the organization of a cow testing association but there was hardly enough men interested to organize at this time. A few farmers have begun to feed balanced rations, and several are growing more feed on their farms due to the agents efforts. Assistance has been rendered several men in buying or replacing pure bred and good grade animals. The necessity of good cows for the home dairy and plenty of home grown food has been emphasized at all times.

There seems to be a growing interest in hog production and a few men have been assisted in procuring a few good hogs to be used as breeding stock. Attention has also been given to proper feeding and the importance of pasture in pork production.

The outstanding work with livestock however has been done with poultry. The importance of a good home flock on every farm, and that flock properly housed, culled and fed has been emphasized throughout the year. With the assistance of the banks money was raised to more than a hundred club members, to help them in securing eggs from standard bred flocks. This is the third year this has been done and as a result there are quite a few well bred farm flocks over the county.

Several culling demonstrations have been held in different parts of the county, and at each one proper methods of housing and feeding as well as culling was thoroughly discussed.

In one community a woman's poultry club has been organized, at their request, and meets once a month at which time some special phase of poultry industry is discussed. Several new poultry houses have been constructed during the year and a number of old ones remedied.

Rural Engineering--- Some little work has been done along rural engineering lines. Terracing has been recommended on quite a number of farms and in a few communities demonstration terraces have been built under the direction of the agents. Several poultry houses have been remodeled and a few new ones built as direct results of extension work. Plans have been furnished quite a few farmers for different other farm buildings.

In cooperation with the Agricultural Engineering Department several farms have been visited and advised about home power plants, drainage, and building. Orders have been taken for pyrotol to be used in clearing of land and in ditching, and the farmers report very good results with it.

Agricultural Economics--- A cost accounting school was held for the farmers by the agents and the specialist in Agricultural Economics. About eighteen farmers attended this, six or eight of whom are keeping complete records on their farm for the year.

A Model Farm exhibit was put on at the Danville fair by the agents and Specialist, showing crop rotations advocated for the county, farm layouts, and other recommended farming practices.

Work with the Tobacco Growers Cooperative Marketing Association, has been largely of an educational nature in which, the principles of cooperative marketing, the importance of economical production, the necessity for continual study of the cooperative principle, and the importance of loyalty to, and confidence in, the Association, have been stressed. The locals have been used, whenever possible, to promote an extension program, this has been done in part by their selecting some member as a demonstrator to adopt an improved method along whatever line they desire.

As miscellaneous activities in the county might be mentioned the Danville Fair in which the Agents assisted both in encouraging and securing exhibits and in the supervision of all club and school exhibits and farmers corn exhibit. And the Chatham Seaman Poultry Show in which only club members were allowed to make exhibits. Both of these fairs were considered a success both from the number and the quality of the exhibits made.

General Recommendations for Plan of Work
for
Pittsylvania County for 1926
by
Harry L. Moore, County Agent.

In making recommendations for another year of Extension Work in Pittsylvania County the agent believes the policy should be to continue to follow the five year program of work as adopted by the Agricultural Advisory Council and upon which the 1925 program was based, the following recommendations are submitted;

1. To work towards better organization and more specific demonstrations and reports of the 4-H clubs.
2. To organize a County 4-H Council.
3. To continue to work with the Tobacco Growers Cooperative Marketing Association.
4. To conduct demonstrations with adults in more communities of the county in the principle crops.
5. To encourage systematic crop rotations and the use of more lime and legumes.
6. To emphasize the county wide, Live At Home Campaign.
7. To encourage the use of better aires and livestock, looking especially towards the development of good poultry on every farm.
8. To continue to emphasize the importance of good seed.
9. To continue to work with the Danville Fair and hold a County Agricultural and School Fair if thought advisable.

ANNUAL REPORT OF COUNTY EXTENSION WORKERS

This report form is to be used by county extension agents, such as county agricultural agent, home demonstration agent, club agent, and negro agent, reporting on their respective lines of work.

State Virginia County Pittsylvania
Report of H. T. Moody C. L. Hall County Farm Demonstration Agents
(Name) (Name) (Title)
From December 1, 1924 to November 30, 1925.

If agent has not been employed entire year, indicate exact period. Agents resigning during the year should make out this report before quitting the service.

State Extension Director.

SUGGESTIONS RELATIVE TO THE PREPARATION OF THE COUNTY EXTENSION AGENT'S ANNUAL REPORT.

The annual report should be a review, analysis, interpretation, and presentation to the people of the county, the State, and the Nation of the sum total of the extension activities in each county for the year and the results obtained by the county extension agent assisted by the subject-matter specialists. The making of such a report is of great value to the county extension agent and the people of the county in showing the progress made during the year as a basis for future plans. It is of vital concern also to the State and Nation as a measure of rural progress and a basis for intelligent legislation and financial support.

Separate statistical and narrative reports are desired from each county extension agent in charge of a line of work, such as county agent, home demonstration agent, boys' and girls' club agent, and negro agent. Where an assistant agent has been employed a part or all of the year, a report on his or her work should be included with the report of the leader in charge of that line of work. Where an agent in charge of a line of work has quit the service during the year, the information contained in his or her report should be incorporated in the annual report of the agent on duty at the close of the report year, and the latter report so marked. Where two or more extension agents are employed in a county, each in charge of a line of work, care should be exercised to avoid including the same data in the statistical report of more than one agent.

At least four copies of the annual report should be made: One copy for the county officials, one copy for the agent's files, one copy for the State extension office, and one copy for the Extension Service, United States Department of Agriculture. *The report to the Washington office should be sent through the State extension office.*

NARRATIVE SUMMARY.

The narrative report should be a statement in orderly fashion and arranged under appropriate subheadings, of the work done, methods used, and results obtained under each project, as well as of the general work accomplished. Every statement should be clear-cut, concise, forceful, and, where possible, reinforced with ample data from the statistical summary. In the preparation of the part of the report relative to each project, the results reported in the statistical summary for the project should be analyzed, conclusions drawn, and recommendations made. The report may well be illustrated with photographs, maps, diagrams, blue prints, or copies of charts and other forms used in demonstration work. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs, and reasonably good margins left. The pages should be numbered in consecutive order.

The following outline is suggestive of how the narrative report may be clearly and systematically presented:

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT.

- I. Cover and title page.
- II. Table of contents.
- III. Status of county extension organization.
 - (1) Form of organization—changes and development.
 - (2) Function of local people, committees, or project leaders in developing the program of work.
 - (3) General policies, including relationships to other organizations.
- IV. Program of work, goals established, methods employed, and results achieved.
 - (1) Factors considered and methods used in determining program of work.
 - (2) Project activities and results.

<ol style="list-style-type: none"> (a) Soils (b) Farm crops (Horticulture) (c) Home gardens (Beautification of home grounds) (d) Forestry (e) Rodents, predatory animals, and birds. (f) Animal husbandry (g) Dairy husbandry (Home dairy) (h) Poultry husbandry (Home poultry) 	} (including diseases and insects).
---	-------------------------------------

IV. Program of work, etc.—Continued.

(2) Project activities and results—Continued.

- (i) Rural engineering.
 - (i) Rural engineering—home.
- (j) Agricultural economics, including farm management and marketing.
 - (j) Home marketing.
- (k) Foods.
- (l) Nutrition.
- (m) Clothing.
- (n) Home management.
- (o) House furnishings.
- (p) Home health and sanitation.
- (q) Community activities.
- (r) Miscellaneous.

V. Outlook and recommendations, including suggestive program of work for next year.

VI. Summary of activities and accomplishments, preferably of one or two typewritten pages only, placed at the beginning or end of the narrative report.

STATISTICAL SUMMARY.

To supplement the narrative part of the report, and in order that comparable State and National summaries may be made, it is necessary to include a statistical summary of the work in each county. The following form has been prepared to insure uniformity of reporting. In addition to the questions asked under each subdivision of the report, space is provided to add further data if desired. The statistical summary will grow naturally out of the field and office records.

DEFINITIONS OF TERMS USED IN THIS REPORT.

1. A PROGRAM OF WORK is a definitely outlined plan for extension work.
2. A PROJECT is a definite, systematic, organized plan for carrying out some phase of the extension program of work, providing for what is to be done, how much, when, where, how, and by whom.
3. MISCELLANEOUS WORK includes work which has not yet become a regular part of the program of work—work other than project work.
4. A COMMUNITY, for the purposes of this report, may be any one of the several units into which the county is divided for purposes of conducting organized extension work.
5. A PROJECT LEADER OR LOCAL LEADER is a person, selected because of his or her special interest and fitness, who functions as a leader in advancing some phase of the local program of extension work.
6. A DEMONSTRATION is an example designed to show the practical application of an established fact. Demonstrations as contemplated in this report are of two kinds, method demonstrations and result demonstrations.
 - A method demonstration is a demonstration given by an extension worker or other trained leader to a group for the purpose of showing them how to carry out a practice. Synonym: Lecture demonstration. Examples: Demonstrations of castrating, mixing of spray materials, and culling of poultry.
 - A result demonstration is a demonstration carried on by a farmer, farm woman, boy, or girl under the direction of the extension service, involving a substantial period of time, records of results, and comparisons. Examples: Child-feeding, corn-culture, and orchard-management demonstrations.
7. A DEMONSTRATOR is a farmer, farm woman, boy, or girl who, under the direction of the extension service, conducts a result demonstration.
8. MEMBERS COMPLETING should include those who have satisfactorily finished the work outlined for the current year.
9. A DEMONSTRATION MEETING is a meeting held to give a method demonstration or to start, inspect, or further a result demonstration.
10. A TRAINING MEETING is a meeting at which project leaders or local leaders are trained to carry on extension activities in their respective communities.
11. AN OFFICE CALL OR TELEPHONE CALL is a visit or call by a farmer or other person seeking agricultural or home economics information, as a result of which some definite assistance or information is given.
12. A FARM VISIT is a call at a farm by the agent at which some definite information is given or concrete plan of work outlined, or some valuable information obtained from the farmer regarding his work, or the better practice prevailing in his neighborhood.
13. A HOME VISIT is a call at a home by the agent at which some definite information is given or concrete plan of work outlined, or some valuable information obtained from the farm woman regarding her work, or the better practice prevailing in her neighborhood.
14. DAYS IN OFFICE should include time spent by the county agent in his office, at county agent conferences, and any other work directly related to office administration.
15. DAYS IN FIELD should include all days spent on official duty other than those spent in office.
16. LETTERS WRITTEN should include all single letters on official business.

DEFINITIONS OF TERMS USED IN THIS REPORT—Continued.

17. A FARMERS' INSTITUTE is one of a series of meetings of one to two days' duration, arranged by a central State farmers' institute agency, at which agricultural and home-economics problems are discussed, usually by outside speakers employed for the purpose.
18. AN EXTENSION OR MOVABLE SCHOOL is an itinerant school usually of two to six days' duration where practical but systematic instruction is given to persons not resident at the college. An EXTENSION SMOKE COURSE differs from an extension school in that it is usually held at the college or other educational institution and usually for a longer period of time, but not exceeding two weeks.
19. RECORDS consist of definite information filed in the county office that will enable the agent to verify the data on extension work included in this report.
20. FARM OR HOME PRACTICE ADOPTED is a new or improved practice adopted on a farm or in a home during the year as a result of extension teaching. Examples: Spraying of potatoes for disease, canning of fruits and vegetables, use of balanced rations, and-hat making.

GENERAL ACTIVITIES.

Report only this year's extension activities and results that are supported by records.

If an assistant agent has been employed during the year, include his or her work with that of the agent.

1. List below the names, titles, and periods of service of the county extension agents whose work is included in this report.

<i>Harry L. Moore</i> County Agent	<i>8</i>
<small>(Name.)</small> <small>(Title)</small> <small>(Months of service this year.)</small>	
<i>Sandanti. Ellean</i> County Agent	<i>4</i>
<i>C. L. Hall</i> Ass't. Co. Agent	<i>12</i>

2. Number of communities in county where extension work should be conducted. 35 2

3. Number of above communities in which the extension program has been cooperatively worked out by extension agents and people concerned. 25 3

4. Number of voluntary county, community, or local leaders actively engaged in forwarding the extension program with— 4

(a) Juniors	<i>20</i>
(b) Adults	<i>9</i>

5. Number of clubs carrying on extension work: 5

(a) Junior	<i>20</i>
(b) Adult	<i>4</i>

(a) Boys	<i>208</i>	(c) Men	<i>28</i>
(b) Girls	<i>177</i> (<i>220</i>)	(d) Women	<i>16</i>

7. Number of club members completing: 7

(a) Boys	<i>96</i> (<i>178</i>)	(c) Men	
(b) Girls	<i>99</i> (<i>176</i>)	(d) Women	

8. Number of members in junior club work for four or more years: 8

(a) Boys	<i>14</i>
(b) Girls	<i>12</i>

Club meetings held *no attendance*
138 *1600*

Club demonstrations visited *737*

GENERAL ACTIVITIES—Continued.

9. Number of junior judging or demonstration teams trained	2	9	
10. Number entering college this year who have been club members	18	10	
11. Total number of farm visits ¹ made in conducting extension work	1290	11	
12. Number of different farms visited	830	12	
13. Total number of home ¹ visits made in conducting extension work	75	13	
14. Number of different homes visited	58	14	
15. Number of calls ² relating to extension work	(a) Office	821	15	
	(b) Telephone	82		
16. Number of days agent spent in office	166	16	
17. Number of days agent spent in field	427	17	
18. Number of individual letters written	1061	18	
19. Number of fairs at which extension exhibits were made	(a) Community	1	19	
	(b) County	1		
20. Training meetings ³ held for local leaders	(a) Number	14	20	
	(b) Leaders in attendance	235		
21. Method and result demonstration meetings ³ held (do not include meetings reported in number 20)	(a) Number	6	21	
	(b) Attendance	85		
22. Farmers' institutes ³ held	(a) Number		22	
	(b) Attendance			
23. Extension schools ³ and short courses held	(a) Number	1	23	
	(b) Attendance	15		
24. Junior club encampments held:	(a) Number		24	
	(b) Attendance by club members	(1) Boys		
		(2) Girls		
(c) Total attendance				
25. Other extension meetings attended and not previously reported	(a) Number	125	25	
	(b) Attendance	2315		
26. Number of meetings at which were shown	(a) Lantern slides		26	
	(b) Motion pictures			
	(c) Charts			

[Use space below to include other important data.]

¹ Do not count the same visit as both a farm visit and a home visit.

8-51a

FARM-DEMONSTRATION WORK.

SOILS.¹

Report only this year's extension activities and results that are supported by records.

45. Number of method demonstrations given. (See definition 6, page 3.)	12	45
46. Number of result demonstrations started or under way. (See definition 6, page 3.)	7	46
47. Number of result demonstrations completed or carried through the year.	3	47
48. Number of acres involved in these completed demonstrations.	8	48
49. Number of farms adopting improved practices in the use of commercial fertilizer this year.	25	49
50. Tons involved in preceding question.	100	50
51. Number of farms taking better care of farm manures this year.		51
52. Number of farms using lime or limestone for the first time .	400	52
53. Tons of lime or limestone so used.	1600	53
54. Number of farms plowing under cover or other green manure crops for the first time .	472	54
55. Acres of cover and green manure crops so plowed under.	1428	55
56. Total number of different farms adopting improved practices, relative to the soils work reported on this page. (Include questions 47, 49, 51, 52, and 54 less duplications.)	1132	56

[Use space below to include other important data relating to soils.]

The greatest work that is being done with soils and soil building in this County is through the use of lime and legumes and the use of crop rotations. A great many of the better farmers are realizing the necessity of lime and are being it on a part of their land.

Several of the demonstrations numbered above have been started recently and as of the nature of lime and legume or living pastures and so no returns have been obtained as yet.

CEREALS¹

Report only this year's extension activities and results that are supported by records.

70. Total number of different farms adopting improved practices relative to the cereal work reported on this page	225 (64)	800 15		18			70

[Use space below to include other important data relating to cereals.]

This has been a very poor year for the production of corn because of the extremely dry summer and the yields have been unusually low. With the Corn demonstrations however, especially with the Club members, frequent and shallow cultivation was practiced and the yield was much better than when the common method of cultivation was used.

¹ Report fall acreage and the hay they are harvested.

² Includes crop by county.

³ Clubs which do not operate clubs on a project basis should not report on this question but should report on enrollment and completion.

9

LEGUMES AND FORAGE CROPS.

[Use space below to include other important data relating to legumes and forage crops.]

In most of these demonstrations lime was used on at least a part of the land and in several cases, especially with alfalfa and clover, the results were very striking and caused much comment among the neighbors in favor of the lime portion.

¹Indicate whether yield is bushels of seed or tons of cured forage.

²States which do not organize clubs on a project basis should not report on this question but should report on enrollment and completion.

LEGUMES AND FORAGE CROPS—Continued.

(b) Girls.							
79. Number of acres grown by junior club members completing.							
80. Total yield ² of crops grown by junior club members.	bu. tons	bu.	bu.	tons	X X X		bu. tons
81. Number of farms planting improved seed for the first time.							4
82. Number of farms practicing seed selection for the first time.							
83. Number of farms inoculating for these crops for the first time.							
84. Total number of different farms adopting improved practices relative to the legumes and forage crops reported on this page.			4			15	4

[Use space below to include other important data relating to legumes and forage crops.]

Although there is a comparatively small amount of pasture in the County, there is quite a bit of interest in pasture improvement and several demonstrations have been started this fall in pasture improvement. I have had her quite a few calls for assistance in getting lawns established at some outstaring ones & have her obtained by following the advice given.

¹ Includes crop by name.

² Indicate whether yield is bushels of seed or tons of cured forage.

³ States which do not organize clubs on a project basis should not report on this question but should report on enrollment and completion.

POTATOES, COTTON, TOBACCO, AND OTHER SPECIAL CROPS.

Report only this year's extension activities and results that are supported by records.

Item	(a) Irish potatoes	(b) Sweet potatoes	(c) Cotton	(d) Tobacco	(e) Other ¹
85. Number of method demonstrations given	3			12	85
86. Number of adult result demonstrations started or under way			1	8	86
87. Number of adult result demonstrations completed or carried through the year				4	87
88. Acres involved in these completed demonstrations				6	88
89. Increased yield per acre on demonstrations	bu.	bu.	lbs. ²	50 lbs.	89
90. Number of junior clubs *				2	90
91. Number of members enrolled	(a) Boys.			2	91
	(b) Girls.				
92. Number of members completing work	(a) Boys.			2	92
	(b) Girls.				
93. Number of acres grown by junior club members completing				18	93
94. Total yield of crops grown by junior club members	bu.	bu.	lbs. ²	lbs.	94
95. Number of farms planting improved seed for the first time				14	95
96. Number of farms practicing seed selection for the first time				4	96
97. Number of farms treating seed for disease for the first time				28	97
98. Number of farms spraying or dusting for diseases and insects for the first time				8	98
99. Total number of different farms adopting improved practices relative to potatoes, cotton, tobacco, and other special crops reported on this page				54	99

[Use space below to include other important data relating to potatoes, cotton, tobacco, and other special crops.]

The greatest work done with tobacco has been in seed treatment of plants, but treatment for the control of diseases and insects, and in recommending the using of properly balanced high analysis fertilizers.

¹ Indicate crop by name.

² Report yield of cotton in pounds of seed cotton.

* Clubs which do not organize clubs or groups on a project basis should not report on this question but should report on enrollment and completion.

HORTICULTURE.

Report only this year's extension activities and results that are supported by records.

Item.	(4)	(5)	(6)	(6)	(6)	(7)
