Virginia Coal

1992 VIRGINIA COAL

Total Virginia coal production for 1991, as reported to the Virginia Department of Mines, Minerals, and Energy (Division of Mines), was 42,336,136 tons, down 9% from the record 1990 total of 46,500,106. This is the lowest production total since 1986, when the figure was just under 41.8 million tons. Underground production, at 34,248,769 tons, was down 12% from 1990. Longwall mining accounted for 8,303,318 tons of coal, down 15% from the previous year's total. Virginia's overall drop in coal production was due in part both to mild weather conditions and to the continuing recession. Surface production, at 8,086,417 tons, was up almost 5.5% - its highest since 1982.

Virginia coal received the promise of a boost in 1991, when a 786-megawatt, coal-fired facility near Clover in Halifax County, jointly proposed by Old Dominion Electric Cooperative (ODEC) and Virginia Power, was approved by the Virginia Air Pollution Board after protracted conflict. Clover will be the only utility-owned, coal-fired facility in the state which uses both low-sulfur coal and wet scrubbers; the scrubbers will capture between 94 and 95% of the incoming coal's sulfur content. A permit for the plant was also required from the U.S. Environmental Protection Agency, which granted approval to the project in January of 1992.

While its coal industry is experiencing a minor downswing, it is certain that the Commonwealth's low-sulfur resource will continue to play an important part in both the economy and future of Virginia. This directory seeks to track the trends affecting that resource - mining, productivity, exports, and more - through 1991.

COAL PRODUCTION BY COUNTY, AND STATE TOTAL: 1982-1991

Hampton Roads Coal Shipments

HAMPTON ROADS COAL EXPORT TERMINALS

DOMINION TERMINAL ASSOCIATES (D.T.A.)

Dominion Terminal Associates is located on the east bank of the James River in Newport News, and is co-owned by Ashland Coal, Inc., Peabody Holding Company, Inc., the Pittston Company and Westmoreland Coal Company. Served by the CSX Rail System, D.T.A. has an annual throughput capacity of 18.5 million tons and can accommodate vessels ranging from barges to ships of 178,000 dwt. The tandem rotary dumper can unload coal at a rate of 5,700 tons per hour. Nineteen belt conveyors transport the coal from dumper to storage or direct to the shiploader. Coal is stored in four areas with a maximum capacity of 1.7 million tons, and is later reclaimed for shipment by two stacker/reclaimers and one reclaimer. These three machines have 200-foot booms and are capable of luffing, slewing and traveling along the length of the storage areas to stack and reclaim the coal with a minimum amount of dozing. Coal can be reclaimed and transported to the twin silos at 6,800 tons per hour, where two grades can be blended and loaded into vessels at up to 6,500 tons per hour. The single shiploader with a 145-foot boom can accommodate ships with a 79-foot air draft. Pierside, D.T. A. matches the harbor's 50-foot depth.

The terminal's best 24-hour period with its single shiploader is 123,271 tons, and its best 8-hour shift is 48,840 tons. In June 1991, a one-month record was established for D.T.A. of 1,646,399 tons. ADDRESS: **Dominion Terminal Associates, P.O. Box 967-A, Newport News, VA 23607; 804/245-2275.**

NORFOLK SOUTHERN COMPANY

The Lamberts Point coal handling facility of the **Norfolk Southern Railway Company (NS)** concentrates at one point the collection and blending of coals originating from approximately 200 and preparation plants on its rail system. In addition to the shiploading piers, NS has constructed modern weighing, thawing and dumping facilities to supply coal to the pier. Classification and storage yards accommodate approximately 7,500 loaded coal hopper cars at Lamberts Point, or the equivalent of almost 700,000 tons of coal on hand each day, with additional tracks provided for receiving loaded trains and assembly of empty cars returning to the coalfields. At Isle of Wight, Virginia, NS is building a coal ground-storage facility to enhance export service. Service is expedited by a high-speed, virtually one-way route for coal trains from the mines to Norfolk. Norfolk Southern's **Coal Pier 6** is the largest and the fastest facility of its type in the world, featuring twin traveling loaders - each as high as a 17-story building - which can serve two colliers or concentrate on a single ship. Over 150,000 tons of coal have been loaded in a single collier, some of which are 1,000 feet in length and 175 feet in width. Coal is carried to the loaders by a series of 8-foot-wide rubber conveyor belts (which are, in turn, equipped with a sophisticated, mechanical sampling system) to the loaders, where even-flow retractable booms deposit it smoothly into the colliers. The booms can reach out as far as 120 feet, providing an even-keel loading for ships with centerline bulkheads. Pier 6 has a design capacity of 16,000 tons an hour, with a maximum capacity of 20,000 tons per hour. ADDRESS: **Pier Master's Office, Norfolk Southern, P.O. Box 3070, Norfolk, VA 23514; 804/446-5481.**

PIER IX TERMINAL COMPANY

With a depth of over 50 feet, loading facilities include a double-berth pier with a conveyor system, a single shiploader, and an air draft of 75 feet, capable of loading 85,000 to 90,000-ton colliers in a day. Berth and loading facilities will accommodate vessel lengths of up to 1,000 feet and breadths of up to 155 feet. The storage facility has a rated capacity of 12 million tons of coal per year with ground storage of 1.36 million tons in 12 piles. The Terminal is served by the CSX Rail System, which accesses the highest qualities of metallurgical and steam coals with competitive rail rates. Pier IX Terminal Company also offers mechanical sampling to and from storage, stockpile blending to an accuracy of plus or minus 1%, and guaranteed demurrage protection. ADDRESS: **Pier IX Terminal Company, P.O. Box 38, Newport News, VA 23607; 804/244-8800.**

**1992
Virginia Coal Mine
Directory**

ABOUT THE 1992 VIRGINIA COAL MINE DIRECTORY

The following listing presents a comprehensive data set for 483 mines licensed in Southwestern Virginia by the Virginia Division of Mines (VDM/Virginia Department of Mines, Minerals and Energy) as of January 1, 1992. All figures presented refer to mine activity during the calendar year 1991, and were drawn from VDM computer files at the agency's offices in Big Stone Gap. The data in this Directory are printed as shown in VDM records, which present information reported by coal-mine operators for individual mining operations.

Mines are listed alphabetically by company, and the following information is included for each mine:

Company Name	Mine ID #	# of Employees	County
Company Contact	Mine Type	# of Days Worked	Seam(s) Worked
Company Address	Activity Status, 1/1/92	# of Hours Worked	Seam Height(s)
Telephone #	Production, 1990	Tons/Man Hour	Equipment Used
	Production, 1991	Wages	Coal Owner(s)

VCCER extends its sincere appreciation to Chief Mine Inspector Harry Childress and to the employees of the Virginia Division of Mines for their invaluable help in providing the information included in this directory.

ABBREVIATIONS USED

MINE TYPE

deep(TI) = Underground Tipple Mine
deep(TR) = Underground Truck Mine

surface(A) = Surface Auger Mine
surface(S) = Surface "Strip" Mine

EQUIPMENT

ATRS = Automatic Temporary Roof Support
AUGER = Various Augering Equipment
BCAR = Battery-Powered Car
CD = Coal Drill
CH = Continuous Haulage
CM = Continuous Miner
CMA = Continuous Miner/Auger Type
CTR = Conventional Cutter

DCAR = Diesel-Powered Car
LDR = Conventional Loader
LW = Longwall
RD = Roof Drill or Bolter
SCAR = Shuttle Car
SCOOP = Haulage Machine (LHD)
STRIP = Various Stripping Equipment
NA = Not Available
