FOREWORD

In this brief annual narrative summary of the Agricultural Extension Program conducted in Franklin County during December 1, 1938, through November 30, 1939, the agent will attempt to discuss his activities. This narrative will contain a brief discussion of the different activities given in the statistical report.

Although it would be impossible to give a detailed discussion of the duties of the agent, since his duties are so numerous, it is hoped that this narrative will give a general idea of the practices of the agent and some of the accomplishments attained.

The results achieved by the regular extension program and the Agricultural Conservation Program have been very gratifying to the agricultural committees, business men, farmers and the agent. Much credit must be given to the loyal committeemen who have worked hard throughout the year to make the program a success.

4-H Club work has been conducted in the county during the year by Mr. F. L. Price, Assistant County Agent, in charge of the 4-H club work.

EXTENSION ORGANIZATION

The county has been divided into 8 districts for the purpose of planning agricultural programs. Each of these districts has a program planning committee of from 3 to 5 men. The chairmen of each community committee comprises a County Board. In addition to these men, each agency in the county doing agricultural work is an ex-officio member of this board. This board met jointly early in January for the purpose of adopting a plan of work for 1939. Following this meeting, a series of 3 discussion meetings was scheduled in each of the 8 districts to discuss this program with the farmers. Each of the agricultural agencies in the county was given an opportunity, at these meetings, to explain how its particular program fitted into the county plan of work. It is hoped, that through this medium, it would be possible to effect a closer relationship of all agencies so that better programs may be formulated for the rural group. Farmer discussion leaders were utilized at this meetings. Leader training meetings were held prior to the group discussion meetings.

Following this series of discussion meetings, the county board met to consider suggestions given by farmers participating in the group discussion meetings.

THE FRANKLIN COUNTY BULL ASSOCIATION

This association consists of 12 members with a total of approximately 300 cows. The association purchased 2 additional Holstien Bulls this year, making a total of 7 bulls that are being proven as their production records. Each herd in the association is tested annually for Bangs and tuberculosis.

The annual meeting of this association was held in January with 12 members present. Following this meeting, the board of directors met and elected officers for the coming year.

THE DAIRY HERD IMPROVEMENT ASSOCIATION

The Dairy Herd Improvement Association consists of 5 committeemen and 16 members. Each member's herd is tested monthly for butter fat production by the D. H. I. A. Inspector, and accurate and systematic records are kept by each member.

THE FRANKLIN COUNTY SOIL CONSERVATION ASSOCIATION

This association consists of 18 committeemen and 205 members. The purpose of this association is to help promote the work being done by the S. C. S. Camp. The practices of this association will be discussed later.

THE FRANKLIN COUNTY AGRICULTURAL CONSERVATION ASSOCIATION

Twenty-seven committeemen and 3115 members comprise this association. The activities of this association will be discussed in subsequent paragraphs.

THE FRANKLIN COUNTY DAIRYMEN'S ASSOCIATION

This association consists of 5 committeemen and 53 members. The purpose of this association is to sponsor the dairy program for Franklin County and to assist with educational work in connection with the dairymen's school and other general activities. The dairymen's association will sponsor a pasture improvement project during the coming year.

THE FRANKLIN COUNTY AGRICULTURAL CONSERVATION PROGRAM

The results obtained by the Franklin County Agricultural Conservation Program have been very gratifying to the farmers and committeemen working in connection with this program. During the year, the committeemen were called upon to work out individual allotments for farmers participating in the 1939 program. This was a tremendous job and required considerable time on the part of the committeemen. After these individual allotments had been adjusted and approved, the agent notified the producer of his allotment and instructed him as to the methods whereby he could earn his maximum payment. Following this notice, the agent held 10 educational meetings to explain the various phases of the program, with a total attendance of 1460 farmers. In addition to the contact made at these meetings, the agent has written 320 individual letters regarding this program and prepared 28 circular letters, distributing 24,000 copies.

Although it would be impossible to give definite results obtained under this program, the agent is listing below an estimate of some of the accomplishments, based on samples taken at random. The following table will give in brief the accomplishments of the 1939 program:

1. Number of tons of ground limestone used--	14,600.
2. Number of tons of phosphate used--	575.
3. Number of acres of permanent pasture treated with lime or phosphate--	1820.
4. Number of acres of clover seeded--	1630.
5. Number of acres of alfalfa seeded--	320.
6. Number of acres of lespedeza seeded--	4300.

Checking performance was one of the most difficult jobs of the program. Twenty-four field supervisors were used and eight additional clerks in the county office during the three months required to complete the field work.

This program has given the agent the best opportunity in the history of extension work to aid the individual farmer in planning his farm program and conducting method demonstrations.

THE FRANKLIN COUNTY SOIL CONSERVATION PROGRAM

The Franklin County Soil Conservation Association embodies 16 committeemen and 203 members. The purpose of this association is to assist in the educational work for the Soil Conservation Camp. The annual meeting of this association was held in Rocky Mount in March, 1939. Mr. J. A. Waller of the Agricultural Engineering Department of V. P. I. was the principal speaker. All members of this association and interested farmers were invited, and out of this group, 115 persons attended. During the meeting, the officers and directors of the association were elected for 1939.

The agent has given a considerable amount of his time in cooperating with the S. C. S. Camp, in holding group discussion meetings and planning the work of the camp. The agent also conducted a farmers' tour of the camp demonstrational area in Franklin County.

AGRICULTURAL ENGINEERING

During the year, the agent has furnished plans for two dairy buildings, 2 silos, 10 poultry houses, and 2 storage structures. Agricultural Engineering Extension specialists were utilized in selecting plans for the buildings and in selecting proper sites. The agent, with the help of the extension specialist, made surveys during the year for two rams and one gravity water system. The agent has also given a considerable amount of his time assisting farmers in working out programs for strip-cropping and contour tillage. There has been much more demand for this type of work than there was in the past year.

The agent has received numerous requests for terracing, and with the help of the assistant agent, all of these requests have been met. Twenty-eight farmers have been assisted with this work, with a total of 213 acres being terraced. Although terracing is becoming a less important method of erosion control in the county, it still has a place in the county plan of work due to the fact that it is possibly the best method of controlling erosion in the flue-cured tobacco sections of this county.

HORTICULTURE

The work of the Fruit Growers' Association has been continued. This association sponsored 5 pruning demonstrations during the year to assist farmers with their pruning problems. Five permanent pruning demonstrations, started last year, were continued in an endeavor

show the importance of this work. It is hoped, that through this work, farmers will be able to follow a more definite pruning program.

Individual visits were made to growers on request for information regarding storage, thinning, pruning, and new plantings of trees. Along with the field work, timely information has been distributed to growers concerning orchard practices.

The agent also assisted the growers in the disposition of surplus apples through the Federal Surplus Commodity Corporation.

POULTRY

The poultry producers in the county meet each year in a one day poultry school with the extension poultry specialists of V. P. I. This gives each producer an opportunity to discuss his individual problems with the specialist, and also gives the agent an opportunity to better understand the problems facing the poultry producers of the county. The agent has devoted several days in field work, assisting farmers with the culling of their flocks, treatment of flocks for worms, and individual disease treatment.

SOIL TYPE FERTILIZER DEMONSTRATIONS

During the year, the agent, with the cooperation of the V. P. I. Agronomy Department, conducted three soil type fertilizer demonstrations started last year; namely, corn, small grain, and permanent pasture. In addition to the soil type fertilizer demonstration, the agent received quite a number of soil samples to be tested for plant food content and lime. This type of work is beginning to play an important role in making fertilizer recommendations for different crops.

T. V. A. FERTILIZER DEMONSTRATIONS

Franklin County has been approved for a number of T.V.A. unit farm demonstrations. Individual farm plans for this demonstration have not been completed; however, the agent has visited each of these farms and has worked out a cropping and farming system for each farm selected for this type of work. The Agricultural Board of Franklin County selected the farms to be used for this demonstrational purpose, care being taken to select farms that would represent the different types of farming in Franklin County. These farms are being worked in cooperation with the other agricultural agencies of this county in an endeavor to make it as complete a demonstration as possible.

5

THE BLUE RIDGE SOIL CONSERVATION DISTRICT

Franklin County has been included in the Blue Ridge Soil Conservation District. The agent has spent a considerable amount of time doing educational work in connection with this program. The Blue Ridge Soil Conservation District includes Bedford, Henry, and Franklin Counties.

4-H CLUB WORK

INTRODUCTION

4-H Club work was first started in Franklin County about 1933 by the Agricultural Agent. However, the clubs were not organized. In 1935 club work was started again, the agricultural agent working with the boys, and the Home Demonstration Agent working with the girls.

During 1939 club work was conducted in Franklin County by the Assistant Agricultural Agent and the Home Demonstration Agent.

ORGANIZATION

Eleven of the clubs were organized together, and each agent had two other clubs which he conducted alone, either of all boys or all girls.

Each club organized together had one set of officers, and the meetings were divided into two parts, the first part being a general meeting for boys and girls, and the second part, a project meeting, with the group divided, the boys working with the man agent, and the girls with the woman agent.

A county council composed of the officers of each club met twice a year to make plans for club work in the county. These meetings were conducted by the president of the council who was elected to that office by the council members. The council members worked out a skeleton plan of work, which was completed by each club.

Due to the fact that all of the clubs existed under different conditions, a set of standards for "Banner Clubs" was drawn up by the council, as a means for recognizing outstanding work by clubs.

The requirements for a Banner Club follow:

1. Hold nine (9) regular club meetings during year.
(Also have two (2) social meetings.)
2. Have an average attendance of 90% for all club meetings.
3. Have 90% project completions.
4. Have club represented at District and/or State Short Course.
5. Have club represented at County Council meetings.
6. Each club pay \$2.00 dues to County Council.
7. Each club be represented at Achievement Day with a report from club.

In addition to these standards, the following goals were listed by the council.

1. 100% completion of projects.
2. 100% attendance at club meetings.
3. Increase in membership.
4. Personal Improvement.
5. Community project for each 4-H club.

Dots show location of 4-H Clubs in Franklin County.

7

OUTSTANDING PROJECT WORK

In Franklin County, the most outstanding project work was conducted by a boy in the Boons Mill Community. This boy carried and completed projects in corn, wheat, poultry, fat pigs, and conservation. This boy also served as Junior Leader of his 4-H Club, and got 100% completion of projects for his club, an average project completion of $1\frac{1}{2}$ projects per boy. He also attended the State Short Course, was President of the County Council, and a member of the Franklin County Crops Judging Team.

Next most outstanding in project work was a boy from the Sontag and Sydnorsville community, who completed projects in corn, tobacco, and conservation. He was a member of the Franklin County Crops Judging Team and made the fifth highest individual score in the state Crops Judging contest. He attended the Jamestown Wildlife and Conservation Camp, and also took an active part in his club, school, and community activities.

CAMP AND SHORT COURSES

A district short course was held in Chatham in June. Both the Assistant Agricultural Agent, and the Home Demonstration Agent participated in conducting this camp.

The Camp was organized with a Big Chief, Lesser Chiefs, and a Scribe presiding, under the supervision of the agents and the Recreation Director.

Classes were conducted in First Aid, Wildlife, and Conservation, and Handicraft, athletic contests, games, and swimming completing the program.

About 100 boys and girls attended this camp, of which number, ten were from Franklin County.

COUNTY MEETINGS

During the year, several meetings were held for instruction in poultry judging and crops judging. Extension specialists from V. P. I. instructed the club members in these classes. The meetings preceded the selection, late in the year, of county teams.

The Franklin County Achievement Day was held on November 11, 1939.

OUTSTANDING CLUBS

Three 4-H Clubs in Franklin County were "Banner 4-H Clubs" in 1939, and in addition there were other clubs who were recognized as "Honorable Mention Clubs" due to the fact that they almost met the requirements of a "Banner Club".

All three of the "Banner Clubs" had 100% completion of projects, and one of these clubs had an average project completion of $1\frac{1}{2}$ projects per boy.

CONTESTS

Franklin County has county winners in each of the following contests: Rural Electrification, Chilean Crop Contest, and Barrett Crop Contest.

Circumstances prevented all but one of the boys on the judging teams from attending the State Contests; however, this one boy made the fifth highest individual score in the State Crops Judging Contest.

CONCLUSION

In conclusion it may be said, that Franklin County carried out a rather full year of club work with reasonably successful results.

Although the percent of project completions for the county did not reach the goal that was set, it is noticeable that those members who completed are interested in club work, and are striving to "Make the Best, Better".

It is also noticeable, that in the clubs reorganized (and most of them have been) that the attitude toward club work is excellent, consequently we are looking forward to a bigger and better 4-H Club year in 1940.

SUGGESTED PLAN OF WORK FOR 1939

1. Continue 4-H Club work
2. Continue Agricultural Conservation Program.
3. Cooperate with other Federal Agencies doing Agricultural work.
4. Continue Horticultural work.
5. Continue Program Planning work.

CONCLUSION

In conclusion, the agent wishes to express his appreciation to the District Agent, and the Extension Specialists for the assistance given him during this year.

SUGGESTIONS RELATIVE TO THE PREPARATION OF THE COUNTY EXTENSION AGENT'S ANNUAL REPORT

The annual report should be a summary, with analysis and interpretations, for presentation to the people of the county, the State, and the Nation of the extension activities in each county for the year, and the results obtained by the county extension agents assisted by the subject-matter specialists. The making of such a report is of great value to the county extension agents and the people of the county in showing the progress made during the year as a basis for future plans. It is of vital concern also to the State and Nation as a measure of rural progress and a basis for intelligent legislation and financial support of extension work.

At least four copies of the annual report should be made: One copy for the county officials, one copy for the agent's files, one copy for the State extension office, and one copy for the Extension Service, United States Department of Agriculture. *The report to the Washington office should be sent through the State extension office.*

STATISTICAL SUMMARY

Where two or more agents are employed in a county they should submit a single statistical report showing the combined activities and accomplishments of all county extension agents employed in the county during the year. Results obtained through assistance rendered agents by specialists should also be included. This report shows, insofar as possible, the part each agent has taken in forwarding the extension program. The county totals should be the sum of the activities and accomplishments of individual agents *minus duplications due to two or more agents participating in the same activity or accomplishment.* The county totals, when properly recorded, show the progress made in the county during the year in forwarding the entire extension program. Negro men and women agents should prepare a combined statistical report separate from that of the white agents.

The statistical summary should be a report of this year's activities and results that can be verified by records on file in the county office. Where records are not available careful estimates are desired. Such estimates should be marked "Est."

NARRATIVE SUMMARY

A separate narrative report is desired from the leader of each line of work, such as county agricultural agent, home demonstration agent, boys' and girls' club agent, and Negro agent. Where an assistant agent has been employed during a part or all of the year, the report of his or her work should be included with the report of the leader of that line of work. Where an agent in charge of a line of work has quit the service during the year, the information contained in his or her report should be incorporated in the annual report of the agent on duty at the close of the report year, and the latter report so marked.

The narrative report should summarize and interpret, under appropriate subheadings, the outstanding results accomplished and the extension methods used for each project. Every statement should be clear-cut, concise, forceful, and, where possible, reinforced with necessary data from the statistical summary. Use a descriptive style of writing, giving major accomplishments first under each project. Give extension methods fully relating to outstanding results only, and where practicable illustrate with photographs, maps, diagrams, blueprints, or copies of charts and other forms used. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs and reasonably good margins. The pages should be numbered in consecutive order.

The following outline is merely suggestive of how the narrative report may be clearly and systematically presented. Each agent should prepare an outline to fit the situation and the work to be reported.

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT

- I. Cover and title page.
- II. Table of contents.
- III. Summary of activities and accomplishments, preferably of one or two typewritten pages only, placed at the beginning of the narrative report.
- IV. Changes in county extension organization.
 - (1) Form.
 - (2) General policies.
 - (3) Procedure.
- V. County program of work.
 - (1) Factors considered and methods used in determining program of work.
 - (2) Project activities and results.

Under appropriate headings and subheadings present in some detail for each major project or line of work the goals set up, the methods used, the results achieved, and the significance of these results in terms of improved farms and homes and of better community life.
- VI. Outlook and recommendations, including suggestive program of work for next year.

TERMINOLOGY

To insure reports which convey the intended meaning to others and to facilitate the compilation of satisfactory national statistics on extension, it is extremely important that terms be used in accordance with accepted definitions. The following definitions of extension terms have been approved by the United States Department of Agriculture and the Association of Land Grant Colleges and Universities. Agents should read these definitions before starting to write the annual reports.

DEFINITIONS OF EXTENSION TERMS

1. A program of work is a statement of the specific projects to be undertaken by the extension agents during a year or a period of years.
2. A plan of work is a definite outline of procedure for carrying out the different phases of the program of work. Such a plan provides specifically for the masses to be used and the methods of using them. It also shows what, how, when, and where the work is to be done.
3. A community is a more or less well-defined group of rural people with common interests and problems. Such a group may include those within a township, tract area, or similar limits. For the purpose of this report a community is one of the several units into which a county is divided for conducting organized extension work.
4. A project leader, local leader, or committeeman is a person who, because of special interest and fitness, is selected to serve as a leader in advancing some phase of the local extension program. A project leader may be either an organization or a subject-matter leader.
5. Demonstrations as contemplated in this report are of two kinds—method demonstrations and result demonstrations. A method demonstration is a demonstration given by an extension worker or other trained leader for the purpose of showing how to carry out a practice. Example: Demonstrations of how to oan fruits and vegetables, mix spray materials, and call poultry.
6. A result demonstration is a demonstration conducted by a farmer, home maker, boy, or girl under the direct supervision of the extension worker, to show locally the value of a recommended practice. Such a demonstration involves a substantial period of time and records of results and comparisons, and is designed to teach others in addition to the person conducting the demonstration. Example: Demonstrating that the application of fertilizer to cotton will result in more profitable yields, that underweight of certain children can be corrected through proper diet, that the use of certified seed in growing potatoes is a good investment, or that a large farm business results in a more efficient use of labor.
7. The adoption of a farm or home practice resulting from a demonstration or other teaching activity employed by the extension worker as a means of teaching is not in itself a demonstration.
8. A result demonstrator is an adult, a boy, or a girl who conducts a result demonstration as defined above.
9. A cooperator is a farmer or home maker who agrees to adopt certain recommended practices upon the solicitation of an extension worker. The work is not directly supervised by the extension agent and records are not required, but reports on the success of the practice may be obtained.
10. A 4-H Club is an organized group of boys and/or girls with the objectives of demonstrating improved practices in agriculture or home economics, and of providing desirable training for the members.
11. 4-H Club members enrolling are those boys and girls who actually start the work outlined for the year.
12. 4-H Club members completing are those boys and girls who satisfactorily finish the work outlined for the year.
13. A demonstration meeting is a meeting held to give a method demonstration or to start, inspect, or further a result demonstration.
14. A leader-training meeting is a meeting at which project leaders, local leaders, or committeemen are trained to carry on extension activities in their respective communities.
15. An office call is a call in person by an individual or a group seeking agricultural or home-economics information, as a result of which some definite assistance or information is given. A telephone call differs from an office call in that the assistance or information is given or received by means of the telephone. Telephone calls may be either incoming or outgoing.
16. A farm or home visit is a call by the agent at a farm or home at which some definite information relating to extension work is given or obtained.
17. Days in office should include those spent by the county extension agent in the office, at annual and other extension conferences, and on any other work directly related to office administration.
18. Days in field should include all days spent on official duty other than "days in office."
19. Letters written should include all original letters on official business. (Duplicate letters should not be included.)
20. An extension school is a school usually of 2 to 6 days' duration, arranged by the Extension Service, where practical instruction is given to persons not resident at the college. An extension short course differs from an extension school in that it is usually held at the college or another educational institution and usually for a longer period of time.
21. Records consist of definite information on file in the county office that will enable the agent to verify the data on extension work included in this report.
22. The county extension association or committee is that county organization, whether a membership or a delegate body, which is recognized officially in the conduct of extension work in the county.

GENERAL ACTIVITIES

Report Only This Year's Extension Activities and Results That Can Be Verified

1. List below the names, titles, and periods of service of the county extension agents whose work is included in this report. Include time of assistants with that of regular agent.

AGENT	Total months of service this year	Days devoted to ag- conservation and adjustment programs	Days devoted to relief work	Total days in office	Total days in field
	(a)	(b)	(c)	(d)	(e)
<u>Martha C. Cook</u> (Name) Home demonstration agent	12			89	176½
Asst. home demonstration agent					
<u>F. L. Price</u> 4-H Club agent	6			31	120
Assistant county agent in charge of club work					
<u>C. H. Turner</u> Agricultural agent	12	126	0	149	145
Assistant agricultural agent					

2. County extension association or committee:

(a) Agricultural extension: (1) Name Agricultural Advisory Board (2) Number of members 40

(b) Home demonstration: (1) Name Homemaking Board (2) Number of members 39

(c) 4-H Club: (1) Name 4-H Club Council (2) Number of members 52

3. Number of communities in county where extension work should be conducted 24

4. Number of above communities in which the extension program has been planned cooperatively by extension agents and local committees 15

5. Number of different voluntary county or community project leaders or committeemen actively engaged in forwarding the extension program: 15

(a) Adult work { (1) Men 105 (2) Women 20 } (b) 4-H Club work { (1) Men 2 (2) Women 5 } (3) Older club boys 1 (4) Older club girls 1

6. Number of different paid local leaders engaged in agricultural-conservation and adjustment programs: (a) Men 27 (b) Women

7. Number of clubs or other groups organized to carry on adult home demonstration work 13

8. Number of members in such clubs or groups 372

ITEM	Home demonstration agents	4-H Club agents	Agricultural agents	County total ¹
	(a)	(b)	(c)	(d)
9. Number of 4-H Clubs	<u>13</u>		<u>13</u>	<u>15</u>
10. Number of different 4-H Club members enrolled: (1) Boys <u> </u> (2) Girls <u>237</u>			<u>186</u> <u>4</u>	<u>186</u> <u>241</u>
11. Number of different 4-H Club members completing: (1) Boys <u> </u> (2) Girls <u>194</u>			<u>98</u> <u>4</u>	<u>98</u> <u>198</u>

12. Number of different members enrolled in 4-H Club work for:⁴

MEMBERS	1st year	2d year	3d year	4th year	5th year	6th year and over
(a) Boys	<u>50</u>	<u>53</u>	<u>44</u>	<u>31</u>	<u>8</u>	
(b) Girls	<u>121</u>	<u>42</u>	<u>31</u>	<u>23</u>	<u>13</u>	<u>11</u>

¹ County total should equal sum of preceding three columns minus duplications due to two or more agents participating in the same activity or accomplishment.

² Report the total number of different boys or girls enrolled in club work. This total should equal the sum of the project enrollments reported on pages 17 to 26, minus duplications due to the same boy or girl carrying on two or more subject-matter lines of work. Do not include boys and girls enrolled late in the year in connection with the succeeding year's program.

³ Same as footnote 2 but refers to completions instead of enrollments.

⁴ The total for this question should agree with county total, question 10.

	(2) 4-H Club	(a) Number	7		7	
		(b) Total attendance	130		130	
34. Number of above meetings (questions 27-34) at which discussion group method of presentation was followed				24	24	34

SUMMARY OF EXTENSION INFLUENCE FOR YEAR

It is highly desirable for extension workers to consider the proportion of farms and farm homes in the county which have been definitely influenced to make some substantial change in farm or home operations as a result of the extension program for men, women, boys, and girls. It is recognized that this information is very difficult for agents to report accurately, so a conservative estimate based upon such records, surveys, and other sources of information as are available will be satisfactory. Such estimates should be marked "Est."

Include results of emergency activities as well as the regular extension program.

35. Number of farms in county	3947	35
36. Number of farms on which changes in practices have definitely resulted from the agricultural extension program	1860	36
37. Number of farm homes in which changes in practices have definitely resulted from the home demonstration program	630	37
38. Number of other homes in which changes in practices have definitely resulted from the home demonstration program	88	38
39. Number of farm homes with 4-H Club members enrolled	354	39
40. Number of other homes with 4-H Club members enrolled	30	40
41. Total number of different farm families influenced by some phase of the extension program (Include questions 35, 37, and 39, minus duplications.)	2510	41
42. Total number of different other families influenced by some phase of extension program (Include questions 38 and 40, minus duplications.)	78	42

¹ County total should equal sum of preceding three columns minus duplications due to two or more agents participating in the same activity or accomplishment.

NOTE.—Questions 18-34 refer to the total number of different activities conducted this year. The totals should equal the sums of the corresponding information reported on following pages minus duplications where the same activity relates to two or more lines of work.
