CONFERENCE FAIRS MIS. -----	11

I have as my aid in carrying on this work in the county a County Advisory Board. Each community club selects one of its outstanding member which together form an advisory board. The duty of the board being to formulate a plan of work for the county and assist the agent in putting it over; to provide for all county-wide activities; to send delegates and make reports at Hampton Farmers Conference and to the State Advisory Board, and to plan for and help to put over the County Farmers Conference.

The board sent delegates to Hampton Farmers Conference and to State Advisory Board, paying part of their expense. The board also gave valuable assistance in planning for and conducting the county conference.

Inbeginning our corn demonstration this year stress was laid on these points: deep fall plowing, good seed bed, good well selected seed and good cultivation and fertilization. The demonstrators were assured that by following these instructions, other conditions being favorable, a good yield could be expected.

All of the 21 demonstrators continued through the year, following instructions. Mr. Norvell Meggerson of Stapleton made an exceptionally good yield. On inspecting his demonstration, I found a pure bred Boone County corn. In answer to my comment he said "I had plenty of corn for seed, but I decided to use a pure bred corn and I am certainly satisfied, as I shall make more corn this year than I have ever made before. He reports a yield of 80 bushels per acre. His field was in a good state of cultivation and he applied a liberal coating of barn yard manure.

Two years ago Mr. W.J. Walker of Pamplin showed me a piece of land that he said was not producing satisfactorily and asked for my suggestion. I advised him to try peas. When I visited him last year, he asked me to go with him to see his pea field. He again asked for my suggestion as to what to follow his peas with. I suggested corn. This fall when I visited him I found a very fine piece of corn on that piece of land. Mr. Walker declares it to be the best crop of corn he ever got from it. Mr. Logan of Pamplin has been improving his farm for three years with cowpeas, clover and barn yard manure. While doing so he rented land for his corn crop. On my last visit to him he showed me a very good crop of corn and remarked "I am done renting. I can make my corn now at home"

Demonstration- Corn (Junior Work)

The Juniors have developed a spirit of local competition and the keen and interesting. Samuel and Lewis Ferguson and William and Manuel Lewis of Agee Club have battled for 2 years for first place in corn production in their club. They attacked their work in a determined manner this year Samuel and Lewis put on a liberal application of manure, William and Manuel turned under a crop of peas. All four had splendid demonstrations from pure bred seed. As a matter of stimulating interest, I spoke of their effort to Mt. Airy club and Wesley and Joe Banks challenged and Miron Woodson. The members of Mt. Airy club have for a long time showed an ambition to come up to Wesley Bank in corn production. In club meeting last year I was asked about Wesley's method. I replied "He uses good seed! That drove nearly every boy in the club to petition me to secure a good corn for his project this year. When I was gathering exhibits for the State Fair, I passed the Woodson boys' place with the Banks' boys' corn. Sabwell asked "Is the Banks boys corn better than ours?" I said "All is good, the judge will decide which is best. The fact is I considered it some what a tie."

The fathers of these boys were interested the year through. Whenever I went to inspect their demonstrations their fathers would go along.

copy 10

Well prepared seed bed ,good seed and fertilizer and treating seed for smut was our slogan in starting our two demonstrators this year. They both continued through the year following instructions.

Mr. S.R.Powell of Spout Spring made an average of 20 bushels per acre on his demonstration. I called on him the day he threshed. The man who threshed it pronounced it a good clean crop of wheat as good as any he had threshed during the season.Mr. Powell was easily the leader in average yield on his community. I asked his white neighbor who was there, and by-the-way was a member of the board of supervisors, and had been boasting of his 18 bushel average, why he allowed Powell to beat him and his tenants. He replied " We are not demonstrators".

Mr. Powell's wheat was made on a demonstration plat he had used for three years rotating with corn, crimson clover cowpeas and rye with a liberal application of lime.

We have pledged ourselves to raise at least hay enough ^{to feed} in the county to feed our stock. At our community meetings we discuss the bad of not raising hay enough for home consumption and depending on our tobacco money to supply our needs along that line. The low price of tobacco prevailing for the last two years has brought that fact home to us all. It is comparatively easy now to talk to the farmers about producing hay, and easy to have them act upon any sound suggestion given in the method of such production.

In at least one meeting in each community club we discuss the variety of crops that might be grown for hay; such crops as clover, oats, rye, and vetch, cowpeas and soy beans being the principal crops.

Mr. McKinley of Tower Hill had a fine demonstration of soy beans this year and filled his barn with hay. He assured me that he had enough soy bean hay with his other roughage to take of his stock for 12 months. Mr. Chambers of Bent Creek says he has not been without hay since he finished his first soy bean demonstration three years ago. On visiting Mr. Lewis of Bent Creek I found him cramming his barn with cowpea hay. When I made one of my regular visits to Mr. Powell last spring he took me to his barn and there he showed me a fine lot of new mown rye hay and asked me to feel and smell of its softness and sweetness. On my visit to Mr. Patterson this fall he showed me his alfalfa demonstration that had given him a second cutting and he was confident of a third good cutting. He also showed me his well filled barn and said "I don't have to worry any more about hay for my stock. My alfalfa takes care of that

I am sure of one thing our hay bill has been cut half in the county in the last five years. Farmers are seldom seen hauling hay from the market now.

My Advisory Board and I pledged ourselves to do all we could to help build up the soil in our county. Each community where a program has been worked out has made soil improvement a part of its program. Our Wattle Fry is lime, legumes and manure.

Mr. Yancey Abbott of Oakville said he could not get his farm to produce clover therefore found the farm was running down. He was advised to use lime. He straightway ordered a carload of lime at a saving of \$30. Now he has a nice stand of clover.

Mr. Walker was advised to use peas on a piece of land that he said did not produce well. He followed with a cover crop of rye and then planted it to corn. On my last visit to him he showed me a very fine crop of corn that he said was the best crop he had ever raised on that piece of land.

To stimulate interest in improving the soil, we conducted a county wide campaign this year. This being the first of a three year run. While the campaign was county-wide, it culminated in a Soil Improvement Contest in Stonewall, Oakville and Agee communities. The effect of the campaign and contest are very encouraging. Stonewall seeded more than 50 acres of cowpeas and soy beans to turn down. Oakville com. that had never had a demonstration for improving the soil seeded more than 12 acres of cowpeas to turn down. Agee went over the 40 acre mark in cow peas and soy beans.

Stonewall community used over 20 tons of lime and Oakville com. used over 40 tons; one farmer alone used 30 tons.

Mr. Reed of Concord who has been using improved methods of soil building for several years has really converted a run down farm into a nice little productive farm by the use of lime, manure and cowpeas.

Mrs. Trent of Stapleton had to abandon his farm several years ago because it did not produce enough to support his family. Since he has been back he has by the use of lime, manure and legumes brought that farm up to a high state of cultivation. In fact he brought one field up from a production of 15 bushels of corn per acre to a production of 40 bushels of corn per acre. Mr. Trent says he is now able to raise every thing that his family and stock consume on his own farm.

We stressed better breed, better feeding, better housing and better sanitary arrangement in starting out our poultry demonstrators this year.

All demonstrators in a great measure followed these instructions. As a result we have a much better breed of poultry in the county especially among the demonstrators who in every case have pure bred stock. The housing condition has improved so that we now have open front poultry houses on most of our farms. Housewives have been very insistant all the year on obtaining advice on care of poultry and I have given my best effort in instructing and supervising these fields. So well have these instructions been carried out that when the specialist visited the county last summer he announced the plants he visited creditable.

Mrs. Powell of Stapleton who conducts a poultry center is one of the outstanding. She strives to have her flock one of pure birds, well fed and in healthy quarters. She will keep a record on her birds as to cost and production. I can check up on her any day. She says she is proud of being a demonstrator says it helps her and gives her an ambition to strive. Mrs. Powell started this year with 40 hens and with these she says she has been able to take care of all the needs of the house such as sugar and coffee. Mrs. Powell sheet shows a balance of more than \$200 in her favor. With this she has been able to help her husband buy a car which is a means of helping her get her trade to market. Her poultry and eggs are of fine quality and find a ready market in Lynchburg where she sells once a week.

Mrs. Powell is furnishing her neighbors with pure cockerels and eggs for setting.

All farm families in the county keep one or more milk cows. there is no exception. In fact every organized community is pledged to provide enough food and feed for families and live stock and milk is considered an important factor in the food provision. In our meetings we often discuss whether a farmer can be considered a good manager who does provide plenty of milk for his family, especially his growing children.

To keep these cows in good condition and up to a good flow of milk I have urged sowing enough rye for early green pasture and such crops as cowpeas and soy beans to be used when the grasses fail in the fall, and to stow away a sufficient amount for winter use.

Mr. Walker of Pamplin told me the other day that a man came to him some time ago to buy a cow. In bargaining he told the man the cow gave 5 gallons of milk per day. The man said if he would guarantee that he would buy. He remarked he would if the man would feed her as he did. This statement was brought out because of a comment I had just made on his cows grazing in a knee deep pea crop.

On my last visit to Mr. McKinley Lewis, we visited his cowpea demonstration. He said I am going to put this in for my cow to eat this winter I paid \$25 for her 2 years ago but I would not take \$75 for her now. I said I don't blame you because you have made her over.

Our cows are looking much better because they are better fed and sheltered and are of better grade than in former years because the scrub bull is a stranger here.

In planning our program for the year we made raising food and feed enough for family and stock our big slogan. We stressed pork production as an important factor to be reckoned with in food production. We also advised that pork not economically produced was not profitably produced. We called attention to the fact that putting a pig in the pen at weaning time and keeping it there until killing time was poor practice and made the meat cost too much.

To correct this error we used 6 demonstrators to teach a lesson. Mr. W.J. Walker of Pamplin who says he has not bought a pound of meat since he has been a demonstrator, perhaps has the most complete grazing method. He starts his hogs in the spring on a rye pasture seeded the fall before, moving them from that to rape then to cowpeas and sorghum and allowing them to finish by hogging down corn planted behind the rye. Mr. Walker has succeeded by this method in raising more than enough meat for his family, and his method is known throughout the county by his talks at our conferences and my advertising his method as I go through the county.

In telling Mr. Mason Lewis of Towerhill of Mr. Walker's success he remarked "I shall order my pasture wire today. The next time I visited him he had his pasture established. During one of my visits to him last summer he said "My hogs are costing me practically nothing and are growing faster and in better shape than I have ever had them at this time in the year before. Mr. J.W.S. Logan has aside from a grazing lot, a wood pasture where his hogs can get the benefit of acorns in the fall. Mr. Logan says he not only is saved of buying meat but is also saved of buying pigs as he can now keep a brood sow economically.

We have succeeded in organizing nine community clubs in the county whose duty it is to work out a program for the year which will meet the vital needs of that particular community. These clubs give the agent an opportunity to handle his people in groups enabling his help to be more uniformly given and the community's need more easily found out. In this way an opportunity is also given to do team work in attacking and putting over any activity that effects the whole community. These clubs are scheduled to hold monthly meetings.

To hold the interest of the people and to get them to attend the meetings in good numbers we find it necessary to vary the programs to meet the needs and approval of the individual community. Communities with village centers such as Spout Spring, Evergreen and Pamplin can be more easily interested and better work can be accomplished when the program deals with home conveniences, garden, poultry and marketing. Appomattox being a town community, can be more effectively reached by a program featuring good homes, sanitation and garden. The communities some distance from towns, villages and railroads and depending on farming exclusively for their livelihood; such as Mt. Airy, Stonewall, Promise Land and Agee will respond readily to a program featuring soil improvement and field crops. All of the organized communities in the county have such programs as those mentioned.

We have also found that each community needs a program to draw attendance to its meetings. Spout Spring starts each meeting after opening exercises with reading a little local paper that gives the happenings of the community during the month. That is usual followed by a debate or a round table talk based on some vital need of the community. This program always brings results. Promise Land round tables some subject selected at a previous meeting; Pamplin uses some of its members to tell of some outstanding piece of work done, telling of method employed and giving results Stonewall for some time has had her school problem. We talked about that until we got a nice Rosenwald school building.

These communities pledge to send delegates to Hampton Farmers Conference when possible, and to send delegates and report at the county farmers conference and to exhibit at the county fair. Spout Spring and Appomattox sent delegates to Hampton Farmers Conference paying their way.

We held our regular county farmers conference in July to which 5 communities sent delegates. These delegates in their own way told of the improvements made in their respective communities through demonstration work. How to successfully fight the bean beetle was our main topic for round table discussion. It was brought out that most of the housewives were afraid to dust and in a majority of cases had resorted to the method of hand picking their gardens.

District Agent J.L. Charity and Local Agent J.W. Lancaster were with us and gave instruction in the matter of beetle control.

Demonstration

Fairs

Ten of my club boys sent exhibits to The Richmond and Tide Water State Fairs. Five won prizes at the Richmond State Fair.

Both adults and juniors exhibited at the regular county fair. The judge declared the improvement in quantity and quality to be 50 per cent over that of last year.

Demonstration

Miscellaneous

I have found that to retain the interest of all the people it is necessary for the agent to take a large part some time in their religious activities. I therefore organized a Sunday School association last spring in which both adults and juniors are interested. The association planned an annual get-together meeting known as a Joint Sunday School picnic. Six schools now compose the body. All the other schools of the county are allowed to become members on their application.

We held our first meeting on Labor Day with all the schools representing with their entire schools. More than five hundred people attended this meeting. ~~My District Agent Mr. Charity came up from Richmond and spent the morning with us.~~ The morning was taken up with Sunday School exercises and the afternoon games and recreation. The highest good spirit prevailed throughout the day. Every school had its own banner and every scholar a corresponding badge.

So impressed were the older people that they have agreed to stage a similar get-together meeting for our church congregations.

ANNUAL REPORT OF COUNTY EXTENSION WORKERS

This report form is to be used by county extension agents, such as county agricultural agent, home demonstration agent, club agent, and negro agent, reporting on their respective lines of work.

State Virginia County Appomattox
Report of P. W. Keelabam County Local Agent.
(Name) (Title)
From December 1st to November 30, 1927.

If agent has not been employed entire year, indicate exact period. Agents resigning during the year should make out this report before quitting the service.

READ DEFINITIONS, PAGES 3 AND 4

NEGRO EXTENSION WORK
COUNTY AGENT WORK

Approved:

Date Dec. 4, 1927

John L. Chaney
District Supervisor

Date _____

State Extension Director.

SUGGESTIONS RELATIVE TO THE PREPARATION OF THE COUNTY EXTENSION AGENT'S ANNUAL REPORT.

The annual report should be a review, analysis, interpretation, and presentation to the people of the county, the State, and the Nation of the sum total of the extension activities in each county for the year and the results obtained by the county extension agent assisted by the subject-matter specialists. The making of such a report is of great value to the county extension agent and the people of the county in showing the progress made during the year as a basis for future plans. It is of vital concern also to the State and Nation as a measure of rural progress and a basis for intelligent legislation and financial support.

Separate statistical and narrative reports are desired from each county extension agent in charge of a line of work, such as county agent, home demonstration agent, boys' and girls' club agent, and negro agent. Where an assistant agent has been employed a part or all of the year, a report on his or her work should be included with the report of the leader in charge of that line of work. Where an agent in charge of a line of work has quit the service during the year, the information contained in his or her report should be incorporated in the annual report of the agent on duty at the close of the report year, and the latter report so marked. Where two or more extension agents are employed in a county, each in charge of a line of work, care should be exercised to avoid including the same data in the statistical report of more than one agent.

At least four copies of the annual report should be made: One copy for the county officials, one copy for the agent's files, one copy for the State extension office, and one copy for the Extension Service, United States Department of Agriculture. The report to the Washington office should be sent through the State extension office.

NARRATIVE SUMMARY.

The narrative report should be a statement in orderly fashion and arranged under appropriate subheadings, of the work done, methods used, and results obtained under each project, as well as of the general work accomplished. Every statement should be clear-cut, concise, forceful, and, where possible, reinforced with ample data from the statistical summary. In the preparation of the part of the report relative to each project, the results reported in the statistical summary for the project should be analyzed, conclusions drawn, and recommendations made. The report may well be illustrated with photographs, maps, diagrams, blue prints, or copies of charts and other forms used in demonstration work. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs, and reasonably good margins left. The pages should be numbered in consecutive order.

The following outline is suggestive of how the narrative report may be clearly and systematically presented:

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT.

- I. Cover and title page.
- II. Table of contents.
- III. Status of county extension organization.
 - (1) Form of organization—changes and development.
 - (2) Function of local people, committees, or project leaders in developing the program of work.
 - (3) General policies, including relationships to other organizations.
- IV. Program of work, goals established, methods employed, and results achieved.
 - (1) Factors considered and methods used in determining program of work.
 - (2) Project activities and results.

(a) Bulls	}	(including diseases and insects).
(b) Farm crops		
{ Horticulture		
{ Beautification of home grounds		
(c) Home gardens		
(d) Forestry		
(e) Rodents, predatory animals, and birds.		
(f) Animal husbandry		
{ Dairy husbandry	}	(including diseases and insects).
{ Home dairy		
{ Poultry husbandry		
(g) Home poultry		

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT—Continued.

IV. Program of work, etc.—Continued.

(2) Project activities and results—Continued.

- (5) Rural engineering.
- (6) Rural engineering—home.
- (7) Agricultural economics, including farm management and marketing.
- (8) Home marketing.
- (9) Foods.
- (10) Nutrition.
- (11) Clothing.
- (12) Home management.
- (13) Home furnishings.
- (14) Home health and sanitation.
- (15) Community activities.
- (16) Miscellaneous.

V. Outlook and recommendations, including suggestive program of work for next year.

VI. Summary of activities and accomplishments, preferably of one or two typewritten pages only, placed at the beginning or end of the narrative report.

STATISTICAL SUMMARY.

To supplement the narrative part of the report, and in order that comparable State and National summaries may be made, it is necessary to include a statistical summary of the work in each county. The following form has been prepared to insure uniformity of reporting. In addition to the questions asked under each subdivision of the report, space is provided to add further data if desired. The statistical summary will grow naturally out of the field and office records.

DEFINITIONS OF TERMS USED IN THIS REPORT.

1. A PROGRAM OF WORK is a definitely outlined plan for extension work.
2. A PROJECT is a definite, systematic, organized plan for carrying out some phase of the extension program of work, providing for what is to be done, how much, when, where, how, and by whom.
3. MISCELLANEOUS WORK includes work which has not yet become a regular part of the program of work—work other than project work.
4. A COMMUNITY, for the purposes of this report, may be any one of the several units into which the county is divided for purposes of conducting organized extension work.
5. A PROJECT LEADER OR LOCAL LEADER is a person, selected because of his or her special interest and fitness, who functions as a leader in advancing some phase of the local program of extension work.
6. A DEMONSTRATION is an example designed to show the practical application of an established fact. Demonstrations as contemplated in this report are of two kinds, method demonstrations and result demonstrations.
 - A method demonstration is a demonstration given by an extension worker or other trained leader to a group for the purpose of showing them how to carry out a practice. Synonyms: Lecture demonstration. Examples: Demonstrations of canning, mixing of spray materials, and culling of poultry.
 - A result demonstration is a demonstration carried on by a farmer, farm woman, boy, or girl under the direction of the extension service, involving a substantial period of time, records of results, and comparisons. Examples: Child-feeding, corn-culture, and orchard-management demonstrations.
7. A DEMONSTRATOR is a farmer, farm woman, boy, or girl who, under the direction of the extension service, conducts a result demonstration.
8. MEMBERS COMPLETING should include those who have satisfactorily finished the work outlined for the current year.
9. A DEMONSTRATION MEETING is a meeting held to give a method demonstration or to start, inspect, or further a result demonstration.
10. A TRAINING MEETING is a meeting at which project leaders or local leaders are trained to carry on extension activities in their respective communities.
11. AN OFFICE CALL OR TELEPHONE CALL is a visit or call by a farmer or other person seeking agricultural or home economics information, as a result of which some definite assistance or information is given.
12. A FARM VISIT is a call at a farm by the agent at which some definite information is given or concrete plan of work outlined, or some valuable information obtained from the farmer regarding his work, or the better practice prevailing in his neighborhood.
13. A HOME VISIT is a call at a home by the agent at which some definite information is given or concrete plan of work outlined, or some valuable information obtained from the farm woman regarding her work, or the better practice prevailing in her neighborhood.
14. DAYS IN OFFICE should include time spent by the county agent in his office, at county agent conferences, and any other work directly related to office administration.
15. DAYS IN FIELD should include all days spent on official duty other than those spent in office.
16. LETTERS WRITTEN should include all single letters on official business.

4

DEFINITIONS OF TERMS USED IN THIS REPORT—Continued.

17. A **FARMERS' INSTITUTE** is one of a series of meetings of one to two days' duration, arranged by a central State farmers' institute agency, at which agricultural and home-economics problems are discussed, usually by outside speakers employed for the purpose.
18. An **EXTENSION ON MOVABLE SCHOOL** is an itinerant school usually of two to six days' duration where practical but systematic instruction is given to persons not resident at the college. An **EXTENSION SCHOOL CONTRACT** differs from an extension school in that it is usually held at the college or other educational institution and usually for a longer period of time, but not exceeding two weeks.
19. **RECORDS** consist of definite information filed in the county office that will enable the agent to verify the data on extension work included in this report.
20. **FARMS ON WHICH PRACTICE EXPERIENS** is a new or improved practice adopted on a farm or in a home during the year as a result of extension teaching. Examples: Spraying of potatoes for disease, canning of fruits and vegetables, use of balanced rations, and hat making.

GENERAL ACTIVITIES.

Report only this year's extension activities and results that are supported by records.

If an assistant agent has been employed during the year, include his or her work with that of the agent.

1. List below the names, titles, and periods of service of the county extension agents whose work is included in this report. 1

P. W. Callahan	Local Agent	12 months
(Name)	(Title)	(Months of service this year)

2. County association, if any, fostering extension work. 11

(a) Name	County Advisory Board	1
(b) Number of members		15

3. Number of communities in county where extension work should be conducted. 2

	12
--	----

4. Number of above communities in which the extension program has been cooperatively worked out by extension agents and people concerned. 3

	9
--	---

5. Number of voluntary county, community, or local leaders actively engaged in forwarding the extension program with— 4

(a) Juniors		7
(b) Adults		23

6. Number of clubs carrying on extension work: 5

(a) Junior		7
(b) Adult		9

7. Membership in above clubs: 6

(a) Boys ¹	71	(c) Men	26 families
(b) Girls ¹	7	(d) Women	

8. Number of club members completing: 7

(a) Boys ¹	60	(c) Men	49
(b) Girls ¹	6	(d) Women	8

9. Number of members in junior club work for four or more years: 8

(a) Boys		31
(b) Girls		

¹ Report the total number of different boys or girls enrolled in club work. This total should equal the sum of the project enrollments reported on pages 8 to 21, less any duplications due to the same boys or girls carrying on two or more subject-matter lines of work.

² Include those boys and girls enrolled in club work as reported under 6(a) and 6(b) who have finished the work undertaken on such portion of it as it was planned to finish during the report year.

8-2148

GENERAL ACTIVITIES—Continued.

9. Number of junior teams trained	(a) Judging	9
	(b) Demonstration	
10. Number entering college this year who may have been club members		10
11. Total number of farm visits ¹ made in conducting extension work		428	11
12. Number of different farms visited		93	12
13. Total number of home ² visits made in conducting extension work		26	13
14. Number of different homes visited		8	14
15. Number of calls ³ relating to extension work	(a) Office	22	15
	(b) Telephone	
16. Number of days agent spent in office		48	16
17. Number of days agent spent in field		264	17
17½. Number of news articles prepared for press ⁴		17½
18. Number of individual letters written		424	18
18½. Number of bulletins distributed		591	18½
19. Number of fairs at which extension exhibits were made	(a) Community	1	19
	(b) County	1	
20. Training meetings held for local leaders	(1) Number	1	20
	(2) Leaders in attendance	7	
	(1) Number	3	
	(2) Leaders in attendance	49	
21. Method and result demonstration meetings ⁵ held (do not include meetings reported in number 20)	(a) Number	44	21
	(b) Attendance	1837	
22. Farmers' institutes held	(a) Number	22
	(b) Number of sessions	
	(c) Attendance	
23. Extension schools ⁶ and short courses held	(a) Number	23
	(b) Attendance	
24. Encampments held	(1) Number	24
	(2) Attendance by club members	
	(a) Boys	
	(b) Girls	
(b) Farm women	(1) Number	24
	(2) Attendance by club members	
	(3) Total attendance	
25. Other extension meetings attended and not previously reported	(a) Number	4	25
	(b) Attendance	918	
26. Number of meetings at which were shown	(a) Lantern slides	26
	(b) Motion pictures	
	(c) Charts	

¹ Do not count the same visit as both a farm visit and a home visit.² See definition on page 5.³ Include county and State press, agricultural journals, and home magazines. Do not count items relating to notices of meetings only.

5

PROGRAM SUMMARY

List below information on each project of the program of work for the year. If an assistant agent has been employed during the year, include his or her time with that of the agent. This page should not be filled out until the questions on the following pages have been answered.

Title of project.	Number of non-merchants participating 1	Number of local leaders assisting 2	Days spent on budget.	Days spent devoted to projects.	
	(a)	(b)	(c)	(d)	
Illustrative entry—Poultry	6	7	2	11	
27. Soils (page 7)	4	4		60	27
28. Farm crops (pages 6, 9, 10, 11)	2	24		120	28
29. Horticulture (page 12)—home gardens (page 27) Beautification of home grounds (page 26)	3	3		32	29
30. Forestry (page 13)	—	—	—	—	30
31. Rodents, predatory animals, and birds (page 13)	—	—	—	—	31
32. Animal husbandry (pages 14, 15, columns b, c, d, f)	4	3		36	32
33. Dairy husbandry (pages 14, 15, column a)—home dairy (page 29)					33

315. Number of lighting systems installed this year according to plans furnished.....	315
316. Number of poultry houses constructed this year according to plans furnished.....	316
317. Total number of different homes adopting improved practices relative to the rural-engineering work reported on this page.....	317

[Use space below to include other important data relating to rural engineering.]

BEAUTIFICATION OF HOME GROUNDS.

Report only this year's extension activities and results that are supported by records.

Do not list information which has been previously reported on page 12.

318. Number of project clubs or groups.....	(a) Women.....	318
	(b) Juniors.....	
319. Number of members enrolled in beautification of home grounds.....	(a) Women.....	319
	(b) Girls.....	
	(c) Boys.....	
320. Number of members completing.....	(a) Women.....	320
	(b) Girls.....	
	(c) Boys.....	
321. Number of method demonstrations given.....		321
322. Number of result demonstrations started or under way.....	(a) Women.....	322
	(b) Girls.....	
	(c) Boys.....	
323. Number of result demonstrations completed or carried through the year.....	(a) Women.....	323
	(b) Girls.....	
	(c) Boys.....	
324. Number of home grounds planted this year according to a landscape plan.....		324
325. Number of school and community grounds planted this year according to a landscape plan.....		325
326. Number of homes painted or whitewashed this year as a result of instruction in beautification.....		326
327. Total number of different homes beautifying home grounds this year.....		327

[Use space below to include other important data relating to beautification of home grounds.]

* States which do not organize clubs or groups on a project basis should not report on this question but should report on enrollment and completion.

HOME GARDENS.

Report only this year's extension activities and results that are supported by records.
Do not list information which has been previously reported on page 12.

328. Number of project clubs or groups ¹	(a) Women.....	328
	(b) Juniors.....	
329. Number of members enrolled in home gardens.....	(a) Women.....	329
	(b) Girls.....	
	(c) Boys.....	
330. Number of members completing.....	(a) Women.....	330
	(b) Girls.....	
	(c) Boys.....	
331. Number of method demonstrations given.....		331
332. Number of result demonstrations started or under way.....	(a) Women.....	332
	(b) Girls.....	
	(c) Boys.....	
333. Number of result demonstrations completed or carried through the year.....	(a) Women.....	333
	(b) Girls.....	
	(c) Boys.....	
334. Number of gardens involved in result demonstrations.....	(a) Women.....	334
	(b) Girls.....	
	(c) Boys.....	
335. Number of individuals adopting improved practices in growing fruit trees this year.....	(a) Women.....	335
	(b) Girls.....	
	(c) Boys.....	
336. Number of individuals adopting improved practices in growing bush and small fruits this year.....	(a) Women.....	336
	(b) Girls.....	
	(c) Boys.....	
337. Number of individuals adopting improved practices in growing grapes this year.....	(a) Women.....	337
	(b) Girls.....	
	(c) Boys.....	
338. Number of individuals adopting improved practices in growing vegetables this year.....	(a) Women.....	338
	(b) Girls.....	
	(c) Boys.....	
339. Number of individuals saving improved stock or seed for the first time.....	(a) Women.....	339
	(b) Girls.....	
	(c) Boys.....	
340. Number of homes spraying or otherwise treating garden crops for diseases and insect pests for the first time.....		340
341. Number of individuals growing winter gardens for the first time.....	(a) Women.....	341
	(b) Girls.....	
	(c) Boys.....	
342. Total number of different homes adopting improved practices relative to the home-garden work reported on this page.....		342

[Use space below to include other important data relating to home gardens.]

¹States which do not organize clubs or groups on a project basis should not report on this question but should report on enrollment and completion.

HOME POULTRY.

Report only this year's extension activities and results that are supported by records.
Do not list information which has been previously reported on pages 14 and 15.

343. Number of project clubs or groups ¹	(a) Women.....	} 343
	(b) Juniors.....
