NARRATIVE ANNUAL REPORT

SUSSEX COUNTY - 1939

J. W. Freeman, County Agent

COUNTY AGENT ANNUAL REPORT

TABLE OF CONTENTS

I - REGULAR EXTENSION ACTIVITIES AND ACCOMPLISHMENTS

A - Program Planning

B - 4-H Club Work

C - Rural Electrification

D - Other Activities:

1 - Sussex Cooperative Farm Bureau

2 - Immunization of hogs

3 - Experimental Work

4 - Miscellaneous

II - WORK IN CONNECTION WITH THE A. A. A.

A - Agricultural Conservation Program

B - Cotton Marketing Quotas

C - Cotton Price Adjustment Program

III - RECOMMENDATIONS AND OUTLOOK

I - REGULAR EXTENSION ACTIVITIES AND ACCOMPLISHMENTS:

A - Program Planning:

Five program planning discussions were held in each of the six communities in Sussex County during the months of February and March of 1939. The discussions were led by trained leaders in four of the six communities but the agent, who attended all discussions in the county, found it necessary to act as leader of the discussions in two of the communities. The agent feels it highly desirable to have as many discussions as possible led by trained farmer-leaders as trained farmer-leadership is one of the most important developments to be made in rural life. Developing trained leaders for four of the six communities was quite an accomplishment, the agent feels, and it is hoped that the other two communities will develop similar leadership in the near future.

It is impossible to measure the value of such discussions at this time. That they have been extremely beneficial there can be no doubt. The agent fears that farmers do not think as scientifically about their farm problems as they should - problems of local, state, national and international scopes, and there can be no doubt of the value of program planning discussions if the farmers can be made to realize that their problems extend far beyond their county and state boundaries and through this information, work out a sounder and more practical farm program for his farm.

B - 4-H Club Work:

The 4-H Club work was begun in 1939 by W. K. Miller, Assistant County Agent in Sussex and Hanson Counties and was completed by H. B. Powers in the same capacity. These two men did excellent work under some most adverse circumstances and their work cannot be praised too highly. The report of 4-H Club work in Sussex has been prepared by Mr. Powers and is to be attached to this report.

C - Rural Electrifications:

It is a source of great pleasure to any extension worker to be able to help rural people and then be able to see the results of his efforts permanently.

This is true particularly in the case of rural electrification in Sussex County. The agent does not attempt to take all the credit for the sixty miles of rural electric lines built, or nearly built, in Sussex County in 1939 by the Rural Electrification Administration. The fine work and cooperation received by the agent, from the various farm people in the rural areas, in securing this fine electric service cannot be commended too highly. With respect to rural electrification, it should be adequate here to say that it is obvious that much time and labor was spent in getting the service and the value of such service speaks for itself.

D - Other Activities:

1 - Sussex Cooperative Farm Bureaus

The Farm Bureau has become a permanent institution in Sussex County. Its value is well appreciated by most farmers as well as by all agricultural leaders. It, like any other great farm organization, is indispensable to the welfare of the farmers. The agent has given considerable time in advising with and assisting Farm Bureau officials in the county in making their program a success. The Agent lent material aid of the Sussex Cooperative Farm Bureau in joining hands with other Farm Bureaus in this area to organize the Southside Farm Bureau Exchange, with headquarters at Petersburg, Virginia. This Exchange performs a valuable service for its members, enabling them to purchase farm supplies at considerable savings. The Sussex Farm Bureau also saved its members considerable money on gasoline and oil and fertilizers and lime. The agent is proud that he was instrumental in organizing such a fine cooperative and in keeping it going.

2 - Immunisation of Hogs:

The agent contacted over 300 hog producers in 1939 and immunized nearly 4000 hogs against cholera. While the agent tried to do a minimum amount of this work, it was impossible to keep from doing some of it. The credit for most of the work along this line goes to M. D. Jones,

colored agent, who has done a valuable piece of work and rendered a fine service to the farmers.

3 - Experimental Work:

The agent assisted the Holland Experiment Station, through its representative, Mr. Lawrence I. Miller, to conduct two demonstrations in the county by dusting peanuts with sulphur to prevent leaf spot. Both demonstrations were unusually successful, results showing from 200 to 400 pounds per acre increase for the treated plots as against the check plots. Everything along this line indicates considerable savings can be made in peanut production by farmers who dust wisely.

4 - Miscellaneous:

Miscellaneous extension activities have been numerous and each deal with such things as advice and assistance to individual farmer's relative to problems in agronomy, horticulture, animal husbandry, poultry husbandry, etc.

II - WORK IN CONNECTION WITH THE A. A. A.

A - Agricultural Conservation Programs

All farms in Sussex County were covered by a work sheet in 1939 with the exception of eight, whose owners refused to execute a work sheet. There were 1506 work sheets in 1939 of which 750 will earn a payment. The 750 farms who complied with the 1939 Program will receive, or have received, approximately \$40,000. This is about \$20,000 less than was received by farmers in 1938 under the Agricultural Conservation Program and the decrease can be attributed to a considerable increase in peanut and tobacco acreage in 1939. The outstanding success of the Agricultural Conservation Program in 1939, as the agent sees it, was not the payments made for compliance, but was the record-breaking seeding of winter cover crops and green manure crops. Such a program as this is well worth many times the money expended in improved soils and crop yields and subsequent increases in farm income. The agent spent considerable time in conducting, with committeemen, educational meetings throughout the year

and there is no doubt in the agent's mind that the key to the success of these programs lies entirely in the manner and completeness of conducting the educational work. The agent lent the AAA committeemen much time in helping them set peanut, tobacco and cotton allotments and in conducting the cotton and tobacco referendums.

B - Cotton Marketing Quotas:

Very little enthusiasm was manifested on the part of farmers regarding cotton marketing quotas due to the low price for cotton and the bad production season. About 900 cotton growers received allotments but only 600 actually planted cotton. Extremely low yields were made due to boll weevil and practically all of the growers planted within their acreage allotment.

C - Cotton Price Adjustment Program:

Cotton price adjustment payments for 900 cotton growers have been received, totalling \$20,000. This program was comparatively easy to administer and the payments the growers received were very much needed to bolster up the depressed prices they received for their cotton.

III - RECOMMENDATIONS AND OUTLOOK: .

The extension program will be improved in 1940, the agent hopes, through further use of program planning committees in fostering much needed extension projects. More practical demonstrations will be carried on, more educational work with relation to better farming practices will be done and, in effect, a well balanced extension program will be inaugurated.

The same efforts to make the 1939 AAA programs a success will be continued in 1940.

COMBINED ANNUAL REPORT OF COUNTY EXTENSION WORKERS

This report form is for use by county extension agents in making a combined statistical report on all extension work done in the county during the year. Agents resigning during the year should make out this report before quitting the service.

State Virginia County Sussex

REPORT OF

_____ (Name) <u>Home Demonstration Agent.</u>	From _____ to _____, 193
_____ <u>Assistant Home Demonstration Agent.</u>	From _____ to _____, 193
_____ <u>4-H Club Agent.</u>	From _____ to _____, 193
<u>J. B. Powers</u> <u>Assistant County Agent in charge of Club Work.</u>	From <u>Sept. 1, 1939</u> to <u>Nov. 30,</u> 1939
<u>J. Greenow</u> <u>Agricultural Agent.</u>	From <u>Dec. 1, 1938</u> to <u>Nov. 30,</u> 1939
_____ <u>Assistant Agricultural Agent.</u>	From _____ to _____, 193

READ SUGGESTIONS, PAGES 2 AND 3

Approved: _____

Date _____ State Extension Director.

SUGGESTIONS RELATIVE TO THE PREPARATION OF THE COUNTY EXTENSION AGENT'S ANNUAL REPORT

The annual report should be a summary, with analysis and interpretations, for presentation to the people of the county, the State, and the Nation of the extension activities in each county for the year, and the results obtained by the county extension agents assisted by the subject-matter specialists. The making of such a report is of great value to the county extension agents and the people of the county in showing the progress made during the year as a basis for future plans. It is of vital concern also to the State and Nation as a measure of rural progress and a basis for intelligent legislation and financial support of extension work.

At least four copies of the annual report should be made: One copy for the county officials, one copy for the agent's files, one copy for the State extension office, and one copy for the Extension Service, United States Department of Agriculture. *The report to the Washington office should be sent through the State extension office.*

STATISTICAL SUMMARY

Where two or more agents are employed in a county they should submit a single statistical report showing the combined activities and accomplishments of all county extension agents employed in the county during the year. Results obtained through assistance rendered agents by specialists should also be included. This report shows, insofar as possible, the part each agent has taken in forwarding the extension program. The county totals should be the sum of the activities and accomplishments of individual agents minus duplications due to two or more agents participating in the same activity or accomplishment. The county totals, when properly recorded, show the progress made in the county during the year in forwarding the entire extension program. Negro men and women agents should prepare a combined statistical report separate from that of the white agents.

The statistical summary should be a report of this year's activities and results that can be verified by records on file in the county office. Where records are not available careful estimates are desired. Such estimates should be marked "Est."

NARRATIVE SUMMARY

A separate narrative report is desired from the leader of each line of work, such as county agricultural agent, home demonstration agent, boys' and girls' club agent, and Negro agent. Where an assistant agent has been employed during a part or all of the year, the report of his or her work should be included with the report of the leader of that line of work. Where an agent in charge of a line of work has quit the service during the year, the information contained in his or her report should be incorporated in the annual report of the agent on duty at the close of the report year, and the latter report so marked.

The narrative report should summarize and interpret, under appropriate subheadings, the outstanding results accomplished and the extension methods used for each project. Every statement should be clear-cut, concise, forceful, and, where possible, reinforced with necessary data from the statistical summary. Use a descriptive style of writing, giving major accomplishments first under each project. Give extension methods fully relating to outstanding results only, and where practicable illustrate with photographs, maps, diagrams, blueprints, or copies of charts and other forms used. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs and reasonably good margins. The pages should be numbered in consecutive order.

The following outline is merely suggestive of how the narrative report may be clearly and systematically presented. Each agent should prepare an outline to fit the situation and the work to be reported.

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT

- I. Cover and title page.
- II. Table of contents.
- III. Summary of activities and accomplishments, preferably of one or two typewritten pages only, placed at the beginning of the narrative report.
- IV. Changes in county extension organization.
 - (1) Form.
 - (2) General policies.
 - (3) Procedure.
- V. County program of work.
 - (1) Factors considered and methods used in determining program of work.
 - (2) Project activities and results.

Under appropriate headings and subheadings present in some detail for each major project or line of work the goals set up, the methods used, the results achieved, and the significance of these results in terms of improved farms and homes and of better community life.
- VI. Outlook and recommendations, including suggestive program of work for next year.

TERMINOLOGY

To insure reports which convey the intended meaning to others and to facilitate the compilation of satisfactory national statistics on extension, it is extremely important that terms be used in accordance with accepted definitions. The following definitions of extension terms have been approved by the United States Department of Agriculture and the Association of Land Grant Colleges and Universities. Agents should read these definitions before starting to write the annual reports.

DEFINITIONS OF EXTENSION TERMS

1. A program of work is a statement of the specific projects to be undertaken by the extension agents during a year or a period of years.
2. A plan of work is a definite outline of procedure for carrying out the different phases of the program of work. Such a plan provides specifically for the means to be used and the methods of using them. It also shows what, how much, when, and where the work is to be done.
3. A community is a more or less well-defined group of rural people with common interests and problems. Such a group may include those within a township, trade area, or similar limits. For the purpose of this report a community is one of the several units into which a county is divided for conducting organized extension work.
4. A project leader, local leader, or committeeman is a person who, because of special interest and fitness, is selected to serve as a leader in advancing some phase of the local extension program. A project leader may be either an organization or a subject-master leader.
5. Demonstrations as contemplated in this report are of two kinds—method demonstrations and result demonstrations. A method demonstration is a demonstration given by an extension worker or other trained leader for the purpose of showing how to carry out a practice. Examples: Demonstrations of how to can fruits and vegetables, mix spray materials, and cull poultry.
6. A result demonstration is a demonstration conducted by a farmer, home maker, boy, or girl under the direct supervision of the extension worker, to show locally the value of a recommended practice. Such a demonstration involves a substantial period of time and records of results and comparisons, and is designed to teach others in addition to the person conducting the demonstration. Examples: Demonstrating that the application of fertilizer to cotton will result in more profitable yields, that underground of certain children can be corrected through proper diet, that the use of certified seed in growing potatoes is a good investment, or that a large farm business results in a more efficient use of labor.
7. The adoption of a farm or home practice resulting from a demonstration or other teaching activity employed by the extension worker as a means of teaching is not in itself a demonstration.
8. A result demonstrator is an adult, a boy, or a girl who conducts a result demonstration as defined above.
9. A cooperator is a farmer or home maker who agrees to adopt certain recommended practices upon the solicitation of an extension worker. The work is not directly supervised by the extension agent and records are not required, but reports on the success of the practices may be obtained.
10. A 4-H Club is an organized group of boys and/or girls with the objectives of demonstrating improved practices in agriculture or home economics, and of providing desirable training for the members.
11. 4-H Club members enrolled are those boys and girls who actually start the work outlined for the year.
12. 4-H Club members completing are those boys and girls who satisfactorily finish the work outlined for the year.
13. A demonstration meeting is a meeting held to give a method demonstration or to start, inspect, or further a result demonstration.
14. A leader-training meeting is a meeting at which project leaders, local leaders, or committeemen are trained to carry on extension activities in their respective communities.
15. An office call is a call in person by an individual or a group seeking agricultural or home-economics information, as a result of which some definite assistance or information is given. A telephone call differs from an office call in that the assistance or information is given or received by means of the telephone. Telephone calls may be either incoming or outgoing.
16. A farm or home visit is a call by the agent at a farm or home at which some definite information relating to extension work is given or obtained.
17. Days in office should include time spent by the county extension agent in the office, at annual and other extension conferences, and on any other work directly related to office administration.
18. Days in field should include all days spent on official duty other than "days in office."
19. Letters written should include all original letters on official business. (Duplicated letters should not be included.)
20. An extension school is a school usually of 2 to 6 days' duration, arranged by the Extension Service, where practical instruction is given to persons not resident at the college. An extension short course differs from an extension school in that it is usually held at the college or another educational institution and usually for a longer period of time.
21. Records consist of definite information on file in the county office that will enable the agent to verify the data on extension work included in this report.
22. The county extension association or committee is that county organization, whether a membership or a delegate body, which is recognized officially in the conduct of extension work in the county.

GENERAL ACTIVITIES

Report Only This Year's Extension Activities and Results That Can Be Verified

1. List below the names, titles, and periods of service of the county extension agents whose work is included in this report. Include time of assistants with that of regular agent.

AGENT		Total months of service this year	Days devoted to agr.-conservation and adjustment programs	Days devoted to relief work	Total days in office	Total days in field
		(a)	(b)	(c)	(d)	(e)
(Name) _____	Home demonstration agent.....					
	Asst. home demonstration agent.....					
	4-H Club agent.....	12	-	-	11	35
<i>H. B. Powers</i>	Assistant county agent in charge of club work.....					
<i>J. H. Freeman</i>	Agricultural agent.....	12	213	-	139.5	135
	Assistant agricultural agent.....					

2. County extension association or committee:

(a) Agricultural extension:

(1) Name *Missouri County Agric. Com. Committee* (2) Number of members *21*

(b) Home demonstration:

(1) Name _____ (2) Number of members *-*

(c) 4-H Club:

(1) Name _____ (2) Number of members *-*3. Number of communities in county where extension work should be conducted *6*4. Number of above communities in which the extension program has been planned cooperatively by extension agents and local committees *6*

5. Number of different voluntary county or community project leaders or committeemen actively engaged in forwarding the extension program:

(a) Adult work { (1) Men *20* (2) Women *-* } (b) 4-H Club work { (1) Men *-* (2) Women *-* } (3) Older club boys *0* (4) Older club girls *0* }

6. Number of different paid local leaders engaged in agricultural-conservation and adjustment programs { (a) Men *39* (b) Women *0* }7. Number of clubs or other groups organized to carry on adult home demonstration work *-*8. Number of members in such clubs or groups *-*

ITEM	Home demonstration agents (a)	4-H Club agents (b)	Agricultural agents (c)	County total (d)
9. Number of 4-H Clubs.....	-	4	-	4
10. Number of different 4-H Club members enrolled.....	-	(1) Boys <i>82</i>	-	<i>82</i>
		(2) Girls <i>64</i>		
11. Number of different 4-H Club members completing.....	-	(1) Boys <i>10</i>	-	<i>10</i>
		(2) Girls <i>15</i>		

12. Number of different members enrolled in 4-H Club work for:¹

MEMBERS	1st year	2d year	3d year	4th year	5th year	6th year and over
(a) Boys.....	<i>35</i>	<i>24</i>	<i>14</i>	<i>4</i>	<i>3</i>	<i>2</i>
(b) Girls.....	<i>30</i>	<i>12</i>	<i>11</i>	<i>7</i>	<i>3</i>	<i>1</i>

¹ County total should equal sum of preceding three columns minus duplications due to two or more agents participating in the same activity or accomplishment.² Report the total number of different boys or girls enrolled in club work. This total should equal the sum of the project enrollments reported on pages 7 to 24, minus duplications due to the same boy or girl carrying on two or more subject-matter lines of work. Do not include boys and girls enrolled late in the year in connection with the succeeding year's program.³ Same as footnote 2 but refers to completions instead of enrollments.⁴ The total for this question should agree with county total, question 10.

SUMMARY OF EXTENSION INFLUENCE FOR YEAR

It is highly desirable for extension workers to consider the proportion of farms and farm homes in the county which have been definitely influenced to make some substantial change in farm or home operations as a result of the extension program for men, women, boys, and girls. It is recognized that this information is very difficult for agents to report accurately, so a conservative estimate based upon such records, surveys, and other sources of information as are available will be satisfactory. Such estimates should be marked "Est."

Include results of emergency activities as well as the regular extension program.

35. Number of farms in county	1306	35
36. Number of farms on which changes in practices have definitely resulted from the agricultural extension program	140 Est.	36
37. Number of farm homes in which changes in practices have definitely resulted from the home demonstration program	—	37
38. Number of other homes in which changes in practices have definitely resulted from the home demonstration program	—	38
39. Number of farm homes with 4-H Club members enrolled	94	39
40. Number of other homes with 4-H Club members enrolled	20	40
41. Total number of different farm families influenced by some phase of the extension program (Include questions 35, 37, and 39, minus duplications.)	204 Est.	41
42. Total number of different other families influenced by some phase of extension program (Include questions 38 and 40, minus duplications.)	20	42

* County total should equal sum of preceding three columns minus duplications due to two or more agents participating in the same activity or accomplishment.

NOTE.—Questions 35-39 refer to the total number of different activities conducted this year. The totals should equal the sums of the corresponding information reported on following pages minus duplications where the same activity relates to two or more lines of work.
