- VII. Miscellaneous.

STATUS OF COUNTY EXTENSION ORGANIZATION 1928.

The "Appomattox County Agricultural Advisory Council" is the name of the Extension organization in this County. My work is directed by this Board, which is composed of five farmers, one business man from each Magisterial District, Superintendent of the local Experiment Station, Smith-Hughes Teacher, Editor of the County paper and two ladies from each District.

The purpose of this organization is to work out plans or programs for developing the County Agriculturally and educationally, and to aid the County Agent in putting the plans across after they are worked out.

Before attempting to plan the County's work the Council with the County Agent, meet around the table and assist the Agent in his proposed plan of work for the following year. The Council is of untold value to the County Agent.

The five year program is being carried out in most cases with splendid results. The Agent is endeavoring to accomplish recommendations worked out in the five year program in order that Agricultural conditions may be improved.

The following are the projects undertaken as the major part of the 1928 program: Soil Improvement, Forage Crops, Grain, Live Stock, Horticulture, Agricultural Engineering, Boy's and Girl's Club Work, County Fair.

GOALS ESTABLISHED.**RESULTS ACHIEVED.****SOIL IMPROVEMENT.**

10 Crop Rotation	10 completed.
30 Lime	36 "
8 Fertilizer	8 "
10 Legumes	41 "

FORAGE CROPS.**(Summer and Fall)**

AGRICULTURAL ENGINEERING.4 Terracing
3 Rains Installed2 completed.
Nothing accomplished.**BOY'S and GIRL'S CLUB WORK.**8 Organized Clubs
100 Members8 Organized
108 Members.**SOIL IMPROVEMENT.**

Realizing the quickest way to bring about soil improvement is through the use of "more legumes," lime and high analysis fertilizer." We were successful in getting a larger number of farmers than ever to use lime this year which represents one thousand and fifty (1050 T.) tons, or five hundred and twenty five (525 A.) acres limed.

The Agent is constantly stressing sweet clover as one of our best soil improving crops with the result that more farmers than ever are sowing this legume, using inoculation and lime by directions given.

The Agent was successful in persuading four farmers to save their sweet clover for seed. The result, in these farmers have enough seed for their own use and some to sell their neighbors.

FARM CROPS.

Most all crop yields in the county being low, the Agent is emphasizing the importance of a crop rotation in order to get sufficient plant food to produce more profitable crops.

A rotation such as tobacco, wheat, clover or mixed grasses, one or two years and corn, wheat, clover or grasses one or two years.

The farm crop project covers the major crops grown in the County and are reported as follows:

WHEAT

This year there were eight farmers growing certified wheat which represents around one hundred (100) acres with an increase of two bushels to the acre. While the season of 1927 was not favorable for wheat the increase is due largely to thorough preparation of seed bed, using good seed free from smut.

During the fall of 1926 the Agent devoted much time in holding demonstrations throughout the County treating seed for the prevention of smut. The result is the millers tell me they rarely ever see any wheat infected with smut.

With the assistance of the Plant Pathologist we treated seed from several crops of wheat for the prevention of loose smut using the hot water method.

CORN.

The work conducted with this crop was a selection of good seed varieties and fertilization. The farmers took the Agents advice in securing good seed of known variety for planting this year's crop. Farmers who formerly used 16% acid phosphate, 4

the Agent was able to get some of the growers to use 3-8-3 and 4-8-4 for this crop. - had a good crop of corn due to the careful preparation of the seed bed, cultural methods and proper fertilization. Boone County, Casey's pure bred, Virginia White Dent of White Corn and Reir's Yellow Dent and Leaning, of the yellow varieties were used.

OATS and BARLEY

Oats and barley are grown by very few farmers in this County. However, the four growing oats and the two growing barley made splendid yields and were pleased with their results.

ALFALFA.

The work conducted with this crop was principally with the preparation of the land, fertilizer and seed.

The Agents advice was followed in this work. Fifteen demonstrations were secured and seven completed. Highland Utah Alfalfa seed was used. The seeds were all inoculated. Five to six hundred pounds of high grade fertilizer and four thousand pounds of lime were used per acre.

RED CLOVER

In working with the red clover growers it has been found that the crop is seeded in the spring, using wheat as a nurse crop, and in August. Red Clover requires no inoculation in this County. On these demonstrations lime was used at the rate 5

of two tons per acre and 16% acid phosphate at the rate of three hundred pounds per acre. These seven demonstrations included forty two acres, while the clover has not been thrashed yet, it is safe to say these seven farmers will thresh out winter around ninety bushels of good plump seed.

HAY and PASTURES

The fifteen demonstrations in mixed grasses and ten in permanent pasture are not complet. These lands being seeded last spring and late summer, however these demonstrations have excellent stands which I believe will be very beneficial to the land.

Those having alfalfa, clovers and mixed grasses such as timothy and clover, made excellent crops of hay this year.

SOY BEANS

In the last two years there has been a steady increase in the acreage seeded to this crop, especially with those farmers selling whole milk and butter fat.

Early in the winter and spring the Agent tried as far as possible to get the farmers, more especially those with dairy cows, to sow two acres for each cow owned. This was very satisfactorily carried out.

The Virginia and the Laredo are the principle varieties used in this section for hay. In some cases two and a half tons per acre were produced.

ANIMAL HUSBANDRY.

Hogs, beef and dairy cattle are the sub-projects on which work has been done. The work conducted on the hog project consisted of placing purebreds, both sows and boars, and pasture rotation.

The Agent has frequently been called on to advise about diseases of live stock, and where necessary a veterinarian was called in.

Last spring a disease broke out among hogs on two farms in the county, which the Agent recognized to be cholera and immediately called in the State Veterinarian and assisted him in treating seventy four hogs against cholera.

During the summer black leg broke out among calves and the Agent vaccinated ninety-six against this disease.

During the year the Agent has cured five cows of milk fever and nine of bloat.

In such cases as garget, worms, colic and constipation the Agent advised treatment.

POULTRY.

The Agent held thirty culling demonstrations with sixty persons present, handling fourteen hundred and sixty-six birds retaining eight hundred and thirty six and discarding six hundred and thirty as non-producers. He held five demonstrations in treating poultry for worms with sixty five persons present and treated nine hundred and forty six birds.

Thirty one farm flocks are being fed for egg production by the Agent's directions.

DAIRYING.

This project is one which is growing in interest and importance in the County, especially since tobacco prices have been so low.

The people are gradually taking hold of this industry. This year the Agent has placed three purebred guernsey bulls, one purebred jersey bull and ten purebred guernsey heifers.

The eight better management demonstrations were entered and are feeding well balanced dairy rations. As stated above the Agent secured the cooperation of a number of farmers just starting in the sale of butter fat to grow two acres of hay for each cow giving milk, and this was put across with soy beans.

It is not our aim to encourage the farmers of the County to go into dairying on a large scale but to have every farmer increase milk stock with purebreds for the sale of butter fat, so that he may have more than one cash crop.

The Agent is also encouraging farmers to raise hogs and poultry not only for home consumption, but a surplus for market.

HOME ORCHARDS.

Considerable interest has been shown in the past year in the upkeep of the home orchards. Twenty four (24) pruning demonstrations were held in different sections of the County with eighty five (85) persons present. The Agent has orchards in fourteen different communities which he is taking care of so as to demonstrate to the farmers of these communities how to prune an orchard during the first five years of its life.

AGRICULTURAL ENGINEERING.

Cooperating with the specialist from the Extension Division, demonstrations were given in laying out terraces on two farms totaling about thirty four acres. After laying out terraces the Agent demonstrated how to make them by making one.

Furnished plans for three dairy barns, seven new poultry houses and two new hog houses.

AGRICULTURAL EDUCATION.

(Boy's and Girl's Club Work)

Boy's and Girl's 4-H Club Work is ever growing in interest and importance in this County and is one of the outstanding Extension Projects.

With Club Work we are able to teach a larger number of adults through the boys and girls better farming methods.

We have eight organized Clubs with a total membership of one hundred and eight (108), the projects carried are cow and calf, corn, soy beans, tobacco, fat pig, breeding pig, poultry, dairy calf, raspberries and crop rotation.

Of sixty boys carrying projects, fifty eight completed their work. Of forty eight girls carrying projects forty five completed their work.

Our third District Short Course was held at Hampden-Sidney College, July 9th - 14th inclusive. The eight Clubs sent as delegates seventeen boys and twenty girls, expenses paid by the Clubs. The last week in July the Agent took twenty six boys and girls as delegates whose expenses were paid by the Clubs.

to the State Short Course At Blacksburg.

In addition to an organized "County Club Council" we have fourteen, " ALL STAR MEMBERS", who are also organized. The All Stars meet at least four times during the year and in their August meeting they arranged a splendid program for our County Club Rally which was held on the 12th of September.

Most of the members from the eight clubs were present with their parents and others totaling around one hundred and eighty five, (185).

MISCELLANEOUS.

The Agent attended the Farmer's Institute at Blacksburg taking with him eighteen farmers who returned home much pleased with what they saw and learned.

Specialist from the following departments have visited the County on twenty four different occasions during the year, Agronomy, Poultry, Agricultural Engineering, Plant Pathology and Clubs.

The Agent assisted the Board of Directors of the Fair Association, and various committees in soliciting, exhibits for the Fair which proved to be one of the most successful that has ever been held here.

ANNUAL REPORT OF COUNTY EXTENSION WORKERS

This report form is to be used by county extension agents, such as county agricultural agent, home demonstration agent, club agent, and negro agent, reporting on their respective lines of work.

State Virginia County Appomattox
 Report of R. B. Hedgins County Appomattox Agent.
(Name) (Title)
 From November 30 to Dec 1st, 1928.

If agent has not been employed entire year, indicate exact period. Agents resigning during the year should make out this report before quitting the service.

SUGGESTIONS RELATIVE TO THE PREPARATION OF THE COUNTY EXTENSION AGENT'S ANNUAL REPORT.

The annual report should be a review, analysis, interpretation, and presentation to the people of the county, the State, and the Nation of the sum total of the extension activities in each county for the year and the results obtained by the county extension agent assisted by the subject-matter specialists. The making of such a report is of great value to the county extension agent and the people of the county in showing the progress made during the year as a basis for future plans. It is of vital concern also to the State and Nation as a measure of rural progress and a basis for intelligent legislation and financial support.

Separate statistical and narrative reports are desired from each county extension agent in charge of a line of work, such as county agent, home demonstration agent, boys' and girls' club agent, and negro agent. Where an assistant agent has been employed a part or all of the year, a report on his or her work should be included with the report of the leader in charge of that line of work. Where an agent in charge of a line of work has quit the service during the year, the information contained in his or her report should be incorporated in the annual report of the agent on duty at the close of the report year, and the latter report so marked. Where two or more extension agents are employed in a county, each in charge of a line of work, care should be exercised to avoid including the same data in the statistical report of more than one agent.

At least four copies of the annual report should be made: One copy for the county officials, one copy for the agent's files, one copy for the State extension office, and one copy for the Extension Service, United States Department of Agriculture. The report to the Washington office should be sent through the State extension office.

NARRATIVE SUMMARY.

The narrative report should be a statement in orderly fashion and arranged under appropriate subheadings, of the work done, methods used, and results obtained under each project, as well as of the general work accomplished. Every statement should be clear-cut, concise, forceful, and, where possible, reinforced with ample data from the statistical summary. In the preparation of the part of the report relative to each project, the results reported in the statistical summary for the project should be analyzed, conclusions drawn, and recommendations made. The report may well be illustrated with photographs, maps, diagrams, blue prints, or copies of charts and other forms used in demonstration work. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs, and reasonably good margins left. The pages should be numbered in consecutive order.

The following outline is suggestive of how the narrative report may be clearly and systematically presented:

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT.

- I. Cover and title page.
- II. Table of contents.
- III. Status of county extension organization.
 - (1) Form of organization—changes and development.
 - (2) Function of local people, committees, or project leaders in developing the program of work.
 - (3) General policies, including relationships to other organizations.
- IV. Program of work, goals established, methods employed, and results achieved.
 - (1) Factors considered and methods used in determining program of work.
 - (2) Project activities and results.

<ol style="list-style-type: none"> (a) Soils (b) Farm crops (c) Horticulture (c) Home gardens { Beautification of home grounds (d) Forestry (e) Rodents, predatory animals, and birds. (f) Animal husbandry (g) Dairy husbandry { Home dairy (A) Poultry husbandry { Home poultry 	} (including diseases and insects).
---	-------------------------------------

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT—Continued.

IV. Program of work, etc.—Continued.

(2) Project activities and results—Continued.

- (a) Agricultural engineering.
- (b) Agricultural engineering—home.
- (c) Agricultural economics, including farm management and marketing.
- (d) Home marketing.
- (e) Foods.
- (f) Nutrition.
- (g) Clothing.
- (h) Home management.
- (i) Home furnishings.
- (j) Home health and sanitation.
- (k) Community activities.
- (l) Miscellaneous.

V. Outlook and recommendations, including suggestive program of work for next year.

VI. Summary of activities and accomplishments, preferably of one or two typewritten pages only, placed at the beginning or end of the narrative report.

STATISTICAL SUMMARY.

To supplement the narrative part of the report, and in order that comparable State and National summaries may be made, it is necessary to include a statistical summary of the work in each county. The following form has been prepared to insure uniformity of reporting. In addition to the questions asked under each subdivision of the report, space is provided to add further data if desired. The statistical summary will grow naturally out of the field and office records.

DEFINITIONS OF TERMS USED IN THIS REPORT.

1. A PROGRAM OF WORK is a definitely outlined plan for extension work.
2. A PROJECT is a definite, systematic, organized plan for carrying out some phase of the extension program of work, providing for what is to be done, how much, when, where, how, and by whom.
3. MISCELLANEOUS WORK includes work which has not yet become a regular part of the program of work—work other than project work.
4. A COMMUNITY, for the purposes of this report, may be any one of the several units into which the county is divided for purposes of conducting organized extension work.
5. A PROJECT LEADER or LOCAL LEADER is a person, selected because of his or her special interest and fitness, who functions as a leader in advancing some phase of the local program of extension work.
6. A DEMONSTRATION is an example designed to show the practical application of an established fact. Demonstrations as contemplated in this report are of two kinds, method demonstrations and result demonstrations.
 - A method demonstration is a demonstration given by an extension worker or other trained leader to a group for the purpose of showing them how to carry out a practice. Synonyms: Lecture demonstration. Examples: Demonstrations of canning, mixing of spray materials, and culling of poultry.
 - A result demonstration is a demonstration carried on by a farmer, farm woman, boy, or girl under the direction of the extension service, involving a substantial period of time, records of results, and competence. Examples: Child-feeding, corn-culture, and orchard-management demonstrations.
7. A DEMONSTRATOR is a farmer, farm woman, boy, or girl who, under the direction of the extension service, conducts a result demonstration.
8. MEMBERS COMPLETING should include those who have satisfactorily finished the work outlined for the current year.
9. A DEMONSTRATION MEETING is a meeting held to give a method demonstration or to start, inspect, or further a result demonstration.
10. A TRAINING MEETING is a meeting at which project leaders or local leaders are trained to carry on extension activities in their respective communities.
11. AN OFFICE CALL or TELEPHONE CALL is a visit or call by a farmer or other person seeking agricultural or home economics information, as a result of which some definite assistance or information is given.
12. A FARM VISIT is a call at a farm by the agent at which some definite information is given or concrete plan of work outlined, or some valuable information obtained from the farmer regarding his work, or the better practice prevailing in his neighborhood.
13. A HOME VISIT is a call at a home by the agent at which some definite information is given or concrete plan of work outlined, or some valuable information obtained from the farm woman regarding her work, or the better practice prevailing in her neighborhood.
14. DAYS IN OFFICE should include time spent by the county agent in his office, at county agent conferences, and any other work directly related to office administration.
15. DAYS IN FIELD should include all days spent on official duty other than those spent in office.
16. LETTERS WRITTEN should include all single letters on official business.

4

DEFINITIONS OF TERMS USED IN THIS REPORT—Continued.

17. A **FARMERS' INSTITUTE** is one of a series of meetings of one to two days' duration, arranged by a central State farmers' institute agency, at which agricultural and home-economics problems are discussed, usually by outside speakers employed for the purpose.
18. AN **EXTENSION OR MOVABLE SCHOOL** is an itinerant school usually of two to six days' duration where practical but systematic instruction is given to persons not resident at the college. AN **EXTENSION SMOKE COURSE** differs from an extension school in that it is usually held at the college or other educational institution and usually for a longer period of time, but not exceeding two weeks.
19. **RECORDS** consist of definite information filed in the county office that will enable the agent to verify the data on extension work included in this report.
20. **FARM OR HOME PRACTICE ADOPTED** is a new or improved practice adopted on a farm or in a home during the year as a result of extension teaching. Examples: Spraying of potatoes for disease, canning of fruits and vegetables, use of balanced rations, and hat making.

GENERAL ACTIVITIES.

Report only this year's extension activities and results that are supported by records.

If an assistant agent has been employed during the year, include his or her work with that of the agent.

1. List below the names, titles, and periods of service of the county extension agents whose work is included in this report. 1

R. B. Hudgins County Agent Loeber
(Name) (Title) (Months of service this year.)

2. County association, if any, fostering extension work. 11

(a) Name _____ 1

(b) Number of members _____ 2

2. Number of communities in county where extension work should be conducted. 18 2

3. Number of above communities in which the extension program has been cooperatively worked out by extension agents and people concerned. 16 3

4. Number of voluntary county, community, or local leaders actively engaged in forwarding the extension program with— 4

(a) Juniors _____ 8

(b) Adults _____ 4

5. Number of clubs carrying on extension work: 5

(a) Junior _____ 8

(b) Adult _____ 4

6. Membership in above clubs: 6

(a) Boys: 60 60 (c) Men _____

(b) Girls: 48 48 (d) Women _____

7. Number of club members completing: 7

(a) Boys: 58 58 (c) Men _____

(b) Girls: 46 46 (d) Women _____

8. Number of members in junior club work for four or more years: 8

(a) Boys _____ 3

(b) Girls _____ 5

*Report the total number of different boys or girls enrolled in club work. This total should equal the sum of the project enrollments reported on pages 8 to 11, less any duplications due to the same boy or girl carrying on two or more distinct-student lines of work.

**Exclude those boys and girls enrolled in club work as reported under 6(c) and 6(d) who have finished the work undertaken on each portion of 11 as it was planned to finish during the report year.

GENERAL ACTIVITIES—Continued.

9. Number of junior teams trained	(a) Judging	_____	_____	9

8-518

District Agent visited county 8 different times. Sick two days.
No vaccination taken this year.

FARM-DEMONSTRATION WORK.

SOILS¹

Report only this year's extension activities and results that are supported by records.

45. Number of method demonstrations given. (See definition 6, page 3.)	11	45
46. Number of result demonstrations started or under way. (See definition 6, page 3.)	47	46
47. Number of result demonstrations completed or carried through the year	38	47
48. Number of acres involved in those completed demonstrations	269	48
49. Number of farms adopting improved practices in the use of commercial fertilizer this year	65	49
50. Tons involved in preceding question	142	50
51. Number of farms taking better care of farm manures this year	66	51
52. Number of farms using lime or limestone for the first time	47	52
53. Tons of lime or limestone so used	1850	53
54. Number of farms plowing under cover or other green manure crops for the first time	17	54
55. Acres of cover and green manure crops so plowed under	93	55
55½. Number of farms adopting other improved soil practices this year. (Specify below.)		55½
56. Total number of different farms adopting improved practices, relative to the soils work reported on this page. (Include questions 47, 48, 51, 52, 54, and 55½ less duplications.)		56

Agent at all times urges that farmers in
 create acreage of alfalfa and sweet clover,
 stressing the importance of inoculation
 and lime.

Forty nine cars of lime unloaded in the Co
 this year - 1050 tons distributed, mostly on sweet
 clover, alfalfa and pastures.

It is encouraging to find farmers taking
 more interest in higher grades of fertilizer
 on tobacco, wheat and tomatoes.

Many farmers this fall are turning
 under second growth of clover.

Acreage in sweet clover is nearly doubled
 over last year. This crop is being stressed
 by Agent on account of its soil building
 qualities.

¹ For drainage, irrigation, land clearing, and terracing see "Agricultural Engineering," page 15.

LEGUMES AND FORAGE CROPS.

Report only this year's extension activities and results that are supported by records.

81. Number of farms planting improved seed for the first time.	6				4	
82. Number of farms practicing seed selection for the first time.					4	
83. Number of farms experimenting for the first time.	6	3	5			
83½. Number of farms adopting other improved practices for the first time. (Specify below.)	15	-			5	
84. Total number of different farms adopting improved practices relative to the legumes and forage crops reported on this page. (Include questions 73, 78, 81, 82, 83, and 83½ less duplications.)	24	3	15		5	
As previously stated the agent is encouraging the growth of legumes, especially sweet clover, on account of its soil improving qualities and its carrying capacity for grazing.						

¹ Indicate whether yield in bushels of seed or tons of cured forage.² States which do not operate clubs on a project base should not report on this question but should report on enrollment and completion.

9-526

LEGUMES AND FORAGE CROPS—Continued.

Report only this year's extension activities and results that are supported by records.

Item.	(1)	(2)	(3)	(4)	(5)	Total (Other)
	Velvet beans.	Field beans.	Peas.	Legumes.	Patrons.	
71. Number of method demonstrations given.					10	71
72. Number of adult result demonstrations started or under way.					6	72
73. Number of adult result demonstrations completed or carried through the year.					-	73
74. Acres involved in these completed demonstrations.					-	74
75. Increased yield ¹ per acre on demonstrations.	bu. tons	bu.	bu.	tons	X X X	bu. tons
76. Number of junior clubs ² .						76
77. Number of members enrolled						77
(1) Boys (2) Girls						
78. Number of members completing						78
(1) Boys (2) Girls						
79. Number of acres grown by junior club members completing.						79
80. Total yield ² of crops grown by junior club members.	bu. tons	bu.	bu.	tons	X X X	bu. tons
81. Number of farms planting improved seed for the first time.						81
82. Number of farms practicing seed selection for the first time.						82
83. Number of farms inoculating for these crops for the first time.						83
83a. Number of farms adopting other improved practices for the first time. (Specify below.)					6	83a
84. Total number of different farms adopting improved practices relative to the legumes and forage crops reported on this page. (Include questions 73, 75, 81, 82, 83, and 83a less duplications.)					9	84
<i>Most of our farmers realize the value of good pastures and some are using lime and super-phosphate on their pasture land with good results. Those farmers selling better fat are being urged to take better care of their pasture lands.</i>						

¹ Estimate crop by acre.² Indicate whether yield in bushels of seed or tons of cured forage.³ State which do not organize clubs on a project basis should not report on this question but should report on enrollment and completion.

POTATOES, COTTON, TOBACCO, AND OTHER SPECIAL CROPS.

Report only this year's extension activities and results that are supported by records.

Item.	(1)	(2)	(3)	(4)	(5)
	Irish potatoes.	Sweet potatoes.	Cotton.	Tobacco.	Other. ¹ Tomatoes
85. Number of method demonstrations given					5
86. Number of adult result demonstrations started or under way					4
87. Number of adult result demonstrations completed or carried through the year					4
88. Acres involved in these completed demonstrations					8
89. Increased yield per acre on demonstrations	bu.	bu.	lbs. ²	lbs.	6
90. Number of junior clubs ³

165a. Number of farms adopting other improved livestock practices this year. (Specify below.)	36				15-		165a
166. Total number of different farms adopting improved practices relative to the livestock work reported on pages 14 and 15. (Exclude questions 140, 145, 167, 148, 149, 153, 155, 157, 158, 160, 161, 162, 163, 164, 165, and 165a less duplications.)	36	2	16		42		166

Since tobacco, being the main money crop in this section, has so decreased in value, quite a number of farmers are gradually turning their interest and time to livestock of all kinds, more especially the better milk type cows, pure bred swine and poultry. The agent is stressing the importance along this line. On numerous occasions the agent has been called on to advise treatment of diseases in livestock and where necessary a veterinarian was called in. Agent treated 87 calves for blackleg and assisted the veterinarian in treating several herds of hogs for cholera.

AGRICULTURAL ENGINEERING.

Report only this year's extension activities and results that are supported by records.

166. Number of method demonstrations given	4	166
