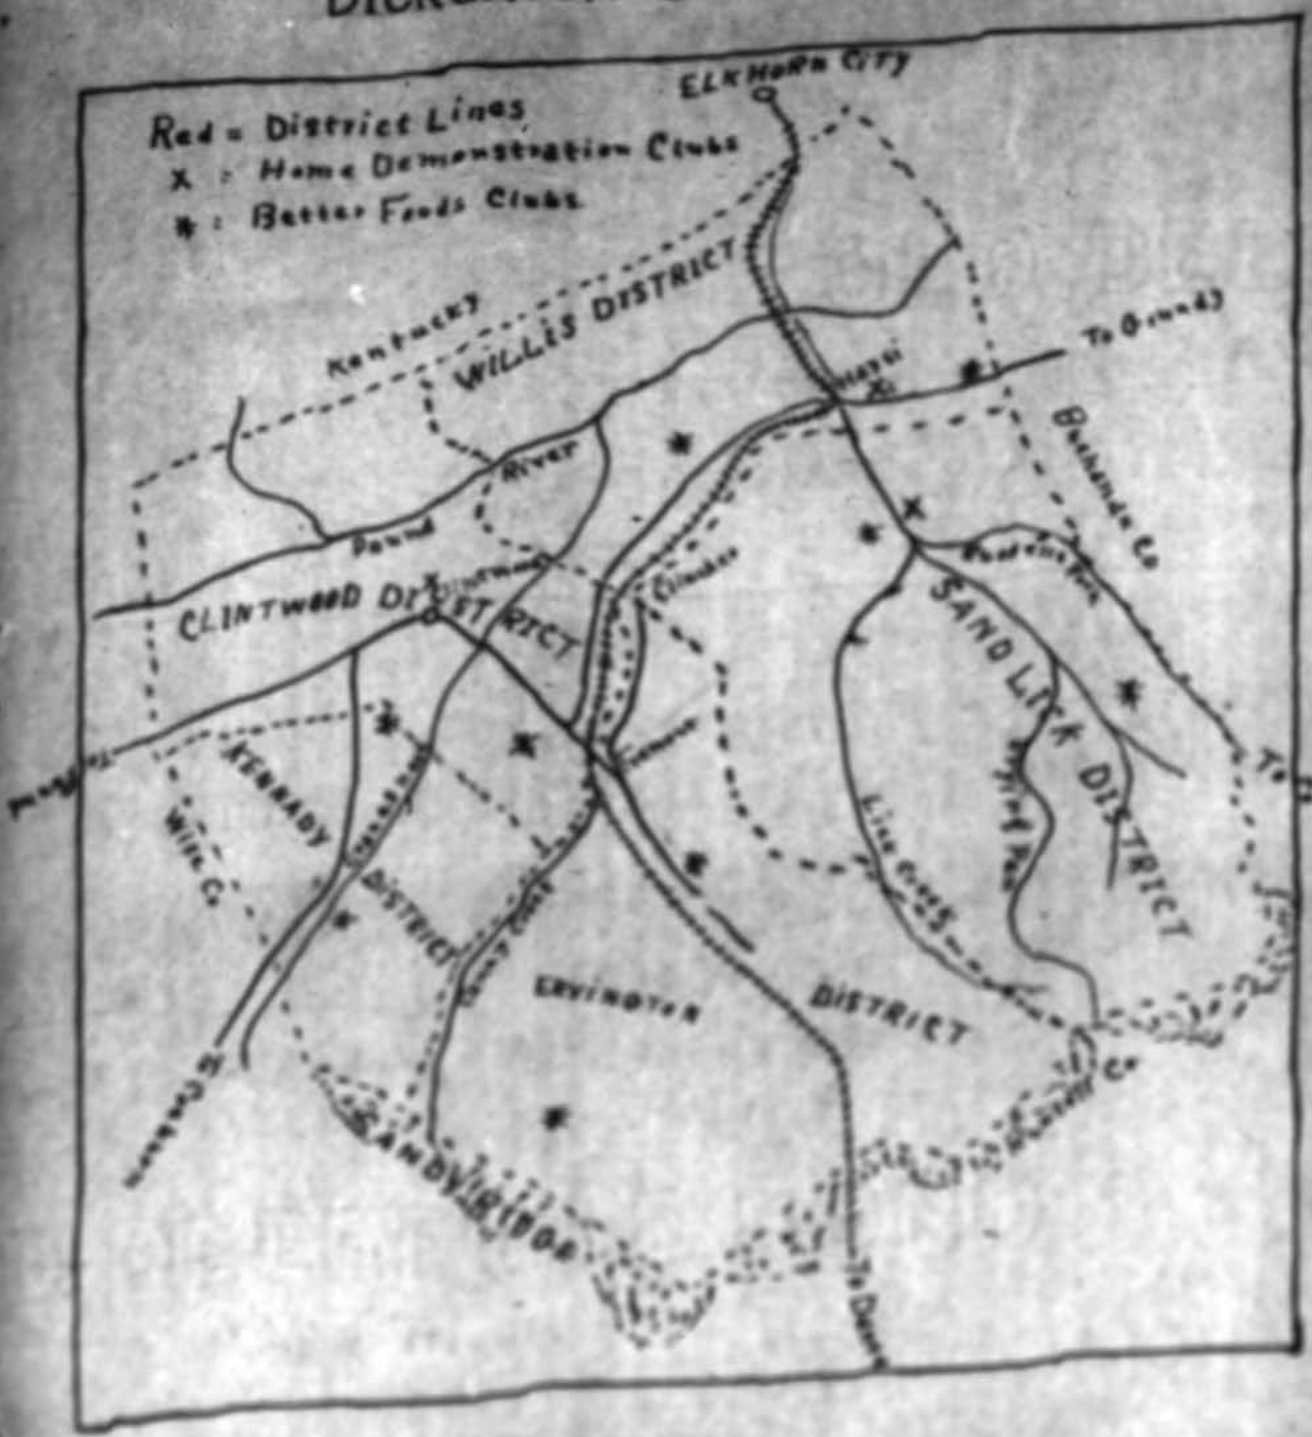
DICKENSON COUNTY



Narrative report of Dickenson County

In bringing together the following Narrative Report of some of the things being accomplished in Dickenson County it seems but fitting to first give a short bit of history concerning the county.

Dickenson is the baby county of the State, and is just forty-nine years old It was formed from Buchanan.

Farming, mining and lumbering are the chief occupations. It has an area of 332.2 square miles; and is a very mountainous county -The most conspicuous is Pine Mountain about 3000 feet above the sea level. The highest point in the county is 3139 feet and the lowest point is 904 feet.

The county is well drained, the valleys cut by the streams are deep and narrow, most of them are very fertile.

The rainfall is adequate and is usually well distributed during the year. The climate is moderate.

Essentially all the soils of the county are the result of decay and disintegration of the underlying formations which are chiefly sandstone and sandy shale, thus the soils are chiefly sandy loam.

The chief crops are corn, hay, rye, oats, Irish and sweet potatoes, vegetables and wheat.

The soils and climate are well adapted to the growing of apples, peaches, pears and other fruits. Many kinds of vegetables are profitably grown. Corn is the principal crop.

The acreage of farms are less than 100 per farm. Some have not sanitary are raised. The use of farm machinery has increased rapidly during the last decade

About 60 percent of the county is classified as permanent forest land.

Practically all of the county is underlain by productive coal beds in which is found the mineral wealth of the county. About 8,000,000,000 tons of high

grade coking bituminous coal.(This according to Virginia Geological Survey) t this is practically untouched.

The Carolina,Clinchfield and Ohio Railway runs through the central part of the county.

Dickenson is entirely rural. 23.5 per cent of population is illiterate and and so say there are more women than men . 2.7 per cent of population are negroes. Educationally the county is making as rapid progress as almost any other county.

According to the last Federal Census of Religious bodies Dickenson stood lowest among the counties of Virginia. 6.2 per cent of the population only. Dickenson is making rapid progress in its schools and in the roads. This will greatly increase the religious welfare of the county.

Friendly Union Sun

Annual Narrative Report

In Dickinson County there is no county support for demonstration work. The work is taken care of by State funds.

So far no Advisory Board or Club Council has been formed in the county. The is in the introductory stage at present

Personal report summary :

Number of miles traveled in the county	1941
Number of homes visited	118
Number of different homes visited	92
Number of conferences held	91
Number of days spent in office	113
Number of days spent in field	40½
Number of news articles prepared	8
Number of individual letters written	198
Number of bulletins distributed	644
Number of method demonstrations meetings	25
Number of other meetings held	17
Number of 4-H Clubs organized	4

Other clubs are to be organized during the month of December.

Outlined county map will show the location of the groups in which the agent is working. A special effort has been made to distribute the work as evenly over the county as possible.

Women's Work :

Project Work :

The first Home demonstration Club was organized in the county July 19th, at Hegal. This club decided upon food preservation as a unit plan of work. Four demonstrations have been given by the agent, each well attended, and reports show and by the women to the effect that it has been beneficial. The club demonstration is progressing at each station being a number of requested home

ed to be the most appreciated. One woman said "If there is any left after filling the jar let's pass it around and let all get a taste". She had stirred while it was cooking before filling the jar. A little was still left & the hostess requested that she add a little more to it so that her husband might enjoy it for his supper. The last demonstration was the canning of meats. Delicious was used -It was certainly worth the effort and the lad read the agent visited to get to the meeting, 22 miles of hard drive.

This club so far has been the most active in the county,at its last meeting not only did the women prepare for the next demonstration but some follow-up work was done from the November meeting; at which time the agent was asked to give a talk along the lines of Bread Making,this was done also posters and charts were shown, each member present was given a cake of yeast and one of Miss Vassiling's booklets "The Art of Making Bread" these were to practice making loaf bread and at the next meeting exhibit loaves of bread to be judged by the absent members. Four members brought bread to the last meeting.A former Domestic Science teacher was chairman of the judging committee. The loaf cannot score in dif- of the month. The women expressed themselves as highly pleased with the helpful suggestions they got during the judging.

Home Management.

July 22nd the Fleetwood Club was organized. As a club group it has practically done nothing, yet there are some membership are interested and individually have benefited much. It might be said here that unfortunately for the group the wrong persons were chosen for President and Secretary, with a change it is believed that the club will accomplish things. It seems filling into to make recording of a demonstration,both mother and daughter attended so. The first day the agent was in the county the daughter said to her "I know we are understanding to ourselves our old home ,if you can help us in any way please do so". Of course she was glad to offer her services, many hours was spent with these good people but all profitably. Almost impossible all of the

Home of Mrs. R.C.Duffell. Which shows July has been completely
changed in the remodelling. Action Dutch Colonial effect also the
Jack and Jill porch- pleasure given south west end of house.

pictures and plans available. Those in charge of the work were even willing to put the sink as high as desired. As a result of all working and planning together by the first of November the family was ready to move back into the house. No one would know it as the same place. The guest room has the southwest room for the winter much study will be given to Home Decoration. On last visit to Glenwood the daughter said " Had I known the bigness of the job to tear down and plaster and finish the old rooms we would never have undertaken it yet I am glad we were overpersuaded. I would not have to go through with tearing up things again for years. Now that it is over we are all glad that it is done and the house will be so much more comfortable for the winter". It is hoped that this home will be a good Better Homes demonstration. The next club meeting will be held there.

The third club in the county to organize was the Riverbend Club organized October 16th. but has not started work yet. The group is very anxious for some food work also Home Decoration work. The first piece of work planned was a demonstration, quilting & Dooryard Privy. Materials are all in hand. The home of the President and Treasurer the place. Mr. Dooley from the State Health Department was to give the demonstration November 21st. The weather conditions prevented. December 12th was our next, again the weather would not permit. By having one think best to put it off until spring. The club had planned for a goodly number of people to see the demonstration. This is the beginning of a sorely needed piece of work. The Hazel club is also interested in Home Decoration The Secretary of that club has planned for a demonstration following the one at Riverbend. If we can get rid of the unsanitary privies hanging over the banks of the streams which will have been accomplished enough of the Home Decoration problem.

Community Activities :

The Hazel Club is the only one in the county as far organized & community project. One of the first things undertaken was the cleaning and improving of

of the cemetery, the club expects to continue with this project caring for and beautifying the cemetery. Not only the women,but the citizens as a whole took part in this piece of work. These women have also been interested in some children of the community who are at one of the county district schools. The club is responsible for the board and clothing of one of the girls. Have sent boxes of clothing to the school .Also have pieced a quilt and quilted same for the school. The mother of these children is untrue to her duties as mother. The club through its activities has made possible the money for these things. If there was no other good to come from the meeting together of the group than the social side it is worthwhile. One of the members stated at last meeting that it had been seven years since she was in the home in which the meeting was held; and said to the hostess"just to think we used to be such friends. I am so glad you answered to our emergency call so just moment and let us met with you". The club treasurer was to have entertained the district was unexpectedly called away that morning.

There are three home demonstration clubs organized in the county

July 15th Excel - Membership — 38 meetings held — 8

July 22nd Clintwood " 27 " " " 8

Oct. 15th Pittsfield " 6 " " 1

Bad weather prevented the November meeting of the last named club.

Darwin 4- H Club The old gentleman often visits in this school -"My boys and girls" he says.

Girls' Work :

No 4-H Club Council has been formed in the county .

The Better Foods Project is the only one so far carried on the county. All efforts have been given to develope this piece of work, and so far believe it was a wise thing to do concentrate on one thing if the county wanted it .

Name of project	Number enrolled
Sulphur Springs	25
Silver Gap	21
Sandlick	20
Frazier	15
Canyon	22
Mine	19
Greenwood	20
Stratton	18
Darwin	16
Grove Park	13

Total 21 4-H's and 96 girls .

The best piece of work , that is , the best preparation for the work has been done with the Mine group. This group has done more of the weighing and measuring work than any other group. Since the work started a pair of scales has been purchased. Thus the children have a better opportunity to keep them on their improvement. The average score for the ten months the group has been working is 381.48

The highest score made by any member of the group was

The Stratton group has made an average score of 348.3 ; members of this group made a score of 380

The Darwin group made a score of 361.18 - 4 making a perfect score of 400 points each.

Up to the present time four 4-H Community Clubs have been organized

Rice	Membership	22
Darwin	Membership	22
Prater	Membership	22
Turjon	Membership	21

Other groups will be organized into 4-H Clubs during the month of December if the weather permits.

Some of these groups were started during the month of August, others in the September.

The goal at the beginning was ten groups in the county. this has been accomplished, and all clubs to get 6 months work before time for the annual report. This has been accomplished in 7 groups.

In running off what has been accomplished with the young people it may wisely be said that they only need a chance, they are as a whole willing to try to do and evidently from the response gotten many of the parents are interested with them.

The only plan so far for 1930 is possible maintenance of the food work as Food and Nutrition Work and try to introduce some garden and poultry work. Incidentally the boys and girls will get many helps along other lines of work

It will not be wise to get together more groups until the county makes appropriations for the work as already there is all the work that can be cared for with the small amount of time each week.

ANNUAL REPORT OF COUNTY EXTENSION WORKERS

This report form is to be used by county extension agents, such as county agricultural agent, home demonstration agent, club agent, and negro agent, reporting on their respective lines of work.

State Virginia County Dickenson

Report of Lillian V. Gilbert (Name) County Home Demonstration Agent (Title)

From July 1st 1929 to November 30, 1929.

If agent has not been employed entire year, indicate exact period. Agents resigning during the year should make out this report before quitting the service.

SUGGESTIONS RELATIVE TO THE PREPARATION OF THE COUNTY EXTENSION AGENT'S ANNUAL REPORT.

The annual report should be a review, analysis, interpretation, and presentation to the people of the county, the State, and the Nation of the sum total of the extension activities in each county for the year and the results obtained by the county extension agent assisted by the subject-matter specialists. The making of such a report is of great value to the county extension agent and the people of the county in showing the progress made during the year as a basis for future plans. It is of vital concern also to the State and Nation as a measure of rural progress and a basis for intelligent legislation and financial support.

Separate statistical and narrative reports are desired from each county extension agent in charge of a line of work, such as county agent, home demonstration agent, boys' and girls' club agent, and negro agent. Where an assistant agent has been employed a part or all of the year, a report on his or her work should be included with the report of the leader in charge of that line of work. Where an agent in charge of a line of work has quit the service during the year, the information contained in his or her reports should be incorporated in the annual report of the agent on duty at the close of the report year, and the latter report so marked. Where two or more extension agents are employed in a county, each in charge of a line of work, care should be exercised to avoid including the same data in the statistical report of more than one agent.

At least four copies of the annual report should be made: One copy for the county officials, one copy for the agent's files, one copy for the State extension office, and one copy for the Extension Service, United States Department of Agriculture. The report to the Washington office should be sent through the State extension office.

Narrative Summary.

The narrative report should be a statement in orderly fashion and arranged under appropriate subheadings, of the work done, methods used, and results obtained under each project, as well as of the general work accomplished. Every statement should be clear-cut, concise, forceful, and, where possible, reinforced with ample data from the statistical summary. In the preparation of the part of the report relative to each project, the results reported in the statistical summary for the project should be analyzed, conclusions drawn, and recommendations made. The report may well be illustrated with photographs, maps, diagrams, blue prints, or copies of charts and other forms used in demonstration work. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs, and reasonably good margins left. The pages should be numbered in consecutive order.

The following outline is suggestive of how the narrative report may be clearly and systematically presented:

STATISTICAL SUMMARY.

To supplement the narrative part of the report, and in order that comparable State and National summaries may be made, it is necessary to include a statistical summary of the work in each county. The following form has been prepared to insure uniformity of reporting. In addition to the questions asked under each subdivision of the report, space is provided to add further data if desired. The statistical summary will grow naturally out of the field and office records.

DEFINITIONS OF TERMS USED IN THIS REPORT.

1. A *program of work* is a definitely outlined plan for extension work.
2. A *project* is a definite, comparatively organized plan for carrying out some phase of the extension program of work, providing for what is to be done, how much, when, where, how, and by whom.
3. *Miscellaneous work* includes work which has not yet become a regular part of the program of work—work other than project work.
4. A *community*, for the purposes of this report, may be any one of the several units into which the county is divided for purposes of conducting organized extension work.
5. A *cooperator* [illegible] is a person, appointed because of his or her special interest and fitness, who functions as a leader in advancing some phase of the local program of extension work.
6. A *demonstration* is an example designed to show the practical application of an established fact. The demonstrations enumerated in this report are of two kinds, method demonstrations and result demonstrations.
A method demonstration is a demonstration given by an extension worker or other trained leader to a group for the purpose of showing them how to carry out a principle. Synonyms: Lecture demonstration. Examples: Demonstrations of canning, testing of spray materials, and culling of poultry.
A result demonstration is a demonstration carried out by a farmer, farm woman, boy, or girl, under the direct supervision of the extension worker, to prove and justify the value of a recommended practice. Such a demonstration involves a substantial period of time, records of results, and comparisons, and is designed to teach others in addition to the person conducting the demonstration. It should not be confused with the activities of a farm or home practice cooperator or other leading worker, but which is not supervised by the extension worker as a matter of teaching. Examples: Demonstrating that the application of fertilizers on cotton will result in more profitable yields; that vaccination of certain children can be successful [illegible] people don't; or that the use of certified seed in growing potatoes is a good investment.
7. A *cooperator* is a farmer, farm woman, boy, or girl who, under the direction of the extension service, conducts a result demonstration.
8. *Discontinued cooperators* should include those who have satisfactorily finished the work outlined for the current year.
9. A *cooperative meeting* is a meeting held to give a method demonstration or to start, improve, or further a result demonstration.
10. A *supervisory meeting* is a meeting at which project leaders or local leaders are trained to carry on extension activities in their respective communities.
11. An *office call* is [illegible] a call or call by a farmer or other person seeking information or home extension information, as a result of which some definite assistance or information is given.
12. A *home visit* is a call at a farm [illegible] the object or which some definite information is given or complete plan of work outlined, or some valuable information obtained from the farmer regarding his work, or the latter position generally existing in his neighborhood.
13. A *demo visit* is a call at a home for the object or which some definite information is given or complete plan of work outlined, or some valuable information obtained from the farm woman regarding her work, or the latter position generally existing in her neighborhood.
14. *Farm or ranch visits* should include those spent by the county agent in his office, or county agent conference, and any other work directly related to office administration.
15. *Farm or ranch visits* should include all such visits on official duty other than those spent in office.
16. *Extension workers* should include all single letters on official business.

Definitions of Terms Used in the Report—Continued.

17. A FARMERS' CONFERENCE is one of a series of meetings of one to two days' duration, arranged by a central State farmers' institute agency, at which agricultural and home-economics problems are discussed, usually by outside speakers employed for the purpose.

18. An EXTENSION OR SCHOOL SESSION is an itinerant school usually of two to six days' duration where practical but systematic instruction is given to persons not resident at the college. An EXTENSION SESSION course differs from an ordinary session school in that it is usually held at the college or other educational institution and usually for a longer period of time, but not exceeding two weeks.

19. Records must consist of definite information filed in the county office that will enable the agent to verify the data on extension work included in this report.

20. FARM OR HOME PRACTICES ADOPTED is a new or improved practice adopted on a farm or in a home during the year as a result of extension teaching. Examples: Spraying of potatoes for disease, canning of fruits and vegetables, use of balanced rations, and hay making.

GENERAL ACTIVITIES.

Report only this year's extension activities and results that are supported by records.

If an assistant agent has been employed during the year, include his or her work with that of the agent.

1. List below the names, titles, and periods of service of the county extension agents whose work is included in this report.

FARM-DEMONSTRATION WORK.

SOILS.[1]

Report only this year's extension activities and results that are supported by records.

45. Number of method demonstrations given. (See definition 6, page 2.)		45
46. Number of result demonstrations started or under way. (See definition 6, page 2.)		46
47. Number of result demonstrations completed or carried through the year		47
48. Number of acres involved in these completed demonstrations		48
49. Number of farms adopting improved practices in the use of commercial fertilizer this year		49
50. Time involved in preceding question		50
51. Number of farms taking better care of farm manures this year		51
52. Number of farms using lime or limestone for the first time		52
53. Tons of lime or limestone so used		53
54. Number of farms plowing under cover or other green manure crops for the first time		54
55. Acres of cover and green manure crops so plowed under		55
55½. Number of farms adopting other improved soils practices this year. (Specify below.)		55½
56. Total number of different farms adopting improved practices relative to the soils work reported on this page. (Exclude questions 47, 49, 51, 52, 54, and 55½ [see duplications.])		56

[1] For methods, terminology, and examples see "Agricultural Engineering," page 6.

CEREALS[1]

65. Number of acres grown by junior club members completing							65
66. Total yield of records grown by junior club members	____ bu.	____ bu.	____ bu.	____ lbs.	____ bu.	____ bu.	66
67. Number of farms planting improved seed for the first time							67
68. Number of farms planting seed selected for the first time							68
69. Number of farms treating seed grain for smut for the first time							69
69½. Number of farms adopting other improved practices for the first time. (Specify below.)							69½
70. Total number of different farms adopting improved practices relative to the annual work reported on this page. (Exclude operations 58, 59, 67, 68, 69, and 69½ for explanations.)							70

[1] Report full-season crops the year they are harvested.

[2] Specify crops for items.

[3] Report result of one outstanding club in a project basis should not report in this project but should report in enrollment and completion.

[4] Include those who have finished the work satisfactorily, or such portion of it as they planned to finish during the report year.

LEGUMES AND FORAGE CROPS.

Report only this year's extension activities and results that are supported by records.

Item.	(a) Adults.	(b) Highroads	(c) Home Demo.	(d) Clothing Club	(e) Canning Club, adults, white	(f) Canning.	
71. Number of method demonstrations given							71
72. Number of adult result demonstrations started or under way							72
73. Number of adult result demonstrations completed or carried through the year							73
74. Acres involved in those completed demonstrations							74
75. Increased yield[1] per acre on demonstrations	Acres	Bu. Acres	Acres	Acres	Acres	Bu. Acres	75
76. Number of junior clubs[2]							76
77. Number of members enrolled { (1) Boys. (2) Girls.							77
78. Number of members completing { (1) Boys. (2) Girls.							78
79. Number of acres grown by junior club members completing							79
80. Total yield[1] of crops grown by junior club members	Acres	Bu. Acres	Acres	Acres	Acres	Bu. Acres	80
81. Number of farms planting improved seed for the first time							81
82. Number of farms practicing seed selection for the first time							82
83. Number of farms inoculating for these crops for the first time							83
83a. Number of farms adopting other improved practices for the first time. (Specify below.)							83a
84. Total number of different farms adopting improved practices subject to the legumes and forage crops reported on this page. (Exclude questions 73, 75, 81, 82, 83, and 83a [not duplications].)							84

[1] Indicate whether gain is bushels of fruit or tons of harvested forage.

[2] Report under this caption only those clubs which are reported in this question but should report on members and completions.

LEGUMES AND FORAGE CROPS—Continued.

Report only this year's extension activities and results that are supported by records.

Item.	(a) Tribal farms.	(b) Field farms.	(c) Projects.	(d) Locations.	(e) Districts.	Total (Cols. a-e)	
71. Number of method demonstrations given.							71
72. Number of adult result demonstrations started or under way							72
73. Number of adult result demonstrations completed or carried through the year							73
74. Acres involved in those completed demonstrations							74
75. Increased yield[1] per acre on demonstrations	lbs. [illegible]	lbs.	lbs.	[illegible]	X X X	lbs. [illegible]	75

[2] [illegible]

POTATOES, COTTON, TOBACCO, AND OTHER SPECIAL CROPS.

Report only this year's extension activities and results that are supported by records.

Item.	(a) Irish potatoes.	(b) Sweet potatoes.	(c) Cotton.	(d) Tobacco.	(e) Other.[1]	
83. Number of method demonstrations given						83
86. Number of adult result demonstrations started or under way						86
87. Number of adult result demonstrations completed or carried through the year						87
88. Acres involved in these completed demonstrations						88
89. Increased yield per acre on demonstrations	____ bu.	____ bu.	____ lbs.[2]	____ lbs.		89
90. Number of junior clubs[3]						90
91. Number of members enrolled (1) Boys						91
(2) Girls						
92. Number of members completing work (1) Boys						92
(2) Girls						
93. Number of acres grown by junior club members completing						93
94. Total yield of crops grown by junior club members	____ bu.	____ bu.	____ lbs.[2]	____ lbs.		94
95. Number of farms planting improved seed for the first time						95
96. Number of farms practicing seed selection for the first time						96
97. Number of farms treating seed for disease for the first time						97
98. Number of farms spraying or dusting for diseases and insects for the first time						98
98½. Number of farms adopting other improved practices for the first time. (Specify below.)						98½
99. Total number of different farms adopting improved practices relative to potatoes, cotton, tobacco, and other special crops reported on this page. (Do not include questions 87, 88, 93, 94, 97, 98, and 98½ in duplications.)						99

[1] Indicate crop by name.

[2] Report yield in pounds of seed cotton.

[3] Enter clubs in each agricultural group on a proper basis (boys and girls) as this question and report on additional work undertaken.

HORTICULTURE.

Report only this year's extension activities and results that are supported by records.

Item	(a) Tree fruits	(b) Small fruits	(c) Grapes	(d) Market garden vegetables	(e) Farm gardens	(f) Ornamental plants	
100. Number of method demonstrations given							100
101. Number of adult result demonstrations started or under way							101
102. Number of adult result demonstrations completed or carried through the year							102
103. Acres involved in these completed demonstrations					X X X	X X X	103
104. Increased yield per acre on demonstrations	lbs.	qts.	lbs.	lbs.	X X X	X X X	104

106. Number of members enrolled (1) Boys. (2) Girls.							106
107. Number of members completing (1) Boys. (2) Girls.							107
108. Number of acres grown by junior club members completing						X X X	108
109. Total yield of crops grown by junior club members	lbs.	qts.	lbs.	lbs.	lbs.	X X X	109
110. Number of farms showing improved stock or seed for the first time							110
111. Number of farms pruning for the first time							111
112. Number of visits involved in preceding question	visits	visits	visits	X X X	X X X	X X X	112
113. Number of farms spraying or otherwise treating for disease and insect pests for the first time							113
114. Number of visits involved in preceding question	visits	visits	visits	visits	X X X	X X X	114
114a. Number of farms adopting other improved practices for the first time (Specify below.)							114a
115. Number of farms adopting improved practices relative to the horticultural work reported on this page. (Include practices 101, 102, 103, 111, 113, and 114a but duplications.)							115

*Boys might be not reported this a garden or a project farm should not report an adult practice but should report an enrollment and completion.

FORESTRY.

Report only this year's extension activities and results that are supported by records.

116. Number of method demonstrations given ____ 116
117. Number of adult result demonstrations started or under way ____ 117
118. Number of adult result demonstrations completed or carried through the year ____ 118
119. Number of acres included in these completed demonstrations ____ 119
120. Number of junior clubs[1] ____ 120
121. Number of members enrolled—(a) Boys ____ (b) Girls ____ 121
122. Number of members completing—(a) Boys ____ (b) Girls ____ 122
123. Number of acres handled by junior club members ____ 123
124. Number of forest or woodland plantations established this year ____ 124
125. Acres involved in preceding question ____ 125
126. Number of farms enlisted in forest management this year ____ 126
127. Acres involved in preceding question ____ 127
128. Number of farms planting windbreaks this year ____ 128
129. Number of farms attempting to control white-pine blister rust for first time ____ 129
130. Number of acres involved in preceding question ____ 130
130½. Number of farms adopting other improved practices for the first time. *(Specify below.)* ____ 130½
131. Total number of farms adopting improved practices relative to the forestry work reported on this page. (Include questions 116, 122, 124, 126, 128, 130, and 130½ but not duplications.) ____ 131

INSECTS AND MISCELLANEOUS[2] DIRECT AND ANIMAL PESTS.

Report only this year's extension activities and results that are supported by records.

Item	(a) Rodents	(b) [illegible][3]	(c) [illegible]	(d) [illegible][3]	
132. Number of control demonstrations given					132
133. Number of result demonstrations started or under way					133
134. Number of such demonstrations completed or carried through the year					134
135. Number of acres in above completed demonstrations					135
136. Total number of farms adopting to control situations this year					136
137. Number of acres involved in preceding question					137

[1] Boys' clubs do not include those that project work should not report on this question but should report on woodwork and manufacture.
[2] Do not include work reported under "Crop and Livestock Pests."
[3] Indicate by name.

LIVESTOCK.

Report only this year's extension activities and results that are supported by records.

Item.	(a) Poultry raising	(b) Beef cattle	(c) Swine	(d) Sheep	(e) Poultry	(f) Other*	
138. Number of method demonstrations given							138
139. Number of adult result demonstrations started or under way							139
140. Number of adult result demonstrations completed or carried through the year							140
141. Number of animals involved in these completed demonstrations							141
142. Total credit or saving on demonstrations							142
143. Number of junior clubs*							143
144. Number of members enrolled (1) Boys. (2) Girls.							144
145. Number of members completing (1) Boys. (2) Girls.							145
146. Number of animals involved in junior club work completed							146
147. Number of farms assisted in obtaining purebred sires this year							147
148. Number of farms assisted in obtaining high-grade or purebred females this year							148
149. Number of farms selling lambs or feeder for the first time							149
150. Number of animals in each lambs or feeders							150
151. Number of acres of pasture improved							151
152. Number of half, hour, talk, or skeleton meetings, clinics, or demonstrations organized during the year					X X X		152
153. Number of members in preceding meeting, clinics, etc					X X X		153
154. Number of local committeemen or clubs organized during the year							154
155. Number of members in these meetings or clubs							155

*Indicate by name.
*Enter under (f) the number of project work sheets you report on this problem. (If sheets report on enrollment and completion

LIVESTOCK—Continued.

Report only this year's extension activities and results that are supported by records.

Item.	(46) Dairy cattle.	(47) Beef cattle.	(48) Swine.	(49) Sheep.	(50) Poultry.	(51) Other.*	
156. Number of cow-testing associations organized or reorganized during the year		X X X	X X X	X X X	X X X	X X X	156
157. Number of members in these associations		X X X	X X X	X X X	X X X	X X X	157

159. Number of cows under test by such associations and individual farms		X X X	X X X	X X X	X X X	X X X	159
160. Number of farms adopting improved practices in the sanitary production and care of milk this year		X X X	X X X	X X X	X X X	X X X	160
161. Number of farmers feeding better-balanced rations for the first time							161
162. Number of farmers controlling external and internal parasites for the first time							162
163. Number of farmers directly influenced to test animals for tuberculosis this year				X X X		X X X	163
164. Number of farmers directly influenced to vaccinate animals for blackleg this year			X X X	X X X	X X X	X X X	164
165. Number of farmers directly influenced to vaccinate swine for cholera this year	X X X	X X X		X X X	X X X	X X X	165
165½. Number of farms adopting other improved livestock practices this year. (Specify below.)							165½
166. Total number of different farms adopting improved practices relative to the livestock work reported on pages 14 and 15. (Exclude questions 150, 151, 157, 158, 159, 163, 164, 165, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, and 165½ from duplications.)							166

*Indicate by name.

AGRICULTURAL ENGINEERING.

Report only this year's extension activities and results that are supported by records.

167. Number of method demonstrations given ____ 167
168. Number of result demonstrations started or under way ____ 168
169. Number of result demonstrations completed or carried through the year ____ 169
170. Number of farms installing drainage systems this year ____ (a) Open ditches ____ (b) Under ditches ____ 170
171. Acres drained by ____ (a) Open ditches ____ (b) Under ditches ____ 171
172. Number of farms installing irrigation systems this year ____ 172
173. Acres irrigated ____ 173
174. Number of farms controlling erosion this year by ____ (a) Terraces ____ (b) Soil-saving dams ____ 174
175. Acres on which soil erosion was so prevented by ____ (a) Terraces ____ (b) Soil-saving dams ____ 175
176. Number of dwellings constructed this year according to plans furnished ____ 176
177. Number of dwellings remodeled this year according to plans furnished ____ 177
178. Number of sewage-disposal systems installed this year according to plans furnished ____ 178
179. Number of water systems installed this year according to plans furnished ____ 179
180. Number of heating systems installed this year according to plans furnished ____ 180
181. Number of lighting systems installed this year according to plans furnished ____ 181
181½. Number of farms following suggestions on maintenance and repair of machinery ____ 181½
181¾. Number of farms employing better types of machinery recommended by extension agent ____ 181¾
181½. Number of machines involved in question 181¾ ____ (a) Cultivators ____ (b) Plows ____ (c) Tractors and gas engines ____ (d) Sprayers ____ (e) Harvesters and threshers ____ (f) Other ____ 181½
182. Number of farms on which buildings other than dwellings were constructed or remodeled this year according to plans furnished ____ 182
183. Number of buildings involved in preceding question ____ (a) Barns ____ (b) Hog houses ____ (c) Poultry houses ____ (d) Silos ____ (e) Other ____ 183
184. Number of farms clearing land of stumps or boulders this year ____ 184
185. Acres of land so cleared ____ 185
185½. Number of farms adopting other improved practices for the first time. (Specify below.) ____ 185½
186. Total number of different farms adopting improved practices relative to the agricultural engineering work reported on this page. (Items numbered 166, 170, 172, 174, 176, 177, 178, 179, 180, 181, 181½, 181¾, 182, 184, and 185½ less duplications.) ____ 186

AGRICULTURAL ECONOMICS

Report only this year's extension activities and results that are supported by records.

FARM MANAGEMENT

187. Number of method demonstrations given ____ 187

188. Number of farm account books distributed this year ____ 188

189. Number of farmers keeping records in such account books throughout the year ____ 189

190. Number of farmers assisted in summarizing and interpreting their accounts ____ 190

191. Number of farmers making changes in their business as result of keeping accounts ____ 191

192. Number of other farmers adopting cropping, livestock, or complete farming systems this year according to recommendations ____ 192

193. Number of junior farm-management clubs* ____ 193

194. Number of members enrolled— (a) Boys ____ (b) Girls ____ 194

195. Number of members completing— (a) Boys ____ (b) Girls ____ 195

196. Number of farmers advised relative to leases this year ____ 196

197. Number of farm-management and farm-account schools held this year ____ 197

198. Number of farmers assisted in keeping cost-of-production records this year ____ 198

198½. Number of farms adopting other improved farm-management practices this year ____ 198½

199. Total number of different farms adopting improved practices shown in the farm-management work reported on this page. (Exclude questions 190, 192, 195, 196, 198, 198½, and 1945 from duplications.) ____ 199

FORESTRY

200. Number of farm-lot or other woodlot specialties organized this year with assistance of extension service ____ 200

201. Membership in short courses ____ 201

202. Number of other farmers assisted in obtaining woods ____ 202

MARKETING

203. Number of method demonstrations given ____ 203

204. List below the cooperative marketing associations organized during this year upon organization or with account of the extension service: 204

(a) Name of association or group	(b) Number of members	Products and products handled	Amount purchased: (c) Value	(d) Selling	Amount sold: (e) Value	(f) Weight
			$	$	$	
Totals						

*Where there is not regular staff or program both should not report on this question but should report to headquarters and compile it once

AGRICULTURAL ECONOMICS—Continued.

Report only this year's extension activities and results that are supported by records.

308. List below this year's results in connection with the cooperative-marketing associations in the county previously organized and with which the extension service cooperated or advised. 308

(a) Name of association or group.	(b) Number of members.	Supplies and products handled.	Supplies purchased.		Products sold.	
			(c) Value.	(d) Quantity.	(e) Value.	(f) Quantity.
			$	$	$	$
Total						

309. Total number of different farms adopting improved marketing practices (include entries for questions 304 (b) and 305 (b) less duplications plus other farms not in cooperative associations) 309

COMMUNITY ACTIVITIES AND MISCELLANEOUS.

Report only this year's extension activities and results that are supported by records.

Use this space to include work on any other agricultural project not included in the preceding pages, such as home beautification, and similar work, i. e., any other information that can be reported statistically and that will help to give a more complete account of the year's work.

Item.	(a) Demonstrations.	(b) Enrollment.	(c)	
310. Number of method demonstrations given				310
311. Number of adult result demonstrations started or under way				311
312. Number of result demonstrations completed or carried through the year				312
313. Number of talks to clubs on completed demonstrations				313
314. Number of junior clubs[1]				314
315. Number of members enrolled (1) Boys				315
(2) Girls				
316. Number of members completing (1) Boys				316
(2) Girls				
317. Number of talks to junior club work completed				317
318. Total number of different farms adopting improved practices relative to the demonstration work reported on this page				318
[Use space below to include other important data relating to miscellaneous work.]				

[1] Include boys' or girls' clubs, or groups to a project here should not report on this question but should report on enrollment and completion.

E-1938

HOME-DEMONSTRATION WORK.

FOODS.

Report only this year's extension activities and results that are supported by records now available.

213. Number of project clubs or groups[1] — (a) Women ____ (b) Juniors ____ — 213

214. Number of members enrolling in food preparation — (a) Women ____ (b) Girls ____ (c) Boys ____ — 214

217. Number of members completing[2] — (a) Women ____ (b) Girls ____ (c) Boys ____ — 217

218. Number of method demonstrations given. (See definition 6, page 3.) ____ — 218

219. Number of result demonstrations started or under way. (See definition 6, page 3.) — (a) Women ____ (b) Girls ____ (c) Boys ____ — 219

220. Number of result demonstrations completed or carried through the year — (a) Women ____ (b) Girls ____ (c) Boys ____ — 220

221. Number of individuals adopting improved practices in bread making this year — (a) Women ____ (b) Girls ____ (c) Boys ____ — 221

222. Number of individuals adopting improved practices in meat cookery this year — (a) Women ____ (b) Girls ____ (c) Boys ____ — 222

223. Number of individuals adopting improved practices in vegetable cookery this year — (a) Women ____ (b) Girls ____ (c) Boys ____ — 223

224. Number of individuals adopting improved practices in preparation of dairy-product dishes this year — (a) Women ____ (b) Girls ____ (c) Boys ____ — 224

225. Number of individuals adopting improved practices in meat preparation and service this year — (a) Women ____ (b) Girls ____ (c) Boys ____ — 225

226. Number of homes budgeting the family food supply for the first time ____ — 226

227. Total number of different homes adopting improved practices relative to the food-preparation work reported on this page. (Exclude entries for questions 226, 231, 235, 239, 254, 255, and 256 from duplications.) ____ — 227

[Use space below to include other important data relating to food preparation.]

---

[1] Report return to any meeting, class, or groups as a project. Such should not report on this question any attendance and membership records that have formed the only contribution of such parties of it as to the pleasure or work during the report year.

FOODS—Continued.

Report only this year's extension activities and results that are supported by records.

FOOD PRESERVATION.

220. Number of project clubs or groups[1]	(a) Women	1	220
	(b) Juniors		
221. Number of members enrolled in food preservation	(a) Women	15	221
	(b) Girls		
	(c) Boys		
222. Number of members completing	(a) Women	15	222
	(b) Girls		
	(c) Boys		
223. Number of method demonstrations given		4	223
224. Number of result demonstrations started or under way	(a) Women		224
	(b) Girls		
	(c) Boys		
225. Number of result demonstrations completed or carried through the year	(a) Women	15	225
	(b) Girls		
	(c) Boys		
226. Number of individuals adopting improved practices in preserving fruits and vegetables this year	(a) Women		226
	(b) Girls		
	(c) Boys		
227. Number of individuals adopting improved practices in preserving meats and fish this year	(a) Women		227
	(b) Girls		
	(c) Boys		
228. Number of homes providing better food storage for the first time			228
229. Total number of different homes adopting improved practices relative to the food-preservation work reported on this page		15	229

230. List below amount of food preserved by club members completing:

Kind of food.	(1) Women.	(2) Girls.	(3) Boys.
(a) Fruits and vegetables canned	quarts		
(b) Meats and fish canned	quarts		
(c) Jelly and preserves made	quarts		
(d) Fruit juices made	quarts		
(e) Pickles made	quarts		
(f) Fruits and vegetables dried	pounds[2]		
(g) Meats cured	pounds[2]		

[Use space below to include other important data relating to food preservation.]

This group has done some good work on Canning vegetables, fruit, pickles, pickles and relishes, but got the demonstration on meat preservation taken to do any work before reporting. The group was very much interested in Food work

[1] Count regular clubs or groups as a unit. Count project clubs or groups as a unit only when they do not report on the regular form for clubs. [2] Count 1 pound = 1 quart.

NUTRITION.

Report only this year's extension activities and results that are supported by records.

339. Number of project clubs or groups	(a) Women (b) Juniors	10	339
340. Number of members enrolled in nutrition	(a) Women (b) Girls (c) Boys	54 41	340
341. Number of members completing	(a) Women (b) Girls (c) Boys	45 20	341
342. Number of method demonstrations given		21	342
343. Number of result demonstrations started or under way	(a) Women (b) Girls (c) Boys		343
344. Number of result demonstrations completed or carried through the year	(a) Women (b) Girls (c) Boys	45 30	344
345. Number of individuals following family meals according to approved methods for the first time	(a) Women (b) Girls (c) Boys		345
346. Number of individuals preparing better school lunches for the first time	(a) Women (b) Girls (c) Boys		346
347. Number of schools induced to serve a hot dish or school lunch for the first time			347
348. Number of children benefited by preceding question			348
349. Number of homes carrying out improved practices in child feeding for the first time			349
350. Number of children benefited by preceding question			350
351. Total number of different homes adopting improved practices relative to the nutrition work reported on this page		180	351

[Use space below to highlight other important facts relating to nutrition.]

"Better Foods" clubs have been formed. Score sheets are being kept. As fast as cans be done children are being weighed and those overweight are trying to gain. Each school has purchased scales.

"Better Food" points are being stressed in each club and demonstration. Not much can be done stressed are Bureau of Education Letter and charts have been used also booklets such as Child Health Day Stuffy. Women are to have copies of each Set of Score Cards given to each group.

We all hope that each girl will lead a happier and healthier long life. Thru the reading of a "Better Foods" Booklet

CLOTHING.

Report only this year's extension activities and results that are supported by records.

352. Number of project clubs or groups[1]	(a) Women (b) Juniors		352
353. Number of members enrolled in clothing work	(a) Women (b) Girls (c) Boys		353
