

ACKNOWLEDGMENTS

I would like to acknowledge the four corner stones of foundation upon which this degree was built: the “faith” corner; the “always supportive” corner; the “tough love” corner; and the “necessary” corner.

FAITH Corner

God: For giving me the strength to keep going and to get up when I fell.

Danny: For giving me a renewed motivation and focus in life and in the pursuit of this degree. For making me not only see, but understand and embrace how blessed I truly am in life.

ALWAYS SUPPORTIVE Corner

Wayne: For always wanting to fight my battles when the world was against me and this degree.

Kate: For helping me make time to live outside of work and school.

Deb: For being more than an advisor, but a mentor and friend.

TOUGH LOVE Corner

Mom and Dad: For helping me stay focused and committed and for reading countless iterations and tearing them apart.

Myrna: For always scanning my work with a critical eye and never accepting anything until after it was approved by the committee.

Bill: For pushing me to succeed and not accept anything less than perfect.

NECESSARY Corner

The Crew: For making my research both enjoyable and memorable. Without the willingness of the participants this research would not exist...thank you!

The Committee: For working with me and listening to my thoughts and concerns and for allowing me to perform research I loved even though it was outside of the norm.

TABLE OF CONTENTS

LIST OF TABLES	vi
LIST OF FIGURES	vii
1.0 INTRODUCTION	1
1.1 Background	1
1.2 Justification	1
1.3 Problem Statement	2
1.4 Research Question.....	3
1.5 Hypothesis	3
2.0 LITERATURE REVIEW	4
2.1 Respiratory Changes Associated with Organic Dust.....	4
2.1.1 Airway Disease-General	4
2.1.2 Obstructive Disease	4
2.1.3 Restrictive Disease	5
2.1.4 Occupational Asthma	5
2.1.5 Organic Dust Toxic Syndrome	6
2.2 Physical- Spirometry	6
2.2.1 Forced Expiratory Volume	7
2.2.2 Forced Vital Capacity	7
2.3 Occupational Settings Studied	7
2.3.1 Grain Handlers	7
2.3.2 Swine Management Workers	9
2.3.3 Textile	10
2.4 Etiological Agents	10
2.4.1 Endotoxin -Bacteria	10
2.4.2 Mycotoxin – Fungi	12
2.5 Overview of Landscaping Industry	13
2.5.1 Facts on Industry	13
2.5.2 Description of Mulching Task and Associated Risks	14
2.5.2.1 Mulching Hazards	14
2.5.2.2 Exposures to Fungi/Bacteria.....	15
3.0 METHODS	16
3.1 Participants	16
3.2 Hypothesis	16
3.3 Location	17
3.4 Experimental Design	17
3.5 Equipment Administration	20
3.6 Spirometer Evaluation	20
3.7 Exposure Sampling Methods	25
4.0 RESULTS AND DISCUSSION	27
4.1 Limitations	27
4.2 Research Question Revisited	30
4.3 Preliminary Demographic Responses	31
4.4 Rylanders Questionnaire Responses	31
4.4.1 Rylander (1990) Respiratory Questionnaire Response Summary:	32
4.5 Pulmonary Function Tests	35

4.6 Fungal Spore Exposure	37
4.6.1 Aspergillus	40
4.6.2 Stachybotrys	41
4.6.3 Penicillium	41
4.6.4 Alternaria and Cladosporium	42
4.7 Endotoxin Exposure	42
4.8 Respirator Design	44
4.8.1 Respirator Characteristics	47
4.9 Data Analysis	48
5.0 Conclusion	52
5.1 Exposure Responses	52
5.2 Exposure Limits	53
5.3 Respirator Design	53
5.3.1 Recommended Respirator Design Guidelines	54
5.4 Further Research	54
5.4.1 Data Collection Tools	55
5.5 Summary	55
6.0 References	57
APPENDIX A	59
APPENDIX B	66
APPENDIX C	69
APPENDIX D	72
APPENDIX E	74
APPENDIX F	75
APPENDIX G	77
