

## Acknowledgements

I would first like to thank my committee chairman, Dr. Raymond H. Plaut. His guidance and knowledge were integral to the completion of this research and his efforts are greatly appreciated. I would also like to thank my supporting committee members, Dr. Thomas M. Murray and Dr. Finley A. Charney, for their assistance in the classroom and on this project.

Thank you to all of the people who helped me out at the structures lab and with the modeling of the data. I would still be out there sweating if it weren't for Brett Farmer, Dennis Huffman, Nick Pearson, Chris Link, and Paul Taylor. Youngjin Park was instrumental in developing the mathematical model for this research and I really appreciate all the assistance he provided.

I would like to thank all of the really great friends that I have made while here in Blacksburg. The snow was deep and we had more work than we knew what to do with, but you all were always there to support me and keep me in good spirits. Rich, Juan, and Alicia, you all are awesome and your friendship will never be forgotten. I would also like to thank all of the other friends that I have made over the years. We have spread out and grown up, but you all are still as special to me as you were back then.

Finally, I would like to thank the most important people in my life, my family. Dad, Mom, Joseph, and Becca, you guys are the greatest parents and siblings that anyone could ever ask for and your constant support, love, and sarcasm have made everything in life possible. I wouldn't have anything if it weren't for you.

This research was supported by the National Science Foundation under Grant No. CMS-0114709, and that support is greatly appreciated.

# **Table of Contents**

<b>Chapter 1:</b>	<b>Introduction and Literature Review.....</b>	1
1.1	Introduction.....	1
1.2	Literature Review.....	2
1.2.1	Snap Loads.....	2
1.2.2	Energy Loss and Damping Properties.....	4
1.2.3	Shock Analysis.....	5
1.3	Objectives and Scope of Research.....	7
<b>Chapter 2:</b>	<b>Overview and Analysis of the Previous Research.....</b>	9
2.1	Scope of the Previous Research.....	9
2.2	Original Drop Tower.....	9
2.3	Data Acquisition.....	13
2.4	Static and Dynamic Tests.....	13
2.5	Ropes that were Tested.....	15
2.6	Results and Conclusions from the Previous Research.....	16
2.7	Continuation of the Dynamic Test Sequences.....	17
2.8	Analysis of Dynamic and Static Tests.....	18
2.9	Results of Analyses.....	19
<b>Chapter 3:</b>	<b>Development of the Current Research.....</b>	24
3.1	Continuation of Previous Research.....	24
3.2	Development of Current Research.....	26
3.3	Drop Tower Modifications.....	28
<b>Chapter 4:</b>	<b>Description of the Static and Dynamic Tests.....</b>	31
4.1	Static Data Analysis.....	31
4.2	Dynamic Data Analysis.....	33
4.3	Dynamic Data Analytical Values.....	40

4.4	Energy Dissipation.....	45
4.5	Longitudinal Stress Waves.....	48
4.6	Theoretical Values.....	49
<b>Chapter 5:</b>	<b>Results of the Static and Dynamic Test Analyses.....</b>	<b>53</b>
5.1	Static Test Results.....	53
5.2	Dynamic Test Results.....	59
5.2.1	Rope Stiffness.....	60
5.2.2	Inherent and Integrated Data.....	62
5.2.3	Rope Elongation Comparisons.....	72
5.2.4	Energy Dissipation Trends and Comparisons.....	74
5.2.5	Longitudinal Stress Waves.....	87
5.2.6	Comparison of Analytical and Theoretical Data.....	89
<b>Chapter 6:</b>	<b>Mathematical Modeling of the Test Data.....</b>	<b>94</b>
6.1	Scope and Purpose of the Model.....	94
6.2	Development of the Model.....	94
6.2.1	Initial Model (Model 1).....	95
6.2.2	First Model Revision (Model 2).....	98
6.2.3	Second Model Revision (Model 3).....	100
6.2.4	Third Model Revision (Model 4).....	106
6.3	Model Results.....	110
<b>Chapter 7:</b>	<b>Summary and Conclusions.....</b>	<b>112</b>
7.1	Summary and Conclusions.....	112
7.2	Need for Further Research.....	115
<b>References.....</b>		<b>117</b>

Figure C.4.98: Load vs. Velocity – Amsteel II JJ – New – Cycle 15.....	391
Figure C.4.99: Load vs. Displacement – Amsteel II JJ – New – Cycle 20.....	392
Figure C.4.100: Load vs. Velocity – Amsteel II JJ – New – Cycle 20.....	392

## List of Tables

Table 2.5.1: Rope Types Tested in the Previous Research.....	15
Table 3.2.1: Rope Classification Method.....	27
Table 5.1.1: Static Rope Elongation Comparison.....	56
Table 5.1.2: Static Test Results.....	59
Table 5.2.3.1: Measured Rope Lengths.....	72
Table 5.2.3.2: Static and Dynamic Rope Elongation Comparisons.....	73
Table 5.2.3.3: Total Measured Elongation of the Ropes.....	74
Table 5.2.4.1: Comparison of Average Energy Dissipation and Recorded Data Values.....	86
Table 5.2.5.1: Longitudinal Stress Wave Data for the Amsteel Blue ropes.....	88
Table 5.2.5.2: Longitudinal Stress Wave Data for the Amsteel Blue ropes.....	88
Table 5.2.6.1: Average Velocity Loss values.....	91
Table 6.2.3.1: Results from Model 3 for the Follow-Up Tests and New Tests.....	102
Table 6.2.4.1: Results from Model 4 for the Follow-Up Tests and New Tests.....	107
Table A.2.1: Static Maximum Displacement Values.....	130
Table A.3.1: Static Rope Stiffness Values.....	131
Table A.4.1: Values of Area under the Static Hysteresis Loops.....	132
Table A.5.1: Amsteel Blue Dynamic Test Data.....	133
Table A.6.1: Amsteel II Dynamic Test Data.....	136
Table A.7.1: Amsteel SLV Dynamic Test Data.....	139

Table A.8.1: Dura Plex Dynamic Test Data.....	143
Table A.9.1: QS Polytron Dynamic Test Data.....	144
Table A.10.1: RP Polyester Dynamic Test Data.....	146
Table A.11.1: RP Ultra Blue Dynamic Test Data.....	148
Table A.12.1: SSR 1200 Dynamic Test Data.....	150
Table A.13.1: Tech 12 Dynamic Test Data.....	152
Table A.14.1: Tenex Dynamic Test Data.....	155
Table A.15.1: XLS Yacht Braid Dynamic Test Data.....	158
Table A.16.1: Dynamic Test Data of Sequences with Constant Drop Heights and Weights.....	159
Table A.17.1: Dynamic Data of Sequences with Constant Drop Heights and Changing Weights.....	161
Table A.18.1: Energy Losses for Follow-Up Dynamic Tests.....	165
Table B.2.1: Static Rope Elongation Values.....	174
Table B.3.1: Static Maximum Displacement Values.....	176
Table B.4.1: Static Rope Stiffness Values.....	178
Table B.5.1: Areas Inside the Static Hysteresis Loop.....	180
Table B.6.1: Dynamic Rope Elongation Comparison.....	182
Table B.6.2: Change in Rope Length throughout Testing.....	182
Table B.7.1: Dynamic Rope Stiffness Values.....	183
Table B.8.1: Pulse Duration Values.....	191
Table B.9.1: Maximum Force Values.....	194
Table B.10.1: Maximum Acceleration Values.....	197
Table B.11.1: Maximum Displacement Values.....	200
Table B.12.1: Impact Velocity Values.....	208
Table B.13.1: Impulse Values.....	211
Table B.14.1: Energy Loss Values.....	214
Table B.15.1: Dynamic Area Values.....	218
Table B.19.1: Average Results for the Energy Dissipation and Recorded Data.....	253

Table B.20.1: Longitudinal Stress Wave Data.....	263
Table B.21.1: Amsteel Blue Ropes – Recorded and Theoretical Stiffness Values.....	264
Table B.21.2: Converging Static Slopes (Static Rope Stiffnesses).....	265
Table B.21.3: Amsteel II Ropes – Recorded and Theoretical Stiffness Values.....	265
Table B.22.1: Amsteel Blue Ropes - Recorded and Theoretical Maximum Displacement Values.....	275
Table B.22.2: Amsteel II Ropes - Recorded and Theoretical Maximum Displacement Values.....	276
Table B.23.1: Amsteel Blue Ropes – Impact Velocity Comparisons.....	286
Table B.23.2: Amsteel II Ropes – Impact Velocity Comparisons.....	287
Table B.23.3: Percent Loss of Velocity Due to Friction.....	288
Table C.1.1: Results from Model 4 for the Follow-Up Tests and New Tests.....	290
