# **Sustainability Values Diagnostic**

Leah Triplett, Will Miksovic, Andy Paulonis, Mary Haninger, Kaleb Jubar

CS 4624 Multimedia, Hypertext, and Information Access Dr. Fox Virginia Tech, Blacksburg VA 24061 5/2/19

## Outline

- Project Recap
- Recent Progress
- Implementation
- Demo
- User Testing Results

- Additional User Testing
- Final Stretch
- Lessons Learned
- Acknowledgements

A Diagnostic Exercise by Center for Leadership in Global Sustainability

# **Project Recap**

- Website to host a survey created by Dr. Hull
  - Generate a report that Ο defines the user's sustainability values
  - Allow users to  $\bigcirc$ download/re-access results and administrator to download all data

More Information Contact Us

To take the sustainability values diagnostic survey, select TAKE SURVEY below.

If you have already taken the survey and would like to re-access your report, select VIEW RESULTS below.

TAKE SURVEY VIEW RESULTS

#### Why this subject is important:

Most sustainability decisions are hotly contested and intensely political because they involve deeply held, highly personal, and often hidden values.

Values define who we are, they reveal biases and assumptions, and they guide decisions. Failure to navigate value differences produces confusion, negotiation train wrecks, and loss of trust.

Many people have not critically examined their values about core sustainability topics. As a result, they struggle to communicate with others and they are less effective at listening, navigating differences, and discovering synergies.

#### What this survey will do:

This diagnostic examines values, myths, and biases embedded and hidden in most sustainability efforts. It is intended to help sustainability professionals understand themselves, become better listeners, build productive collaborative efforts, and manage conflict.

# **Recent Progress**

- User testing
  - With client, Dr. Hull
  - With undergraduate students in Dr. Hull's class
- Updates/Changes
- Group Functionality
- VTURCS

### Sustainability Values

A Diagnostic

Anonymity and confidentiality will be protected.

Do you have a group code?

Yes
No
Group Code:

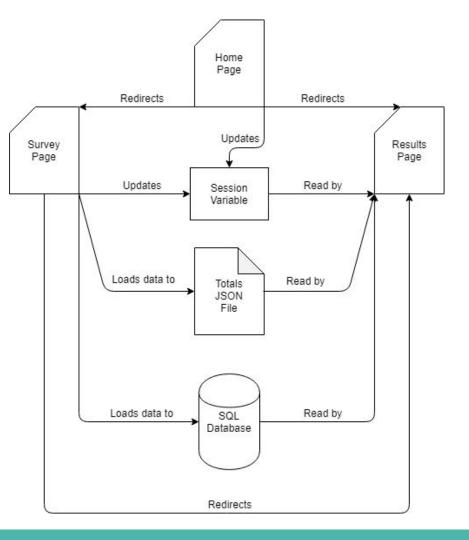

Question 1: Assume the total global budget for worldwide sustainable development efforts is \$100, that you are the person to allocate it, and that you must allocate all of it. Assume your allocations will determine the outcomes that get emphasized by sustainable development efforts. <u>Allocate ALL \$100 among the following 6 choices</u>.

\$ 0

Resources: Money for programs that promote & sustain renewable & non-renewable resource inputs into the economy, including energy, biomaterials, water, fish, minerals, oil, and soil.

# Implementation

- PythonAnywhere
  - Flask
  - SQLAlchemy
- MySQL database

A Diagnostic Exercise by Center for Leadership in Global Sustainability

## Functionality

- Survey
  - Individual
  - Group
- Instant report

- Download/print results
- Re-access results
- Administrator portal
  - Data download

## https://www.sustainabilityvalues.com/

# **User Testing Results**

- Bug in back-end calculations
- Result representation was unclear
  - Added clarification sentences
- Terms required more explanation
  - Added hover explanations
- Small aesthetic changes
  - Changed text size
  - Added color

### Before:

### Sustainability Values Diagnostic

To help interpret your value diagnostic, use the following guide: https://blogslt.vt.edu/constructingcustainability/

Each cell shows the % of people out of 2274 that fall in each category.

Your scores are denoted by the shaded cells.

#### What should be sustained?

	Strong	Weak	Neutral	Weak	Strong	
Natural Capital	19%	31%	29%	15%	6%	Social Capital
Ecosystem Services	16%	28%	35%	16%	5%	Species and Biodiversity

### After:

Sustainability Values Diagnostic

To help interpret your value diagnostic, use the following guide: Sustainability Values Booklet 28

Each cell shows the % of people out of 2312 that fall in each category.

Your scores are denoted by the highlighted cells.

#### What should be sustained?

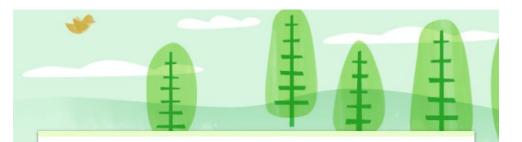

You strongly lean towards 'Social Capital', so did 7% of people who took this survey.

You fall directly between 'Ecosystem Services' and 'Species and Biodiversity', so did 36% of people who took this survey.

	Strong	Weak	Neutral	Weak	Strong	
Natural Capital ①	20%	30%	29%	15%	7%	Social Capital 🛈
Ecosystem Services O	16%	28%	36%	16%	5%	Species and Biodiversity ()

# **Additional User Testing**

- For our final user testing we have released a survey
- Our survey consists of tasks and subsequent questions for the user
- This will be more efficient and will allow us to reach a wider audience

### Sustainability Values Diagnostic

This is a user test survey for our Sustainability Values Diagnostic project. This survey should take about 15 minutes. Please take your time and be as descriptive as possible. Thank you for participating!

### https://forms.gle/iz8kZWfp2aF1Bow19

# **Final Stretch**

### <u>Sprint 1</u>

### <u>Sprint 2</u>

- Setup  $\checkmark$
- **Initial Design**
- Upload

- Implement Database
- Modify HTML
- Setup In-House Survey

### Sprint 3 (Spring Break)

- Load Existing Data  $\checkmark$
- Integration of Front-End  $\checkmark$ and Back-Fnd

### <u>Sprint 5</u> Sprint 6 <u>Sprint 4</u> <u>Sprint 7</u>

- Report Page  $\checkmark$
- Survey Result / Analysis
- Admin Access

- User Testing
  - Re-accessible User Results Functionality
- Update Group
  - Functionality
- Visualization X

- Finalize
- Document
- Review with Client

## **Lessons Learned**

- Don't trust people to be honest signing up for extra credit user testing
- Have user testing earlier on to find bugs quicker
- Assess difficulty and feasibility of stretch goals early on
- However, our stretch goals could be used for future projects
  - Additional visualizations
  - Edit functionality
  - Easier credential change

# Acknowledgements
