| Pasture Improvement | 6 |
| Terracing | 6 |
| Agricultural Economics | 6-7 |
| Farm Management | 7 |
| Outlook for Extension Work | 7-8 |
| Summary | 8-10 |

INTRODUCTION

The following is a narrative summary of the extension and A. A. A. program conducted in Cumberland County, for the year 1934. Work in this county has been carried on by the Emergency County Agent, W. O. Moss, assisted by T. A. Barrs, the last four months being completed by the writer of this summary.

This county has not had the services of the regular county agent for a number of years; consequently, the extension program has just been started. However, the agent has done considerable extension work along with the A. A. A. program.

A county extension organization is composed of the county agent and a county advisory board. This board, however, has been superseded by the community and county control committees of the various A. A. A. programs.

The committees in this county consist of 3 county and 15 community dark-fired tobacco committeemen, 3 county fine-cured committeemen, 3 county wheat committeemen, and 5 members of the corn and hog organization, 3 of these men acting as county committeemen.

Mr. W. O. Moss, Emergency County Agent, came to this county on December 1, to continue the A. A. A. program that had been started by T. A. Barrs and the county leaders. Mr. Moss worked entirely with the A. A. A. program until July 28. At this time he resigned to take up work in another field. On August 3, the agent replaced Mr. Moss. It was necessary that the agent spend considerable time rearranging the office records and familiarizing himself with the people and the county conditions. Due to the time that was necessarily devoted to the various A. A. A. programs, it was impossible for the agent to devote much of his time to the extension work for the first several months. After A. A. A. records had been rearranged, the present filing system set up in the office, and the common details in connection with A. A. A. work had been attended, the agent found it possible to devote some time introducing the extension work that had been started by Mr. E. M. Mathews, former joint County Agent in Goochland and Cumberland Counties.

TOBACCO

There are four types of tobacco grown in this county; dark-fired, flue-cured, dark air-cured, and Burley. Of these four types, dark-fired is the most important and is the largest cash crop grown in this county. The production of dark tobacco is about 1,000,000 pounds annually. There are 431 dark-fired A. A. A. contracts in the county, which cover about 92% of the dark tobacco grown. Approximately 4% of the tobacco grown in 1934 is covered by tax exemption warrants, and the remaining 4% is neither covered by contract nor allotted tax warrants.

The tobacco program has met with considerable success thus far. At this time, I feel that it is only just that I mention the work done by Joseph W. Hazelgrove, E. M. Shepard, and W. B. Stonnell, members of the county control committee. This committee has at all times tried to render unbiased decisions between the farmer and the other parties of tobacco contracts. Without the able assistance of this committee, the tobacco program could not have been an equal success.

Flue-cured tobacco is the second most important type grown in this county. Of this type, we have fifteen contracted growers, and three growers who have received tax exemption warrants. About 98% flue tobacco grown in this county is covered by a contract or tax allotment. The A. A. A. program of this community has met with splendid success and the growers are more than pleased with the prices they are receiving for the crop. It seems to be the desire of every flue-cured grower, or grower who has grown flue-cured tobacco, to increase the acreage, or start growing the golden weed again.

Dark air-cured and Burley tobacco hold very little importance in this county, the cash income from these two crops being very little. Although there is very little air-cured tobacco grown in the county this year, many farmers in the north-east portion have been watching the affects of the A. A. A. program on this commodity, hoping that some time in the future they will be able to resume the production of this crop to a limited extent.

WHEAT

This county, like most other counties in the dark-fired belt of Virginia, does not produce enough wheat for home consumption. Regardless of this fact, there are forty growers in this county who have signed a wheat reduction contract.

Those signing the contract are among the larger farmers in the county, who seed considerable acreage to wheat.

The wheat producers in this county have shown less interest in the A. A. A. program than the signers to any other commodity contract. This is possibly due to the little importance that the wheat crop holds in the county, from a standpoint of cash income.

CORN AND HOG

The agent feels that it is necessary to consider the above crop and livestock together, inasmuch as the A. A. A. program has combined the two. The thirty signers of the corn and hog contract are highly pleased with the results obtained through the cooperation with the A. A. A. program. The main criticism to this program has been the endless red tape that the growers have had to contend with from the signing of the contract until it had been completed. Many of our farmers from the James River side of the county have received considerable income from the government in benefit payment on their corn and hog contracts. Every contract signer who voted in the corn and hog referendum voted for a new contract for 1935. This alone is enough to say that they are well pleased with the program.

SWEET POTATOES

This crop is not extensively grown in the county. However, there is much soil that is well adapted to the production of this crop. Through the efforts of Mr. H. G. Gordon and L. C. Beamer, one farmer in this county has erected a sweet potato curing house and has successfully cured his 1934 sweet potato crop. The interest shown in this demonstration leads the agent to believe that more such curing houses will be erected in the future.

SWEET PEPPERS AND CUCUMBERS

Due to the low price received for the various types of tobacco, many farmers have diversified their farming by the adding of cucumbers and sweet peppers as cash crops. This:

however, has not met with success, largely due to the lack of marketing facilities. The agent has spent considerable thought and little work on the changes of the present marketing system. It is hoped, by some means, the producers of these two crops might receive more for their labor.

TOMATOES

This crop is grown to some extent by farmers in the northeast portion of the county and is due some consideration as a source of cash income. However, the agent has spent little time working with this crop but feels that some mention should be given to the cooperative cannery whose organization was assisted by T. A. Barrs and W. O. Moss, Emergency County Agent. The cooperative cannery is returning to its producers about 54¢ per bushel compared with the prevailing market price at any other canneries of 30¢ per bushel.

CLOWERS

Due to the fact that this county is unfortunate in not having a railroad, most of the farmers have not had the opportunity to buy lime at a reasonable price. Therefore, one can readily judge that there is very little clover grown. Crimson clover is most extensively grown of the clovers. Recommendations have been made for the use of lime, in most cases in more concentrated forms, due to the cost of hauling. In many cases, farmers have indicated that they would make applications of lime prior to the seeding of their clovers in the spring.

LESPEDEZA

The agent feels that there has been enough said by everyone concerning this wonderful legume, therefore, it is useless to elaborate further concerning the increasing popularity of this crop. It is at this time that I would like to pay tribute to Mr. E. M. Mathews, former joint County Agent, and Mr. Herbert Goodman, county farmer, for the introduction and promotion of this crop in the county. The crop is comparatively new here, and until this year, only a few farmers had saved seed. I am unable to give an accurate estimate as to the amount of

seed saved in the county this year, but I am safe in saying that it is ten times that of last year. From the present outlook, I feel that there will be 150% more acreage sown to this crop in the spring of 1935 than in 1934.

POULTRY

Many farmers have added small commercial flocks as a source of cash income from their farms. The agent has made every effort to encourage the introduction of poultry on many of the farms that do not receive some cash income from poultry at the present time. He has also used every opportunity to encourage the improvement of the flocks now in the county.

The following has been done as a means of improving the farm flock:

1. The use of better males.
2. Advocation of more rigid culling of the farm flock.
Demonstration of culling.
The culling of several commercial flocks by the agent.
3. Changes recommended in the present hen-houses for better lighting and ventilation.
4. Better sanitation practices recommended.
Building dropping boards
Lowering roost poles
Using litter on the floors of the houses
Regular cleaning and disinfecting of houses
5. Several calls have been made by the agent to farmers to give advice on treatments for various poultry diseases.
6. The use of the individual treatment for tape and round worms, to many of the flock owners visited, recommended.

The agent realizes that by the introduction of good poultry into this county, many more farmers will have a regular source of cash income. Therefore, he is endeavoring, and will continue to do everything possible to introduce more and better poultry.

SHEEP

Only a few farmers in the county have small flocks of

sheep. However, the agent has had several calls to demonstrate treatments for stomach worms. Most of the larger raisers have cooperated in starting regular treatments for worms. The agent is planning to get the farmers to market their wool cooperatively or to assist them in getting better markets for their wool than they have had in the past.

DAIRY CATTLE

Dairy cattle, like other types of livestock, hold little importance in the county. Consequently, the agent has had few calls relating to dairy cattle management. Most of the work has been in the form of recommendation for winter feed.

PASTURE IMPROVEMENT

The agent has had several opportunities to call the farmers attention to the results obtained in the pasture demonstrations being carried on in Appomattox County and making fertilizer recommendations for pastures on the basis of the results being obtained at the Appomattox demonstrations.

TERRACING

Much interest has been shown by several good farmers in the terrace work that was introduced by Mr. E. M. Mathews, former joint County Agent, and a leading farmer, Mr. Herbert Goodman. The agent has not had an opportunity to actually lay off terraces, but he has booked several engagements for terrace work to be done.

Due to the prevailing types of soil much terrace work is needed in the county. The agent has planned an intensive program promoting the building of terraces and more extensive use of clover crop.

AGRICULTURAL ECONOMICS

Mr. W. O. Moss held several educational meetings and distributed many of the farm record works issued in connection with the A. A. A. work. Some farmers seem to be using these books. However, most of them are unable to keep their records in the record books obtained from the department but rather

prefer to keep their records by their own systems. This probably indicates that the proper instructions have not been given by the agent as to how to use the book, or else the book is not of the proper type for the average farmer.

FARM MANAGEMENT

As has been mentioned previously in this report, the agent has started work and has outlined a program of work along the following farm improvement suggestions:

1. More and better poultry.
2. Control of soil erosion by terracing and use of cover crops.
3. More clovers by the use of lime.
4. More dollars from cash crops by better marketing systems.
5. Soil improvement by the use of lespedeza and other legumes.
6. Better livestock by more rigid culling and the use of better sires.

OUTLOOK FOR EXTENSION WORK

The agent hesitates to say too much when speaking of the outlook of extension work. He realizes that it is a real problem to get the farmers to realize that there is a real need for extension work. Many of the farmers seem to think that the A. A. A. program is the limit of our field. However, the agent feels somewhat encouraged by the interest that is being taken by some of the leading farmers in our contemplated extension program.

The following are some of the facts which will lead one to believe that the farmers are really cooperating with the extension program:

1. Seven requests for terracing.
2. Four requests for demonstration of regular treatment for stomach worms in sheep.

3. Many requests for advice on poultry culling and management.
4. Several requests for advice on cattle feeding.
5. Numerous inquiries about what can be expected of lespedeza and the method of seeding it.
6. Two inquiries for best recommendations of pasture improvement.

SUMMARY

To summarize all of the work done in this county by the writer of this narrative would be almost impossible. Due to the fact that eight months of the work was done by W. O. Moss, Emergency County Agent, and the office records are not complete, nor is Mr. Moss at hand to consult in writing this report. Mr. Moss was acting as Emergency County Agent, naturally, his work was confined chiefly to the organization and carrying on the various A. A. A. commodity associations. Mr. Moss had completed the sign-up of all commodities before the agent arrived.

The sign-up by commodities is as follows:

| | |
|----------------------------------|-----|
| Dark-fired tobacco | 431 |
| Flus-cured tobacco | 15 |
| Dark air-cured tobacco | 2 |
| Wheat | 40 |
| Corn and hog | 30 |

As it has been mentioned, most of the signers of these contracts have been satisfied with the results obtained through their cooperation in the reduction programs.

The rental payments on the various commodities have amounted to:

| | |
|------------------------------|-----------------------|
| Dark tobacco | \$ 5,296.80 |
| Flue-cured tobacco | 687.75 |
| Air-cured tobacco | 21.60 |
| Corn and hog | 2,517.00 |
| Wheat | <u>4,000.00--est.</u> |
| Total | \$12,523.15 |

In conclusion, the agent wishes to express his appreciation to the district agent, Mr. J. G. Bruce, for his personal interest and advice that he has given the work in this county throughout the year. The assistance of extension and A. A. A. workers is greatly appreciated.

Those who assisted in the work are:

S. K. Castle and J. L. Maxton, assistant Agricultural Economists, (through their cooperation in the tobacco program),

W. H. Byrne, Assistant Agronomist,

W. I. Thomas, Commodities Representative,

B. L. Hummel, Extension Sociologist,

Dr. Gordon Ward, Agricultural Economist,

H. H. Gordon, Assistant Agricultural Engineer,

L. C. Beamer, Assistant in Vegetable Extension.

The following committeemen should be given consideration for work that they have done with the A. A. A. program:

Joseph W. Hazelgrove, W. B. Stonnell, E. M. Shepard, (dark tobacco county control committee),

L. W. Ayres, W. Ben Walker, A. M. Blanton, Frank Vogel, W. E. Tatum, J. H. Tatum, W. P. Senderson, W. S. Anderson, J. W. Garnett, A. E. Amos, E. W. Madison, H. A. Davis, W. E. Wright, George Sanderson, and S. W. Shepard, (members of the corn and hog control association),

A. U. Bryant, G. W. Bryant, and G. W. Key, (members of the flue-cured county control committee),

John Martin, William P. Sanderson, Frank Baeber,
(members of the corn and hog control committee),

Joseph W. Hazelgrove, Frank Baeber, William P. Sanderson,
(members of the county wheat control committee).

The agent has thoroughly enjoyed the busy hours spent
in Cumberland County for the past four months, working with
Cumberland County farmers.

COMBINED ANNUAL REPORT OF COUNTY EXTENSION WORKERS

This report form is for use by county extension agents in making a combined statistical report on all extension work done in the county during the year. Agents resigning during the year should make out this report before quitting the service.

State Virginia County Cumberland

REPORT OF

(Name) Home Demonstration Agent. From _____ to _____ 193
W. O. Moss From Dec. 1, 1933 to July 28, 1934
Emergency County 4-H Club Agent.
Engel M. Cabell From Aug. 3 to Nov. 30, 1934
Agricultural Agent.

READ SUGGESTIONS, PAGES 2 AND 3

COUNTY AGENT ANNUAL REPORT

Approved: _____

Date _____

State Extension Director.

SUGGESTIONS RELATIVE TO THE PREPARATION OF THE COUNTY EXTENSION AGENT'S ANNUAL REPORT

The annual report should be a summary, with analysis and interpretations, for presentation to the people of the county, the State, and the Nation of the extension activities in each county for the year, and the results obtained by the county extension agents assisted by the subject-matter specialists. The making of such a report is of great value to the county extension agents and the people of the county in showing the progress made during the year as a basis for future plans. It is of vital concern also to the State and Nation as a measure of rural progress and a basis for intelligent legislation and financial support of extension work.

At least four copies of the annual report should be made: One copy for the county officials, one copy for the agent's files, one copy for the State extension office, and one copy for the Extension Service, United States Department of Agriculture. *The report to the Washington office should be sent through the State extension office.*

STATISTICAL SUMMARY

Where two or more agents are employed in a county they should submit a single statistical report showing the combined activities and accomplishments of all county extension agents employed in the county during the year. Results obtained through assistance rendered agents by specialists should also be included. This report shows, insofar as possible, the part each agent has taken in forwarding the extension program. The county totals should be the sum of the activities and accomplishments of individual agents *minus duplications due to two or more agents participating in the same activity or accomplishment.* The county totals, when properly recorded, show the progress made in the county during the year in forwarding the entire extension program. Negro men and women agents should prepare a combined statistical report separate from that of the white agents.

The statistical summary should be a report of this year's activities and results that can be verified by records on file in the county office. Where records are not available careful estimates are desired. Such estimates should be marked "Est."

NARRATIVE SUMMARY

A separate narrative report is desired from the leader of each line of work, such as county agricultural agent, home demonstration agent, boys' and girls' club agent, and Negro agent. Where an assistant agent has been employed during a part or all of the year, the report of his or her work should be included with the report of the leader of that line of work. Where an agent in charge of a line of work has quit the service during the year, the information contained in his or her report should be incorporated in the annual report of the agent on duty at the close of the report year, and the latter report so marked.

The narrative report should summarize and interpret, under appropriate subheadings, the outstanding results accomplished and the extension methods used for each project. Every statement should be clear, concise, forceful, and, where possible, reinforced with necessary data from the statistical summary. Use a descriptive style of writing, giving major accomplishments first under each project. Give extension methods fully relating to outstanding results only, and where practicable illustrate with photographs, maps, diagrams, blueprints, or copies of charts and other forms used. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs and reasonably good margins. The pages should be numbered in consecutive order.

The following outline is merely suggestive of how the narrative report may be clearly and systematically presented. Each agent should prepare an outline to fit the situation and the work to be reported.

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT

- I. Cover and title page.
- II. Table of contents.
- III. Summary of activities and accomplishments, preferably of one or two typewritten pages only, placed at the beginning of the narrative report.
- IV. Changes in county extension organization.
 - (1) Form.
 - (2) General policies.
 - (3) Procedure.
- V. County program of work.
 - (1) Factors considered and methods used in determining program of work.
 - (2) Project activities and results.

Under appropriate headings and subheadings present in some detail for each major project or line of work the goals set up, the methods used, the results achieved, and the significance of these results in terms of improved farms and homes and of better community life.
- VI. Outlook and recommendations, including suggestive program of work for next year.

TERMINOLOGY

To insure reports which convey the intended meaning to others and to facilitate the compilation of satisfactory national statistics on extension, it is extremely important that terms be used in accordance with accepted definitions. The following definitions of extension terms have been approved by the United States Department of Agriculture and the Association of Land Grant Colleges and Universities. Agents should read these definitions before starting to write the annual reports.

DEFINITIONS OF EXTENSION TERMS

1. A program of work is a statement of the specific projects to be undertaken by the extension agents during a year or a period of years.
2. A plan of work is a definite outline of procedure for carrying out the different phases of the program of work. Such a plan provides specifically for the means to be used and the methods of using them. It also shows what, how much, when, and where the work is to be done.
3. A community is a more or less well-defined group of rural people with common interests and problems. Such a group may include those within a township, trade area, or similar limits. For the purpose of this report a community is one of the several units into which a county is divided for conducting organized extension work.
4. A project leader, local leader, or committeeman is a person who, because of special interest and fitness, is selected to serve as a leader in advancing some phase of the local extension program. A project leader may be either an organization or a subject-matter leader.
5. Demonstrations as contemplated in this report are of two kinds—method demonstrations and result demonstrations. A method demonstration is a demonstration given by an extension worker or other trained leader for the purpose of showing how to carry out a practice. Examples: Demonstrations of how to can fruits and vegetables, mix spray materials, and cull poultry. A result demonstration is a demonstration conducted by a farmer, home maker, boy, or girl under the direct supervision of the extension worker, to show locally the value of a recommended practice. Such a demonstration involves a substantial period of time and records of results and comparisons, and is designed to teach others in addition to the person conducting the demonstration. Examples: Demonstrating that the application of fertilizer to cotton will result in more profitable yields, that underweight of certain children can be corrected through proper diet, that the use of certified seed in growing potatoes is a good investment, or that a large farm business results in a more efficient use of labor. The adoption of a farm or home practice resulting from a demonstration or other teaching activity employed by the extension worker as a means of teaching is not in itself a demonstration.
6. A result demonstrator is an adult, a boy, or a girl who conducts a result demonstration as defined above.
7. A cooperator is a farmer or home maker who agrees to adopt certain recommended practices upon the solicitation of an extension worker. The work is not directly supervised by the extension agent and records are not required, but reports on the success of the practices may be obtained.
8. A 4-H Club is an organized group of boys and/or girls with the objectives of demonstrating improved practices in agriculture or home economics, and of providing desirable training for the members.
9. 4-H Club members enrolled are those boys and girls who actually start the work outlined for the year.
10. 4-H Club members completing are those boys and girls who satisfactorily finish the work outlined for the year.
11. A demonstration meeting is a meeting held to give a method demonstration or to start, inspect, or further a result demonstration.
12. A leader-training meeting is a meeting at which project leaders, local leaders, or committeemen are trained to carry on extension activities in their respective communities.
13. An office call is a call in person by an individual or a group seeking agricultural or home-economics information, as a result of which some definite assistance or information is given. A telephone call differs from an office call in that the assistance or information is given or received by means of the telephone. Telephone calls may be either incoming or outgoing.
14. A farm or home visit is a call by the agent at a farm or home at which some definite information relating to extension work is given or obtained.
15. Days in office should include time spent by the county extension agent in the office, at annual and other extension conferences, and on any other work directly related to office administration.
16. Days in field should include all days spent on official duty other than "days in office."
17. Letters written should include all original letters on official business. (Duplicated letters should not be included.)
18. An extension school is a school usually of 2 to 6 days' duration, arranged by the Extension Service, where practical instruction is given to persons not resident at the college. An extension short course differs from an extension school in that it is usually held at the college or another educational institution and usually for a longer period of time.
19. Records consist of definite information on file in the county office that will enable the agent to verify the data on extension work included in this report.
20. The county extension association or committee is that county organization, whether a membership or a delegate body, which is recognized officially in the conduct of extension work in the county.

GENERAL ACTIVITIES

Report Only This Year's Extension Activities and Results That Can Be Verified

1. List below the names, titles, and periods of service of the county extension agents whose work is included in this report. Include time of assistants with that of regular agent.

| AGENT | Total number of service this year | Days devoted in A. A. A. work | Days devoted to other work | Total days in office | Total days in field |
|---|-----------------------------------|-------------------------------|----------------------------|----------------------|---------------------|
| | 60 | 60 | 60 | 60 | 60 |
| (Name) Home demonstration agent..... | (1) | | | | |
| Asst. home demonstration agent..... | | | | | |
| 4-H Club agent..... | (2) | | | | |
| Assistant 4-H Club agent..... | | | | | 1 |
| <i>Eugene M. Carson</i> Agricultural agent..... | (3) | 12 | 270 | | |
| <i>A. D. Mass</i> Assistant agricultural agent..... | | | | 75 | 227 |

2. County extension association or committee:

- (a) Agricultural extension: *County advisory board*
- (1) Name..... (2) Number of members..... *18*
- (b) Home demonstration: (1) Name..... (2) Number of members..... *2*
- (c) 4-H Clubs: (1) Name..... (2) Number of members.....
3. Number of communities in county where extension work should be conducted..... *6*
4. Number of above communities in which the extension program has been planned cooperatively by extension agents and local committees..... *6*
5. Number of different voluntary county or community project leaders or committeemen actively engaged in forwarding the extension program:
- (a) Adult work { (1) Men..... (b) 4-H Club work { (1) Men..... (3) Older club boys..... } 5
- { (2) Women..... } { (2) Women..... (4) Older club girls..... } 5
6. Number of different paid local leaders engaged in A. A. A. program, or in relief work..... { (a) Men..... *27* } 6
- { (b) Women..... *1* } 6
7. Number of clubs or other groups organized to carry on adult home demonstration work..... 7
8. Number of members in such clubs or groups..... 8

| ITEM | Home demonstration agents (a) | 4-H Club agents (b) | Agricultural agents (c) | County total (d) |
|---|-------------------------------|---------------------|-------------------------|------------------|
| 9. Number of 4-H Clubs..... | | | | 9 |
| 10. Number of different 4-H Club members enrolled..... { (1) Boys..... } 10 | | | | |
| { (2) Girls..... } | | | | |
| 11. Number of different 4-H Club members completing..... { (1) Boys..... } 11 | | | | |
| { (2) Girls..... } | | | | |
| 12. Number of different members enrolled in 4-H Club work for:..... | | | | |

| MEMBERS | 1st year | 2d year | 3d year | 4th year | 5th year | 6th year and over |
|----------------|----------|---------|---------|----------|----------|-------------------|
| (a) Boys..... | | | | | | |
| (b) Girls..... | | | | | | |

County total should equal sum of preceding three columns unless duplications due to two or more agents participating in the same activity or communities.

Report the total number of different boys or girls enrolled in club work. This total should equal the sum of the project enrollments reported on page 7 to this report. Duplications due to the same boy or girl enrolling on two or more subject-matter lines of work.

Report as separate 2 but refer to completion instead of enrollment.

The total for this question should agree with county total, question 11.

GENERAL ACTIVITIES—Continued

Report Only This Year's Extension Activities and Results That Can Be Verified

| ITEM | Age | Head number | 11 | 12 | 13 | 14 | 15 | 16 | 17 | 18 | 19 | 20 and over |
|---|-----------|-------------|----|----|----|----|----|----|----|----|----|-------------|
| 13. Number of different 4-H Club members enrolled according to age ¹ | (a) Boys | | | | | | | | | | | |
| | (b) Girls | | | | | | | | | | | |

14. Number of 4-H Club members: (a) In school (b) Out of school 14

| ITEM | Home demonstration agents (a) | 4-H Club agents (b) | Agricultural agents (c) | County total ¹ (d) |
|---|-----------------------------------|---------------------|-------------------------|-------------------------------|
| 15. Number of 4-H Club teams trained: (1) Judging (2) Demonstration | | | | |
| 16. Number of groups other than 4-H Clubs organized for extension work with rural young people 16 years of age and older | | | | |
| 17. Members in groups reported in question 16: (1) Young men (2) Young women | | | | |
| 18. Total number of farm or home visits ² made in conducting extension work | | | 954 | 954 |
| 19. Number of different farms or homes visited | | | 535 | 535 |
| 20. Number of calls relating to extension work: (1) Office (2) Telephone | | | 2064 | 2064 |
| 21. Number of news articles or stories published ³ | | | 3 | 3 |
| 22. Number of individual letters written | | | 1530 | 1530 |
| 23. Number of different circular letters prepared (not total copies mailed) | | | 24 | 24 |
| 24. Number of bulletins distributed | | | 252 | 252 |
| 25. Number of radio talks made | | | 0 | 0 |
| 26. Number of events at which extension exhibits were shown | | | 2 | 2 |
| 27. Training meetings held for local leaders or committeemen: (1) Adult work (2) 4-H Club | (a) Number | | 5 | 5 |

| | (c) Women leaders | | | |
| (1) Number (2) Total attendance | (a) Number | | 3 | 3 |
| | (b) Leaders | | 55 | 55 |
| 28. Method demonstration meetings held (include all method demonstrations in both adult and 4-H Club work given by agents and specialists not reported under question 27) | (1) Number | | 3 | 3 |
| (2) Total attendance | | | 55 | 55 |
| 29. Meetings held at result demonstrations: | (1) Number | | | |
| | (2) Total attendance | | | |

¹ The total for this question should agree with county total, question 14.² County total should equal sum of preceding three columns minus duplications due to two or more agents participating in the same activity or combination.³ Do not count a single visit to both the farm and home as two visits.⁴ Do not count letters relating to sessions of meetings only.

Notes—Questions 18-26 refer to the total number of different activities conducted this year. The totals should equal the sums of the corresponding information reported on following pages, minus duplications where the same activity relates to two or more lines of work.

GENERAL ACTIVITIES—Continued

| | | (b) Total attendance | | | | |
| | (2) 4-H club | (a) Number | | | | |
| | | (b) Total attendance | | | | |

SUMMARY OF EXTENSION INFLUENCE FOR YEAR

It is highly desirable for extension workers to consider the proportion of farms and farm homes in the county which have been definitely influenced to make some substantial change in farm or home operations as a result of the extension program for men, women, boys, and girls. It is recognized that this information is very difficult for agents to report accurately, so a conservative estimate based upon such records, surveys, and other sources of information as are available will be satisfactory. Such estimates should be marked "Est."

Include results of emergency activities as well as the regular extension program.

| | | |
|---|--------------------|----|
| 25. Number of farms in county | 1024 | 25 |
| 26. Number of farms on which changes in practices have definitely resulted from the agricultural extension program | 477 ⁹⁶ | 26 |
| 27. Number of farm homes in which changes in practices have definitely resulted from the home demonstration program | | 27 |
| 28. Number of other homes in which changes in practices have definitely resulted from the home demonstration program | | 28 |
| 29. Number of farm homes with 4-H Club members enrolled | | 29 |
| 30. Number of other homes with 4-H Club members enrolled | | 30 |
| 31. Total number of different farm families influenced by some phase of the extension program <small>(Include questions 25, 26, and 28, minus duplications.)</small> | 831 ⁶⁶⁵ | 31 |
| 32. Total number of different other families influenced by some phase of extension program <small>(Include questions 29 and 30, minus duplications.)</small> | 3 | 32 |

* County total should equal sum of preceding three columns minus duplications due to two or more agents participating in the same activity or overlapping.

** Items 31-32 refer to the total number of different activities conducted this year. The totals should equal the sum of the corresponding information reported on following pages from duplications where the same activity occurs in two or more lines of work.

CEREALS¹

Report Only This Year's Extensive Activities and Results That Can Be Verified

| ITEM | Corn (a) | Wheat (b) | Oats (c) | Rye (d) | Barley (e) | All other cereals ² (f) |
