

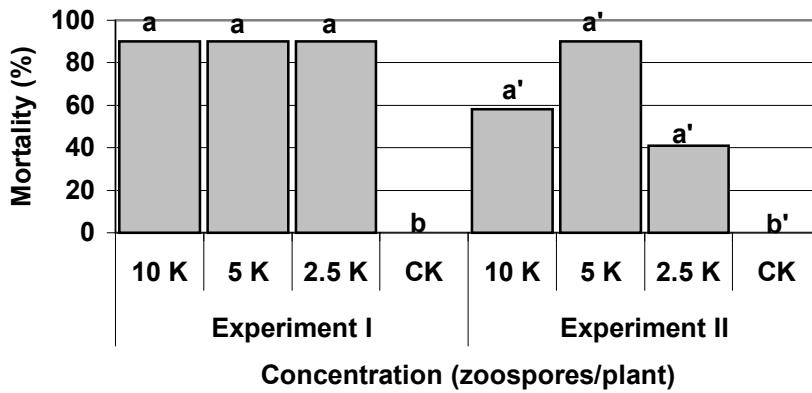

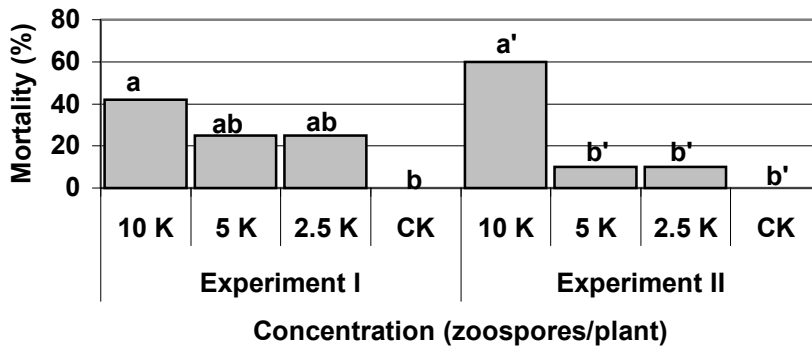

Figure 15, A-E. Mortality of *Salvia officinalis* (sage) after inoculation with three zoospore concentrations (10,000; 5,000; 2,500 zoospores/plant) from isolates of *Phytophthora* and non-treated control (CK). Bars with the same letter are not significantly different according to Fisher's exact test ($P \leq 0.05$).

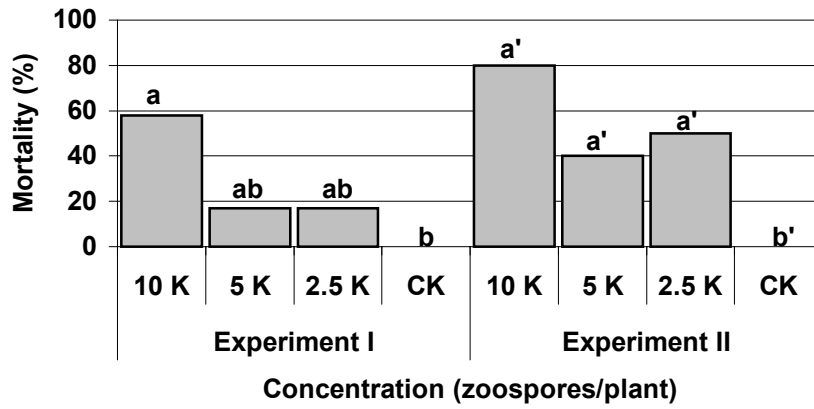

A. *P. cactorum* (65).

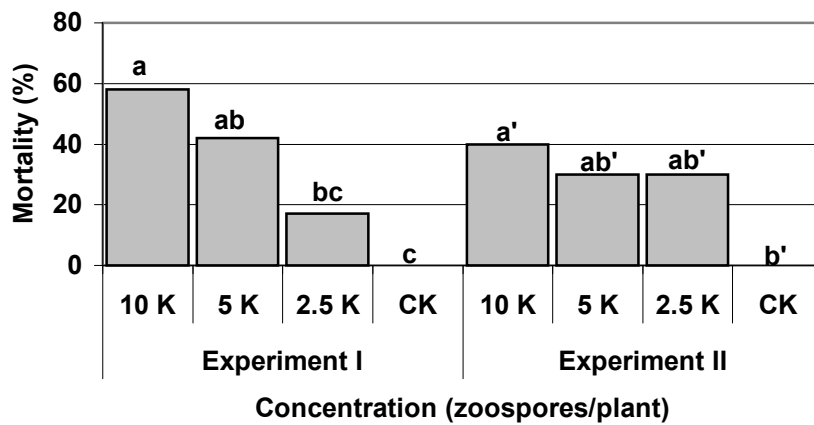

B. *P. capsici* (279).

C. *P. citrophthora* (288).

D. *P. citrophthora* (67).

E. P. nicotianae (100).
