Personal Summary Report

Dec. 1, 1938 - Nov. 30, 1939

Days in office	162 $\frac{1}{2}$
Days in Field	242
Number of Farm visits	628
Number of different Farms visited	301
No. of Calls relative to Demonstration work	1, 035
No. of individual letters written.	896
No. of Different letters prepared	46
No. of bulletins distributed	247
No. of different meetings held and participated in by agents.	71
Total Attendance	9,412
Total miles traveled on Official duty	14,642

III. Brief Summary of Activities

The office of the County Agricultural Agent has materially assisted in making Powhatan a wealthier county.

A. The Agricultural Conservation Program:

The Agricultural Conservation Program, an activity which consumes more of the agents' time than any other, is bringing into the county this year \$16,488.00. Approximately \$14,258.13 of this is paid to farmers in the County for soil improvement practices they have carried out and for what they have done to maintain an adequate food and feed commodities. \$2,229.87 of this is paid to local Powhatan people for administering this program, thus making available some much needed local part time employment.

Account \$9,000.00 more could have been earned in Powhatan County this year had the farmers taken full advantage of the opportunities they had to improve their soil.

It is a well established fact that soil is the most precious natural resource of our nation. The proper use of this resource has such a profound influence upon the welfare of both the city and the country people that society has come to realize its responsibility for helping

maintain the productive powers of soil. The Powhatan Agricultural Conservation Association is the vehicle carrying out this responsibility locally.

Six hundred and sixty-two farms are listed in the Association. This year three hundred and fifty-four of these farms staved off soil erosion and prevented plant food leaching, increased the humus in the soil and increased the productive power of the soil in general by:

1. Applying 22 carloads of lime or 712 tons.
2. Using recommended crop rotations on 4,301 acres.
3. Plowing under green manure crops on 445 acres.
4. Applying 112,500 pounds of Triple Superphosphate and 95,340 lbs of superphosphate on pastures and legumes.
5. By diverting land from the cultivation of tobacco to the raising of soil improving crops.
6. By seeding 53.0 acres of Alfalfa; 71.3 acres of clover, vetch, and austrian peas; seeding 3,584.1 acres of Lespedeza; Lespedeza and clover mixtures.
7. By plowing under or leaving on the land 540.4 acres of Peas, rye, crimson clover and vetch.

It is the hope of the County Agricultural Extension Agents that not only all of the eligible farmers in the county, but all of the county people will realize that an asset this Agricultural Conservation Program is to the county at present and will make it

2

an even greater asset, not only in dollars and cents but also in providing a more permanent basis for the future prosperity of the county.

B. Rural Electrification:

The thirty-one miles of R. E. A. Power lines recently built and energized in Powhatan County serving seventy-six families on the southside of Route 60; the eighteen miles expected to be built shortly in the Fine Creek Mills section for which fifty families have already signed contracts for service, and the line being worked on in the Trenholm community, will not only revolutionize the standard of living of the families who are on these lines, but it will be reflected in the future revenues for the public services of the county which will affect all tax payers.

The R. E. A. power lines located in this county are taxable in the same way that any other public utility is taxed for local revenue. Therefore from the standpoint of local public policy we should strive for every mile we can get.

C. More efficient methods of Production:

The narrow margin of profit in all farm products springing from disparity in price levels of prices farmers receive for the products they produce and the prices they pay for the goods

they purchase, makes more important than every before the emphasis which the county Agricultural Agents are placing on more efficient methods of production.

Farmers in Powhatan are being constantly advised to buy higher analysis fertilizers thereby eliminating the cost of handling excess worthless materials and many of them are doing it.

They are likewise being continuously reminded to apply fertilizers that are balanced from the standpoint of the need of the crops, and the nature and content of the soil. This office has assisted farmers in making soil tests.

Good seed, and inoculation where necessary, has increased the income of many of the farmers. Much has been done to curb the sale and purchase of low quality seed full of noxious weed seeds or from poor parent stock. Another service which this office affords local people is help in getting free tests of their seeds to determine whether they are suitable to plant.

The County Agent has assisted a number of farmers in getting better sires to head their breeding program which will be a large factor in the permanent success of the producers.

D. Control of Diseases and Parasites:

Hundreds of dollars more are in the pockets of the farmers of Powhatan because of the disease and parasite control work that has been done by the county agricultural agents.

It is the policy of the Extension Service to carry out an educational program to prevent losses from diseases and parasites through sanitation and other preventive control measures. However,

we realize that when a poultryman's flock is dying or not producing as they should; when sheep and hogs are dying or failing to grow for lack of proper treatment for worms; when danger of an epidemic of cholera exists and there is no veterinarian in the county or within reasonable reach, then we have done what is necessary to help get these troubles under control.

In other instances we helped gardeners to determine the causes of losses from insects and prescribed control measures.

There were three outbreaks of hog cholera in the County this year and when informed of this outbreak we immediately inoculated most of the hogs in these communities and at the present time we seem to have this serious disease under control and have no doubt saved the farmers hundred of dollars.

IV. County Extension Organization:

A. Form

The county Extension organization under the leadership of the Agricultural Extension Agents is centered around a County Board of Agriculture made up of representatives selected by the people of the communities where Agricultural Conservation work and County program planning meetings are held and also representatives of other organizations that are closely associated with the Agricultural Agents' activities. The purpose of this Board is to make recommendations regarding the projects that should be undertaken and the methods that should be used.

5

in carrying out these projects.

B. General Policies

- 1. The recommendations of the County Board of Agriculture have been followed as closely as possible.
- 2. We have cooperated with all other agencies of the county and the government working with rural people.
- 3. We have helped co-ordinate the various activities and programs now underway locally for the services of rural people, in an effort to insure greater efficiency.

C. Procedures:

- 1. Fifty-two public meetings have been held locally to carry out the educational features of projects undertaken.
- 2. Forty-six different circular letters totaling several thousand copies have been mailed to keep the people informed.
- 3. Eight hundred and ninety-six letters have been written in reply to definite requests for information.
- 4. Radio broadcasts over W R V A are put on each six weeks about some local projects of current interest.
- 5. Telephone service has recently been installed by the County Board of Supervisors as an additional means of making the information and facilities of this office available to the local people.
- 6. Six hundred and twenty-eight farm and home visits have been made by the Agricultural Agents in helping farmers with their problems.

6.

V. County Program of Work:

The County program of work for 1939 was very largely outlined by the County Board of Agriculture. In outlining this program a number of related factors were considered.

A. Factors considered:

1. Factual information about the county:

a. Location:

Powhatan County is admirably located. It is only twenty-five miles west of the State capital at Richmond and it has a number of different good roads leading to this large Metropolitan center from all parts of the county. From the standpoint of marketing and also from the standpoint of the future expansion and growth of the county this is very important and significant.

Powhatan County is in the lower Piedmont section of Virginia, and is bounded on the North by the James River and on the south by the Appomattox River. (The fertile river bottoms adjacent to these rivers are a great asset to the county agriculturally) It is bounded on the east by Chesterfield and on the west by Cumberland Counties.

b. Land:

Powhatan County has an area of 273 square miles or 174,720 acres. The County is approximately thirty miles long and eighteen miles wide. It has 770 farms according to § recent census data and each farm has an average of 134 acres.

These farms are classified according to the following types: General - 137; cash-grain - 17; crop specialty,

(tobacco, ect) 37; dairy 25; livestock - 20; poultry 14; self-sufficing, 372; abnormal and others - 135.

c. Soils:

The soils along the rivers mentioned above are characteristic of all river bottom land. The rest of the soil varies from gray to dark chocolate with red subsoil predominating.

This soil is adapted to specialized types of farming as well as being exceptionally well suited to general farming.

d. The People:

Powhatan County has a very substantial citizenship. This arises partly from the fact that we have a lot of really good land which was settled very early in our nations history and traditions of permanency established then have endured throughout the years.

According to the last population census Powhatan had 2998 whites and 3,113 colored people.

e. The Sources of Income:

Powhatan is essentially an agricultural county. Its chief sources of income are agricultural and forestry products.

We have service institutions it is true, but these thrive as a result of almost 100% farmer patronage,

The tourist trade is becoming more important as ^a source of income.

8

2. Progress with previous projects:

Results of previous Extension projects had considerable influence upon the recommendations made by the County Board of Agriculture. For instance, the fact that previous agronomy campaigns has been instrumental in helping to get larger supplies of feeds and improved pastures, made it seem wise that the county increase its livestock to profitably utilize these products. Before these feed supplies had been increased it did not seem at all sensible for people to increase their livestock because of the high prices they would have to pay for feed to maintain the increase.

3. The Needs of the People:

Plant food is the only product the farmer has to sell, which way he should market it was the real problem that the County Board of Agriculture and the Extension Agents had to determine.

Whether this plant food in the soil should be marketed in the form of seed corn, wheat, hogs, beef cattle, dairy products or hay was and is of very vital concern to every farmer in the county.

Whether our farmers shall wisely use or squander their basic heritage -- the plant food in the soil -- is a matter that is of concern to farmers and non-farmers as well.

Whether there will be substance in the soil to maintain another generation is a result of how the present generation conserves or increases the present fertility.

B. Recommendations and Results:

After holding fifteen County program planning meetings in five communities in the County, and keeping in mind the factors mentioned above,

our County Board of Agriculture met and made the following recommendations to be carried out as far as possible in a long time Agricultural program for this County.

1. To do more pasture improvement work on our badly neglected pastures by using lime, fertilizer, and grass seed where needed. This has been done to a greater extent this year than ever before and will be continued.
2. To get more farmers to use lime on their crop land and pastures, and to use higher grade fertilizers. This has been done in a large number of cases this year.
3. Encourage more farmers to carry out better rotation systems on their farms. They have been assisted in this by the County Agents and Community Committeemen with considerable success.
4. Help farmers realize the importance of having a winter cover crop on all row crop land to avoid leaching and washing. This was done at farmers meetings and by letters.
5. Since the Agricultural Conservation Program has done so much to increase the acreage of clovers and grasses, the Board felt that there should be a substantial increase of all classes of livestock. With normal seasons feed for livestock is not the serious problem that it has been in the past so we are working on not only more but better livestock.

However, until the farmers realize that beef cattle requires better pastures than we have at the present time and more and better roughage for winter feeding, and for this reason

We have only recommended beef cattle to farmers who are willing to follow some pasture improvement practices and on farms where an abundance of feed can be grown for winter use.

With milk cows there is some difference since there is a need for more cows for family requirements and this we have brought to the attention of the farmers urging them to turn out more heifer calves and at the same time do more pasture improvement work.

6. The Board recommends some increase in barley and oats and the seeding of more rye as a winter cover crop and for grazing.
7. There should be no less than 35 laying hens in good houses on the average farm. An organized Farm Flock Improvement program has been started in the County.
8. The Home garden should be better planned with respect to fertilizers, varieties used, and especially definitely planned fall gardens. Some progress has been made in this direction but not the progress the importance of it merits.

VI. Acknowledgement of Appreciation:

We want to take this opportunity to express our appreciation to the County Board of Supervisors for what they have done in more adequately equipping the County Agent's Office for greater service, and we would also like to thank the members of the Soil Conservation Committees for the excellent work that they have done in helping to carry out the Agricultural Program of the County. A word of appreciation is also due the members of the other Federal Agencies who have been working in the County and the Specialists from the Extension Division at Blacksburg.

The advice and assistance of the County Board of Agriculture has been of inestimable help to the County Extension Agents as one might readily realize

from reading this annual report.

COMBINED ANNUAL REPORT OF COUNTY EXTENSION WORKERS

This report form is for use by county extension agents in making a combined statistical report on all extension work done in the county during the year. Agents resigning during the year should make out this report before quitting the service.

State Virginia County Powhatan

REPORT OF

Katherine R. Brent
(Name) Home Demonstration Agent.

From December 1 to Nov. 30, 1939

Assistant Home Demonstration Agent.

From _____ to _____, 193

4-H Club Agent.

From _____ to _____, 193

Assistant County Agent in charge of Club Work.

From _____ to _____, 193

Paul W. Rose
Agricultural Agent.

From August 1 to Nov. 30, 1939

W. J. Michaux
Assistant Agricultural Agent.

From December 1 to Nov. 30, 1939

READ SUGGESTIONS, PAGES 2 AND 3

2

SUGGESTIONS RELATIVE TO THE PREPARATION OF THE COUNTY EXTENSION AGENT'S ANNUAL REPORT

The annual report should be a summary, with analysis and interpretations, for presentation to the people of the county, the State, and the Nation of the extension activities in each county for the year, and the results obtained by the county extension agents assisted by the subject-matter specialists. The making of such a report is of great value to the county extension agents and the people of the county in showing the progress made during the year as a basis for future plans. It is of vital concern also to the State and Nation as a measure of rural progress and a basis for intelligent legislation and financial support of extension work.

At least four copies of the annual report should be made: One copy for the county officials, one copy for the agent's files, one copy for the State extension office, and one copy for the Extension Service, United States Department of Agriculture. *The report to the Washington office should be sent through the State extension office.*

STATISTICAL SUMMARY

Where two or more agents are employed in a county they should submit a single statistical report showing the combined activities and accomplishments of all county extension agents employed in the county during the year. Results obtained through assistance rendered agents by specialists should also be included. This report shows, insofar as possible, the part each agent has taken in forwarding the extension program. The county totals should be the sum of the activities and accomplishments of individual agents minus duplications due to two or more agents participating in the same activity or accomplishment. The county totals, when properly recorded, show the progress made in the county during the year in forwarding the entire extension program. Negro men and women agents should prepare a combined statistical report separate from that of the white agents.

The statistical summary should be a report of this year's activities and results that can be verified by records on file in the county office. Where records are not available careful estimates are desired. Such estimates should be marked "Est."

NARRATIVE SUMMARY

A separate narrative report is desired from the leader of each line of work, such as county agricultural agent, home demonstration agent, boys' and girls' club agent, and Negro agent. Where an assistant agent has been employed during a part or all of the year, the report of his or her work should be included with the report of the leader of that line of work. Where an agent in charge of a line of work has quit the service during the year, the information contained in his or her report should be incorporated in the annual report of the agent on duty at the close of the report year, and the latter report so marked.

The narrative report should summarize and interpret, under appropriate subheadings, the outstanding results accomplished and the extension methods used for each project. Every statement should be clear-cut, concise, forceful, and, where possible, reinforced with necessary data from the statistical summary. Use a descriptive style of writing, giving major accomplishments first under each project. Give extension methods fully relating to outstanding results only, and where practicals illustrate with photographs, maps, diagrams, blueprints, or copies of charts and other forms used. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs and reasonably good margins. The pages should be numbered in consecutive order.

The following outline is merely suggestive of how the narrative report may be clearly and systematically presented. Each agent should prepare an outline to fit the situation and the work to be reported.

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT

- I. Cover and title page.
- II. Table of contents.
- III. Summary of activities and accomplishments, preferably of one or two typewritten pages only, placed at the beginning of the narrative report.
- IV. Changes in county extension organization.
 - (1) Form.
 - (2) General policies.
 - (3) Procedures.
- V. County program of work.
 - (1) Factors considered and methods used in determining program of work.
 - (2) Project activities and results.
Under appropriate headings and subheadings present in some detail for each major project or line of work the goals set up, the methods used, the results achieved, and the significance of these results in terms of improved farms and homes and of better community life.
- VI. Outlook and recommendations, including suggestive program of work for next year.

TERMINOLOGY

To insure reports which convey the intended meaning to others and to facilitate the compilation of satisfactory national statistics on extension, it is extremely important that terms be used in accordance with accepted definitions. The following definitions of extension terms have been approved by the United States Department of Agriculture and the Association of Land Grant Colleges and Universities. Agents should read these definitions before starting to write the annual reports.

DEFINITIONS OF EXTENSION TERMS

1. A program of work is a statement of the specific projects to be undertaken by the extension agents during a year or a period of years.
2. A plan of work is a definite outline of procedure for carrying out the different phases of the program of work. Such a plan provides specifically for the means to be used and the methods of using them. It also shows what, how much, when, and where the work is to be done.
3. A community is a more or less well-defined group of rural people with common interests and problems. Such a group may include those within a township, trade area, or similar limits. For the purpose of this report a community is one of the several units into which a county is divided for conducting organized extension work.
4. A project leader, local leader, or committeeman is a person who, because of special interest and fitness, is selected to serve as a leader in advancing some phase of the local extension program. A project leader may be either an organization or a subject-matter leader.
5. Demonstrations as contemplated in this report are of two kinds—method demonstrations and result demonstrations. A method demonstration is a demonstration given by an extension worker or other trained leader for the purpose of showing how to carry out a practice. Example: Demonstrations of how to can fruits and vegetables, mix spray materials, and cull poultry.
6. A result demonstration is a demonstration conducted by a farmer, home maker, boy, or girl under the direct supervision of the extension worker, to show locally the value of a recommended practice. Such a demonstration involves a substantial period of time and records of results and comparisons, and is designed to teach others in addition to the person conducting the demonstration. Examples: Demonstrating that the application of fertilizer to cotton will result in more profitable yields, that underweight of certain children can be corrected through proper diet, that the use of certified seed in growing potatoes is a good investment, or that a large farm business results in a more efficient use of labor.
7. The adoption of a farm or home practice resulting from a demonstration or other teaching activity employed by the extension worker as a means of teaching is not in itself a demonstration.
8. A result demonstrator is an adult, a boy, or a girl who conducts a result demonstration as defined above.
9. A cooperater is a farmer or home maker who agrees to adopt certain recommended practices upon the solicitation of an extension worker. The work is not directly supervised by the extension agent and records are not required, but reports on the success of the practice may be obtained.
10. A 4-H Club is an organized group of boys and/or girls with the objectives of demonstrating improved practices in agriculture or home economics, and of providing desirable training for the members.
11. 4-H Club members completing are those boys and girls who actually finish the work outlined for the year.
12. A demonstration meeting is a meeting held to give a method demonstration or to start, inspect, or further a result demonstration.
13. A leader-training meeting is a meeting at which project leaders, local leaders, or committeemen are trained to carry on extension activities in their respective communities.
14. An office call is a call in person by an individual or a group seeking agricultural or home-economics information, as a result of which some definite assistance or information is given. A telephone call differs from an office call in that the assistance or information is given or received by means of the telephone. Telephone calls may be either incoming or outgoing.
15. A farm or home visit is a call by the agent at a farm or home at which some definite information relating to extension work is given or obtained.
16. Days in office should include time spent by the county extension agent in the office, at annual and other extension conferences, and on any other work directly related to office administration.
17. Days in field should include all days spent on official duty other than "days in office."
18. Letters written should include all original letters on official business. (Duplicate letters should not be included.)
19. An extension school is a school usually of 2 to 6 days' duration, arranged by the Extension Service, where practical instruction is given to persons not residents at the college. An extension short course differs from an extension school in that it is usually held at the college or another educational institution and usually for a longer period of time.
20. Records consist of definite information on file in the county office that will enable the agent to verify the data on extension work included in this report.
21. The county extension association or committee is that county organization, whether a membership or a delegate body, which is recognized officially in the conduct of extension work in the county.

GENERAL ACTIVITIES

Report Only This Year's Extension Activities and Results That Can Be Verified

1. List below the names, titles, and periods of service of the county extension agents whose work is included in this report. Include time of assistants with that of regular agent.

AGENT		Total months of service this year (a)	Days devoted to agr. conservation and adjustment programs (b)	Days devoted to relief work (c)	Total days in office (d)	Total days in field (e)
<i>Katherine B. Brent</i> (Name)	Home demonstration agent	12	-	-	66	224
	Asst. home demonstration agent					
	4-H Club agent	(2)				
	Assistant county agent in charge of club work					
<i>Paul W. Rose</i>	Agricultural agent	16	86 1/2	-	162 1/2	242
<i>W. F. Midland</i>	Assistant agricultural agent					

2. County extension association or committee:

(a) Agricultural extension:

(1) Name

County Agricultural Board

(2) Number of members

9

(b) Home demonstration:

(1) Name

County Homemaking Board

(2) Number of members

25

(c) 4-H Club:

(1) Name

County 4-H Council

(2) Number of members

20

3. Number of communities in county where extension work should be conducted

11

4. Number of above communities in which the extension program has been planned cooperatively

10

5. Number of different voluntary county or community project leaders or committeemen actively engaged in forwarding the extension program:

(a) Adult work

(1) Men

15

(b) 4-H Club work

(1) Men

-

(3) Older club boys

1

(2) Women

48

(2) Women

10

(4) Older club girls

14

6. Number of different paid local leaders engaged in agricultural-conservation and adjustment programs

(a) Men

19

(b) Women

-

7. Number of clubs or other groups organized to carry on adult home demonstration work

10

8. Number of members in such clubs or groups

266

ITEM	Home demonstration agents (a)	4-H Club agents (b)	Agricultural agents (c)	County total ¹ (d)
9. Number of 4-H Clubs	10	-	-	10
10. Number of different 4-H Club members enrolled	(1) Boys ²	10	-	10
	(2) Girls ²	119	-	119
11. Number of different 4-H Club members completing	(1) Boys ²	10	-	10
	(2) Girls ²	107	-	107

12. Number of different members enrolled in 4-H Club work for:
- ³

MEMBERS	1st year	2d year	3d year	4th year	5th year	6th year and over
(a) Boys	2	4	4			
(b) Girls	15	35	18	18	15	18

¹ County total should equal sum of preceding three columns minus duplications due to two or more agents participating in the same activity or accomplishment.² Report the total number of different boys or girls enrolled in club work. This total should equal the sum of the project enrollments reported on pages 7 to 24, minus duplications due to the same boy or girl carrying on two or more subject-matter lines of work. Do not include boys and girls enrolled late in the year in connection with the succeeding year's program.³ Same as footnote 2 but refers to completions instead of enrollments.⁴ The total for this question should agree with county total, question 10.

34j. Number of above meetings (questions 27-34) at which discussion group method of presentation was followed		55			55

SUMMARY OF EXTENSION INFLUENCE FOR YEAR

It is highly desirable for extension workers to consider the proportion of farms and farm homes in the county which have been definitely influenced to make some substantial change in farm or home operations as a result of the extension program for men, women, boys, and girls. It is recognized that this information is very difficult for agents to report accurately, so a conservative estimate based upon such records, surveys, and other sources of information as are available will be satisfactory. Such estimates should be marked "Est."

Include results of emergency activities as well as the regular extension program.

35. Number of farms in county	662 (479 white farms)	662	35
36. Number of farms on which changes in practices have definitely resulted from the agricultural extension program			36
37. Number of farm homes in which changes in practices have definitely resulted from the home demonstration program	Est. 250		37
38. Number of other homes in which changes in practices have definitely resulted from the home demonstration program		100	38
39. Number of farm homes with 4-H Club members enrolled		73	39
40. Number of other homes with 4-H Club members enrolled		26	40
41. Total number of different farm families influenced by some phase of the extension program (Include questions 35, 37, and 39, minus duplications.)		800	41
42. Total number of different other families influenced by some phase of extension program (Include questions 36 and 40, minus duplications.)		110	42

¹ County total should equal sum of preceding three columns minus duplications due to two or more agents participating in the same activity or accomplishment.

Note.—Questions 35-42 refer to the total number of different activities conducted this year. The totals should equal the sums of the corresponding information reported on following pages minus duplications where the same activity relates to two or more lines of work.

CEREALS¹

MISCELLANEOUS 4-H CLUBS (Indicate by name)

ITEM	Leadership				
	(a)	(b)	(c)	(d)	
465. Number of 4-H Club members enrolled.....	(1) Boys.....				465
	(2) Girls.....				
466. Number of 4-H Club members completing.....	(1) Boys.....				466
	(2) Girls.....				

¹ Include grasshoppers, army worms, chinch bugs, and other insects not reported under specific crop or livestock headings.

SOIL CONSERVATION AND OTHER WORK

ITEM	Soil conservation	All other work	
	(a)	(b)	
467. Days devoted to line of work by:			
(1) Home demonstration agents			} 467
(2) 4-H Club agents			
(3) Agricultural agents			
(4) Specialists			
468. Number of communities in which work was conducted			468
469. Number of voluntary local leaders or committeemen assisting			469
470. Days of assistance rendered by voluntary leaders or committeemen			470
471. Number of adult result demonstrations conducted			471
471½. Number of meetings at result demonstrations			471½
472. Number of method-demonstration meetings held			472
473. Number of other meetings held			473
474. Number of news stories published			474
475. Number of different circular letters issued			475
476. Number of farm or home visits made			476
477. Number of office calls received			477
478. Number of 4-H Club members enrolled. (Do not include work previously reported.)	(1) Boys	X X X X	} 478
	(2) Girls	X X X X	
479. Number of 4-H Club members completing. (Do not include work previously reported.)	(1) Boys	X X X X	} 479
	(2) Girls	X X X X	
479½. Number of units in projects conducted by 4-H Club members completing. (Do not include work previously reported.)		X X X X	479½

SOIL CONSERVATION—Continued

ITEM	Number of farms	Number of units	
	(a)	(b)	
480. Tests for soil acidity.....		acres.	480
481. Applying lime materials.....	39	712 tons.	481
482. Tests for plant-food deficiencies.....		acres.	482
483. Applying recommended fertilizers.....		tons.	483
484. Proper land use—based on soil types (use of soil-survey maps).....		acres.	484
485. Using recommended crop rotations.....	254	4304 acres.	485
486. Plowing under green manure.....	96	445 acres.	486
487. Controlling soil blowing.....		acres.	487
488. Strip cropping.....		acres.	488
489. Using cover crops.....		acres.	489
490. Approved summer-fallow.....	2	8 acres.	490
491. Constructing terraces. (Reported under question 170, p. 13.).....	x x x x	x x x x	491
492. Controlling gullies. (Reported under question 170½, p. 13.).....	x x x x	x x x x	492
493. Growing crops on contour. (Reported under question 170½, p. 13.).....	x x x x	x x x x	493
494. Pasture and range improvement by contouring.....		acres.	494
495. Grassing waterways.....		acres.	495
496. Depth of moisture tests.....		acres.	496
497. Floodwater control for crop production.....		acres.	497
498. Farms in:			
(1) Legal soil-conservation districts.....		acres.	498
(2) Voluntary soil-conservation associations.....	662	187,266.3 acres.	
(3) Grazing associations.....		acres.
