OFFICE OF EXTENSION WORK, SOUTH.
FARMERS' COOPERATIVE DEMONSTRATION WORK.

REPORT OF WORK OF THE COUNTY AGENT,

CALENDAR YEAR 1917.

DUPLICATE DECEMBER 31, 19

STATE, Virginia

COUNTY, Greenville

REPORT OF C. P. Grizzard COUNTY AGENT.

FROM JANUARY 1, 1917, TO DECEMBER 31, 1917.

APPROVED:

STATE AGENT.

DATE FORWARDED.

DIRECTOR OF EXTENSION WORK.

ANNUAL REPORT FORM AND INSTRUCTIONS TO AGENTS.

The agent's annual report should be a complete summary of all the work performed during the year. This is the only record that the officials of the Extension Division of the State and the Department have of the agent's activities.

The only means of making such a report is to keep field notes or a field diary of everything that is done each day. It is well to not only keep notes of things actually done, but to make some brief observations of general conditions as found from time to time. Many things which seem of minor importance to the agent may be very valuable to the head offices when asked for detailed information regarding certain localities.

An agent's efficiency and the success of his work is necessarily judged from this Office by what is contained in his report. Your District and State Agent may know that you are rendering efficient service, but it is absolutely essential to have something on record to show that the work has been done, when outside parties who can not possibly inspect your work desire definite and accurate information in regard to the results that are being accomplished in local territory.

Every agent in the work has been instructed, by circular letter and by the supervising force at agents' meetings, as to the importance of keeping systematic records throughout the year. If this advice has been followed you should have no difficulty in rendering your annual report upon the forms which are herewith attached. These are broad enough to include the activities of the agents in the entire territory covered by the Extension Work in the South. Some of the questions will not apply to your local territory, and these, of course, need not be answered.

In some instances you will observe that the same form is used for several crops. Be sure to use separate sheets for each crop named under the heading. For example, take the sheet headed "Small Grains", under which are included oats, wheat, barley and rye. In this case all the demonstrations in oats should be included on one sheet, all the demonstrations in rye on another, and so on for all the crops included under this heading.

Be sure to answer the questions in the order in which they are asked, and see that you give the information called for. If this is done, all the reports will be uniform when they are sent in to the State Agent's office, and in like manner the State Agents' reports will be uniform when sent to the Director's office in the State and then to the Washington Office.

It should be distinctly understood that these forms are only to summarize the statistical part of the report, and under each crop or heading such remarks, observations or points of interest as may be useful should be briefly

written out. The back of the respective sheets may be used for remarks on the crops reported on. No doubt many interesting features will be called to mind, which, if written up and sent in to the State Agent's office along with the replies to these definite questions, would be very valuable in giving the report that personal touch which proves of great value and interest in all reports of this nature.

In collecting the replies to the questions of a personal nature, the agent will have to depend on his tact and good judgment in approaching the farmer. A few, no doubt, will be averse to furnishing you with some of the information asked for, but if reliable data could be collected with reference to these points, it would enable the Department to get a rather definite idea as to the beneficial effects of the demonstration work in your section.

The forms that we are sending out include the following crops, groups of crops, and other miscellaneous work of the County Agent:

CROPS:

Corn
Cotton
Tobacco
Small Grain
Hay & Forage
Cover Crops
Summer Legumes
Potatoes (Irish & Sweet)
Truck Crops & Gardens
Sugar Cane
Orchards

LIVE STOCK:

Horses
Dairy Cattle
Beef Cattle
Hogs
Sheep & Goats
Poultry
Live Stock Diseases & Pests.

OTHER WORK:

Fertilizers
Farm Manures
Silos
Dipping Vats
Seed Selection
Lime
Rotations
Pastures
Organizations
Farm Buildings
Drainage
Farm Machinery & Tools
Clearing Land, Stumps, etc.
Timber & Wood Lots
Miscellaneous Demonstration Work
Effect of Demonstration Work on
Community, and Human Interest
Features.
Boys' & Girls' Clubs

If there is anything in any of these forms that is not thoroughly understood, discuss the matter with your District or State Agent or write to this Office for a more specific explanation.

CORN.
(INCLUDING KAFIR, MILO, FETERITA)
SEPARATE SHEET FOR EACH.

SPACE FOR AGENT'S SIGNATURE.

C. P. GRIZZARD,
County Agent,
DREWRYVILLE, VIRGINIA.

1. Number of demonstrators 17
2. Number of demonstrators reporting 10
3. Total acreage of corn grown under improved methods on demonstration farms 333
4. Average yield per acre on demonstrations (bushels) 36.73/333
5. Increased yield on demonstrations over ordinary methods _____
6. Number of cooperators _____; Acreage _____; Yield per A. _____ bu.
7. Number who planted pure or selected seed on their demonstrations _____
8. Number of farmers you have influenced to select seed for next year's crop _____; Estimated amount of seed selected _____ bu.
9. Number who fall plowed their demonstration acres _____
10. Number who turned under cover crops on their demonstration acres _____
11. Number of acres harvested for silage _____; Yield per acre _____ (tons)
12. Number of acres "hogged down" _____; Value per acre when utilized this way \$ _____
13. Number of acres treated for diseases or insect pests _____
14. How many farmers have you influenced to use better methods in growing corn this year? _____
15. Estimate total number of farmers in county who have been influenced to use better methods in corn growing since county agent work started 500
16. What per cent is this of total number of farmers in your county? _____

(FOR REWARDS, INCIDENTS, SPECIAL REPORTS, ETC., USE OTHER SIDE, AND ADDITIONAL SHEETS IF NECESSARY.)

Remarks: The July floods caused many of our demonstrators to drop out of the work.

The number reported are those in good standing in the work at this time. Many will be re-instated the new year. It is hard to report the number of farmers that are influenced by the demonstration work.

COTTON.

SPACE FOR AGENT'S STAMP.

C. P. GRIFFARD,
County Agent,
DREWRYVILLE, VIRGINIA.

1. Number of demonstrators 14
2. Number of demonstrators reporting 10
3. Total acreage grown under improved methods on demonstration farms 215
4. Average yield per acre on demonstrations (pounds seed cotton) 938
5. Increased yield per acre on demonstrations over ordinary methods _____
6. Number of cooperators _____; Acreage _____; Yield per acre in pounds seed cotton _____
7. Number of demonstrators who planted pure or selected seed _____
8. Number of farmers you have induced to field select seed for next year's crop _____
9. How many fall plowed their demonstration acres? _____
10. How many turned under cover crops on their demonstration acres? _____
11. Number of acres treated for diseases or insect pests _____
12. How many farmers have you influenced to use better methods in cotton growing this year? _____
13. Estimate the total number of farmers in your county who have used improved methods since county agent work was started 500
14. What per cent of all the farmers of your county have been reached? _____
15. Have you been able to get the farmers in any community to grow but one variety of cotton? No.; Give particulars _____

Remarks: Many dropped out on account of weather conditions.

- Number of demonstrators 4
 - Number of demonstrators reporting 3
 - Total acreage in this crop grown under improved methods on demonstrations 50
 - Average yield per acre on demonstrations 3 1/2 (tons of cured hay)
 - Number of acres cut for hay All
 - Increased yield of demonstrations over ordinary methods _____ (tons cured hay)
 - Number of acres grazed off None
 - Estimated value per acre of grazing \$ _____
 - Number of cooperators _____ Acreage _____ Yield per acre cured hay (tons) _____
 - How many acres of legumes in this class of crops were inoculated? All
 - How many farmers ordered inoculating material through you from the Dept? 100
 - How many demonstration acres were turned under for soil improvement purposes? None
 - Estimate total number of acres in county turned under by agent's advice None
 - How many acres were sown this fall? 300
 - Estimate acreage grown in county before county agent's work started 50
 - What is your estimate of the increased acreage of this crop in the county as the result of the agent's influence? _____
- | | | |
|-----------------------|------------|------------------------------------|
| | | Give increase by year if possible. |
| First year's increase | <u>20%</u> | Third year's increase <u>100%</u> |
| Second " " | <u>80%</u> | Fourth " " <u>100%</u> |

Remarks: The report does not show many members in the Alfalfa Club, but the acreage has increased rapidly by farmers planting small quantity. These will not join the club and keep the records, but, the crop is growing in the estimation of all.

I have a farmer, who, the first year he failed to inoculate his seed or soil as instructed to do. His soil was thin and he failed. I insisted that he carry out instructions and try again. He did this and this year his alfalfa was as fine as I ever saw. In his immediate neighborhood there was not another acre of alfalfa. Now there are many and Mr. Ferguson says: "That acre of alfalfa produced more feed than any other ten acres in my farm and it has helped my neighbors.

HAY, FORAGE OR COVER CROPS.

C. P. GRIZZARD,
County Agent,
DREWRYVILLE, VIRGINIA.

(NOTE: This form to be used for such crops as Alfalfa, Crimson, Alsike, Red, Bur and Sweet Clovers, Lespedeza, Vetch, Vetch and Oats - Wheat or Rye, Crimson Clover and Oats - Wheat or Rye, Timothy, Mixed Grasses and Clovers, Sudan, Johnson and other Grasses, Sorghum, Millet, etc. Any combination of these or other similar crops should be reported on this form, the name of the crop or combination to be entered in space below.)

True

Remarks: The peanut crop is one of our very best crops. Our soils are adapted for their yield. Still, without the proper rotation of crops, peanuts depletes fertility very fast. We note much improvement among our farmers in not having peanuts to follow peanuts year after year.

The records shows a large variation as to yield and cost of production due largely to soil management.

8. Have you attempted to keep a bulletin board in your office, listing things for sale and things wanted? _____

(FOR DEBARS, INCIDENTS, SPECIAL REPORTS, ETC., USE OTHER SIDE, AND ADDITIONAL SHEETS IF NECESSARY.)

Remarks: I organized early in the year a National Farm Loan Association. Through this Association our farmers have borrowed nearly sixty thousands of dollars.

I organized a County Council of Safety. This organization did much good in prompting the farmers to produce and to conserve more food crops.

I visited each banker in my territory and arranged with them to give the farmers longer credit and cheaper rate of interest.

Their former terms was for 60 or 90 days with 8% discount.

They all agreed to give twelve months time and to charge 6% Discount.

Result is that our farmers are borrowing more money from the banks and buying fewer goods from the merchants on time prices.

FARM AND FARMSTEAD

**EFFECT OF DEMONSTRATION
WORK ON THE COMMUNITY AND
HUMAN INTEREST FEATURES.**

**C. P. GRIZZARD,
County Agent,
DREWRYVILLE, VIRGINIA.**

(The data called for on the other sheets are mostly statistics. The replies to the following questions are intended to furnish a basis from which to make an estimate of the general effect of the demonstration work on the individual and the community. The agent should not restrict his general information to the questions asked, but should give any additional facts that will bring out prominently the good effects of the influence the agent's work has exerted over any individual or over the county in general. Each agent should give at least one human interest story. It would be much better if such stories could take up the work with the individual and follow it through for several years.)

HOW MANY OF YOUR DEMONSTRATORS AND COOPERATORS ARE:

1. Raising practically all their home supplies? _____
2. Have opened new bank accounts since beginning demonstration work? _____
3. Have increased their bank deposits since beginning demonstration work? _____
4. Own their farms? _____
5. Have mortgages on their farms? _____
6. Have paid off their mortgages since beginning demonstration work? _____
7. Trading on a cash basis since beginning demonstration work? _____
8. Do the bankers and merchants favor demonstration farmers in placing business, such as in the loaning of money and extension of credit?
If so, give examples. _____

WHAT PER CENT OF YOUR DEMONSTRATORS AND FARMERS ARE:

9. Decreasing their indebtedness along various lines? _____
10. Showing increased interest in agricultural meetings? _____

C. P. GRIZZARD,
County Agent,

DREWRYVILLE, VIRGINIA. FORM NO. 202 VA.

11. Showing a desire to study their farm business and progress? _____
12. What additional industries have been established in your territory since demonstration work was begun? _____
13. What other signs of progress are apparent as a direct, or indirect, result of demonstration and extension work? _____
14. In how many instances among your demonstrators and cooperators have labor saving devices for the home been installed? _____
15. Name some of the more noticeable effects on the farmers' home and family, of his greater earning power due to better methods; such as increased opportunities for social intercourse, amusements, entertainments, greater contentment with farm life, increased interest in church work, etc. Give instances:

BOYS' AND GIRLS' CLUBS.

C. P. GRIZZARD,
County Agent,
DREWRYVILLE, VIRGINIA.

How long has the Club Work been in your county? _____

List the various kinds of clubs organized, and state the enrollment in each, number reporting, average yield, number and value of prizes.

| KIND OF CLUB | ENROLLMENT | NO. REPORTING | AVERAGE YIELD | NO. OF PRIZES | VALUE OF PRIZES |
|--------------|------------|---------------|------------------|---------------|------------------|
| Corn | 18 | 10 | 45.9/10 | 10 | \$ 75.00 |
| Cotton | 11 | 10 | 1091 | 10 | \$ 10.00 |
| Peanuts | 22 | 15 | 53 $\frac{1}{2}$ | 15 | \$ 25.00 7.50 |
| Remarks: | | | | | \$ _____ |

We had to drop many of our club boy members on account of their crops being drowned.

One pig club boy exhibited his pig at the fair and drew \$7.50 prize.

I have never been able to get the pig club boys to keep the records.
