- VII Publicity
- VIII Miscellaneous
- IX Summary
- X Financial Returns

STATUS OF EXTENSION WORK

At the 1934 January meeting of the Wythe County Board of Supervisors an appropriation was made for a County Agricultural Agent from January 1, 1936 to July 1, 1936. This decision of the Board was reached after much discussion on the subject both for and against the work.

When the county budget for the fiscal year July 1, 1936 to July 1, 1937 was made and passed in April 1936, the agent's appropriation was included.

The present agent has been appearing monthly before the Board and making a report of the previous month's work. This has been done at the request of the Board.

At the request of the Board the agent has been working in cooperation with the manager of the Wythe County Farm to improve conditions there. Much improvement has been made.

PLAN OF WORK

A. MAJOR PROJECT

I Livestock Improvement

1. Better sires work in cattle, sheep and hogs.
2. Improvement of Purebred herds and flocks.
3. Docking and trimming of lambs and stomach worm treatment of sheep.
4. To organize and assist in the cooperative marketing of lambs, wool and cattle.
5. Prevention and treating animal diseases.

B. MINOR PROJECTS

I Agronomy

1. To be conducted by use of demonstration farms in each of the districts of the county by-
 - a. Use of lime
 - b. Adoption of shorter rotations
 - c. Give recommendations of growing food and feed needed on farms.
 - d. Increase in permanent pasture and fertilization of meadows to give more plant food to turn under.
 - e. Prevention of erosion by not breaking the hills.
 - f. Keep accounts on farms.
 - g. Conduct tour of farms.
2. Use of certified seed.
3. Assist in producing and marketing field crops.
4. Assist in handling fertilizer, seed and other farm supplies.
5. Cooperate with project on eradication of native barberry.

II Boy's & Girl's 4-H Club Work

1. To organize in cooperation with the Home Demonstration 4-H Clubs.
2. Hold Rally Day.
3. Hold County 4-H Club Camp.
4. Have one delegate from each club to attend State Short Course.
5. Hold Achievement Day
6. Have 100% completions.

III To promote in every possible way the Soil Conservation Program in Wythe County.

IV Publicity through newspapers

V Miscellaneous

This consists of carrying on necessary work in agriculture, engineering, poultry, dairying, horticulture, farm management and accounts and assisting the various communities with their organization work for civic improvement.

INTRODUCTION

This narrative report includes what the agents think to be the most important accomplishments of their work in Wythe County from the period December 1, 1935 to November 30, 1936. It is thought that this report will show very well how their time was spent.

MAJOR PROJECT

LIVESTOCK IMPROVEMENT

Better Sires

The most effective, cheapest, and best way to improve the quality of livestock in any given area is through the use of purebred sires that are of good breeding and quality. During the past year Wythe County farmers bought from Wythe purebred breeders and purebred breeders in other counties and states 10 purebred beef bulls, 27 purebred rams, 3 purebred boars and 2 purebred stallions. (Much of this was made possible through the agent and the Extension Animal Husbandry Department.)

One of the bulls brought into the county is a Hereford of good quality and excellent breeding. He is to head a new herd of purebred Herefords which is just being established in the county. One of the rams is to head a flock of about 75 purebred Hampshire ewes. This ram was purchased at a Virginia sale and came from one of the largest flocks in the East. He was said to be the best ram produced by his owner this year.

In connection with work on purebred sires comes work with purebred producers. The agent attended five purebred ram sales sponsored by the Extension Animal Husbandry Department to which Wythe County rams were consigned. These were very successful and Wythe County purebred sheep producers received an average of approximately \$30.00 per head for the rams they sold in these and private sales.

The agents and the Extension Animal Husbandry Department worked with the purebred sheep producers in fitting their sheep for the first Southwest Virginia Sheep Show which was held at Tazewell, Virginia and which was promoted by the Southwest Virginia Purebred Sheep Breeders Association.

Care of Sheep

The agents docked and castrated over 500 lambs in 15 demonstrations. Much criticism is heard of this work but quality will win in the long run. Docked and castrated lambs show and have more quality than long tail buck and ewe lambs.

Sheep

Wythe County's Ewe and Ram Show lambs. These are given the best of treatment and they show it.

A Wythe County Ewe and Ram Show lamb

Wythe County's Livestock Judging Team with Ass't. Agent Kite

Wythe County Lambs for Cooperative Shipment

4

The agents treated more than 1,500 ewes and lambs in 50 demonstrations of drenching sheep for stomach worms. The copper sulphate and nicotine sulphate treatment was used almost exclusively with good results. Wherever possible the sheep are starved before treatment and kept up a while after treatment.

The agents in cooperation with some of the farmers in vaccinating several flocks this year for hemorrhagic septicemia with the hope that it will be of some help in preventing winter loss of ewes.

Wythe County Livestock Shipping Association

Wythe County's Livestock Shipping Association which was organized by the agent in 1935 continued to progress during 1936. More than seventy members used the association as a marketing agency and most of them were very well pleased with the results obtained.

Two thousand two hundred forty-three lambs were marketed through the association. All these lambs were graded at the home scales and shipped direct to the terminal markets. The choice or blue circle lambs sold very well indeed during 1936 with other grades selling in proportion. J. L. Reynolds working as manager in the west end of the county did a very good job in shipping 572 of the lambs mentioned above. The net sale value of lambs sold is \$17,784.00.

Fourteen thousand six hundred fifty pounds of wool was marketed through the association, and sold for 36 $\frac{1}{2}$ cents per pound. This was at least 1 $\frac{1}{2}$ cents above the average price paid for wool in the county that was not pooled.

In connection with the wool pool work, a sheep shearing demonstration was given by a representative of the Chicago Flexible Shaft Company.

Ninty-eight cattle were shipped by the association to the terminal market and brought a fair price on the days they were sold. Total dollars returned to association producer members was \$28,653.00 for lambs, wool and cattle sold.

About five hundred sheep and hogs were vaccinated for cholera and hemorrhagic septicemia by the agents. The agents took an active part in helping to stamp out a hog cholera epidemic in the county during the fall of 1936. This work was done in cooperation with the State Bureau of Animal Industry and local veterinarians.

More than 800 calves were vaccinated for the prevention of black-leg during the past year. Very few deaths from this disease have been reported.

MINOR PROJECTS

AGRONOMY

In the agricultural development program which is a cooperative TVA-Extension project and which is being carried on by twenty-nine farmer cooperators much has been accomplished.

Working toward better land use, the land on twenty-three farms has been classified and the rotations have been planned so that the food and feed crops will be grown on the more level land and the steeper and erosive lands will be left for permanent pasture. The remaining six farms are so small and the land of such topography that such changes were not made.

Since the beginning of the program and on the twenty-nine demonstration farms, 1,285 acres of old pasture have been topdressed with superphosphate, 407 acres of new pastures established and topdressed and 804 acres of clover and grass topdressed. There are approximately fifty-six acres of alfalfa on these demonstration farms. One goal for the 1937 program is to increase the acreage of alfalfa.

For increased crop yields, recommendations for more green manure, for the use of lime and the proper amounts and kinds of fertilizer have been made to these demonstrators. In 1935 these demonstrators used approximately 225 tons of lime while in 1936 they have used 901 tons.

This year only one demonstrator harvested clover, lespedeza and orchard grass seed. He estimates that he will receive approximately \$1,000.00 from the sale of this seed.

Several tours had been planned to these farms during the summer season to observe the pasture improvement projects, the mechanical erosion control measures, the results from the use of lime and the livestock improvement projects. Due to the drought, there were no noticeable results and we had no tours for these demonstrations.

To date, 239.7 tons of T. V. A. superphosphate have been used on these farms for pasture and clover improvement. The net value of this plant food to the farmers is estimated at \$9,568.00. The increased value of pastures treated in due consideration of the drought is estimated at \$8,468.00.

By classifying land and growing grass on the steep and erosive lands and growing the food and feed crops on the more level land, it is conservatively estimated that approximately 2,873.4 tons of soil have been saved from washing away, the value of such saving being estimated at \$2,873.40. No value is placed on the hay that was topdressed because the drought caused most of the hay to be pastured instead of being cut.

7

T.V.A. Demonstrator in Clover

Gully Control Work

Pastures like these are being
treated with phosphate. Note
the sparse growth.

Last sitting of the Corn-Hog
Allotment Committee

The use of Golden Queen Corn is increasing in the county and farmers are very well pleased with the results obtained.

Legume inoculation was ordered for a number of farmers.

The agents assisted in reorganizing one cooperative agency which deals in field crops. One cabbage fertilization experiment was conducted but due to dry weather the results were not very satisfactory.

The agent continued to cooperate with the Native Barberrry Eradication project. Results obtained in treated areas were satisfactory.

4-H CLUB WORK

The agents in cooperation with the Home Demonstration agent worked with six organized 4-H clubs. Forty-three boys carried projects of breeding hogs, fat hogs, sheep, poultry, garden, potatoes, corn and garden. Six of these members who kept records and completed their work showed a profit of \$215.20.

During the year the 4-H County Council held two meetings and the community clubs met monthly. The agents attended fifteen of the meetings.

Wythe and Tazewell counties held a 4-H Camp at Bluefield College and 29 boys and girls of Wythe County 4-H Clubs attended. This camp was helpful to those present and much was accomplished in the way of character building during the week spent there.

Fourteen Wythe County 4-H Club members, 8 girls and 6 boys attended the State Short Course held at V. P. I. This was very helpful and instructive to those present.

A Livestock Judging team composed of three Wythe County 4-H Livestock Club Members was trained and taken to the State Fair to judge there. The team placed seventh in competition with the ten other teams in the contest.

A.A.A. & SOIL CONSERVATION

Most of the work on the Corn-Hog program of 1935 was completed during the year. There are still a few contracts on which payment has not been received, however, these are being held up in Washington.

Payment of \$1,730.09 on about one half of the 1936 wheat contracts has been received. Work has been done on this program and on clearing all suspensions on the previous program.

9

4-H Club Work

Wythe County Group Attend Camp

Livestock judging in Burkes' Garden
while at 4-H Club Camp

#7

Three hundred twenty-eight Wythe County farmers filled in work sheets for the 1936 Agricultural Conservation Program. Most of these have signed the application for payment and these have been sent into the State Office.

The general opinion of this program in the county is good and thinking farmers like both phases of the program, the soil conserving and the soil building phase.

The increase in the use of lime and the increase in the use of phosphate on pastures and meadows alone would justify the program in the eyes of a number of Wythe County farmers. Mostly because of the program 4,415 tons of lime have been used by the 328 signers taking part in the program. This lime was generally applied at the rate of 2 tons per acre. Fifty-nine and six-tenths tons of phosphate has been used principally on pasture because of the program. This seems to be a real start and Wythe County is ready to continue.

Program Planning & Discussion Meetings

About two month's work was put on program planning and discussion meetings during January, February and March 1936. Meetings were held in twelve communities with varied success. Some of the meetings were interesting and lively discussion followed. Others were dull and meaningless. It is thought by the agent that the meetings would be more successful if they were limited to three in each community, were on subjects about which the farmers had a speaking knowledge, and the farmers were given some definite conclusions to reach. Good leaders were very hard to obtain and the cold weather was a draw-back to the meetings. As a general rule interest dropped after about two or three meetings in a community.

Drought Relief

The agent acted as chairman of the Drought Relief Committee set-up by Governor Peery to administer the Drought Relief program. As a result of the program nine lime kilns were built, (lime obtained from the kilns estimated at 450 tons) and gully work was done on ten Wythe County farms. At one time about 180 farm laborers were doing this work in the county. The gully work should be very helpful because it is a demonstration in control of gullies. This is a very desirable and popular program and the Wythe County men who have seen the work are very well pleased.

PUBLICITY

During the year the agents have written and had published forty articles for the local newspapers. These have been about subjects which were thought to be timely and interesting.

8

MISCELLANEOUS

Work has been done in agricultural engineering, poultry, dairying, horticulture, farm management and accounts and in assisting the various communities with their organization work for civic improvement.

SUMMARY

The agent thinks that this narrative report and the statistical report will show very well how his time and his assistant's time was spent in 1936.

Special mention is due the committeemen of the various production control associations, the officers and committeemen of the Wythe County Shipping Association and the Wythe County Soil Conservation Association. The agent wishes to thank the members of the Wythe County Agricultural Advisory Board for their work. The agent's office helpers and assistants have been untiring and faithful. Local newspapers deserve mention for giving publicity to various programs in their columns.

Special mention should be made of the following specialists and others who have cooperated in every way possible.

L. C. Seamer, W. H. Byrne, Buster Burnes, S. K. Cassell, R. G. Connelly, R. W. Dickson, L. B. Dietrick, H. H. Gordon, Jno. R. Hutcheson, R. P. Kiethly, Kenneth E. Litton, M. M. Johns, J. L. Maxton, R. D. Michael, Mrs. Mary C. McBride, C. P. McClaughtery, C. A. Montgomery, Lawrence Moore, D. T. Painter, Jake Shelburne, Paul Swaffar, E. T. Swink, Robert Tait, Roy Thompson, W. C. Tully and B. A. Warriner.

FINANCIAL RETURNS

- 2,343 lambs shipped cooperatively, benefit to Wythe County farmers, \$1,500.00.
- 14,560 pounds of wool pooled, benefit to Wythe County farmers, \$256.00.
- 2,000 lambs docked and castrated, benefit to Wythe County farmers, \$1,500.00.
- 1,500 ewes treated for stomach worms, benefit to Wythe County farmers, \$750.00.
- 800 calves vaccinated for Black Leg, benefit to Wythe County farmers, \$1,500.00.
- Value of demonstration phosphate received, 300 tons, \$12,000.00

COMBINED ANNUAL REPORT OF COUNTY EXTENSION WORKERS

This report form is for use by county extension agents in making a combined statistical report on all extension work done in the county during the year. Agents resigning during the year should make out this report before quitting the service.

READ SUGGESTIONS, PAGES 2 AND 3

Approved:

Date

State Extension Director.

SUGGESTIONS RELATIVE TO THE PREPARATION OF THE COUNTY EXTENSION AGENT'S ANNUAL REPORT

The annual report should be a summary, with analysis and interpretations, for presentation to the people of the county, the State, and the Nation of the extension activities in each county for the year, and the results obtained by the county extension agents assisted by the subject-matter specialists. The making of such a report is of great value to the county extension agents and the people of the county in showing the progress made during the year as a basis for future plans. It is of vital concern also to the State and Nation as a measure of rural progress and a basis for intelligent legislation and financial support of extension work.

At least four copies of the annual report should be made: One copy for the county officials, one copy for the agent's files, one copy for the State extension office, and one copy for the Extension Service, United States Department of Agriculture. *The report to the Washington office should be sent through the State extension office.*

STATISTICAL SUMMARY

Where two or more agents are employed in a county they should submit a single statistical report showing the combined activities and accomplishments of all county extension agents employed in the county during the year. Results obtained through assistance rendered agents by specialists should also be included. This report shows, insofar as possible, the part each agent has taken in forwarding the extension program. The county totals should be the sum of the activities and accomplishments of individual agents *minus duplications due to two or more agents participating in the same activity or accomplishment*. The county totals, when properly recorded, show the progress made in the county during the year in forwarding the entire extension program. Negro men and women agents should prepare a combined statistical report separate from that of the white agents. §

The statistical summary should be a report of this year's activities and results that can be verified by records on file in the county office. Where records are not available careful estimates are desired. Such estimates should be marked "Est."

NARRATIVE SUMMARY

A separate narrative report is desired from the leader of each line of work, such as county agricultural agent, home demonstration agent, boys' and girls' club agent, and Negro agent. Where an assistant agent has been employed during a part or all of the year, the report of his or her work should be included with the report of the leader of that line of work. Where an agent in charge of a line of work has quit the service during the year, the information contained in his or her report should be incorporated in the annual report of the agent on duty at the close of the report year, and the latter report so marked.

The narrative report should summarize and interpret, under appropriate subheadings, the outstanding results accomplished and the extension methods used for each project. Every statement should be clear-cut, concise, forceful, and, where possible, reinforced with necessary data from the statistical summary. Use a descriptive style of writing, giving major accomplishments first under each project. Give extension methods fully relating to outstanding results only, and where practicable illustrate with photographs, maps, diagrams, blueprints, or copies of charts and other forms used. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs and reasonably good margins. The pages should be numbered in consecutive order.

The following outline is merely suggestive of how the narrative report may be clearly and systematically presented. Each agent should prepare an outline to fit the situation and the work to be reported.

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT

- I. Cover and title page.
- II. Table of contents.
- III. Summary of activities and accomplishments, preferably of one or two typewritten pages only, placed at the beginning of the narrative report.
- IV. Changes in county extension organization.
 - (1) Form.
 - (2) General policies.
 - (3) Procedure.
- V. County program of work.
 - (1) Factors considered and methods used in determining program of work.
 - (2) Project activities and results.

Under appropriate headings and subheadings present in some detail for each major project or line of work the goals set up, the methods used, the results achieved, and the significance of these results in terms of improved farms and homes and of better community life.
- VI. Outlook and recommendations, including suggestive program of work for next year.

TERMINOLOGY

To insure reports which convey the intended meaning to others and to facilitate the compilation of satisfactory national statistics on extension, it is extremely important that terms be used in accordance with accepted definitions. The following definitions of extension terms have been approved by the United States Department of Agriculture and the Association of Land Grant Colleges and Universities. Agents should read these definitions before starting to write the annual reports.

DEFINITIONS OF EXTENSION TERMS

1. A program of work is a statement of the specific projects to be undertaken by the extension agents during a year or a period of years.
2. A plan of work is a definite outline of procedure for carrying out the different phases of the program of work. Such a plan provides specifically for the means to be used and the methods of using them. It also shows what, how much, when, and where the work is to be done.
3. A community is a more or less well-defined group of rural people with common interests and problems. Such a group may include those within a township, trade area, or similar limits. For the purpose of this report a community is one of the several units into which a county is divided for conducting organized extension work.
4. A project leader, local leader, or committeeman is a person who, because of special interest and fitness, is selected to serve as a leader in advancing some phase of the local extension program. A project leader may be either an organization or a subject-matter leader.
5. Demonstrations as contemplated in this report are of two kinds—method demonstrations and result demonstrations.

A method demonstration is a demonstration given by an extension worker or other trained leader for the purpose of showing how to carry out a practice. Examples: Demonstrations of how to can fruits and vegetables, mix spray materials, and cull poultry.

A result demonstration is a demonstration conducted by a farmer, home maker, boy, or girl under the direct supervision of the extension worker, to show locally the value of a recommended practice. Such a demonstration involves a substantial period of time and records of results and comparisons, and is designed to teach others in addition to the person conducting the demonstration. Examples: Demonstrating that the application of fertilizer to cotton will result in more profitable yields, that underweight of certain children can be corrected through proper diet, that the use of certified seed in growing potatoes is a good investment, or that a large farm business results in a more efficient use of labor.

The adoption of a farm or home practice resulting from a demonstration or other teaching activity employed by the extension worker as a means of teaching is not in itself a demonstration.
6. A result demonstrator is an adult, a boy, or a girl who conducts a result demonstration as defined above.
7. A cooperator is a farmer or home maker who agrees to adopt certain recommended practices upon the solicitation of an extension worker. The work is not directly supervised by the extension agent and records are not required, but reports on the success of the practices may be obtained.
8. A 4-H Club is an organized group of boys and/or girls with the objectives of demonstrating improved practices in agriculture or home economics, and of providing desirable training for the members.
9. 4-H Club members enrolled are those boys and girls who actually start the work outlined for the year.
10. 4-H Club members completing are those boys and girls who satisfactorily finish the work outlined for the year.
11. A demonstration meeting is a meeting held to give a method demonstration or to start, inspect, or further a result demonstration.
12. A leader-training meeting is a meeting at which project leaders, local leaders, or committeemen are trained to carry on extension activities in their respective communities.
13. An office call is a call in person by an individual or a group seeking agricultural or home-economics information, as a result of which some definite assistance or information is given. A telephone call differs from an office call in that the assistance or information is given or received by means of the telephone. Telephone calls may be either incoming or outgoing.
14. A farm or home visit is a call by the agent at a farm or home at which some definite information relating to extension work is given or obtained.
15. Days in office should include time spent by the county extension agent in the office, at annual and other extension conferences, and on any other work directly related to office administration.
16. Days in field should include all days spent on official duty other than "days in office."
17. Letters written should include all original letters on official business. (Duplicated letters should not be included.)
18. An extension school is a school usually of 2 to 6 days' duration, arranged by the Extension Service, where practical instruction is given to persons not resident at the college. An extension short course differs from an extension school in that it is usually held at the college or another educational institution and usually for a longer period of time.
19. Records consist of definite information on file in the county office that will enable the agent to verify the data on extension work included in this report.
20. The county extension association or committee is that county organization, whether a membership or a delegate body, which is recognized officially in the conduct of extension work in the county.

GENERAL ACTIVITIES

Report Only This Year's Extension Activities and Results That Can Be Verified

1. List below the names, titles, and periods of service of the county extension agents whose work is included in this report. Include time of assistants with that of regular agent.

AGENT		Total months of service this year (a)	Days devoted to agr'l-conservation and adjustment programs (b)	Days devoted to relief work (c)	Total days in office (d)	Total days in field (e)
<i>Chilton Ryburn</i>	Home demonstration agent	13	-	-	58	261
<i>Getha Jackson</i>	Asst. home demonstration agent					
	4-H Club agent					
	Assistant 4-H Club agent					
<i>E. M. Jones</i>	Agricultural agent	24	110	10	127	4435
<i>G. D. Kite</i>	Assistant agricultural agent					

2. County extension association or committee:

- (a) Agricultural extension:
 (1) Name Advisory Board (2) Number of members 15
 (b) Home demonstration:
 (1) Name Advisory Board (2) Number of members 59
 (c) 4-H Club:
 (1) Name County Council (2) Number of members 70

3. Number of communities in county where extension work should be conducted 29

4. Number of above communities in which the extension program has been planned cooperatively by extension agents and local committees 29

5. Number of different voluntary county or community project leaders or committeemen actively engaged in forwarding the extension program:

- (a) Adult work (1) Men 20 (2) Women 81 (b) 4-H Club work (1) Men 1 (2) Women 6 (3) Older club boys - (4) Older club girls -

6. Number of different paid local leaders engaged in agricultural-conservation and adjustment programs (a) Men 21 (b) Women 1

7. Number of clubs or other groups organized to carry on adult home demonstration work 19

8. Number of members in such clubs or groups 354

ITEM	Home demonstration agents (a)	4-H Club agents (b)	Agricultural agents (c)	County total (d)
9. Number of 4-H Clubs	<u>16</u>		<u>6</u>	<u>16</u>
10. Number of different 4-H Club members enrolled	(1) Boys <u>213</u> (2) Girls <u>213</u>		<u>43</u>	<u>43</u> <u>213</u>
11. Number of different 4-H Club members completing	(1) Boys <u>146</u> (2) Girls <u>146</u>		<u>6</u>	<u>6</u> <u>146</u>

12. Number of different members enrolled in 4-H Club work for:

MEMBERS	1st year	2d year	3d year	4th year	5th year	6th year and over
(a) Boys	<u>9</u>	<u>11</u>	<u>23</u>			
(b) Girls	<u>67</u>	<u>124</u>	<u>19</u>	<u>3</u>		

* County total should equal sum of preceding three columns minus duplications due to two or more agents participating in the same activity or accomplishment.

** Report the total number of different boys or girls enrolled in club work. This total should equal the sum of the project enrollments reported on page 7 to 20, unless duplications due to the same boy or girl carrying on two or more subject-matter lines of work.

** Same as footnote 2 but refers to completions instead of enrollments.

* The total for this question should agree with county total, question 10.

		(b) Total attendance	594	90	684
	(2) 4-H club	(a) Number	14		14
		(b) Total attendance	76		76

SUMMARY OF EXTENSION INFLUENCE FOR YEAR

It is highly desirable for extension workers to consider the proportion of farms and farm homes in the county which have been definitely influenced to make some substantial change in farm or home operations as a result of the extension program for men, women, boys, and girls. It is recognized that this information is very difficult for agents to report accurately, so a conservative estimate based upon such records, surveys, and other sources of information as are available will be satisfactory. Such estimates should be marked "Est."

Include results of emergency activities as well as the regular extension program.

35. Number of farms in county	2293	35
36. Number of farms on which changes in practices have definitely resulted from the agricultural extension program	508 Est	36
37. Number of farm homes in which changes in practices have definitely resulted from the home demonstration program	700 Est	37
38. Number of other homes in which changes in practices have definitely resulted from the home demonstration program	150 Est	38
39. Number of farm homes with 4-H Club members enrolled	143 Est	39
40. Number of other homes with 4-H Club members enrolled	60 Est	40
41. Total number of different farm families influenced by some phase of the extension program (Include questions 36, 37, and 38, minus duplications.)	1800 Est	41
42. Total number of different other families influenced by some phase of extension program (Include questions 38 and 40, minus duplications.)	150 Est	42

¹ County total should equal sum of preceding three columns minus duplications due to two or more agents participating in the same activity or accomplishment.

NOTE.—Questions 35-42 refer to the total number of different activities conducted this year. The totals should equal the sums of the corresponding information reported on following pages minus duplications where the same activity relates to two or more lines of work.
