Name:	Elaine Bradford
Job Title:	Graduate Student
Institution:	Virginia Tech
Title of Work Used:	Proposed in vitro model of neutrophil swarming in a chronic, low-level inflammatory state
Copyright Holder:	Elaine Bradford
Publication Status:	Unpublished
Publisher:	Virginia Tech
Place of Publication:	Blacksburg, VA
Publication Year:	2019
Description of Work:	Masters Thesis. 24 pages.
Date of Evaluation:	September 23, 2019
Date of Intended Use:	September 23, 2019

Describe the **Purpose** and Character of Your Intended Use:

The purpose of this work is to fully and accurately describe and communicate my work regarding an in vitro pathogen model system developed to elucidate neutrophil behavior under inflammatory conditions. There is intent for this work to be published. Permission and appropriate citations for the use of figures not my own have been noted in text and attached appropriately.

Describe the **Nature** of Your Intended Use of the Copyrighted Work:

Figures in use that are not my own have been previously published and are used at the express approval of the original owners. [+] Work to be used is primarily of a factual nature (non-fiction, collection of facts, etc.)

Describe the **Amount** of Your Intended Use in Relation to the Copyrighted Work as a Whole:

I used two single figures from much larger published works in my thesis. The first was published out of my lab group and supports the same research goals as my research and therefore is being used in the line with the original intent of the author without infringing on their original work. The second figure used was from a much larger work and was subsequently manipulated to become relevant to my thesis; with permission from Shin-Etsu (the publisher). [+] The portion used is not the "heart" of the work (the portion considered most central to the work as a whole)
[+] Only the amount required to achieve the stated, socially-beneficial purpose or objective will be used (be that educational, artistic, scholarly, journalistic, etc.)
[+] Only limited and reasonable portions will be used

Describe the **Effect** of Your Intended Use on the Potential Market or Value of the Copyrighted Work:

The copyrighted work included in this thesis has no direct bearing on the main value of the developed model. Both were used to show potential scientific relevance and / or description of surface chemistry. In both cases, proper citation was given.
[+] Proper attribution will be given with the intended use

The Average **"Fairness Level,"** Based on Your Rating of Each of the 4

Factors, Is:

[\[see tool disclaimer for important clarifying information\]:](#)

Based on the information and justification I have provided above, I, Elaine Bradford, am asserting this use is **FAIR** under Section 107 of the U.S. Copyright Code.
