- IX. Rural Engineering
- X. 4-H. Club Work
- XI. Outlook and Recommendation
- XII. Summary

STATUS OF COUNTY EXTENSION

Organization for Dinwiddie County, 1927

At present there is no County Organization, and has not been since I have been in the County. The Board of Supervisors is co-operating with me at this time to form an Advisory Council for next year. It is our plan to form this Council before the beginning of the year, so that a program of work may be prepared for the coming year.

PROGRAM OF WORK

I have not been working on any definite program since I came to the County, but have tried to complete the former agent's work. This has not been as successful as it should. I have been unable to find the adult demonstrations in most of the cases. The club work is at a low ebb. Many members enrolled did not start projects, and still more did not continue and complete. There was a general lack of interest on the part of club members, when I came to the County.

SOILS

The building up of soils and maintenance of soil fertility has been fostered in an unorganized way this fall. The use of lime and legumes has been encouraged and there is growing tendency on the part of farmers for a more extensive use of both. Soil fertility is one of the biggest interests of the farmers of Dinwiddie County, and bids fair to be one phase of work which will go forward.

FAHM CROPS

My work with crops has been almost entirely with fall sown crops. I have advised on four seedings of alfalfa, and worked with several other farmers in rejuvenating old stands of alfalfa.

Number of recommendations have been made for the treatment of wheat before seeding.

Several farmers are seeding sweet clover for the first time this fall. This crop is in very limited use at present, but interest in it seems to be growing.

HORTICULTURE

The only work in horticulture has been in an advisory capacity, relating to diseases and insects. A large number of bulletins have been distributed on the Mexican Bean Beetle, and its control. The Bean Beetle is well distributed over the County and was very destructive in some localities.

ANIMAL HUSBANDRY

As in above case, my work in animal husbandry has been largely advisory. This was in relation to feeding and sanitary conditions. I have treated the hogs of one farmer for cholera, and recommended treatment for lice in a number of cases. There is a growing interest in production of better hogs, and bids fair to show marked improvements in the near future.

DAIRY HUSBANDRY

The dairying industry is on an increase in the County at present. More registered cattle are coming into the County, and more farmers are building up small herds.

I have helped one farmer select a registered bull and worked with three others on dairy rations.

POULTRY HUSBANDRY

Poultry is becoming one of the leading enterprises of the County. There is wide spread interest in it, and the people are realizing the value of good birds as compared to the ordinary bird.

My work so far has been in culling demonstrations, sanitary recommendations and the treatment of diseases. I have given fourteen, or there abouts, culling demonstrations.

RURAL ENGINEERING

Very little of this work has been carried on in the County since I have been here. A sewage disposal system has been built at one of the schools, and the Extension Specialist of the Portland Cement Company assisted in this work.

4-H CLUB WORK

The club work for the year has not been a success by any means. There were sixty-five members enrolled and only twenty-two completed. A number of those enrolled did not start a project; others started, and that is about all.

No club member had record books when I came to the County, and had kept no record of the work done.

The interest was lacking with the exception of a few, and has not, as yet, revived as it should. The attendance at the Achievement Day Program, in October, was very poor. Only three clubs made a creditable showing.

OUTLOOK AND RECOMMENDATIONS

The outlook for extension work in Dinwiddie is very good. The interest in the work is not as good at present, as it was several years ago. However, a number of the best farmers are still fostering the work, and the outlook is very favorable for a revival of interest in the extension work. Especially is this true with the club work of the County, which promises to be better another year.

The adult work looks brighter for the coming year; interest seems to be growing, taking the County as a whole. Several farmers have told me that this fall was the first time they had taken advantage of the work.

My recommendations for the work are as follows:

1. Greater interest in club work and more completions.
2. More diversified farming
 - a. More clover, alfalfa, and grasses.
 - b. More live stock where practical.
 - c. Increase in the use of soybeans.
3. More farmers treating seed for disease.
4. Increased use of certified seed.
5. A more extensive use of lime.

SUMMARY

The club work finished with very poor results. Only twenty-two out of sixty-five enrolled completed. Those completing seemed to keep up the interest despite the handicaps.

I am unable to report on the adult demonstrations started by the former agent, because I do not know just who these demonstrators were.

The few demonstrations which I have under way, have not developed to the point that results can be obtained.

My work has been largely in getting acquainted with the farmers, answering calls, and trying to complete the club work and stimulate interest in it.

4

Status of County Extension Work for Dinwiddie County 1927

The Dinwiddie County Agricultural Advisory Council is the name of the Extension Organization in this county.

It has as members the four members of the Board of Supervisors, five members from each of the four districts, the Smith-Hughes teacher and the county agent, a total of 26 members. Every type of farming and business interest of the county is represented in this body.

The purpose of this organization is to work out plans or programs for developing the county agriculturally and educationally, and to aid the county agent in putting the plans across after they are worked out.

Before attempting to plan the county's work, the council with the county agent met around a table and considered projects advisable to undertake, how much to undertake, how to do the things planned and who is to do it. The council is of untold value to the county agent.

Program of Work

The agricultural council after making out a long time program covering a period of five years in connection with the big State five year program beginning in 1926, knew that the whole could not be accomplished in one year and in order to attack the problem in a sound an economic way and accomplish something practical, asked the county agent to make a plan for each year covering part of the long time program.

The county agent made a survey of conditions in 1925 and 1926 in the county affecting agriculture. This survey was based largely upon the 1920 census. Notes were taken during 1924 on actual farm and home conditions by the county agent as to what was found on the farms of the county. This was done in order to have something definite on which to make a plan for 1925. The following notes were taken on projects; How farmers were treating their soils, livestock, poultry; the crops

5

grown and care taken of same at harvest; rotation practices; most profitable crop grown; methods of handling such crops; distance to market; seeds used; number of farmers using purebred livestock; hogs, cattle, sheep, and poultry breeds used; the number of purebred sires being used; the amount of hay, small grain, and other products sold off the farm, including garden products; the amount of same purchased by the farmers who should grow these supplies. The county agent found: Not enough feed and food grown to carry the livestock and family through the year; the principal crops yield of the county too low; some farmers did not even have a garden or a cow; too much commercially prepared feed in the form of canned goods was being purchased by farmers; not enough units of livestock on the farms; too much flour, meat, lard, vegetables and other home supplies which the farmer should and can grow purchased from stores; and that there was not enough poultry per farm. The county agent after diagnosing the case, drafted a program of work based upon the needs of the county, which will be given further on in this report in an effort to correct some of the ills.

The following are the projects undertaken as the major part of the 1927 program; work on soils, farm crops, livestock-dairy cows, hogs, sheep, and poultry; boys and girls club work, county tours and news articles.

SOIL IMPROVEMENT

Increase the acreage sown to legumes so as to supply humus and organic matter that fertilizers may be used more economically and soil improvement increased. Increase the use of lime to sweeten acid soils and insure stands of legumes. Larger applications of high analysis open formula fertilizers that larger crops per acre may be produced with less labor. Plant only known origin, adapted seed corn, wheat, oats, cotton, clover, etc., so that stands will be insured and larger yields returned per acre. Adopt not more than two varieties of seed, when possible, for a community. Have a definite crop rotation with legumes once every three years so as to supply the farm with a sufficient amount of hay and grain for home use and livestock each year.

6

Soils Sat

SOILS

20 fertilizer demonstrations
40 lime "
40 soil improvement " through rotations

FARM CROPS

30 corn demonstrations
30 wheat "
30 soybean and cowpea demonstrations
30 clover demonstrations; red, crimson, alsike and sweet clover
10 alfalfa "

ANIMAL HUSBANDRY

Hogs:

15 demonstrations including feeding, breeding, and hog lot rotations

Poultry:

30 demonstrations each of feeding, housing, and culling

Dairying:

5 purebred bulls to place
5 purebred heifers to place
10 feeding demonstrations
10 newly interested demonstrations in dairying

Boys & Girls 4-H Club:

100 interested club members
7 organized clubs
70% exhibit at fair
70% attending district short course
7% attending State Short Course
100% record books

Educational Work:

4 county tours
12 news articles
Increase the interest in cows, hogs, and poultry so as to complete a live-at-home program as well as furnishing a weekly cash return and a balanced farm program, through better feeding, housing and care; and better livestock by replacing scrub sires with purebreds and culling the unprofitable ones.

A definite number of interested club boys and girls in each community for the purpose of developing intelligent, interested leaders for the future.

7

PROJECT ACTIVITIES

SOILS:

The outstanding piece of soil improvement was the use of lime. Six cars of lime were placed in the county with the help of community leaders. Most of the lime was used as a top dressing for wheat and clover, also by men starting alfalfa and sweet clover plots. The leading farmers of the county suggested and recommended the universal use of lime through the county. Over one hundred men have been induced to use lime through the past few years in a soil building program. The application of small quantities applied yearly is being advocated for Dinwiddie county.

FARM CROPS:

Finding the hay and grain crops in the county were too low gave some definite idea of what were needed. These low yields were traced to poor seed, lack of humus in soil and incorrect fertilizing.

CORN:

There has been a general improvement in corn through the county by securing high grade seed corn from the club boys last year and some adult demonstrators. Also there has been a noted increase of legumes sown for a fallow crop and a steady increase of the growing of soybeans with corn. It was found that even poor seed sown behind a legume fallow produced a far superior corn crop than the very best seed corn on land that had been producing forth to fifty bushels, did where they failed to secure a legume fallow. The corn crop in Dinwiddie county this year is the best they have had in years.

WHEAT:

Owing to the treatment of seed wheat with copper carbonate for stinking smut, very little smut was found in Dinwiddie county as compared with last year. About seventy percent of all wheat planted in the county is being treated for smut.

3 2

Mr. J. E. Duane top dressed his wheat with an application of four hundred pounds of acid phosphate per acre and lime, he reported that he was well satisfied with the results of this application.

SOYBEANS:

This crop is gaining in popularity as it answers a two fold purpose in this county by furnishing hay and acting as a soil builder. About forty percent of the soybeans sown this year were of the Laredo variety due to the success obtained by club members last year.

Mr. E. E. Clarke, Sutherland, Virginia, and Mr. E. F. Abernathy, McKenny, are some of the men who are steadily improving their farms through the planting of soybeans with corn and are strong advocates and helped to establish this practice in their communities.

CLOVERS:

Three men planted sweet clover this spring, two of these men had excellent success with this crop and through their demonstration will be a large help in encouraging this crop in the county. There has been a small but steady increase in the acreage of alfalfa. Some eight or ten men have started plots this past spring and as many more plan to plant this fall.

About seventy percent of the dark tobacco farmers are now planting red clover in their wheat for a fallow for their tobacco next year. This is a practice that has been steadily growing through the county.

HOGS:

Eight hogs were treated for cholera and two boars places in the county. Very few hogs are produced in the county except for home supplies and most of them are supplying their own meat.

DAIRYING:

The increase of dairying on a small scale in Dimasiddie has been going on steadily and bids fair to be one of the outstanding money crops in a few years. In fact it has increased to sufficient size to warrant the Spring Grove creamery running

9

a track route through the county. This work was done last spring in cooperation with Mr. Oshner, President of the Spring Grove Creamery. A visit was made to the creamery with some of the shippers for information as to grades and care of cream, from this trip it was suggested that we hold a meeting for all the cream shippers in this section and explain grades and how to best secure the highest grade cream. At the meeting held the following week in Petersburg, it was agreed that the shippers purchase one share jointly and elect one of their members to the Board of Directors so they could have a representative.

Three purebred bulls and three purebred heifers and twenty grade cows were secured for some of the shippers.

POULTRY:

Poultry has grown to such an extent that it now represents one of the main incomes in some of the communities. Over a hundred thousand dollars is received for the poultry and poultry products from Dinwiddie each year. Considerable work has been done with helping the producers balance their rations and mix their own feeds and quite often their savings run from \$10.00 per ton to as high as \$20.00 per ton. Also their profits have been doubled in many cases through culling, housing and feeding. About forty thousand chicks went into the county last year and the setting hen is rapidly becoming a thing of the past. The local market on fresh eggs has steadily improved in the last five years from four cents below the Richmond market to four cents above the Richmond market. This has come about by putting strictly fresh eggs on the market until the townspeople and restaurants refuse anything but a strictly fresh egg.

4-H CLUB WORK:

The club work in this county is in connection with the five year program. There are seven organized clubs with club leaders. These clubs cover the entire county and the boys projects are the same with the adults for a five year program. Sixty-five boys enrolled for club work in the following crops: corn, peanuts, soybeans, tobacco, pigs, and calves. Seventeen of these boys attended the district short course last summer and Dinwiddie county was second in attendance at this short course. A demonstration team was sent to Blacksburg to the State short course.

ANNUAL REPORT OF COUNTY EXTENSION WORKERS

This report form is to be used by county extension agents, such as county agricultural agent, home demonstration agent, club agent, and negro agent, reporting on their respective lines of work.

State Virginia County Dinwiddie
Report of W. H. Doughty County County Agent
(Name)
From May 15 to Nov. 30, 1927.

If agent has not been employed entire year, indicate exact period. Agents resigning during the year should make out this report before quitting the service.

READ DEFINITIONS, PAGES 3 AND 4

COUNTY AGENT WORK

Approved:

Date

State or District Supervisor.

Date

State Extension Director.

SUGGESTIONS RELATIVE TO THE PREPARATION OF THE COUNTY EXTENSION AGENT'S ANNUAL REPORT.

The annual report should be a review, analysis, interpretation, and presentation to the people of the county, the State, and the Nation of the sum total of the extension activities in each county for the year and the results obtained by the county extension agent assisted by the subject-matter specialists. The making of such a report is of great value to the county extension agent and the people of the county in showing the progress made during the year as a basis for future plans. It is of vital concern also to the State and Nation as a measure of rural progress and a basis for intelligent legislation and financial support.

Separate statistical and narrative reports are desired from each county extension agent in charge of a line of work, such as county agent, home demonstration agent, boys' and girls' club agent, and negro agent. Where an assistant agent has been employed a part or all of the year, a report on his or her work should be included with the report of the leader in charge of that line of work. Where an agent in charge of a line of work has quit the service during the year, the information contained in his or her report should be incorporated in the annual report of the agent on duty at the close of the report year, and the latter report so marked. Where two or more extension agents are employed in a county, each in charge of a line of work, care should be exercised to avoid including the same data in the statistical report of more than one agent.

At least four copies of the annual report should be made: One copy for the county officials, one copy for the agent's files, one copy for the State extension office, and one copy for the Extension Service, United States Department of Agriculture. The report to the Washington office should be sent through the State extension office.

NARRATIVE SUMMARY.

The narrative report should be a statement in orderly fashion and arranged under appropriate subheadings, of the work done, methods used, and results obtained under each project, as well as of the general work accomplished. Every statement should be clear-cut, concise, forceful, and, where possible, reinforced with ample data from the statistical summary. In the preparation of the part of the report relative to each project, the results reported in the statistical summary for the project should be analyzed, conclusions drawn, and recommendations made. The report may well be illustrated with photographs, maps, diagrams, blue prints, or copies of charts and other forms used in demonstration work. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs, and reasonably good margins left. The pages should be numbered in consecutive order.

The following outline is suggestive of how the narrative report may be clearly and systematically presented:

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT.

- I. Cover and title page.
- II. Table of contents.
- III. Status of county extension organization.
 - (1) Form of organization—changes and development.
 - (2) Function of local people, committees, or project leaders in developing the program of work.
 - (3) General policies, including relationships to other organizations.
- IV. Program of work, goals established, methods employed, and results achieved.
 - (1) Factors considered and methods used in determining program of work.
 - (2) Project activities and results.

<ol style="list-style-type: none"> (a) Soils (b) Farm crops (c) Home gardens (d) Forestry (e) Rodents, predatory animals, and birds. (f) Animal husbandry (g) Dairy husbandry (h) Poultry husbandry 	}	(including diseases and insects).
---	---	-----------------------------------

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT—Continued.

IV. Program of work, etc.—Continued.

(2) Project activities and results—Continued.

- (f) Rural engineering.
- (g) Rural engineering—home.
- (h) Agricultural economics, including farm management and marketing.
- (i) Home marketing.
- (j) Foods.

- (n) Home furnishings.
- (o) Home health and sanitation.
- (p) Community activities.
- (q) Miscellaneous.

V. Outlook and recommendations, including suggestive program of work for next year.

VI. Summary of activities and accomplishments, preferably of one or two typewritten pages only, placed at the beginning or end of the narrative report.

STATISTICAL SUMMARY.

To supplement the narrative part of the report, and in order that comparable State and National summaries may be made, it is necessary to include a statistical summary of the work in each county. The following form has been prepared to insure uniformity of reporting. In addition to the questions asked under each subdivision of the report, space is provided to add further data if desired. The statistical summary will grow naturally out of the field and office records.

DEFINITIONS OF TERMS USED IN THIS REPORT.

1. A PROGRAM OF WORK is a definitely outlined plan for extension work.
2. A PROJECT is a definite, systematic, organized plan for carrying out some phase of the extension program of work, providing for what is to be done, how much, when, where, how, and by whom.
3. MISCELLANEOUS WORK includes work which has not yet become a regular part of the program of work—work other than project work.
4. A COMMITTEE, for the purposes of this report, may be any one of the several units into which the county is divided for purposes of conducting organized extension work.
5. A PROJECT LEADER OR LOCAL LEADER is a person, selected because of his or her special interest and fitness, who functions as a leader in advancing some phase of the local program of extension work.
6. A DEMONSTRATION is an example designed to show the practical application of an established fact. Demonstrations as contemplated in this report are of two kinds, method demonstrations and result demonstrations.
7. A METHOD DEMONSTRATION is a demonstration given by an extension worker or other trained leader to a group for the purpose of showing them how to carry out a practice. Synonym: Lecture demonstration. Examples: Demonstrations of canning, mixing of spray materials, and culling of poultry.
8. A RESULT DEMONSTRATION is a demonstration carried on by a farmer, farm woman, boy, or girl under the direction of the extension service, involving a substantial period of time, records of results, and comparisons. Examples: Chick-feeding, corn-culture, and orchard-management demonstrations.
9. A DEMONSTRATOR is a farmer, farm woman, boy, or girl who, under the direction of the extension service, conducts a result demonstration.
10. MEMBERS COMPLETING should include those who have satisfactorily finished the work outlined for the current year.
11. A DEMONSTRATION MEETING is a meeting held to give a method demonstration or to start, inspect, or further a result demonstration.
12. A TRAINING MEETING is a meeting at which project leaders or local leaders are trained to carry on extension activities in their respective communities.
13. AN OFFICE CALL OR TELEPHONE CALL is a visit or call by a farmer or other person seeking agricultural or home economics information, as a result of which some definite assistance or information is given.
14. A FARM VISIT is a call at a farm by the agent at which some definite information is given or concrete plan of work outlined, or some valuable information obtained from the farmer regarding his work, or the better practice prevailing in his neighborhood.
15. A HOME VISIT is a call at a home by the agent at which some definite information is given or concrete plan of work outlined, or some valuable information obtained from the farm woman regarding her work, or the better practice prevailing in her neighborhood.
16. DAYS IN OFFICE should include time spent by the county agent in his office, at county agent conferences, and any other work directly related to office administration.
17. DAYS IN FIELD should include all days spent on official duty other than those spent in office.
18. LETTERS WRITTEN should include all single letters on official business.

4

DEFINITIONS OF TERMS USED IN THIS REPORT—Continued.

17. A **FARMERS' INSTITUTE** is one of a series of meetings of one to two days' duration, arranged by a central State farmers' institute agency, at which agricultural and home-economics problems are discussed, usually by outside speakers employed for the purpose.
18. AN **EXTENSION OR MOVABLE SCHOOL** is an itinerant school usually of two to six days' duration where practical but systematic instruction is given to persons not resident at the college. AN **EXTENSION SMOKE COCCESS** differs from an extension school in that it is usually held at the college or other educational institution and usually for a longer period of time, but not exceeding two weeks.
19. **RECORDS** consist of definite information filed in the county office that will enable the agent to verify the data on extension work included in this report.
20. **FARM OR HOME PRACTICE ADOPTED** is a new or improved practice adopted on a farm or in a home during the year as a result of extension teaching. Examples: Spraying of potatoes for disease, canning of fruits and vegetables, use of balanced rations, and hat making.

GENERAL ACTIVITIES.

Report only this year's extension activities and results that are supported by records.

If an assistant agent has been employed during the year, include his or her work with that of the agent.

1. List below the names, titles, and periods of service of the county extension agents whose work is included in this report. 1

<i>W. H. Daugherty</i>	<i>County Agent</i>	<i>3 1/2</i>
<small>(Name)</small>	<small>(Title)</small>	<small>(Months of service this year)</small>
<i>Joe Bellinger</i>	<i>County Agent</i>	<i>8 1/2</i>

2. County association, if any, fostering extension work. 11
 - (a) Name *Board of Supervisors*
 - (b) Number of members 4
3. Number of communities in county where extension work should be conducted. 14 2
4. Number of above communities in which the extension program has been cooperatively worked out by extension agents and people concerned. 11 3
5. Number of voluntary county, community, or local leaders actively engaged in forwarding the extension program with— 8 4
 - (a) Juniors
 - (b) Adults
6. Number of clubs carrying on extension work: 7 5
 - (a) Junior
 - (b) Adult
7. Membership in above clubs: 65 6
 - (a) Boys' 4
 - (b) Girls' 4
 - (c) Men
 - (d) Women
8. Number of club members completing: 18 7
 - (a) Boys' 4
 - (b) Girls' 4
 - (c) Men
 - (d) Women
9. Number of members in junior club work for four or more years: 15 8
 - (a) Boys 13
 - (b) Girls 13

¹ Report the total number of different boys or girls enrolled in club work. This total should equal the sum of the project enrollments reported on pages 4 to 8, less any duplications due to the same boy or girl carrying on two or more subject-matter lines of work.

² Include those boys and girls enrolled in club work as reported under 6(a) and 6(b) who have finished the work (inclusion or such portion of it as it was planned to finish during the report year).

8-5125

5
GENERAL ACTIVITIES—Continued.

		(c) Charts	2		

¹ Do not count the same visit as both a farm visit and a home visit.

² See definition on page 5.

³ Include county and State press, agricultural journals, and home magazines. Do not count items relating to signs of meetings only.

FARM-DEMONSTRATION WORK.

SOILS.¹

Report only this year's extension activities and results that are supported by records.

45. Number of method demonstrations given. (See definition 6, page 3.)	_____	45
46. Number of result demonstrations started or under way. (See definition 6, page 3.)	60	46
47. Number of result demonstrations completed or carried through the year.	_____	47
48. Number of acres involved in these completed demonstrations.	320	48
49. Number of farms adopting improved practices in the use of commercial fertilizer this year.	_____	49
50. Tons involved in preceding question.	_____	50
51. Number of farms taking better care of farm manures this year.	15	51
52. Number of farms using lime or limestone for the first time.	27	52
53. Tons of lime or limestone so used.	75	53
54. Number of farms plowing under cover or other green manure crops for the first time.	60	54
55. Acres of cover and green manure crops so plowed under.	200	55
55j. Number of farms adopting other improved soils practices this year. (Specify below.)	75	55j
56. Total number of different farms adopting improved practices, relative to the soils work reported on this page. (Include questions 47, 49, 51, 52, 54, and 55j less duplications.)	177	56

I have been unable to get the names of Mr. Bellingers demonstrations therefore I cannot answer questions and the number of completions

special effort was made to increase the use of lime clover and soybeans in rotation for soil building.

¹ For drainage, irrigation, land clearing, and terracing see "Rural Engineering," page 16.
