No, worries! Thanks for getting back to me.

I can absolutely do that- that's the format I was already using so it's quite convenient.

Have a good day,
Ella

Subject: RE: Figure permissions Question- Excursion Guide to the Moine

Ella, good morning. Apologies for the delay but I thought someone had got back to you. We certainly discussed it between myself, Graham and our president.

We suggest that a standard scientific citation will suffice, so "Modified from Fig X of Strachan et al. (2010)" should do it.

Hope this helps.

Good luck with the thesis.

Kindest regards,

Neil

Subject: Figure permissions Question- Excursion Guide to the Moine

Hello,

My name is Ella Davis, I am currently finishing up my master's thesis and for a few of the map figures we (my advisor Dr. Richard Law and I) modified some map figures from the book 'A Geological excursion guide to the Moine geology of the Northern Highlands of Scotland'. I know that this guide was published as a joint publication- who is it that I should contact for usage permissions?

All the best,
Ella Davis
