## FOREWORD

At the beginning the agent was faced with many perplexing problems --- problems regarding the adjustment of bases under the A. A. A. necessary to enable the program to reach more people, that they too, might benefit therefrom. The nerve-racking task didn't last long, however, for the Supreme Court on January 6, 1936, declared the processing taxes under the A. A. A. unconstitutional. Their decision, of course, put a stop to all activities. This didn't last long though, for within a few days the old machine was again in full blast completing the existing contracts plus trying to clear up all suspended cases, and at the same time devoting a portion of its time to formulating another National Agricultural Farm Program. Those who do not believe in the after death have a living example in the County Agricultural Conservation Program, often referred to, and very aptly put, as the Soul of the A. A. A. Living in this program are a great many of the sound economic principles of the A. A. A., plus much sounder agricultural principles regarding the soil.

In Franklin County the Extension Program has enjoyed a very successful year, and due credit should be given to the county agricultural conservation program, which will be discussed in length in subsequent paragraphs.

4-H Club work has been conducted in the county throughout the year, Mr. B. C. Campbell, Assistant County Agent, having full charge of the boys' 4-H Clubs.

### EXTENSION ORGANIZATION IN THE COUNTY.

The county has been divided into eight districts for the purpose of planning Agricultural programs. From these eight districts, the agent selected 56 men to serve on the Advisory Committee. These men were very active throughout the year, cooperating with the agent in planning the 1936

cooperating with the agent in planning the 1936 Extension program early in January of 1936. This plan of work was necessarily changed by the change brought about in the National Farm program. During this time, there were 18 men serving on the A. A. A. Committees in this county, who played a big part, cooperating with this county Agricultural Advisory Board, in the county planning program which followed the Supreme Court's decision on the A. A. A. The purpose of these planning meetings was strictly educational.

A series of three meetings were held in this county in each community making a total of 24 meetings. Approximately 400 farmers attended these meetings. Various questions were discussed regarding the agricultural situation of 1936 in an attempt to get groups of farmers to thinking along sound economic lines. Farmers showed intense interest in these discussions as shown by the number attending despite the adverse weather conditions. Organization of the County Agricultural Conservation Association will be discussed under a separate heading.

The Franklin County Bull Association, consisting of 9 members with a total of approximately 256 cows, and owning at present 5 Holstein Bulls which are being proven as to their production records this year. Each member of this Association has his herd free of Bang's disease and tuberculosis.

The Dairy Herd Improvement Association in this county consists of 5 committeemen and 14 members. Each member's herd is tested annually for butter fat production and accurate and systematic records are kept.

The Franklin County Soil Conservation Association, consisting of 16 committeemen and 172 members, has been very active in cooperating with the S. C. S. Camps regarding promotion work for the Camp.

### THE A. A. A. PROGRAMS

The County Agent's duties under the A. A. A. have been subsidized by the National Conservation Program, however, the agent spends a great deal of his time completing contracts and clearing up suspended cases.

The Agent has devoted about 15% of his time in completing the 1935 contracts under the Agricultural Adjustment Program.

There were 989 flue-cured tobacco contracts in existence in 1935. For these contracts the agent was responsible for the completion of the marketing cards, and delivering rental and adjustment checks to producers. Considerable time was also given to the clearing of suspended contracts. In addition to the above flue-cured contracts, in 1935 there were 70 dark-fired contracts, 25 corn-hog contracts, and 80 wheat contracts.

About 15 letters are written each week and about 30 office calls are answered each week with regards to completing contracts, clearing up suspended cases, delivering checks, and aiding farmers in making division of payment to tenants and other interested parties.

All applications for wheat contracts which were signed before the Supreme Court's decision were completed in 1936. This of course, required the cooperation of the committeemen, and the training of supervisors in checking compliance. There were 29 applications for wheat contracts on which compliance was carried out.

Due credit must be given to the loyal committeemen who gave of their time generously, and who tried in every way possible to conduct the program in a democratic manner, and to see that each signer got a fair deal.

#### THE COUNTY AGRICULTURAL CONSERVATION PROGRAM.

The Soil Conservation and Domestic Allotment Act of 1936 became a law on February 29, 1936. Never before in the history of this country has a more important farm program been offered to the farmers of the United States. This program came as a result of cooperative efforts on the part of the farmer.

The objectives of this program are to encourage farmers to take out of cultivation a certain amount of land brought into cultivation as a result of increased demands during the World War, and to devote this land to the production of soil-conserving crops necessary to the maintenance and improvement of farm land, thus adjusting supply to effective demand, and at the same time controlling erosion and the continuous productivity of farm land.

It is almost impossible for the agent to describe in detail his activities in conducting this program. He has tried to give as accurate an account as possible of the farmers' achievements in the statistical report. Therefore, he will only try to touch the highlights in the program in this narrative.

To begin with, it is almost impossible to believe that a program of this kind could be formulated, presented to the farmer, accepted by the farmer, with such successful results obtained in the same year. This program has reached more people of this county and made a more profound impression on the people than anything else ever attempted.

When this program was presented to the farmers a very extensive educational program was conducted. The agent divided the county into eight districts and appointed 3 leading farmers in each district to assist with the educational work and the taking of individual work sheets used in establishing bases for individual farms in this program. Too much credit cannot be given

4

these men, for it was through their efforts that the success of this program rests. The agent conducted 24 educational meetings explaining various phases of the program in addition to the meetings held by the committeemen. The farmers' response was very favorable with a total of 898 work sheets being signed.

After the work sheets were all signed, the county was divided again into six districts and three community committeemen from each district were elected. The chairman of each district serves on the Board of Directors of the County Association. From these directors three men were elected to serve on the County Committee.

The agent has had the best opportunity in the history of extension work to work with individual farmers regarding their farm planning program and to increase the number of adult result demonstrations to a number almost unbelievable.

Checking performance was one of the most difficult aspects of the program. 18 supervisors were appointed by the committeemen to do this work. It was necessary, of course, to hold training schools to familiarize them with this work.

A definite report of the success of this program cannot be given at this time, but I am going to give an estimate based on 90 samples taken from the total number of reports of performance. The different bases for the county are:

1. Fire-Cured Tobacco --- 178.6 acres  
Flue-Cured Tobacco --- 2,183.9 acres.

The estimate shows that there will be a 15% reduction from these bases, which has been seeded to a soil-conserving crop, and on which a payment will be made to the farmer at the rate of 5¢ per pound for flue-cured tobacco and 3½¢ per pound for fire-cured tobacco for his base poundage previously established under A. A. A. contracts.

2. General Soil-Depleting Base - 22,278.1 acres.

The estimate shows that there will be a 12% reduction in this base for farmers producing

above home needs, which has been seeded to a soil-conserving crop on which a payment will be made to the farmer. The average payment for this county per acre will be \$7.60.

The soil-building allowance for the county is estimated to be around \$22,000.00, and the estimate shows that about 70% of this total will be earned.

The agents have spent considerable time both in the field and office dealing with field crops, and thus far, very little has been said regarding this activity, however, it is hoped that the following summary will show the result accomplished this year.

This is an estimate based on the 90 sample work sheets chosen at random.

1. Tons of Ground Limestone or its equivalent used in 1936 --- 5,620.
2. Increase in 1936 over 1935 -- 2,360 T.
3. Tons of Phosphate used in 1936 -- 450.
4. Permanent pasture treated in 1936 with phosphate -- 1,000 acres, with lime -- 1,180 acres, with lime and phosphate -- 300 acres.
5. Acres of clover seeded in 1936 -- 690.
6. Increase over 1935 -- 400 acres.
7. Acres of alfalfa seeded in 1936-- 800.
8. Increase over 1935 -- 630 acres.
9. Acres of lespedeza seeded in 1936 -- 5,472.
10. Increase over 1935 -- 2,736 acres.
11. Acres of soybeans and cowpeas seeded in 1936 -- 1,200.
12. Increase over 1935 -- 600 acres.
13. Acres of all other legumes seeded in 1936 -- 1,100.
14. Increase over 1935 -- 700 acres.

#### 4-H CLUB WORK

All 4-H Club work in this county this year was carried on through organization within the schools. The teachers and principals deserve much credit for their cooperation and influence in pro-

moting 4- H Club work. Considerable time and work was necessary in the organization of the Clubs. Two trips were made to each school before the club organization was completed.

The club work this year was promoted through seven organized clubs and one unorganized club, with a total of 112 members. The organized clubs are under the leadership of elected club members as officers. The securing of older club members or club leaders to aid in carrying on the club work has been quite a problem.

The annual 4-H Club Achievement Day for all club members of the county was held at Rocky Mount on October 17, 1936, at Rocky Mount High School, with 61 members present. An important feature of this program was the talk by Mr. C. A. Montgomery on the value of 4-H club work to farm boys and girls, and the advantages boys and girls would have over children who had not had an opportunity to become club members. He also pointed out to them the names of several old club members who are now connected with the Extension Division. Another important feature of the program was a free moving picture for the club members, made possible through the cooperation of several merchants of Rocky Mount.

Much time was spent in visiting club members to inspect and advise them in carrying out and receiving the greatest benefits from their projects.

In addition to the regular visits, many club members were visited to explain to them and their parents the benefits and values of the State 4-H Club Camps. Fifteen boys from this county attended these meetings. The Assistant Agent attended the State Short Course at Blacksburg and the District Camp held at Chatham, Va.

After several members going to college, moving away, and changing schools, this year's work shows 98 projects completed, or a 87% completion of total club members.

7

In another year, the agents plan to begin with a more definite plan of work and promote better 4-H Club work for the entire county.

#### AGRICULTURAL ENGINEERING

The Agricultural Engineering projects of this county consist of information on terracing, water furrows, and farm water supplies.

All during the year, and especially since the beginning of the new Agricultural Conservation Program, we have had more requests for terracing than could be handled.

The work consists of the laying off of terraces with the farm level, and explaining to the farmer just how he will build the terrace, and how to plow and cultivate a field which has been terraced. Approximately 200 acres have been terraced in this county this year under the supervision of the agents.

The agent has received several requests on the problem of water systems for the farm. After visiting each of these farms, we have requested the aid of the Agricultural Engineering Department at Blacksburg. During this year, several surveys have been made, the material and cost estimated and the home water supply installed. The agent is of the opinion that as time goes on there will be more requests for this type of work.

#### HORTICULTURE

Horticultural work in this county is carried on mostly in two sections, the Callaway-Boone Mill section and the locality in and around Wirtz. Most growers produce apples and peaches.

Part of the agents' time has been devoted to pruning. In addition to eight scheduled pruning

8

demonstrations, the agent held individual pruning demonstrations on a good number of individual farms. Visits were made to growers on requests for information on storages (common), thinning, fruit sprays, and other general orchard practices. Some time was spent in going over orchards in determining the amount of damage of and the control of rodents.

Scheduled meetings have been held in regards to sprays and rodent control. One meeting was called to explain to the producers the National advertising project for Appalachian apples, in which the producers of this county readily accepted and entered into. On several occasions this year, the agent has been greatly aided by the Specialists of the Horticultural Department from V. P. I.

Along with the field work, timely information has been distributed to the growers concerning orchard practices and spraying.

Quite a bit of work has been started in the organization of a County Fruit Growers' Association. This work has been contacting the growers and explaining to them the purpose of such an organization, and the values the agent believes the grower will derive from such an organization. This work is to be continued into another year.

#### SUGGESTED PLAN OF WORK FOR 1937.

1. Continue 4-H Club Work.
2. Continue Soil Conservation Program.
3. Hold more educational meetings.
4. Cooperate with the S. C. S.
5. Continue to work on County Fruit Association.

9

Washington, D.C.

# COMBINED ANNUAL REPORT OF COUNTY EXTENSION WORKERS

This report form is for use by county extension agents in making a combined statistical report on all extension work done in the county during the year. Agents resigning during the year should make out this report before quitting the service.

State Virginia County Franklin

### REPORT OF

Miss Martha Cook From Dec. 1, 1935 to Nov. 30, 1936  
(Name) Home Demonstration Agent.

From \_\_\_\_\_ to \_\_\_\_\_, 193  
4-H Club Agent.

Claude G. Turner From Dec. 1, 1935 to Nov. 30, 1936  
Agricultural Agent.  
Boyd C. Campbell, Asst. County Agent Jan. 6, 1936 to Nov. 30, 1936

**READ SUGGESTIONS, PAGES 2 AND 3**

Approved:

Date \_\_\_\_\_

9-6113

State Extension Director.

## SUGGESTIONS RELATIVE TO THE PREPARATION OF THE COUNTY EXTENSION AGENT'S ANNUAL REPORT

The annual report should be a summary, with analysis and interpretations, for presentation to the people of the county, the State, and the Nation of the extension activities in each county for the year, and the results obtained by the county extension agents assisted by the subject-matter specialists. The making of such a report is of great value to the county extension agents and the people of the county in showing the progress made during the year as a basis for future plans. It is of vital concern also to the State and Nation as a measure of rural progress and a basis for intelligent legislation and financial support of extension work.

At least four copies of the annual report should be made: One copy for the county officials, one copy for the agent's files, one copy for the State extension office, and one copy for the Extension Service, United States Department of Agriculture. *The report to the Washington office should be sent through the State extension office.*

### STATISTICAL SUMMARY

Where two or more agents are employed in a county they should submit a single statistical report showing the combined activities and accomplishments of all county extension agents employed in the county during the year. Results obtained through assistance rendered agents by specialists should also be included. This report shows, insofar as possible, the part each agent has taken in forwarding the extension program. The county totals should be the sum of the activities and accomplishments of individual agents minus duplications due to two or more agents participating in the same activity or accomplishment. The county totals, when properly recorded, show the progress made in the county during the year in forwarding the entire extension program. Negro men and women agents should prepare a combined statistical report separate from that of the white agents.

The statistical summary should be a report of this year's activities and results that can be verified by records on file in the county office. Where records are not available careful estimates are desired. Such estimates should be marked "Est."

### NARRATIVE SUMMARY

A separate narrative report is desired from the leader of each line of work, such as county agricultural agent, home demonstration agent, boys' and girls' club agent, and Negro agent. Where an assistant agent has been employed during a part or all of the year, the report of his or her work should be included with the report of the leader of that line of work. Where an agent in charge of a line of work has quit the service during the year, the information contained in his or her report should be incorporated in the annual report of the agent on duty at the close of the report year, and the latter report so marked.

The narrative report should summarize and interpret, under appropriate subheadings, the outstanding results accomplished and the extension methods used for each project. Every statement should be clear, cut, concise, forceful, and, where possible, reinforced with necessary data from the statistical summary. Use a descriptive style of writing, giving major accomplishments first under each project. Give extension methods fully relating to outstanding results only, and where practicable illustrate with photographs, maps, diagrams, blueprints, or copies of charts and other forms used. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs and reasonably good margins. The pages should be numbered in consecutive order.

The following outline is merely suggestive of how the narrative report may be clearly and systematically presented. Each agent should prepare an outline to fit the situation and the work to be reported.

#### SUGGESTIVE OUTLINE OR APPROX. NARRATIVE REPORT

- I. Cover and title page.
- II. Table of contents.
- III. Summary of activities and accomplishments, preferably of one or two typewritten pages only, placed at the beginning of the narrative report.
- IV. Changes in county extension organization.
  - (1) Form.
  - (2) General policies.
  - (3) Procedure.
- V. County program of work.
  - (1) Factors considered and methods used in determining program of work.
  - (2) Project activities and results.

*Under appropriate headings and subheadings present in some detail for each major project or line of work the goals set up, the methods used, the results achieved, and the significance of these results in terms of improved farms and homes and of better community life.*
- VI. Outlook and recommendations, including suggestive program of work for next year.

## TECHNOLOGY

To insure reports which convey the intended meaning to others and to facilitate the compilation of satisfactory national statistics on extension, it is extremely important that terms be used in accordance with accepted definitions. The following definitions of extension terms have been approved by the United States Department of Agriculture and the Association of Land Grant Colleges and Universities. Agents should read these definitions before starting to write the annual reports.

## DEFINITIONS OF EXTENSION TERMS

1. A program of work is a statement of the specific projects to be undertaken by the extension agents during a year or a period of years.
2. A plan of work is a definite outline of procedure for carrying out the different phases of the program of work. Such a plan provides specifically for the means to be used and the methods of using them. It also shows what, how much, when, and where the work is to be done.
3. A community is a more or less well-defined group of rural people with common interests and problems. Such a group may include those within a township, trade area, or similar limits. For the purposes of this report a community is one of the several units into which a county is divided for conducting organized extension work.
4. A project leader, local leader, or committeeman is a person who, because of special interest and fitness, is selected to serve as a leader in advancing some phase of the local extension program. A project leader may be either an organization or a subject-matter leader.
5. Demonstrations as contemplated in this report are of two kinds—method demonstrations and result demonstrations. A method demonstration is a demonstration given by an extension worker or other trained leader for the purpose of showing how to carry out a practice. Example: Demonstrations of how to can fruits and vegetables, mix spray materials, and cull poultry.  
A result demonstration is a demonstration conducted by a farmer, home maker, boy, or girl under the direct supervision of the extension worker, to show locally the value of a recommended practice. Such a demonstration involves a substantial period of time and records of results and comparisons, and is designed to teach others in addition to the person conducting the demonstration. Example: Demonstrating that the application of fertilizer to cotton will result in more profitable yields, that under-irrigation of certain cottons can be corrected through proper care, that the use of certified seed in growing potatoes is a good investment, or that a large farm business results in a more efficient use of labor.  
The adoption of a farm or home practice resulting from a demonstration or other teaching activity employed by the extension worker as a means of teaching is not in itself a demonstration.
6. A result demonstrator is an adult, a boy, or a girl who conducts a result demonstration as defined above.
7. A cooperator is a farmer or home maker who agrees to adopt certain recommended practices upon the suggestion of an extension worker. The work is not directly supervised by the extension agent and records are not required, but reports on the success of the practices may be obtained.
8. A 4-H Club is an organized group of boys and/or girls with the objectives of demonstrating improved practices in agriculture or home economics, and of providing desirable training for the members.
9. 4-H Club members enrolled are those boys and girls who actually start the work outlined for the year.
10. 4-H Club members completing are those boys and girls who satisfactorily finish the work outlined for the year.
11. A demonstration meeting is a meeting held to give a method demonstration or to start, improve, or further a result demonstration.
12. A leader-training meeting is a meeting at which project leaders, local leaders, or committeemen are trained to carry on extension activities in their respective communities.
13. An office call is a call in person by an individual or a group seeking agricultural or home-economics information, as a result of which some definite assistance or information is given. A telephone call differs from an office call in that the subject or information is given or received by means of the telephone. Telephone calls may be either incoming or outgoing.
14. A farm or home visit is a call by the agent at a farm or home at which some definite information relating to extension work is given or obtained.
15. Days in office should include those spent by the county extension agent in the office, at annual and other extension conferences, and on any other work directly related to office administration.
16. Days in field should include all days spent on official duty other than "days in office."
17. Letters written should include all original letters on official business. (Duplicated letters should not be included.)
18. An extension school is a school usually of 2 to 6 days' duration, arranged by the Extension Service, where practical instruction is given to persons not resident at the college. An extension short course differs from an extension school in that it is usually held at the college or another educational institution and usually for a longer period of time.
19. Records consist of definite information on file in the county office that will enable the agent to verify the data on extension work included in this report.
20. The county extension association or committee is that county organization, whether a membership or a delegate body, which is recognized officially in the conduct of extension work in the county.

## GENERAL ACTIVITIES

Report Only This Year's Extension Activities and Results That Can Be Verified

1. List below the names, titles, and periods of service of the county extension agents whose work is included in this report. Include time of assistants with that of regular agent.

AGENT		Total months of service this year (a)	Days devoted to ag'l-conservation and adjustment programs (b)	Days devoted to relief work (c)	Total days in office (d)	Total days in field (e)
<i>Maudie C. Cook</i> (Name)	Home demonstration agent	12		1	10 1/2	183
	Asst. home demonstration agent					
	4-H Club agent					
	Assistant 4-H Club agent					
<i>Claude G. Tinsley</i>	Agricultural agent	23	302	2	226	312
	Assistant agricultural agent					

## 2. County extension association or committee:

- (a) Agricultural extension:  
(1) Name Advisory Board (2) Number of members 19
- (b) Home demonstration:  
(1) Name Advisory Board (2) Number of members 65
- (c) 4-H Club:  
(1) Name 4-H Club Council (2) Number of members 55
3. Number of communities in county where extension work should be conducted 24
4. Number of above communities in which the extension program has been planned cooperatively by extension agents and local committees 24
5. Number of different voluntary county or community project leaders or committeemen actively engaged in forwarding the extension program:  
(a) Adult work (1) Men 56 (2) Women 65 (b) 4-H Club work (1) Men 4 (2) Women 4 (3) Older club boys 2 (4) Older club girls 2
6. Number of different paid local leaders engaged in agricultural-conservation and adjustment programs (a) Men 36 (b) Women
7. Number of clubs or other groups organized to carry on adult home demonstration work 15
8. Number of members in such clubs or groups 415

ITEM	Home demonstration agents (a)	4-H Club agents (b)	Agricultural agents (c)	County total (d)
9. Number of 4-H Clubs	10		8	18
10. Number of different 4-H Club members enrolled	(1) Boys		112	112
	(2) Girls	195		195
11. Number of different 4-H Club members completing	(1) Boys		98	98
	(2) Girls	167		167

## 12. Number of different members enrolled in 4-H Club work for:

MEMBERS	1st year	2d year	3d year	4th year	5th year	6th year and over
(a) Boys	98	14				
(b) Girls	60	49	46	17	16	7

<sup>1</sup> County total should equal sum of preceding three columns minus duplications due to two or more agents participating in the same activity or accomplishment.

<sup>2</sup> Report the total number of different boys or girls enrolled in club work. This total should equal the sum of the project enrollments reported on page 7 to 26, minus duplications due to the same boy or girl carrying on two or more subject-matter lines of work.

<sup>3</sup> Same as footnote 2 but refers to completions instead of enrollments.

<sup>4</sup> The total for this question should agree with county total, question 10.

## GENERAL ACTIVITIES—Continued

Report Only This Year's Extension Activities and Results That Can Be Verified

ITEM	Age	10 and under	11	12	13	14	15	16	17	18	19	20 and over
13. Number of different 4-H Club members enrolled according to age	(a) Boys	11	10	20	13	21	14	8	9	5	1	
	(b) Girls	17	14	33	26	39	24	24	9	3	2	4

14. Number of 4-H Club members: (a) In school 299 (b) Out of school 8 14

ITEM	Home demonstration agents (a)	4-H Club agents (b)	Agricultural agents (c)	County total* (d)	
15. Number of 4-H Club teams trained: (1) Judging (2) Demonstration					
16. Number of groups other than 4-H Clubs organized for extension work with rural young people 16 years of age and older	2			2	
17. Members in groups reported in question 16: (1) Young men (2) Young women	14			14	
18. Total number of farm or home visits <sup>2</sup> made in conducting extension work	210		587	797	
19. Number of different farms or homes visited	187		387	574	
20. Number of calls relating to extension work: (1) Office (2) Telephone	92		6,653	6,745	
	95		512	407	
21. Number of news articles or stories published <sup>3</sup>	131		37	168	
22. Number of individual letters written	544		2,961	3,505	
23. Number of different circular letters prepared (not total copies mailed)	32		95	127	
24. Number of bulletins distributed	10		2,468	2,478	
25. Number of radio talks made			3	3	
26. Number of events at which extension exhibits were shown	20		3	23	
27. Training meetings held for local leaders or committeemen:	(1) Adult work: (a) Number (b) Men leaders	3		3	
					(c) Women leaders
	(2) 4-H Club: (a) Number (b) Leaders	3			3
28. Method demonstration meetings held (include all method demonstrations in both adult and 4-H Club work given by agents and specialists not reported under question 27):	(1) Number	219	13	232	
	(2) Total attendance	2,095	305	2,400	
29. Meetings held at result demonstrations:	(1) Number		12	12	
	(2) Total attendance		298	298	

\* The total for this question should agree with county total, question 16.

<sup>2</sup> County total should equal sum of preceding three columns minus duplications due to two or more agents participating in the same activity or accomplishment.

<sup>3</sup> Do not count a single visit to both the farm and home as two visits.

<sup>4</sup> Do not count farms relating to sections of meetings only.

Notes.—Questions 16-31 refer to the total number of different activities conducted this year. The totals should equal the sums of the corresponding information reported on following pages minus duplications where the same activity relates to two or more lines of work.

		(b) Total attendance	123	462	585
	(2) 4-H club	(a) Number	5		5
		(b) Total attendance	47		47

## SUMMARY OF EXTENSION INFLUENCE FOR YEAR

It is highly desirable for extension workers to consider the proportion of farms and farm homes in the county which have been definitely influenced to make some substantial change in farm or home operations as a result of the extension program for men, women, boys, and girls. It is recognized that this information is very difficult for agents to report accurately, so a conservative estimate based upon such records, surveys, and other sources of information as are available will be satisfactory. Such estimates should be marked "Est."

Include results of emergency activities as well as the regular extension program.

35. Number of farms in county	3,953	35
36. Number of farms on which changes in practices have definitely resulted from the agricultural extension program	440	36
37. Number of farm homes in which changes in practices have definitely resulted from the home demonstration program	556	37
38. Number of other homes in which changes in practices have definitely resulted from the home demonstration program		38
39. Number of farm homes with 4-H Club members enrolled	270	39
40. Number of other homes with 4-H Club members enrolled		40
41. Total number of different farm families influenced by some phase of the extension program (Include questions 36, 37, and 38, minus duplications.)	1,500	41
42. Total number of different other families influenced by some phase of extension program (Include questions 38 and 40, minus duplications.)		42

<sup>1</sup> County total should equal sum of preceding three columns minus duplications due to two or more agents participating in the same activity or encampment.

NOTE.—Questions 35-42 refer to the total number of different activities conducted this year. The totals should equal the sums of the corresponding information reported on following pages minus duplications where the same activity refers to two or more lines of work.

CEREALS<sup>1</sup>

Report Only This Year's Extension Activities and Results That Can Be Verified

ITEM	Corn (a)	Wheat (b)	Oats (c)	Rye (d)	Buckwheat (e)	All other crops (f)	
43. Days devoted to line of work by:							
(1) Home demonstration agents							43
(2) 4-H Club agents							
(3) Agricultural agents	27	17	3	7	1		
(4) Specialists	1	1					
44. Number of communities in which work was conducted	24	24	8	7	2		44
45. Number of voluntary local leaders or committeemen assisting	12	8	2				45
46. Days of assistance rendered by voluntary leaders or committeemen	2	7	1				46
47. Number of adult result demonstrations conducted	161	132	63	89	9		47
48. Number of meetings at result demonstrations							48
49. Number of method-demonstration meetings held	3	2	2				49
50. Number of other meetings held	2	4					50
51. Number of news stories published	4	3					51
52. Number of different circular letters issued	3	3					52
53. Number of farm or home visits made	42	26	6				53
54. Number of office calls received	390	368	23	16	5		54
55. Number of 4-H Club members enrolled	24	2					55
(1) Boys							
(2) Girls							
56. Number of 4-H Club members completing	18	2					56
(1) Boys							
(2) Girls							
57. Number of acres in projects conducted by 4-H Club members completing	13	4.5					57
58. Total yields of crops grown by 4-H Club members completing	477 bu.	75 bu.	bu.	bu.	bu.	bu.	58
59. Number of farmers following fertilizer recommendations	392	361	26	29	18		59
60. Number of farmers following insect-control recommendations	27	37					60
61. Number of farmers following disease-control recommendations	46	82	12	9			61
62. Number of farmers following marketing recommendations	9	6					62
63. Number of farmers assisted in using timely economic information as a basis for readjusting enterprises	29	24					63
64. Number of farmers following other specific practice recommendations: <sup>2</sup>							66
(1)							
(2)							
(3)							
(4)							
(5)							

<sup>1</sup> Report fall-sown crops the year they are harvested.<sup>2</sup> Indicate crop by name.<sup>3</sup> For the sake of uniformity it is suggested that each State prepare a list of the more important practices to be reported upon by all agents in that State.

## LEGUMES AND FORAGE CROPS

Report Only This Year's Extension Activities and Results That Can Be Verified
