

ACKNOWLEDGEMENTS

I would like to express my deepest gratitude to Dr. Michel Van Aerde for supporting me in my first year at Virginia Tech. His guidance and inspiration have provided an invaluable experience that will help me in my career.

My sincere appreciation goes to my academic advisor Dr. Wei Lin for his guidance during my graduate studies. I have been honored to have Dr. Randy Dymond and Dr. Dusan Teodorovic as members of my committee.

My special thanks to Mr. Craig Moore of the Hydro Systems group for helping me with my thesis. Thanks go to my friends Sujay, Amlan and Senthil who helped me with the data collection. I also thank the Professors, fellow graduate students and staff at the Transportation Infrastructure and Systems Engineering Department. I would like to thank my numerous friends who helped me throughout this academic exploration.

Last but not the least, I would like to thank my parents and brother for their unconditional love and support.

TABLE OF CONTENTS

Acknowledgements.....	iii
Table of Contents.....	iv
List of Figures.....	vi
List of Tables.....	vii
Chapter 1 Introduction.....	1
1.1 Motivation and Purpose.....	1
1.2 The Problem-Need for Digitized Route Map.....	1
1.3 Objective of thesis.....	2
1.4 Methods to obtain base map.....	2
1.5 Thesis organization.....	3
Chapter 2 Data collection and processing procedure.....	4
2.1 Introduction.....	4
2.1.1 GPS concepts.....	4
2.2 System components.....	5
2.2.1 GeoExplorer receiver.....	5
2.2.1.1 Power to receiver.....	6
2.2.1.2 GeoExplorer menu structure.....	6
2.2.1.3 Memory Specification.....	6
2.3 Preparation for data collection.....	7
2.3.1 Planning.....	7
2.3.2 Creating and transferring a Data Dictionary.....	7
2.3.3 Checking the critical parameters.....	8
2.3.4 Checking the non critical parameters.....	10
2.3.5 Assembling the equipment in office.....	11
2.4 Field Operation-Data collection.....	12
2.4.1 Connections.....	12
2.4.2 Getting a clear view of the sky.....	12
2.4.3 Recording files.....	12
2.5 Data post processing.....	13

2.5.1 Transferring the data files to PC.....	13
2.6 Conversion to coordinate system.....	16
Chapter 3 Map Digitizing.....	20
3.1 Introduction.....	20
3.2 Description of data collection.....	20
3.2.1 Bus trajectory from GPS data after processing.....	21
3.3 Construction of route based on GPS data.....	23
3.4 Procedure for constructing route map with link-node representation.....	24
3.4.1 Step(3)-Obtaining the interval for new point.....	25
3.4.2 Step(4)-Coordinate of new point.....	26
3.4.3 Digitized route map.....	28
3.4.4 Link and Node numbering.....	30
3.5 Location of stops.....	31
3.5.1 Time Distance Plots.....	31
Chapter 4 Comparison of digitized map and base map-analysis and results. 33	
4.1 Introduction.....	33
4.2 Description of base map and digitized map.....	33
4.3 Comparison of base map and digitized map.....	35
4.4 Accuracy of digitized route maps.....	36
4.4.1 Distance of point from digitized map.....	36
4.4.2 Comparison with alternate route.....	41
4.4.3 GPS data collected at different interval.....	42
4.4.4 Comparison of Road Centerline map with digitized route map.....	42
Chapter 5 Conclusions and recommendations 46	
5.1 GPS data collection.....	46
5.2 Route map digitizing.....	47
5.3 Accuracy of digitized route maps.....	47
5.3 Future work.....	48
References.....	49
Vita.....	50

LIST OF FIGURES

Figure 2.1	Trimble GeoExplorer II receiver.....	5
Figure 2.2	Data Transfer Window from the Pathfinder Office Software.....	13
Figure 2.3	Differential Correction Menu from Pathfinder Office Software.....	14
Figure 2.4	Export Menu from the Pathfinder Office Software.....	15
Figure 2.5	Sample Output Text File.....	16
Figure 2.6	Corpscon software window.....	17
Figure 2.7	Text file with coordinates for GPS data points.....	18
Figure 2.8	Plot of coordinates of GPS data points.....	19
Figure 3.1	Sample plot of Tom's Creek A route superimposed on AutoCAD..	21
