PLANS FOR 1940	13
CONCLUSION	13

## INTRODUCTION

The year 1940 has provided a breathing spell for extension workers in Pittsylvania County from the confusion and pressure occasioned by compulsory crop control. The agents have had more time to devote to some of the details of the extension program as well as the AAA. In so doing more effort has been directed at individuals and considerable more has been accomplished.

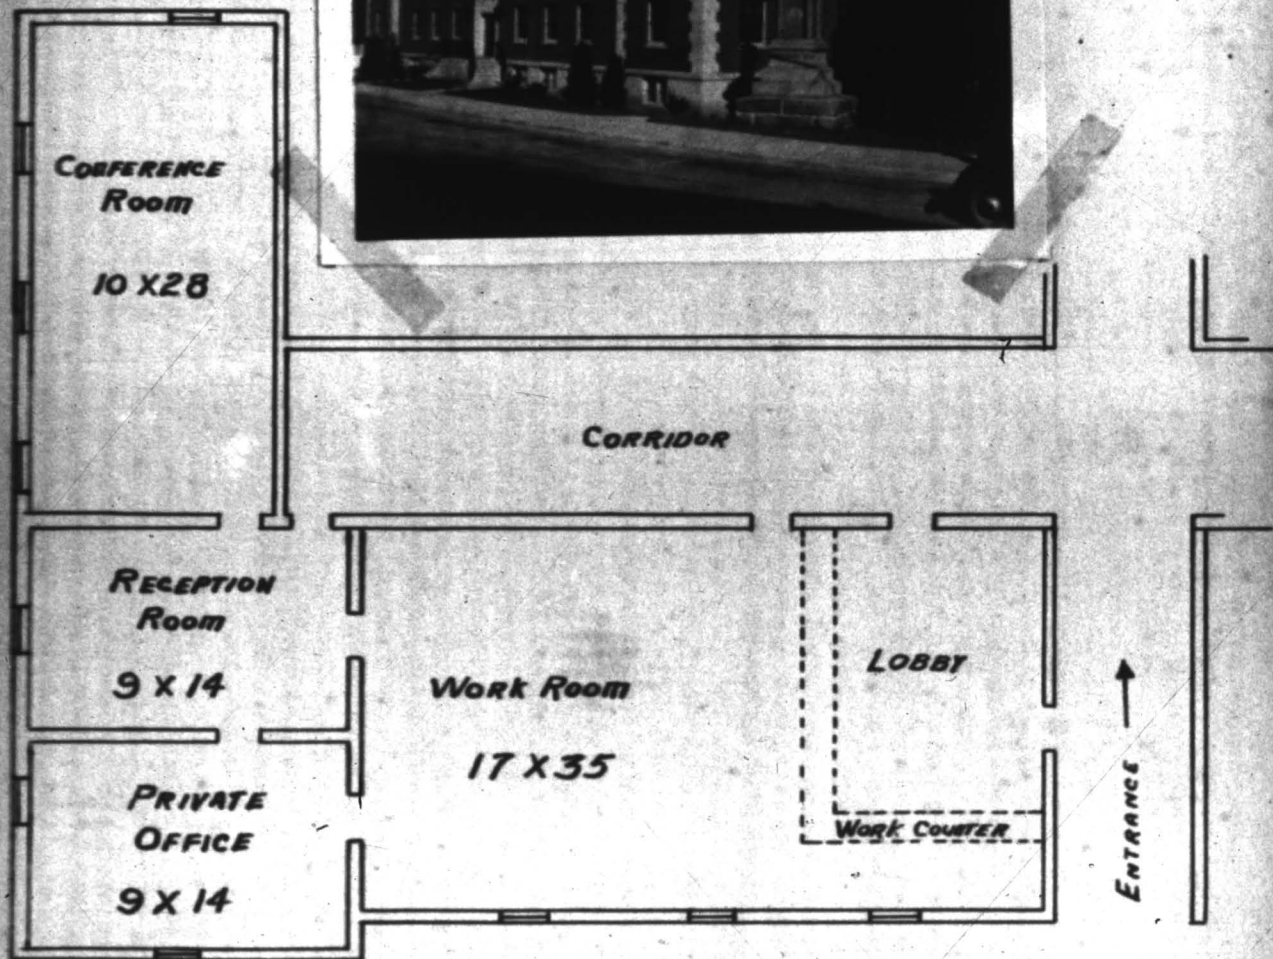

Extension work has been carried on by the County Agent, one Assistant Agent and one Assistant Agent in club work. The accomplishments will be dealt with in this report separately. In carrying on the work during the year these agents have cooperated with other agricultural agencies in the county and a more unified program should result from the activities of this year.

The work under the Agricultural Conservation Program has not been nearly so vexing as has been the case during years when compulsory control of tobacco was in effect. This fact is in a large measure responsible for the fact that there has been more time to devote to some of the finer points of the program, both AAA and Extension.

An attempt has been made to organize more effectively for handling the Conservation Program under the AAA and the Extension Program jointly in 1940. A big contributing factor in this set up is the new quarters in which the entire organization is housed.

The county completed during the year a new three story fire proof office building in which to house the different county offices including the County and Home Agents' offices, ample room being provided for the work of the AAA in the County Agent's quarters. Not only was the agents provided with new quarters but the offices were completely equipped with new all metal office furniture. This furniture includes flat top desks, sufficient tables, chairs and steel cabinets for bulletins, forms, etc.

Below will be found a photo of the building with a sketch of the floor plan of the Agent's quarters directly underneath.

1a

This arrangement is fulfilling a long felt need. With a private office the agent has been enabled to avoid many untimely and unnecessary interruptions. This is absolutely essential if he is to be at his best in directing and coordinating the affairs of an extremely complicated program. Under the present set up the AAA program is segregated to the extent that it can be readily reached without molesting the remainder of the office. Also office calls for Extension information can be handled without interrupting the AAA personnel. This set up is not offered as the ideal but as one that is functioning very satisfactorily at present.

After fourteen years of continuous service as County Agent in his home county, the agent is leaving the work at the end of the year (on leave without pay) to accept a position with the Farm Security Administration as Assistant Tenant Purchase specialist for the state. During these years many changes have taken place, all of which have apparently placed Extension work in a stronger position than ever and a certain amount of pride is derived from the feeling that possibly some contribution was made by the agent during his term of office.

#### PLANS AND AIMS

It has been the aim of those in charge of the work during the year to so coordinate the provisions of the conservation program with the Extension work that participating farmers might realize the greatest benefit. Accordingly the agent and assistants have worked closely with the committeemen in helping individual farmers meet their soil building goal. Unfortunately a large percentage

of the farmers felt it so imperative to increase their tobacco acreage that they could not qualify for a payment. However, on a large number of these farms the soil building goal was fully attained. In advising with different ones relative to reaching their goal it has necessitated in some instances a complete change in the farmers plan. Here has been one of the outstanding achievements of both AAA and Extension for the chances are neither could have accomplished as satisfactory a job single handed.

### FIELD CROPS

#### Small Grains:

Work in connection with small grains and corn will be grouped in this report taking up a part of this report falling under the general heading "Field Crops". Spread over the year considerable time was devoted to corn, wheat and rye. A large part of the work on these crops were fertilizer recommendations. There were something like 200 adult result demonstrations showing the value of fertilizer practices. Improved seed was also popular, especially in connection with wheat and corn, some outstanding results being obtained in this line. A number of farmers tried barley as a substitute for wheat with satisfactory results. The price of wheat for the past several years together with the low yields obtained has been very discouraging to those farmers who have been in the habit of growing wheat on their tobacco land to complete the rotation. It appears from the results obtained from the demonstrations conducted this year that barley should have a larger place in the rotation practices in this county.

#### Tobacco:

This crop being the only cash crop in the county of any consequence is usually given more consideration than all others put together. The agents put in 24 days dealing with plant-bed problems, fertilizer and cultural

methods and disease and insect control. Since the blue-mold (Downy Mildew) disease has been so prevalent during the last few years it was decided that some special effort should be made to get growers to prepare their beds with a view to treating them for the control of this disease. Accordingly the local Experiment Station workers were called in and after considerable discussion it was decided that the treatment with Para-Bacc was the most practical and that a bed 6 ft. wide was the most satisfactory width.

Cooperating with the specialist a number of meetings were scheduled at which the method of treatment was explained and the 6 ft. type of bed stressed. While it is impossible to know how many actually followed recommendations at least 176 carried through with a part of these suggestions. Twenty-four growers submitted soil samples for an analysis test. Those carrying out some of the recommendations relative to use of standard fertilizer and insect control is estimated at 4200.

#### Legumes:

It is felt that more interest has been shown in the production of legumes since the Conservation Program has made possible certain payments for seeding and fertilizing. The most prominent legume in the county being lespedeza. A close check on the amount of seed sown in the spring of 1939 indicates that at least 150,000 lbs. of seed were sown. Of this amount approximately 20 percent was produced at home. More seed were saved from the 1938 crops. The small type combine has made this a very practical as well as profitable farm enterprise. It has also been clearly demonstrated to a large number of farmers that this crop seeded on good land with lime, phosphate and potash, yield more and possibly better hay than any other hay crop in the county. It has practically replaced such crops for hay as hard grass, cogard grass and peas. It seems entirely within the range of possibilities that it will replace alfalfa, and except for its value in the rotation, red clover is not nearly so popular as a hay crop.

### Pastures

For the first time in the Agent's 14 years of experience in the county as agent, there was a desire on the part of the farmer to top dress his pasture with phosphate and lime. There were approximately 26 of these demonstrations during the year. Most of the phosphate used was the triple superphosphate furnished by the AAA as Grants of Aid. In addition to those using phosphate there were 77 demonstrations in the use of lime, clipping and reseeded. One farmer remarked, when asked about the results secured from his top dressing operations, "I have just doubled the carrying capacity of my pasture, I have found that by a little extra attention and plant food I can either do with one half the pasture land formerly used or I can double the amount of stock kept on the same land."

### LIVE STOCK

#### Dairy Cattle:

It is perfectly natural for those farmers having sufficient pastures and feed to look for some enterprise to help bear the farm expense where the tobacco acreage is reduced. This tendency has leaned slightly towards the dairy industry. The agent has received dairy barn plans for three farmers. Also considerable help has been given these farmers in planning their farm operations so that the best part of the tobacco land will remain for tobacco while the other part of the farm will be used for feeds and pastures. Another phase of this type of farming has been the restriction on new producers selling on the local market. The three farms mentioned were able to get small bases to start with. The fact that the production over the entire area was low together with the additional advantage these men had of having been engaged in dairying in a small way in the past accounted for their getting small bases. Still other advantages were the short distance to town, the type of land owned and in two cases a milk truck was passing their farm daily. Four pure bred bulls and four females were placed with the agent's assistance.

### Beef Cattle:

There are several farms in the county well adapted to the production of beef cattle. During the year several of these farmers have called on the county agent for assistance in getting pastures started, breeding stock located and pastures planned. On those farms already having small herds of beef cattle the agent has assisted with some of the breeding and feeding problems. Outlook and market information has been furnished these farmers.

### Sheep and Swine:

Seven farmers were assisted in securing pure-bred rams while three were helped to find pure bred bears. Pure bred sows were found for eight farmers and four were assisted in finding ewes for foundation breeding stock. Two flock owners were helped in treating their flocks for stomach worms. These same two men sold some of their lambs in a shipment made up from local producers. The prices received were  $1\frac{1}{2}$  cents per pound above local prices.

### Poultry:

Apparently more interest in poultry has developed during the year. The agent has been called on for more information relative to methods in production. Better flocks are being developed and more attention is being paid to housing. The agent has cooperated with sixteen farmers throughout the year in handling their flocks. Assistance rendered included culling, feeding and disease problems. Demonstrations in housing and sanitation methods have been outstanding. A one day poultry institute was held in the early spring at which time 22 producers came in for the day and heard different phases of the poultry business discussed by specialist from the State College. Some assistance has been given a local producer in starting a small hatchery for supplying the local demand for baby chicks. An effort has been made to get this hatchery on the state certified list and have eggs purchased locally. Four flock owners have agreed to have their flocks blood tested for the coming year. The hatchery man has agreed to pay the producers who have their flock blood tested, ten cents per dozen above the local market price for all eggs the hatchery can use.

## AGRICULTURAL ENGINEERING

### Terracing:

Terracing and mechanical erosion control work in this county was handled for the third consecutive year through the local Terracing Association, a farmers cooperative under the supervision of the County Agent.

The association makes available the necessary equipment for this work and furnishes technical assistance to supervise operations. The farmer is required to pay the expense of operating the machinery while on his farm. The Extension Division furnishes the technical aid.

This association came into existence through popular demand for this type of work, and the desire and need for same is even greater now than three years ago when the association was first organized, but the absence of ready cash on the part of the farmer has retarded work during 1939.

The fact that the Soil Conservation Service has moved two CCC camps out of the county during the year has also taken away from the farmers a much needed help in the form of assistance in working out complete farm management programs for individuals and the added assistance they received in constructing outlet channels; etc. for terracing systems.

The desire for soil conservation work is exceptionally good but much needed work will have to be left undone unless the farmers get material help from former cooperating agricultural agencies.

### Farm Water Systems:

Assistance has been given fourteen farmers in locating and installing water systems on the farm, and with the help of Extension Specialists plans for installing one Hydro Electric plant has been completed.

Locations for seven runs have been made and two of these farm homes now have bath rooms and three have running water in the home.

The agents have also been able to give assistance in making the necessary contact between the County Sanitation officer and those desiring information and help in installing septic tanks and sewage disposal systems. With the increased interest in building this has been a very necessary service.

#### Farm Buildings:

The assistance given in the field on this work has been limited somewhat due to the lack of time and personnel. However, plans for two silos, three dairy buildings, six poultry houses and two hog houses have been furnished along with the technical advice and assistance requested.

### WORK WITH OTHER AGENCIES

#### Agricultural Conservation Program:

In carrying out the work falling under this head more attention has been given to the details of the program as it applies to soil conservation than it has been in the past. This was made possible from the fact that a full time Chief Clerk has given the agents more time in which to do outside work thus making more individual contacts possible.

As a result of the referendum held in December, 1938, tobacco quotas were voted out in 1939. The result of this referendum was far reaching in its economic. To begin with practically every grower that had land immediately began his plans for enlarging his crop in 1939. If he had help, all right, if he did not have help immediate steps were taken to secure help. As a result large numbers were brought onto the farm from the nearby mills and the 1939 allotments were over planted by approximately 45%. This over planting together with a rather favorable growing season resulted in an unusually large crop of tobacco. However, the harvest season was very unfavorable and much of the crop was lost in the field due to the inability of the growers to save it. While the control

feature of the program was voted down there was nevertheless a job for the committee to do in working out acreage allotments for 1939. These were prepared early in the season giving each grower ample time to know what his allotment was. The office force in the early part of the year was busy preparing applications on the 1938 compliance and delivering checks to those who had complied and met the requirements for payment. A total payment of \$108,281.98 was received in the county. This amount being the smallest payment for any year's performance since the triple A program was started. However, the most of the money was received at a time of the year when it was badly needed and really did do a lot of good.

The committeemen made extra-ordinary effort to get each grower informed as to what was expected of him in 1939. A large number of meetings were advertised and at these meetings the committeemen met the growers with their plans for 1939 and attempted to discuss each plan separately. The agents helped plan these meetings and attended practically all of them rendering any service in connection with making the 1939 plans that he was called on for. In spite of strenuous effort on the part of the committee and the agent only about 50% of the growers enrolled for 1939. The remainder either being dissatisfied with the program in general or refusing to abide by the acreage allotments because they were really too low. It might be pointed out, however, that of this group, where no effort was made to stay within the allotments a large percentage of the soil building practices were carried out. On the farms of the 50% who filed plans it has developed that not more than half of those will earn a payment for 1939. In practically all cases where no payment is earned the failure is due to an overplanting of tobacco acreage. The State and Washington officials have continually sought a reason for an attitude of this kind from the growers of Pittsylvania County. It would appear that the most plausible reason is due to the fact that this county was a large tobacco producing county prior to 1931. During 1931, 1932, 1933 the acreage was reduced to a very great extent and since that time the combined effort of all growers has been to regain ground lost during those years. This attitude of the growers has resulted in much dissatisfaction with acreage allotments and a general feeling of antagonism towards the A. C. Program.

The year just closing is the first in which farmers of this county have taken advantage of grants of aid offered under the Agricultural Conservation program. For the first time attempted, it is felt that participation in this feature of the program has been all that could be asked. Eighty nine tons of triple superphosphate and 445.0 tons of ground limestone were used in meeting soil building requirements. The agents have worked closely with these producers using this material and have tried to assist them in putting it where it would do them the maximum good. In addition to the use of these two materials there has been considerable interest shown in improvement of pastures by reseeding adapted mixtures. Terracing has also received considerable attention. All in all it appears that considerable improvement has been made among the farmers with respect to meeting the soil building requirements. One of the big obstacles in the past has been that the growers complained that their goal was so high they could not meet it by seeding grasses and legumes, a complaint which was true. However, through contacts and meetings it has been shown that by breaking up their seeding program and substituting such practices as applying phosphate, lime and terracing the goal could be very readily met and a better balanced system of farming obtained, and best of all, due to the grants of aid furnished, a smaller cash outlay required.

At present there is considerable speculation among the growers as to what the 1940 tobacco acreage allotments will be. Information given out prior to the holding of the referendum in October indicated that these allotments were likely to be reduced fifteen or twenty percent under the 1939 figures. This prospective reduction in acreage is causing considerable confusion among the tenants, especially those who came to the farm from town and other occupations. It is generally felt that there will be a large number of tenants without homes in 1940 if the 1940 allotments are reduced 20% under the 1939 allotments and the control provisions are tight enough to keep production within the allotments. In lots of cases to keep all this help would mean insufficient income for all the farm population.

### Work with R. E. A.

Every effort was made by the agents during the year to promote the extension of the Rural Electric lines in the county. As a result of ground work laid in 1938 and continued efforts in 1939 approximately 123 miles of lines have been completed under the R. E. A. system. There are nearly 400 subscribers using current at the present. The agents helped the group perfect its organization under the Mecklenburg Electric Cooperative Association. It was very evident early in the year that the subscribers from Pittsylvania County would want representation on the Board of Directors of the Association, the county having been included in an extension project. With this in view the agent made several trips with interested farmers to the home office of the cooperative in Boydton. After considerable discussion the county was given the privilege of electing two members to the Board. Since that time several proposed extensions have been viewed by the cooperative engineer in company with the agent. The prospects are that these extensions will be made at an early date. In addition a number of new customers have been added to lines already constructed.

### F. S. A.:

The agent has worked closely throughout the year with the County R. E. Supervisor of the Farm Security Administration. Whenever possible the agent has met with the Farm Security committee and given advice with respect to applicants for tenant purchase loans, location of farms and appraised values. Two district meetings were attended during the year. Assistance was given in working up a farm plan for three farms purchased under the F. S. program. The R. E. supervisor has also been called on by the agent to meet certain farm groups who wanted special information on the Tenant Purchase program.

### Danville Fair Association:

Following the usual custom the agents cooperated closely with the management of the Fair Association in staging the 1939 Fair. In fact the County Agent gave more

assistance than usual owing to the fact that the acting manager was a new man in the work. The former Secretary died just a short while before Fair time. In addition to having general supervision of the agricultural building, an Extension booth was exhibited showing a model arrangement of farm buildings, all of which was tied in with AAA. The miniature farm buildings were all lighted and the entire exhibit attracted a large crowd during the entire fair.

### COOPERATIVE EFFORT

#### Buying and Sellings

This work continues to grow. It has gotten to the stage where the agent has only a very small part in its activities. As a rule he does attend the meetings of the different Boards of Directors. The farmers of the county during the year bought through their incorporated association over 1000 tons of fertilizer and 25,000 lbs. of lespedeza seed. In addition they sold their wool in a pooled car and two of the farmers sold lambs cooperatively. In addition the report on terracing under agricultural engineering was made possible by the farmers of the county pooling their terracing requirements and purchasing a complete terracing outfit. One meeting of the representatives of all agricultural agencies was held during the year. The results obtained were highly pleasing. Each agency outlined what he was trying to do and enumerated a few things the other agencies could do that would help him with his work. The group decided to make a permanent organization and have regular meetings. The County Agent was made chairman of the group and the R. E. Supervisor secretary. It was generally felt that a close coordination of the various programs would result in increased efficiency.

The agencies represented were:

Farm Security Administration  
Federal Land Bank  
Production Credit Association  
Emergency Seed Loan  
Vocational Agriculture  
Home Demonstration Work  
Home Economic Teaching  
County Sanitation Officer  
County Extension Agent

### PLANS FOR 1940

While it is difficult to outline a program for 1940 at this time, the general plan is to do more coordinating of Agricultural Agencies and possibly some definite steps towards program planning as a follow up of the meeting at which all agricultural agencies were represented.

In addition more work in developing and improving soil conservation practices and helping individual farmers to meet their 1940 soil building goal under the AAA.

### CONCLUSION

As stated elsewhere in this report the agent is quitting the extension work (on a leave basis) with this report. This may mean that he will return at a later date or it may mean that this is really the conclusion to not only the 1939 narrative report but to a career of Extension work. In any event the work has its ups and downs and the agent has been through many of these cycles. It is felt however, that as a whole Extension work in Pittsylvania County has made progress during the year just closing and regardless of whether the agent returns to Extension work or not his interests shall always rank high in his estimation.

In closing due credit must be given those individuals from assistant agent on up including the District Agent and Specialists who have cooperated so beautifully and whose efforts have played such a large part in any progress noted or achievements obtained during the period of years just closing.

## COMBINED ANNUAL REPORT OF COUNTY EXTENSION WORKERS

This report form is for use by county extension agents in making a combined statistical report on all extension work done in the county during the year. Agents resigning during the year should make out this report before quitting the service.

State Virginia County Pittsylvania

#### REPORT OF

Evelyn Clark  
(Name) Home Demonstration Agent.

From Dec. 1, 1938 to Nov. 30, 1939

Assistant Home Demonstration Agent.

From \_\_\_\_\_ to \_\_\_\_\_, 193

4-H Club Agent.

From \_\_\_\_\_ to \_\_\_\_\_, 193

F. L. Price  
Assistant County Agent in charge of Club Work.

From Dec. 1, 1938 to Nov. 30, 1939

J. E. Stone  
Agricultural Agent.

From Dec. 1, 1938 to Nov. 30, 1939

J. M. Jackson  
Assistant Agricultural Agent.

From Dec. 1, 1938 to Nov. 30, 1939

READ SUGGESTIONS, PAGES 2 AND 3

Approved:

Date \_\_\_\_\_

State Extension Director.

The annual report should be a summary, with analysis and interpretations, for presentation to the people of the county, the State, and the Nation of the extension activities in each county for the year, and the results obtained by the county extension agents assisted by the subject-matter specialists. The making of such a report is of great value to the county extension agents and the people of the county in showing the progress made during the year as a basis for future plans. It is of vital concern also to the State and Nation as a measure of rural progress and a basis for intelligent legislation and financial support of extension work.

At least four copies of the annual report should be made: One copy for the county officials, one copy for the agent's files, one copy for the State extension office, and one copy for the Extension Service, United States Department of Agriculture. The report to the Washington office should be sent through the State extension office.

#### STATISTICAL SUMMARY

Where two or more agents are employed in a county they should submit a single statistical report showing the combined activities and accomplishments of all county extension agents employed in the county during the year. Results obtained through assistance rendered agents by specialists should also be included. This report shows, insofar as possible, the part each agent has taken in forwarding the extension program. The county totals should be the sum of the activities and accomplishments of individual agents *minus duplications due to two or more agents participating in the same activity or accomplishment*. The county totals, when properly recorded, show the progress made in the county during the year in forwarding the entire extension program. Negro men and women agents should prepare a combined statistical report separate from that of the white agents.

The statistical summary should be a report of this year's activities and results that can be verified by records on file in the county office. Where records are not available careful estimates are desired. Such estimates should be marked "Est."

#### NARRATIVE SUMMARY

A separate narrative report is desired from the leader of each line of work, such as county agricultural agent, home demonstration agent, boys' and girls' club agent, and Negro agent. Where an assistant agent has been employed during a part or all of the year, the report of his or her work should be included with the report of the leader of that line of work. Where an agent in charge of a line of work has quit the service during the year, the information contained in his or her report should be incorporated in the annual report of the agent on duty at the close of the report year, and the latter report so marked.

The narrative report should summarize and interpret, under appropriate subheadings, the outstanding results accomplished and the extension methods used for each project. Every statement should be clear-cut, concise, forceful, and, where possible, reinforced with necessary data from the statistical summary. Use a descriptive style of writing, giving major accomplishments first under each project. Give extension methods fully relating to outstanding results only, and where practicable illustrate with photographs, maps, diagrams, blueprints, or copies of charts and other forms used. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs and reasonably good margins. The pages should be numbered in consecutive order.

The following outline is merely suggestive of how the narrative report may be clearly and systematically presented. Each agent should prepare an outline to fit the situation and the work to be reported.

#### REGISTRATIVE OUTLINE OF ANNUAL NARRATIVE REPORT

- I. Cover and title page.
- II. Table of contents.
- III. Summary of activities and accomplishments, preferably of one or two typewritten pages only, placed at the beginning of the narrative report.
- IV. Changes in county extension organization.
  - (1) Form.
  - (2) General policies.
  - (3) Procedure.
- V. County program of work.
  - (1) Factors considered and methods used in determining program of work.
  - (2) Project activities and results.Under appropriate headings and subheadings present in some detail for each major project or line of work the goals set up, the methods used, the results achieved, and the significance of these results in terms of improved farms and homes and of better community life.
- VI. Outlook and recommendations, including suggestive program of work for next year.

## TERMINOLOGY

To insure reports which convey the intended meaning to others and to facilitate the compilation of satisfactory national statistics on extension, it is extremely important that terms be used in accordance with accepted definitions. The following definitions of extension terms have been approved by the United States Department of Agriculture and the Association of Land Grant Colleges and Universities. Agents should read these definitions before starting to write the annual reports.

## DEFINITIONS OF EXTENSION TERMS

1. A program of work is a statement of the specific projects to be undertaken by the extension agents during a year or a period of years.
2. A plan of work is a definite outline of procedure for carrying out the different phases of the program of work. Such a plan provides specifically for the means to be used and the methods of using them. It also shows what, how, much, when, and where the work is to be done.
3. A community is a more or less well-defined group of rural people with common interests and problems. Such a group may include those within a township, trade area, or similar limits. For the purpose of this report a community is one of the several units into which a county is divided for conducting organized extension work.
4. A project leader, local leader, or committeeman is a person who, because of special interest and fitness, is selected to serve as a leader in administering some phase of the local extension program. A project leader may be either an organization or a subject-matter leader.
5. Demonstrations are contemplated in this report are of two kinds—method demonstrations and result demonstrations. A method demonstration is a demonstration given by an extension worker or other trained leader for the purpose of showing how to carry out a practice. Example: Demonstrations of how to care fruits and vegetables, mix spray materials, and cull poultry.  
A result demonstration is a demonstration conducted by a farmer, home maker, boy, or girl under the strict supervision of the extension worker, to show locally the value of a recommended practice. Such a demonstration involves an substantial period of time and records of results and comparisons, and is designed to teach others in addition to the person conducting the demonstration. Example: Demonstrating that the application of fertilizer to cotton will result in more profitable yields, that underweight of certain children can be corrected through proper diet, that the use of certified seed in growing potatoes is a good investment, or that a large farm business results in a more efficient use of labor.  
The adoption of a farm or home practice resulting from a demonstration or other teaching activity employed by the extension worker as a means of teaching is not in itself a demonstration.
6. A result demonstrator is an adult, a boy, or a girl who conducts a result demonstration as defined above.
7. A cooperator is a farmer or home maker who agrees to adopt certain recommended practices upon the solicitation of an extension worker. The work is not directly supervised by the extension agent and records are not required, but reports on the success of the practices may be obtained.
8. A 4-H Club is an organized group of boys and/or girls with the objectives of demonstrating improved practices in agriculture or home economics, and of providing desirable training for the members.
9. 4-H Club members enrolled are those boys and girls who actually start the work outlined for the year.
10. 4-H Club members completing work-study boys and girls who satisfactorily finish the work outlined for the year.
11. A demonstration meeting is a meeting held to give a method demonstration or to start, inspect, or further a result demonstration.
12. A leader-training meeting is a meeting at which project leaders, local leaders, or committeemen are trained to carry on extension activities in their respective communities.
13. An office call is a call in person by an individual or a group seeking agricultural or home-economics information, as a result of which some definite assistance or information is given. A telephone call differs from an office call in that the assistance or information is given or received by means of the telephone. Telephone calls may be either incoming or outgoing.
14. A farm or home visit is a call by the agent at a farm or home at which some definite information relating to extension work is given or obtained.
15. Days in office should include those spent by the county extension agent in the office, at annual and other extension conferences, and on any other work directly related to office administration.
16. Days in field should include all days spent on official duty other than "days in office."
17. Letters written should include all original letters on official business. (Duplicated letters should not be included.)
18. An extension school is a school usually of 2 to 6 days' duration, arranged by the Extension Service, where practical instruction is given to persons not resident at the college. An extension short course differs from an extension school in that it is usually held at the college or another educational institution and usually for a longer period of time.
19. Records consist of definite information on file in the county office that will enable the agent to verify the data on extension work included in this report.
20. The county extension association or committee is that county organization, whether a membership or a delegate body, which is recognized officially in the conduct of extension work in the county.

## GENERAL ACTIVITIES

Report Only This Year's Extension Activities and Results That Can Be Verified

1. List below the names, titles, and periods of service of the county extension agents whose work is included in this report. Include time of assistants with that of regular agent.

AGENT	Total months of service this year (a)	Days devoted to agr'l-conservation and adjustment programs (b)	Days devoted to relief work (c)	Total days in office (d)	Total days in field (e)
<i>Evelyn Click</i> (Name) Home demonstration agent	12	-	-	61	230
Asst. home demonstration agent					
<i>J. D. Price</i> 4-H Club agent	12	1	-	31	120
Assistant county agent in charge of club work					
<i>J. E. Stone</i> Agricultural agent	24	129	-	187	402
<i>J. M. Jackson</i> Assistant agricultural agent					

2. County extension association or committee:

- (a) Agricultural extension:  
 (1) Name *County Advisory Board* (2) Number of members *12*
- (b) Home demonstration:  
 (1) Name *County Homemaking Board* (2) Number of members *24*
- (c) 4-H Club:  
 (1) Name *4-H Council* (2) Number of members *42*
3. Number of communities in county where extension work should be conducted *12*
4. Number of above communities in which the extension program has been planned cooperatively by extension agents and local committees *12*
5. Number of different voluntary county or community project leaders or committeemen actively engaged in forwarding the extension program:
- |                |                     |                   |                     |                               |
|----------------|---------------------|-------------------|---------------------|-------------------------------|
| (a) Adult work | (1) Men <i>68</i>   | (b) 4-H Club work | (1) Men <i>3</i>    | (3) Older club boys <i>4</i>  |
|                | (2) Women <i>35</i> |                   | (2) Women <i>13</i> | (4) Older club girls <i>-</i> |
6. Number of different paid local leaders engaged in agricultural-conservation and adjustment programs:
- |                    |
|--------------------|
| (a) Men <i>30</i>  |
| (b) Women <i>-</i> |
7. Number of clubs or other groups organized to carry on adult home demonstration work *16*
8. Number of members in such clubs or groups *374*

ITEM	Home demonstration agents (a)	4-H Club agents (b)	Agricultural agents (c)	County total <sup>1</sup> (d)
9. Number of 4-H Clubs	<i>14</i>	<i>16</i>		<i>16</i>
10. Number of different 4-H Club members enrolled	(1) Boys <i>-</i>	<i>254</i>		<i>254</i>
	(2) Girls <i>293</i>	<i>72</i>		<i>355</i>
11. Number of different 4-H Club members completing	(1) Boys <i>-</i>	<i>182</i>		<i>182</i>
	(2) Girls <i>146</i>	<i>55</i>		<i>201</i>

12. Number of different members enrolled in 4-H Club work for:<sup>2</sup>

MEMBERS	1st year	2d year	3d year	4th year	5th year	6th year and over
(a) Boys	<i>143</i>	<i>50</i>	<i>22</i>	<i>19</i>	<i>9</i>	<i>11</i>
(b) Girls	<i>218</i>	<i>62</i>	<i>40</i>	<i>18</i>	<i>7</i>	<i>10</i>

<sup>1</sup> County total should equal sum of preceding three columns minus duplications due to two or more agents participating in the same activity or accomplishment.

<sup>2</sup> Report the total number of different boys or girls enrolled in club work. This total should equal the sum of the project enrollments reported on pages 7 to 24, minus duplications due to the same boy or girl carrying on two or more subject-matter lines of work. Do not include boys and girls enrolled late in the year in connection with the succeeding year's program.

<sup>3</sup> Same as footnote 2 but refers to completions instead of enrollments.

<sup>4</sup> The total for this question should agree with county total, question 12.

## GENERAL ACTIVITIES—Continued

Report Only This Year's Extension Activities and Results That Can Be Verified

ITEM	Age	10 and under	11	12	13	14	15	16	17	18	19	20 and over	
13. Number of different 4-H Club members enrolled according to age <sup>1</sup>	(a) Boys	18	37	30	45	57	24	22	17	10	1	1	
	(b) Girls	24	48	70	76	56	27	23	15	15	-	1	
14. Number of 4-H Club members: <sup>1</sup>	(a) In school	609										(b) Out of school	-

ITEM	Home demonstration agents (a)	4-H Club agents (b)	Agricultural agents (c)	County total <sup>2</sup> (d)
15. Number of 4-H Club teams trained	(1) Judging	-	3	3
	(2) Demonstration	-	2	2
16. Number of groups other than 4-H Clubs organized for extension work with rural young people 16 years of age and older	1	1	-	1
17. Members in groups reported in question 16	(1) Young men	-	11	11
	(2) Young women	9	-	9
18. Total number of farm or home visits <sup>3</sup> made in conducting extension work	530	176	807	1533
19. Number of different farms or homes visited	265	-	279	544
20. Number of calls relating to extension work	(1) Office	469	31	11,744
	(2) Telephone	43	6	1,715
21. Number of news articles or stories published <sup>4</sup>	44	20	50	114
22. Number of individual letters written	1108	124	3339	4571
23. Number of different circular letters issued (not total copies mailed)	109	11	158	278
24. Number of bulletins distributed	324	921	172	1417
25. Number of radio talks broadcast or prepared for broadcasting	6	1	3	10
26. Number of events at which extension exhibits were shown	2	2	1	5
27. Training meetings held for local leaders or committeemen	(a) Number	4	-	5
	(b) Men leaders	-	-	203
	(c) Women leaders	63	-	63
(2) 4-H Club	(a) Number	5	2	7
	(b) Leaders	28	5	33
28. Method demonstration meetings held (include all method demonstrations in both adult and 4-H Club work given by agents and specialists not reported under question 27)	(1) Number	278	11	289
	(2) Total attendance	4053	600	4653
29. Meetings held at result demonstrations	(1) Number	19	-	19
	(2) Total attendance	287	-	287

<sup>1</sup> The total for this question should agree with county total, question 14.<sup>2</sup> County total should equal sum of preceding three columns minus duplications due to two or more agents participating in the same activity or assignment.<sup>3</sup> Do not count a single visit to both the farm and home as two visits.<sup>4</sup> Do not count items relating to notices of meetings only.

Notes.—Questions 18-24 refer to the total number of different activities conducted this year. The totals should equal the sums of the corresponding information reported on following pages minus duplications where the same activity relates to two or more lines of work.

## GENERAL ACTIVITIES—Continued

Report Only, This Year's Extension Activities and Results That Can Be Verified

ITEM		Home demonstration agents (a)	4-H Club agents (b)	Agricultural agents (c)	County total (d)		
30. Tours conducted	(1) Adult work	(a) Number	-	1	1	30	
		(b) Total attendance	-	200	200		
	(2) 4-H Club	(a) Number	-	-	-		
		(b) Total attendance	-	-	-		
31. Achievement days held	(1) Adult work	(a) Number	1	-	1	31	
		(b) Total attendance	200	-	200		
	(2) 4-H Club	(a) Number	1	1	1		
		(b) Total attendance	105	105	105		
32. Encampments held (Do not include picnics, rallies, or short courses, as these should be reported under other meetings.)	(1) Farm women	(a) Number	-	-	-	32	
		(b) Total members attending	-	-	-		
		(c) Total others attending	-	-	-		
	(2) 4-H Club	(a) Number	1	1	1		
(b) Total boys attending		-	6	-	6		
	(c) Total girls attending	20	-	-	20		
	(d) Total others attending	2	2	-	4		
33. Other meetings of an extension nature participated in by agents or specialists and not previously reported	(1) Number	81	132	61	274	33	
	(2) Total attendance	6271	3093	5111	14,415		
34. Meetings held by local leaders or committeemen not participated in by agents or specialists and not reported elsewhere	(1) Adult work	(a) Number	19	-	19	34	
		(b) Total attendance	396	-	-		396
	(2) 4-H Club	(a) Number	19	2	-		19
		(b) Total attendance	633	27	-		633
34. Number of above meetings (questions 27-34) at which discussion group method of presentation was followed		32	-	-	32	34	

## SUMMARY OF EXTENSION INFLUENCE FOR YEAR

It is highly desirable for extension workers to consider the proportion of farms and farm homes in the county which have been definitely influenced to make some substantial change in farm or home operations as a result of the extension program for men, women, boys, and girls. It is recognized that this information is very difficult for agents to report accurately, so a conservative estimate based upon such records, surveys, and other sources of information as are available will be satisfactory. Such estimates should be marked "Est."

Include results of emergency activities as well as the regular extension program.

35. Number of farms in county	7529	35
36. Number of farms on which changes in practices have definitely resulted from the agricultural extension program	5029	36
37. Number of farm homes in which changes in practices have definitely resulted from the home demonstration program	65 Est	37
38. Number of other homes in which changes in practices have definitely resulted from the home demonstration program	65 Est	38
39. Number of farm homes with 4-H Club members enrolled	534	39
40. Number of other homes with 4-H Club members enrolled	21	40
41. Total number of different farm families influenced by some phase of the extension program (Include questions 35, 37, and 39, minus duplications.)	5200 Est	41
42. Total number of different other families influenced by some phase of extension program (Include questions 38 and 40, minus duplications.)	57 Est	42

\* County total should equal sum of preceding three columns minus duplications due to two or more agents participating in the same activity or accomplishment.

Notes.—Questions 35-42 refer to the total number of different activities conducted this year. The totals should equal the sums of the corresponding information reported on following pages minus duplications where the same activity relates to two or more lines of work.

CEREALS<sup>1</sup>

Report Only This Year's Extension Activities and Results That Can Be Verified

ITEM	Corn (a)	Wheat (b)	Oats (c)	Rye (d)	Buckwheat (e)	Cereals not grown, rice, and other cereals (f)	
43. Days devoted to line of work by:							
(1) Home demonstration agents							43
(2) 4-H Club agents	21	1				4	
(3) Agricultural agents	6	4		7	1		
(4) Specialists							
44. Number of communities in which work was conducted	12	12		12		6	44
45. Number of voluntary local leaders or committeemen assisting							45
46. Days of assistance rendered by voluntary leaders or committeemen							46
47. Number of adult result demonstrations conducted	14	21		165	5		47
48. Number of meetings at result demonstrations							48
49. Number of method-demonstration meetings held							49
50. Number of other meetings held	16						50
51. Number of news stories published	3						51
52. Number of different circular letters issued	3						52
53. Number of farm or home visits made	39					7	53
54. Number of office calls received	176	76		111	16		54
55. Number of 4-H Club members enrolled							55
(1) Boys	75	1		1		27	
(2) Girls							56
56. Number of 4-H Club members completing							
(1) Boys	55	1		1		25	56
(2) Girls							
57. Number of acres in projects conducted by 4-H Club members completing	83.58	16		1		7 1/2	57
58. Total yields of crops grown by 4-H Club members completing	25 bu.	225 bu.	bu.	9 bu.	bu.	4 1/2 bu.	58
59. Number of farmers following fertilizer recommendations	401	291		180	5		59
60. Number of farmers following insect-control recommendations	208	306		16			60
61. Number of farmers following disease-control recommendations	41	644					61
62. Number of farmers following marketing recommendations	23	144					62
63. Number of farmers assisted in using timely economic information as a basis for readjusting enterprises	218	48					63
64. Number of farmers following other specific practice recommendations: <sup>2</sup>							66
(1)							
(2)							
(3)							
(4)							
(5)							

<sup>1</sup> Report fall-corn crops the year they are harvested.<sup>2</sup> Indicate crop by name.<sup>3</sup> For the sake of uniformity it is suggested that each State prepare a list of the more important practices to be reported upon by all agents in that State.

## LEGUMES AND FORAGE CROPS

Report Only This Year's Extension Activities and Results That Can Be Valued

ITEM	Alfalfa	Sweet-clover	Red, bur, and other clovers	Vetch	Lespedeza	Peas

## FORESTRY, WILDLIFE CONSERVATION, AND AGRICULTURAL ENGINEERING

Report Only This Year's Extension Activities and Results That Can Be Verified

ITEM	Forestry (a)	Wildlife conservation, fur and game farming (b)	Agricultural engineering <sup>1</sup> (farm and home) (c)	
141. Days devoted to line of work by:				
(1) Home demonstration agents	-	-	4	141
(2) 4-H Club agents	-	21	-	
(3) Agricultural agents	4	-	283	
(4) Specialists	3	-	5	
142. Number of communities in which work was conducted	5	7	10	142
143. Number of voluntary local leaders or committeemen assisting	-	-	-	143
144. Days of assistance rendered by voluntary leaders or committeemen	-	-	-	144
145. Number of adult result demonstrations conducted	4	-	41	145
146. Number of meetings at result demonstrations	-	-	-	146
147. Number of method-demonstration meetings held	-	-	-	147
148. Number of other meetings held	-	16	4	148
149. Number of news stories published	1	4	2	149
150. Number of different circular letters issued	1	2	10	150
151. Number of farm or home visits made	16	24	529	151
152. Number of office calls received	50	5	370	152
153. Number of 4-H Club members enrolled				153
(1) Boys	-	24	-	
(2) Girls	-	8	-	
154. Number of 4-H Club members completing				154
(1) Boys	-	19	-	
(2) Girls	-	8	-	
154½. Number of 4-H Club members not in special project clubs who participated in forestry or wildlife conservation activities				154½
(1) Boys	-	-	XXXXXXXXXX	
(2) Girls	-	-	XXXXXXXXXX	
155. Number of units handled by 4-H Club members completing. (This refers to questions 154 and 154½)				155
(1) Transplant beds		Coverts <sup>2</sup> improved or built	Acres terraced	
(2) Acres planted to forest trees		Nest boxes, feed trays for song birds	Machines or equipment repaired	
(3) Acres improved		Feeding stations operated	Articles made	
(4) Acres of woodland protected from fire		Animals or birds produced	Equipment installed	

## FORESTRY—Continued

156. Number of farms on which new areas were reforested by planting with small trees	2	156
157. Acres involved in preceding question	4	157
158. Number of farmers planting windbreaks or shelterbelts	1	158
159. Number of farmers planting trees for erosion control	-	159
160. Number of farmers making improved thinnings and weedings	1	160
161. Number of farmers practicing selection cutting	-	161
162. Number of farmers pruning forest trees	-	162
163. Number of farmers cooperating in prevention of forest fire	1	163
164. Number of farmers adopting improved practices in production of naval stores	-	164
165. Number of farmers adopting improved practices in production of maple sugar and sirup	-	165

<sup>1</sup> 4-H farm shop clubs should be reported under this heading.<sup>2</sup> Includes food patches planted or left standing for wildlife.

## FORESTRY—Continued

Report Only This Year's Extension Activities and Results That Can Be Verified

166. Number of farmers assisted in timber estimating and appraisal.....	3	166
167. Number of farmers following wood-preservation recommendations.....	-	167
168. Number of farmers following recommendations in the marketing of forest products.....	2	168

## WILDLIFE CONSERVATION—Continued
