Permissions

As a general rule, permission should be sought from the rights holder to reproduce any substantial part of a copyrighted work. This includes any text, illustrations, charts, tables, photographs, or other material from previously published sources. Obtaining permission to re-use content published by Elsevier is simple. Follow the guide below for a quick and easy route to permission.

[Permission guidelines](#)

Permission guidelines

For further guidelines about obtaining permission, please review our [Frequently Asked Questions](#) below:

[When is permission required?](#)

[When is permission not required?](#)

[From whom do I need permission?](#)

[How do I obtain permission to use photographs or illustrations?](#)

[Do I need to obtain permission to use material posted on a website?](#)

[What rights does Elsevier require when requesting permission?](#)

[How do I obtain permission from another publisher?](#)

[What is RightsLink?](#)

What should I do if I am not able to locate the copyright owner?

Can I obtain permission from a Reproduction Rights Organization (RRO)?

Is Elsevier an STM signatory publisher?

Do I need to request permission to re-use work from another STM publisher?

Do I need to request permission to text mine Elsevier content?

Can I include/use my article in my thesis/dissertation?

Yes. Authors can include their articles in full or in part in a thesis or dissertation for non-commercial purposes.

Which uses of a work does Elsevier view as a form of ‘prior publication’?

How do I obtain permission to use Elsevier Journal material such as figures, tables, or text excerpts, if the request falls within the STM permissions guidelines?

How do I obtain permission to use Elsevier Journal material such as figures, tables, or text excerpts, if the amount of material I wish to use does not fall within the free limits set out in the STM permissions guidelines?

How do I obtain permission to use Elsevier Book material such as figures, tables, or text excerpts?

How do I obtain permission to use Elsevier material that is NOT on ScienceDirect or Clinical Key?

Can I use material from my Elsevier journal article within my thesis/dissertation?

Can I modify a figure when I have received permission to use it?

Can I modify Lancet material?

How do I obtain copies of a book in a format suitable for a person with a disability?

What is the National Institute of Health's (NIH) policy for depositing articles to PubMed Central?

How should I acknowledge Elsevier material?

How do I set up a RightsLink account?

As an Elsevier book author can I post my chapter on a website?

How do I request permission to use NETTER images?

Can I post my Elsevier article to my Institutional Repository?

How can I share my Elsevier article (Scholarly Sharing)?

Can I post my article on ArXiv?

Can I post my article on ResearchGate without violating copyright?

What is Elsevier's policy on using patient photographs?

Where can I find Elsevier's permission request form to use when requesting permission from another copyright holder?

Do I need permission to reuse my own prior Elsevier journal figures/tables/excerpts in my Elsevier book chapter?

Do I need permission to reuse my own prior Elsevier book figures/tables/excerpts in my Elsevier book chapter?

I obtained permission to reuse figures/tables/excerpts from the author of a previously published work. Do I need permission from the publisher?

Do I need permission to reuse figures/tables/excerpts from my own previously published work (with publishers other than Elsevier)?

Do I need permission to redraw a figure? How should I credit the figure?

Do I need permission to use figures/tables/excerpts from the previous edition of this book?

Do I need permission to reuse Open Access material in my chapter?

Do I need to complete the permission log? I didn't add any figures/tables that weren't in the prior edition.

How do I complete the permission log?

Can I include stock images in my chapter? What permissions do I need?

Do I need to obtain permission for figures/tables taken from the Internet?

Do I need permission to cite articles?

What if the rightsholder never responds to my request?

How should I obtain permission for a previously unpublished image (for example, an image used "Courtesy of" a colleague or a university)?

Obtaining permission to use content on ScienceDirect

If the content you wish to re-use is on ScienceDirect, (<http://www.sciencedirect.com/>) you may request permission using the Copyright Clearance Center's RightsLink® service. Simply follow the steps below:

- 1 Locate your desired content on ScienceDirect.** Subscribers will be able to view all content and guest users can view open access content and abstracts for free simply by clicking on the article or chapter title.
- 2 Determine if the content is open access or subscription access.** If you are reading an

Elsevier published article online, you need to look out for the "Open Access" orange label located under the article's title and author information. You will also be able to identify any relevant open access articles in your search results by looking for the same label. To find out how you can reuse an open access article, look underneath the title and click on the license hyperlink for exact details on the user license selected by the author. If your reuse is not covered by the user license, please proceed to the next step.

3 Click on the 'Get rights and content' button located under the author details, adjacent

to the DOI.

The screenshot shows the ScienceDirect article page for 'A socio-economic analysis of biomethane in the transport sector: The case of Italy' by Adriano D'Adamo, Pasquale Marcello Falcone, and Francesco Ferella. The article is published in 'Waste Management' (Volume 95, 15 July 2019, Pages 102-115). The DOI is https://doi.org/10.1016/j.wasman.2019.06.005. A yellow 'Get rights and content' button is visible under the author details. The page includes sections for Outline, Highlights, Abstract, Keywords, and Recommended articles.

4 The following page will then be launched (turn off your pop-up blocker):

The screenshot shows the Elsevier RightsLink permissions page. A dropdown menu is open, listing various reuse options such as 'reuse in a medical communications project', 'purchase this content', 'order reprints', 'reuse in a book/textbook', 'reuse in a journal/magazine', 'reuse in a presentation/slide kit/poster', 'reuse in promotional materials/pamphlet/brochure', 'reuse in training/CME Materials', 'reuse in a thesis/dissertation', 'reuse in coursepack/classroom materials', 'reuse in a CD-ROM/DVD/other storage media', 'reuse in news media', 'make photocopies', 'reuse in conference proceedings', and 'reuse in a government report'. The page also includes a 'Welcome to RightsLink' message and a 'make a selection' button.

5 Select the way you would like to reuse the content.

6 Create an account if you have not done so already.

7 Accept the terms and conditions.

For further information about RightsLink® please click here (<http://www.copyright.com/rightsholders/rightslink-permissions/>) .

For questions about using the RightsLink service, please contact Customer Support via phone 877/622-5543 (toll free) or 978/777-9929, or email customer@copyright.com

(<mailto:customer@copyright.com>).

Please note: When you create an account with RightsLink you will be asked to provide either your credit card information or an invoicing address. This does not necessarily mean that your request will be subject to a permissions fee; it is part of the registration process only. You can determine whether your request is subject to a fee by clicking on the "quick price" button after you have made your selection on how you wish to use the material.

Obtaining permission to use content on ClinicalKey (Book Search)

If the content you wish to re-use is available on Clinicalkey, (<https://www.clinicalkey.com.au/#!>) you may request permission using the Copyright Clearance Center's RightsLink® service. Simply follow the steps below.

- 1 Locate your desired content on ClinicalKey.** Click on the Books tab which is beneath the Search and Browse options and this will take you to a new window in which you need to enable all content by moving the toggle from Subscribed Content
- 2 Enter the book name in the box that reads ‘Filter List by Title’.**

The screenshot shows the ClinicalKey website interface. At the top, there is a navigation bar with 'Search' and 'Browse' options. Below this, there are tabs for 'Books', 'Journals', 'Drug Monographs', 'Guidelines', 'Patient Education', 'Clinical Overviews', 'Multimedia', and 'Procedure Videos'. The 'Browse Books' section is active, showing a search filter for 'Gray's Anatomy for Students'. A list of books is displayed, including 'Current Surgical Therapy' and 'Essentials of Radiology'. The page footer contains the Elsevier logo, contact information, and copyright notice.

- 3 Click on the title displayed to view the Table of Contents (TOC).** Please select the required chapter from the TOC and click on **“Get rights and content”**.

Find 'Gray's Anatomy for Students' in this Chapter or Book

Copyright

Describes the rights related to the publication and distribution of research. It governs how authors (as well as their employers or funders), publishers and the wider general public can use, publish and distribute articles or books.

[Journal author rights](#)

[Government employees](#)

[Elsevier's rights](#)

[Protecting author rights](#)

[O1](#)

Journal author rights

In order for Elsevier to publish and disseminate research articles, we need publishing rights. This is determined by a publishing agreement between the author and Elsevier. This agreement deals with the transfer or license of the copyright to Elsevier and authors retain significant rights to use and share their own published articles. Elsevier supports the need for authors to share, disseminate and maximize the impact of their research and these rights, in Elsevier proprietary journals* are defined below:

For subscription articles

For open access articles

For subscription articles (https://www.elsevier.com)	For open access articles (https://www.elsevier.com/open-access/articles-checkout.elsevier.com)
<p>Authors transfer copyright to the publisher as part of a journal publishing agreement, but have the right to:</p> <ul style="list-style-type: none"> • Share their article for Personal Use (https://www.elsevier.com/about/policies/copyright#personaluse), Internal Institutional Use (https://www.elsevier.com/about/policies/copyright#internaluse) and Scholarly Sharing (https://www.elsevier.com/about/policies/sharing) purposes, with a DOI link to the version of record on ScienceDirect (and with the Creative Commons CC-BY-NC-ND license for author manuscript versions) • Retain patent, trademark and other intellectual property rights (including research data). • Proper attribution and credit for the published work. 	<p>Authors sign an exclusive license agreement, where authors have copyright but license exclusive rights in their article to the publisher**. In this case authors have the right to:</p> <ul style="list-style-type: none"> • Share their article in the same ways permitted to third parties under the relevant user license (together with Personal Use (https://www.elsevier.com/about/policies/copyright#personaluse) rights) so long as it contains a CrossMark logo (https://www.elsevier.com/about/policies/crossmark), the end user license (https://www.elsevier.com/about/policies/open-access-licenses), and a DOI link to the version of record on ScienceDirect. • Retain patent, trademark and other intellectual property rights (including research data). • Proper attribution and credit for the published work.

***Please note that society or third party owned journals may have different publishing agreements. Please see the journal's guide for authors for journal specific copyright information.**

****This includes the right for the publisher to make and authorize commercial use (<https://www.elsevier.com/about/policies/copyright#CU>), please see "Rights granted to Elsevier (<https://www.elsevier.com/about/policies/copyright#Elsevier%20rights>)" for more details.**

Help and Support

- Download a sample publishing agreement for subscription articles in ↓ English and ↓ French.
- Download a sample publishing agreement for open access articles for authors choosing a ↓ commercial user license and ↓ non-commercial user license.

- See our author pages (<https://www.elsevier.com/authors>) for further details about how to promote your article.
- For use of Elsevier material not defined below please see our permissions page (<https://www.elsevier.com/about/policies/copyright/permissions>) or visit the Permissions Support Center (<https://service.elsevier.com/app/contact/supporthub/permissions-helpdesk/>) .

Government employees

Elsevier has specific publishing agreements with certain government and inter-governmental organizations for their employee authors. These agreements enable authors to retain substantially the same rights as detailed in the "Author Rights section (<https://www.elsevier.com/about/policies/copyright#author%20rights>)" but are specifically tailored for employees from the relevant organizations, including:

- World Bank
- World Health Organization
- For US government employees, works created within the scope of their employment are considered to be public domain and Elsevier's publishing agreements do not require a transfer or license of rights for such works.
- In the UK and certain commonwealth countries, a work created by a government employee is copyrightable but the government may own the copyright (Crown copyright). Click here (<https://www.elsevier.com/open-access/agreements/uk-national-archives>) for information about UK government employees publishing open access

Rights granted to Elsevier

For both subscription and open access articles, published in proprietary titles, Elsevier is granted the following rights:

- The exclusive right to publish and distribute an article, and to grant rights to others, including for commercial purposes.
- For open access articles, Elsevier will apply the relevant third party user license

(<https://www.elsevier.com/about/policies/open-access-licenses>) where Elsevier publishes the article on its online platforms.  [ELSEVIER \(https://www.elsevier.com\)](https://www.elsevier.com)   (<https://global-checkout.elsevier.com>) 

- The right to provide the article in all forms and media so the article can be used on the latest technology even after publication.
- The authority to enforce the rights in the article, on behalf of an author, against third parties, for example in the case of plagiarism or copyright infringement.

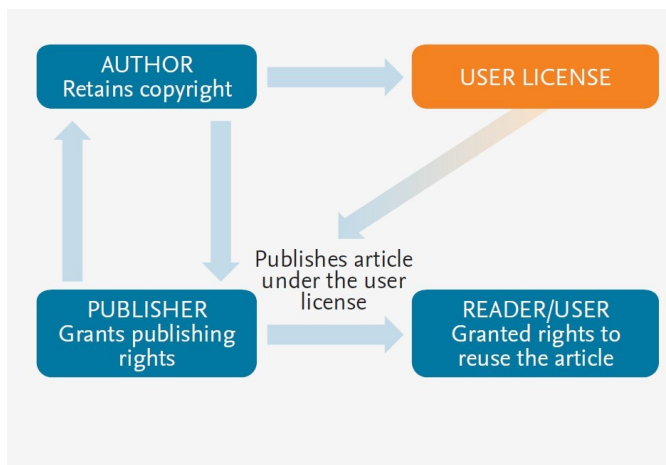

Protecting author rights

Copyright aims to protect the specific way the article has been written to describe an experiment and the results. Elsevier is committed to its authors to protect and defend their work and their reputation and takes allegations of infringement, plagiarism, ethic disputes and fraud very seriously.

If an author becomes aware of a possible plagiarism, fraud or infringement we recommend contacting their Elsevier publishing contact who can then liaise with our in-house legal department. Note that certain open access user licenses may permit quite broad re-use (<https://www.elsevier.com/about/policies/open-access-licenses>) that might otherwise be counted as copyright infringement. For details about how to seek permission to use an article see our permission page (<https://www.elsevier.com/about/policies/copyright/permissions>).

Open access

How copyright works with open access licenses

For Elsevier proprietary journals the following steps apply:

- 1 Authors sign a publishing agreement where they will have copyright but grant broad

publishing and distribution rights to the publisher, including the right to publish the article on Elsevier's online platforms.

- 2 The author chooses an end user license (<https://www.elsevier.com/about/policies/open-access-licenses>) under which readers can use and share the article.
- 3 The publisher makes the article available online with the author's choice of end user license.

Quick definitions

Personal use

Authors can use their articles, in full or in part, for a wide range of scholarly, non-commercial purposes as outlined below:

- Use by an author in the author's classroom teaching (including distribution of copies, paper or electronic)
- Distribution of copies (including through e-mail) to known research colleagues for their personal use (but not for Commercial Use)
- Inclusion in a thesis or dissertation (provided that this is not to be published commercially)
- Use in a subsequent compilation of the author's works
- Extending the Article to book-length form
- Preparation of other derivative works (but not for Commercial Use)
- Otherwise using or re-using portions or excerpts in other works

These rights apply for all Elsevier authors who publish their article as either a subscription article or an open access article. In all cases we require that all Elsevier authors always include a full acknowledgement and, if appropriate, a link to the final published version hosted on Science Direct.

Commercial use

This is defined as the use or posting of articles:

- **For commercial gain without a formal agreement with the publisher.**
 - For example by associating advertising with the full-text of the article, by providing hosting

services to other repositories or to other organizations (including where an otherwise non-commercial site or repository provides a service to other organizations or agencies), or

charging fees for document delivery or access

- **To substitute for the services provided directly by the journal.**
 - For example article aggregation, systematic distribution of articles via e-mail lists or share buttons, posting, indexing, or linking for promotional/marketing activities, by commercial companies for use by customers and intended target audiences of such companies (e.g. pharmaceutical companies and healthcare professionals/physician-prescribers).

If you would like information on how to obtain permission for such uses click here (<https://www.elsevier.com/about/policies/copyright/permissions>) or if you would like to make commercial use of the article please visit the Permissions Support Center (<https://service.elsevier.com/app/contact/supporthub/permissions-helpdesk/>).

Internal institutional use

- Use by the author's institution for classroom teaching at the institution and for internal training purposes (including distribution of copies, paper or electronic, and use in coursepacks and courseware programs, but not in Massive Open Online Courses)
- Inclusion of the Article in applications for grant funding
- For authors employed by companies, the use by that company for internal training purposes

MDPI Open Access Information and Policy

All articles published by MDPI are made immediately available worldwide under an open access license. This means:

- everyone has free and unlimited access to the full-text of *all* articles published in MDPI journals;
- everyone is free to re-use the published material if proper accreditation/citation of the original publication is given;
- open access publication is supported by the authors' institutes or research funding agencies by payment of a comparatively low **Article Processing Charge (APC)** ([/about/apc](#)) for accepted articles.

Permissions

No special permission is required to reuse all or part of article published by MDPI, including figures and tables. For articles published under an open access Creative Common CC BY license, any part of the article may be reused without permission provided that the original article is clearly cited. Reuse of an article does not imply endorsement by the authors or MDPI.

External Open Access Resources

MDPI is a RoMEO **green publisher** (<http://www.sherpa.ac.uk/romeo/search.php?type=publisher&search=mdpi>) — RoMEO is a database of Publishers' copyright and self-archiving policies hosted by the **University of Nottingham** (<http://www.nottingham.ac.uk/>)

Those who are new to the concept of open access might find the following websites or 'Open Access 101' video informative:

Wikipedia article on 'Open Access' ([https://en.wikipedia.org/wiki/Open_access_\(publishing\)](https://en.wikipedia.org/wiki/Open_access_(publishing)))

Peter Suber's 'Open Access Overview' (<http://www.earlham.edu/~peters/fos/overview.htm>)

Information Platform Open Access [in **English** (<https://open-access.net/en/information-on-open-access>), in **German** (<https://open-access.net/informationen-zu-open-access>)]

SHERPA's 'Authors and Open Access' (<http://www.sherpa.ac.uk/guidance/authors.html>)

Meaning of Open Access

In accordance with major definitions of open access in scientific literature (namely the Budapest, Berlin, and Bethesda declarations), MDPI defines *open access* by the following conditions:

- peer-reviewed literature is freely available without subscription or price barriers,

Open Access Explained!

- literature is immediately released in open access format (no embargo period), and
- published material can be re-used without obtaining permission as long as a correct citation to the original publication is given.

<https://www.youtube.com/embed/L5rVH1KGBCY>

[\(/toggle_desktop_layout_cookie\)](#) 🔍 ☰

Until 2008, most articles published by MDPI contained the note: "© year by MDPI (<http://www.mdpi.org>).

Reproduction is permitted for noncommercial

purposes". During 2008, MDPI journals started to

publish articles under the **Creative Commons Attribution License (<https://creativecommons.org/licenses/by/4.0/>)** and are now using the latest version of the CC BY license, which grants authors the most extensive rights. All articles published by MDPI before and during 2008 should now be considered as having been released under the post-2008 Creative Commons Attribution License.

This means that all articles published in MDPI journals, including data, graphics, and supplements, can be linked from external sources, scanned by search engines, re-used by text mining applications or websites, blogs, *etc.* free of charge under the sole condition of proper accreditation of the source and original publisher. MDPI believes that open access publishing fosters the exchange of research results amongst scientists from different disciplines, thus facilitating interdisciplinary research. Open access publishing also provides access to research results to researchers worldwide, including those from developing countries, and to an interested general public. Although MDPI publishes all of its journals under the open access model, we believe that open access is an enriching part of the scholarly communication process that can and should co-exist with other forms of communication and publication, such as society-based publishing and conferencing activities.

Important Note: some articles (especially *Reviews*) may contain figures, tables or text taken from other publications, for which MDPI does not hold the copyright or the right to re-license the published material. Please note that you should inquire with the original copyright holder (usually the original publisher or authors), whether or not this material can be re-used.

Advantages of Open Access for Authors

The High Availability and Visibility of our open access articles is guaranteed through the free and unlimited accessibility of the publication over the Internet. Everyone can freely access and download the full text of all articles published with MDPI: readers of open access journals, *i.e.*, mostly other researchers, do not need to pay any subscription or pay-per-view charges to read articles published by MDPI. Open access publications are also more likely to be included in search engines and indexing databases.

The Higher Citation Impact of open access articles results from their high publicity and availability. Open

access publications are demonstrably more frequently cited [1,2].

Lower Publishing Costs: Open access publishers cover their costs for editorial handling and editing of a paper by charging authors' institutes or research funding agencies. The cost of handling and producing an article is covered through the one-time payment of an **article processing charge (APC) (/about/apc)** for each accepted article. The APCs of open access publishers are only a fraction of the average income per paper earned by traditional, subscription-based publishers. MDPI's **article processing charge (APC) (/about/apc)** is the same, irrespective of article length, because we wish to encourage publication of long papers with complete results and full experimental or computational details [3].

Faster Publication in MDPI's open access journals is achieved by online-only availability. Accepted articles are typically published online more rapidly in MDPI journals than those of traditional, subscription-based and printed journals are [4].

Links and Notes

1. Open access citation impact advantage: http://en.wikipedia.org/wiki/Open_access#Authors_and_researchers ([https://en.wikipedia.org/wiki/Open_access_\(publishing\)#Authors_and_researchers](https://en.wikipedia.org/wiki/Open_access_(publishing)#Authors_and_researchers)). For example, a standard research paper "Shutalev, A.D.; Kishko, E.A.; Sivova, N.V.; Kuznetsov, A.Y. *Molecules* **1998**, *3*, 100-106" has been cited 51 times, the highest number among all the papers published so far by the same author.
2. Lin, S.-K. *Editorial: Non-Open Access and Its Adverse Impact on Molecules*. *Molecules* **2007**, *12*, 1436-1437 (PDF format 16 K, HTML format).
3. Recently a research paper of 30 pages has been published: ***Molecules* 2008, 13(5), 1081-1110 (/1420-3049/13/5/1081)**.
4. Some well written papers have been peer reviewed and published in less than two weeks from manuscript submission, see e.g.: ***Molecules* 2006, 11(4), 212-218 (/1420-3049/11/4/212)**.
