**TPF 5(063)**  
**“Improving the Quality of  
Pavement Profile Measurement”  
Update**

**Pavement Evaluation 2014  
Blacksburg, VA**

# Overview TPF 5(063)

---

- “Improving the Quality of Pavement Profiler Measurement”
- FHWA is lead agency with 22 participating State Highway Agencies (SHA’s) includes:
  - FHWA Office of Technical Services / Resource Center
  - FHWA Long Term Pavement Performance (LTPP)
  - FHWA Federal Lands

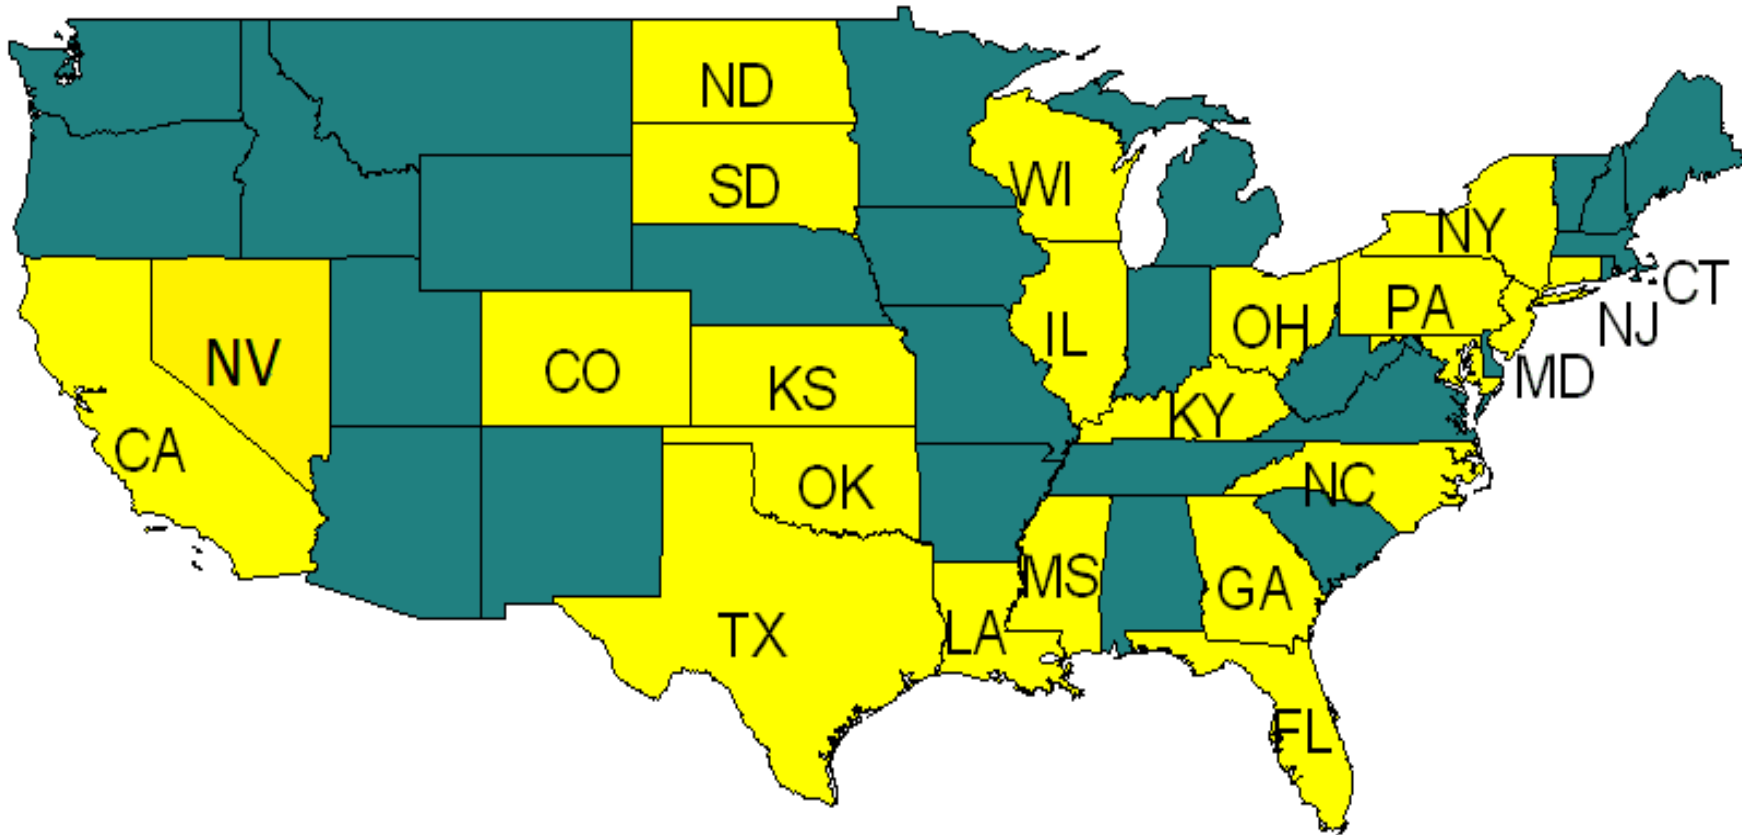

# Participating State Agencies (22)

---

- Ohio
- Louisiana
- Kentucky
- California
- Colorado
- Florida
- Georgia
- Kansas
- Mississippi
- New Jersey
- Nevada
- New York
- North Dakota
- South Dakota
- Illinois
- North Carolina
- Maryland
- Oklahoma
- Connecticut
- Texas
- Wisconsin
- Pennsylvania

# Participating State Agencies

---

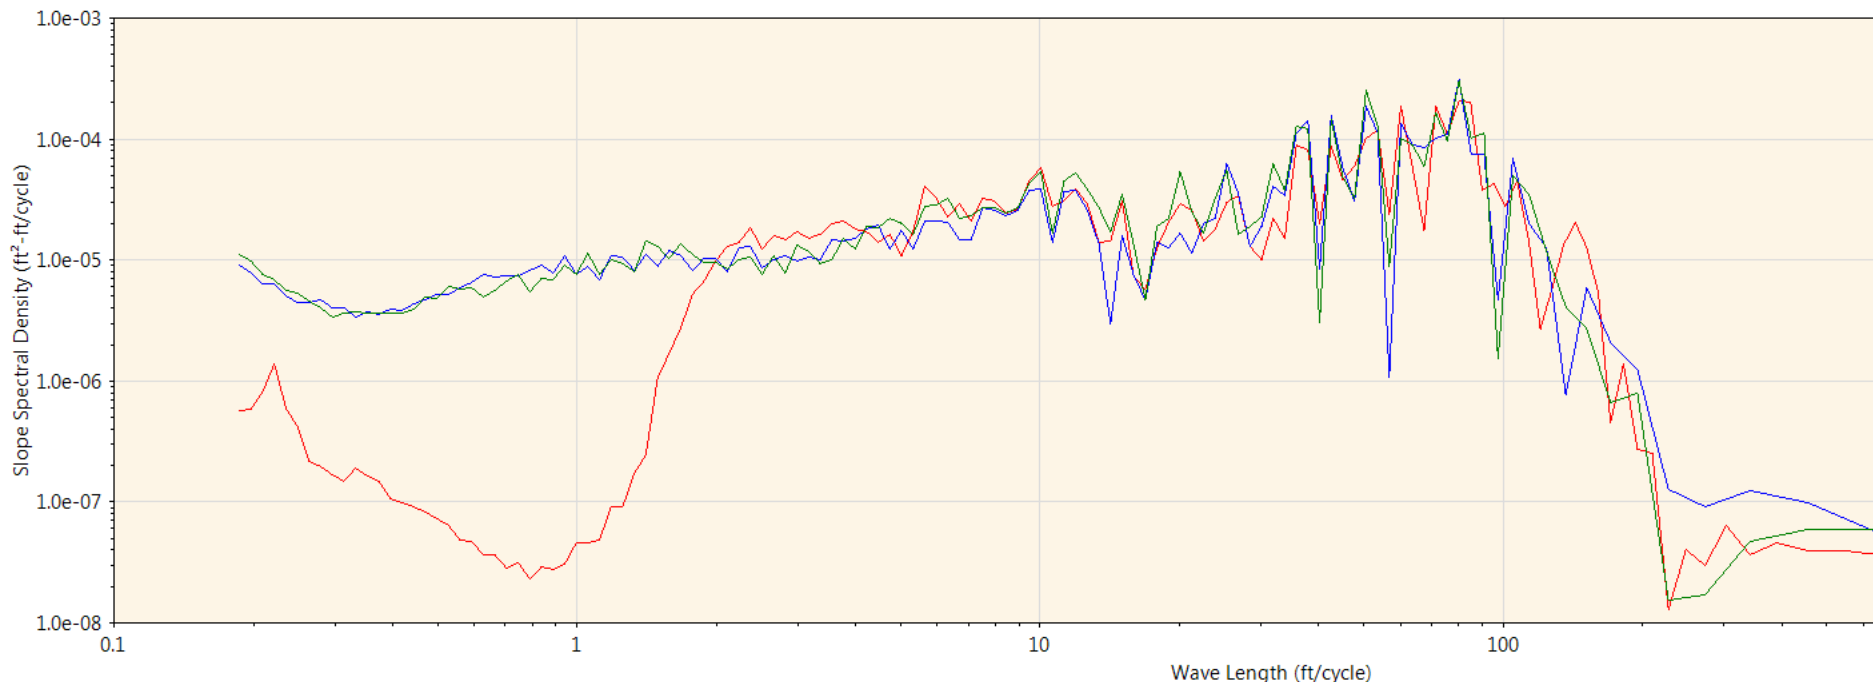

# Inertial Profilers Vary!!!

# Inertial Profilers vary - continued

- All three devices from same manufacturer and all three are supposed to be **not** using a low pass filter. Is there a low pass filter being applied to one of the devices???

Log Scale

# TPF 5(063) Priorities

---

1. Build Reference Profile Device
2. Critical Requirements
3. Bumpfinder Software
4. Certification/Validation Sites
5. Evaluating Upper Limits of Single Accelerometer
6. Emerging Technology that Enhances Profile Measurement

# Progress on TPF 5(063) Priorities

---

1. Build a Reference Profile Device (ongoing):  
Two parts –
  - i. Benchmark Testing – UMTRI
  - ii. Reference Devices – Last round of evaluations Oct. 2012
  - iii. Next round of evaluations: 2015
2. Critical Requirements (completed): UMTRI; final report on pooled fund study website – “Critical Profile Accuracy Requirements”

# TPF 5(063) Priorities - continued

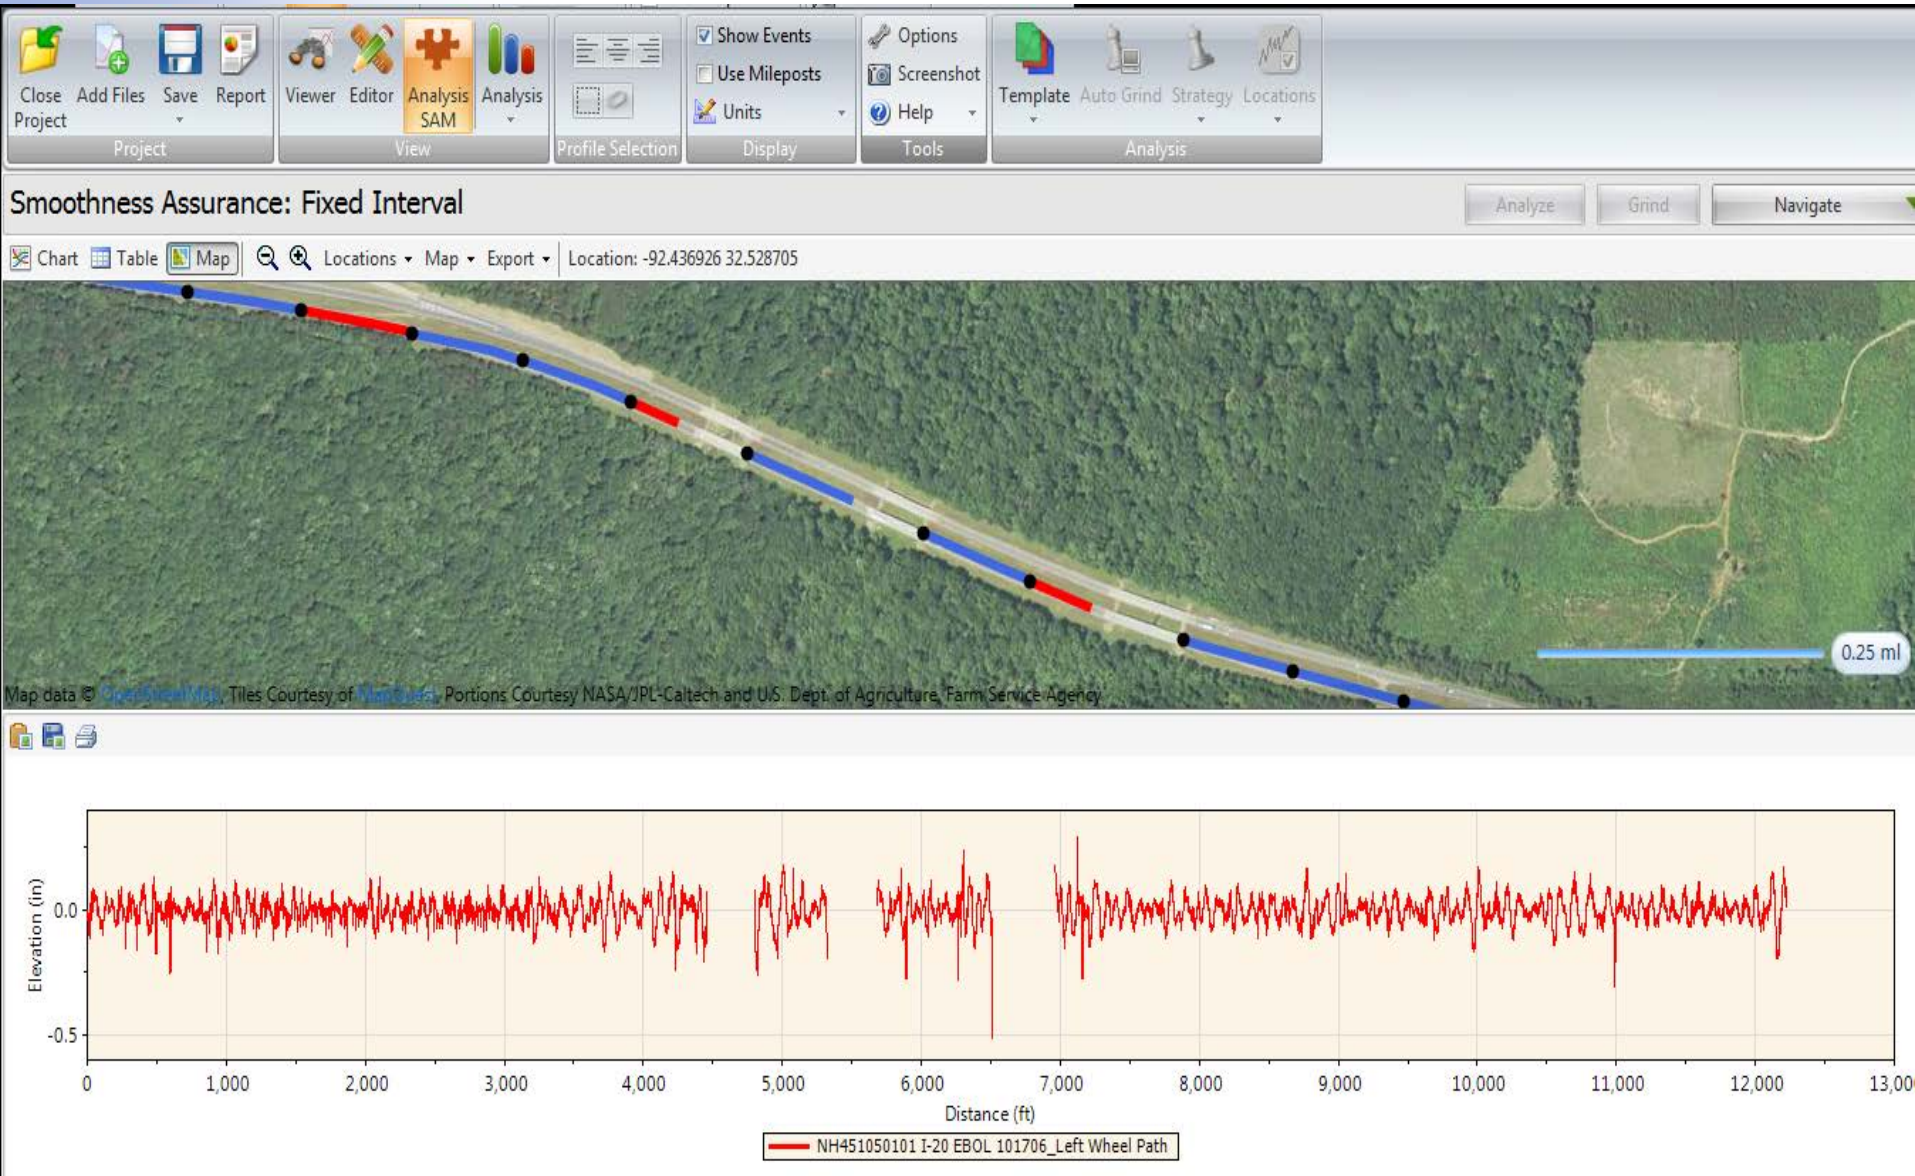

---

3. ProVAL Software: The Transtec Group, Inc. – [www.roadprofile.com](http://www.roadprofile.com)
  - ProVAL 3.3 released in December 2011
    - Includes Automated Faulting Module (AFM)
  - ProVAL 3.4 released Dec. 2012
  - ProVAL 3.5 released Sept. 2014
  - Multiple workshops – 10 annually
    - Scheduling completed for FY14

# ProVAL 3.4 software & workshops

# ProVAL Version 3.5 to include mapping

# Export files to Google Earth

The image shows a screenshot of the Google Earth desktop application. The main window displays a satellite view of a rural landscape with a path highlighted in blue and orange. The path starts at a yellow pushpin labeled "Start" on the left and ends at another yellow pushpin labeled "Stop" on the right. The path follows a road that curves through the landscape. The interface includes a toolbar at the top with various icons for navigation and editing, a "Sign in" button in the top right, and a vertical navigation pane on the right side with a compass, a hand icon, a person icon, and a zoom slider. At the bottom, there is a status bar with the text "© 2014 Google" and "Google earth". The system tray at the very bottom shows the Windows taskbar with icons for Internet Explorer, Firefox, and other applications, along with the system clock showing "10:34 AM 9/10/2014".

# TPF 5(063) Priorities continued

---

4. Certification/Validation Site
  - i. FHWA Study completed Sept. 2014 by SME, Inc. (Perera)
5. Evaluating Upper Limits of Single Accelerometer
  - i. Phase I: Starodub, Inc. – complete
  - ii. Phase II: Completed Dec. 2011
6. Emerging Technology that Enhances Profile Measurement
  - i. Urban IRI measurement - NCHRP
  - ii. Urban and low speed profile indices

# TPF 5(063) Priority Number 1

---

- Build a reference device
  - Need a Ground Truth – Built a Benchmark Cart (UMTRI)

# TPF 5(063) Priority Number 1

---

- First round of evaluations in 2009/2010.
- Second round in October 2012.
- Next round of evaluations in 2015.
  - Need Six Pavement Surfaces:
    - Transverse Tined Concrete
    - Conventionally Ground Concrete
    - Dense Graded Asphalt
    - Negative Texture i.e. Open Graded OR Porous Pavement
    - Coarse Chip Seal
    - Longitudinal Tined Concrete

# TPF 5(063) Priority Number 1

---

- Need Six Surfaces
  - Transverse Tined PCC

# TPF 5(063) Priority Number 1

---

- Need Six Surfaces
  - Dense Graded AC

# TPF 5(063) Priority Number 1

---

- Need Six Surfaces
  - Coarse Chip Seal (positive texture)

# TPF 5(063) Priority Number 1

---

- Need Six Surfaces
  - Conventional Grind on PCC

# TPF 5(063) Priority Number 1

---

- Need Six Surfaces
  - Negative Texture – Porous AC

# TPF 5(063) Priority Number 1

---

- Need Six Surfaces (2009/10)
  - Longitudinal Tined PCC - Wisconsin

# TPF 5(063) Priority Number 1

---

- Need Six Surfaces - 2012
  - Longitudinal Tined PCC now at MnROAD

# TPF 5(063) Priority Number 1

---

- Build a reference device – VERY CLOSE
  - Next round of evaluations – 2015

# TPF 5(063) Priority Six

---

- Current studies underway:
  - Federal Lands is lead agency:
    - **“Improving the Quality of Pavement Profile Measurement in Urban and Low-Speed Settings**
      - \$350K effort with University of Michigan Transportation Research Institute (UMTRI)
      - Completion Date September 30, 2015
      - Includes field evaluations of potential measurement equipment
- NCHRP 10-93 – similar topic: see Dr. Amir Hanna

# TPF 5(063) Priority Six cont.

---

- Current FHWA task order just initiated:  
Conduct inertial profiler “Type Test”
  - A type test is used in industry (government) to conduct an independent evaluation of components and equipment being supplied by manufacturers and/or technology integrators.

# TPF 5(063) Priority Six cont.

---

- “Type Test” Objective:
  - To provide an unbiased report of the equipment and it is essential that both manufacturers and owner/agencies can rely on the test reports from a fully independent testing operation.
  - Details to follow shortly – most likely conducted fall 2015.

---

# FHWA Toolkit - Smoothness

# Smoothness

---

- ProVAL software ([www.roadprofile.com](http://www.roadprofile.com))
- ASTM E2560-07: Standard Specification for Data Format for Pavement Profile
- NHI 131100 “Pavement Smoothness”
- Task Order contractor to assist with the implementation of AASHTO ride standards
- AASHTO Ride Quality Standards
  - M328 Equipment Specification
  - R54 Accepting Ride Quality using an inertial profiler
  - R56 Certification of Inertial Profilers
  - R57 Operation of Inertial Profilers
