

ACKNOWLEDGMENTS

I would like to thank Dr. R. Sivanandan for his guidance, patience, encouragement and belief in me through out this research effort. I thoroughly enjoyed working with him and learned a great deal from him. I would also like to express my sincere gratitude to Mr. Eugene D. Arnold, Jr., of VTRC for his support and valuable input throughout this research. I would also like to extend my thanks to Dr. Antonio A. Trani, for his support and for serving on my thesis committee. The author also appreciates the input from Mr. Nelson Newton and Mr. Herman Hollins of VDOT's Transportation Planning Division. Mr. John Hawley, the Town Engineer of Pulaski and Ms. Keary Vass of Pulaski town office deserve a special mention here for assisting in data collection.

I would like to thank my friends Vivek and Rajeev for their constant encouragement and support, during my thesis work. Vivek not only helped me in getting admission at Virginia Tech while I was in India, but also helped me after I came to Blacksburg.

The Center for Transportation Research has a special place in my heart. I found it to be an ideal place to work. I would like to thank everyone involved at the Center. I feel that everybody at the Center has contributed towards this research effort and in completion of my thesis.

I would like to thank my grand parents (H. L. Nanda and Kailash Nanda; S. R. Dhawan and Kaushalya Dhawan), parents (Raj & Shashi), sisters (Rakhi and Deepali), my uncles and aunts and my cousins, for all their good wishes and support throughout. I would also like to thank all my friends in India for their support as well.
