

APPENDIX 2 – BEER DISTRIBUTION GAME EXPERIMENTAL DATA

Appendix 2 contains the data from the Beer Distribution Game experiment. For each trial there are several documents first there is the experimental data for the full 40 weeks of play (Pages 265 – 454)

1. RME GRG Nonlinear – the model and results of the GRG NON Linear Solver for the Retail Position for the full 40 weeks of play.
2. WME GRG Nonlinear – the model and results of the GRG NON Linear Solver for the Wholesaler Position for the full 40 weeks of play.
3. DME GRG Nonlinear – the model and results of the GRG NON Linear Solver for the Distributor Position for the full 40 weeks of play
4. FME GRG Nonlinear – the model and results of the GRG NON Linear Solver for the Factory Position for the full 40 weeks of play
5. Model Charts comparing the model simulated inventory to the actual inventory for each position.
6. Order Charts comparing the model simulated orders with the actual orders for each position.
7. Model Worksheet for the trial.
8. The Model Raw Data from the game play.

This is followed by data for the first 20 weeks of play (Pages: 455 – 644)

1. RME GRG Nonlinear – the model and results of the GRG NON Linear Solver for the Retail Position for the first 20 weeks of play.
2. WME GRG Nonlinear – the model and results of the GRG NON Linear Solver for the Wholesaler Position for the first 20 weeks of play.
3. DME GRG Nonlinear – the model and results of the GRG NON Linear Solver for the Distributor Position for the first 20 weeks of play
4. FME GRG Nonlinear – the model and results of the GRG NON Linear Solver for the Factory Position for the first 20 weeks of play

5. Model Charts comparing the model simulated inventory to the actual inventory for each position.
6. Order Charts comparing the model simulated orders with the actual orders for each position.
7. Model Worksheet for the trial.
8. The Model Raw Data from the game play.

This is followed by data for the second 20 weeks of play (Pages 645 – 834).

1. RME GRG Nonlinear – the model and results of the GRG NON Linear Solver for the Retail Position for the second 20 weeks of play.
2. WME GRG Nonlinear – the model and results of the GRG NON Linear Solver for the Wholesaler Position for the second 20 weeks of play.
3. DME GRG Nonlinear – the model and results of the GRG NON Linear Solver for the Distributor Position for the second 20 weeks of play
4. FME GRG Nonlinear – the model and results of the GRG NON Linear Solver for the Factory Position for the second 20 weeks of play
5. Model Charts comparing the model simulated inventory to the actual inventory for each position.
6. Order Charts comparing the model simulated orders with the actual orders for each position.
7. Model Worksheet for the trial.
8. The Model Raw Data from the game play.
