Dissertation/Thesis

ASM authorizes an advanced degree candidate to republish the requested material in his/her doctoral thesis or dissertation. If your thesis, or dissertation, is to be published commercially, then you must reapply for permission.

Attribution and Permission Statement

The author(s) retains copyright under this license. Others may copy, distribute, adapt, reorganize, and build upon the published work, as long as credit to the author and original article is given, and the new work, which includes the previously published content, is licensed under identical terms.

ASM considers "credit" to mean that the full citation to the original publication and permission notice in connection with any reproduction of the licensed material is included in the new work. i.e. Authors, Journal name, year, volume, page numbers, original image and/or table number (where applicable) DOI and reproduced/amended with permission from American Society for Microbiology under a Creative Commons Attribution license. An example of the citation format can be seen on the first page of the article PDF [e.g., Stabler RA, Negus D, Pain A, Taylor PW. 2013. Draft genome sequences of *Pseudomonas fluorescens* BS2 and *Pusillimonas noertemannii* BS8, soil bacteria that cooperate to degrade the poly-gamma-D-glutamic acid anthrax capsule. *Genome Announc.* 1(1):e00057-12. doi:10.1128/genomeA.00057-12.

Title: Aerosolization of Two Strains (Ice+ and Ice-) of Pseudomonas syringae in a Collison Nebulizer at Different Temperatures

Author: Renée B. Pietsch, Ray F. David, Linsey C. Marr, et al

Publication: Aerosol Science & Technology

Publisher: Taylor & Francis

Date: Mar 4, 2015

Copyright © 2015 Taylor & Francis
