

## List of Figures

Figure 2.1	Adaptive Filtering Problem .....	9
Figure 2.2	Estimates Produced by NLMS for Various Values of $\bar{\mu}$ .....	10
Figure 2.3	Successive Estimates Produced by NLMS .....	11
Figure 2.4	Scatter Plot of Input Vector Corresponding to a Low-Pass Signal .....	12
Figure 2.5	Locus of Weight Estimates Generated by NLMS and NLMS-OCF(1) .....	18
Figure 2.6	Results from NLMS, NLMS-OCF(1), and NLMS-OCF(2) .....	20
Figure 3.1	Dependence of the Convergence Rate Factor on $M$ .....	31
Figure 3.2	Learning Curves of APA for White Input Using $\bar{\mu} = 1.0$ .....	34
Figure 3.3	Learning Curves of APA for Reasonably Colored Input Using $\bar{\mu} = 1.0$ .....	35
Figure 3.4	Learning Curves of APA for Highly Colored Input Using $\bar{\mu} = 1.0$ .....	35
Figure 3.5	Learning Curves of APA for Reasonably Colored Input Using $\bar{\mu} = 0.1$ .....	36
Figure 3.6	Learning Curves of APA for Highly Colored Input Using $\bar{\mu} = 0.01$ .....	37
Figure 3.7	Simulated Learning Curves of APA for Highly Colored Input – Various $M$ .....	38
Figure 3.8	Simulated Learning Curves of APA for White Input – Various $M$ .....	39
Figure 3.9	Simulated Learning Curves of APA Misadjustment/Convergence Rate Tradeoff .	40
Figure 3.10	Dependence of Misadjustment on Step Size .....	41
Figure 4.1	Mean-Squared-Error for Different Step Sizes .....	50
Figure 4.2	Lag Error for Different Step Sizes with Input Matching Assumptions .....	53
Figure 4.3	Lag Error for Different Step Sizes with Input Not Matching Assumptions .....	54
Figure 4.4	Lag Error for Different Number of OCFs with Short Delay .....	55
Figure 4.5	Lag Error for Different Number of OCFs with Long Delay .....	55
Figure 4.6	Lag Error for Different Delays .....	56
Figure 4.7	NLMS Lag Error for Different Step Sizes .....	57
Figure 5.1	Set of Input Vectors Used for Adaptation .....	58
Figure 5.2	Lattice Equivalent of Fast Orthogonalization .....	64
Figure 5.3	Dependence of Convergence Rate on $D$ (Input: AR(1), Pole at 0.97, $\bar{\mu} = 1.0$ ) .....	65
Figure 5.4	Dependence of Convergence Rate on $D$ (Input: AR(1), Pole at 0.97, $\bar{\mu} = 0.5$ ) .....	65
Figure 5.5	Dependence of Convergence Rate on $D$ (Input: AR(1), Pole at 0.97, $\bar{\mu} = 0.01$ ) ...	66
Figure 5.6	Dependence of Convergence Rate on $D$ (Input: AR(1), Pole at 0.3, $\bar{\mu} = 1.0$ ) .....	66
Figure 5.7	Dependence of Convergence Rate on $D$ (Input: AR(1), Pole at 0.3, $\bar{\mu} = 0.5$ ) .....	67
Figure 5.8	Dependence of Convergence Rate on $D$ (Input: AR(1), Pole at 0.3, $\bar{\mu} = 0.01$ ) .....	67
Figure 6.1	Learning Curves for White Input .....	77

Figure 6.2	Learning Curves for AR Input .....	77
Figure 6.3	Learning Curves for Highly Colored MA Input .....	78
Figure 6.4	Learning Curves for Reasonably Colored MA Input .....	78
Figure 7.1	Stereophonic Echo Canceler Configuration .....	81
Figure 7.2	Channel Impulse Responses Used for Simulation .....	85
Figure 7.3	Test Speech Signal .....	85
Figure 7.4	Learning Curves of NLMS-OCF Corresponding to Speech Input .....	87
Figure 7.5	Misalignment of Echo Canceler Coefficients Corresponding to Speech Input .....	88
Figure 7.6	Misalignment of Echo Canceler with Step Changes in Cross-Correlation .....	89
Figure 7.7	Learning Curves of Echo Canceler with Step Changes in Cross-Correlation .....	90
Figure 7.8	Misalignment Characteristics Corresponding to Different Noise Levels .....	92
Figure 7.9	Misalignment Characteristic Corresponding to Recorded Stereo Signal .....	92
Figure 7.10	Learning Curves of APA and NLMS-OCF .....	93
Figure 9.1	State-Space Adaptive Filter .....	105
Figure 9.2	Gradient Computing Filter .....	106
Figure 9.3	Learning Curve of the Proposed Algorithm (Noise-Free Data).....	107
Figure 9.4	True and Estimated Magnitude Responses.....	108
Figure 9.5	Learning Curve of the Proposed Algorithm (Noisy Data).....	108
Figure 10.1	Equation-Error-Based Identifier Used for Adaptive Filtering .....	112
Figure 10.2	True and Estimated Pole-Zero Locations .....	119
Figure 10.3	True and Estimated Magnitude Response .....	120
Figure 10.4	True and Estimated Value of $a_0$ .....	120
