

Acknowledgements

I would like to thank my family for instilling in me a sense of achievement and patience and hard work. I am forever thankful and indebted for their support moral and otherwise.

I am deeply appreciative to my advisor Dr. Devenport for his guidance and utmost care he has provided me. It would have been impossible to finish my thesis if it was not for his diligent guidance and patience. I would like to aspire to the profound persistent dedication and passion he brings to his field in which I hold in awe.

I would like to thank Chittiappa Muthanna, Yu Wang for their assistance and valuable suggestions during data acquisition process. I would like to thank AOE lab technicians Bruce Stanger, Kent Morris, and Greg Bandy for their help in making the ring model and installation. I would also like to thank fellow AOE graduate students at the annex for their moral support. Last but not least, I would like to thank Dr. Antoni Jakubowski for his curtesy in offering his office throughout my thesis completion.

I would like to thank the Office of Naval Research for their financial support through grant number ONR AASERT award N00014-96-1-0970 under the supervision of Dr. L. Patrick Purtell.
