

ACKNOWLEDGEMENTS

I would like to thank Dr. Thomas Cousins for his guidance and support throughout my graduate experience at Virginia Tech and for serving as chairman of my research committee. I appreciate the professional and personal relationship that we developed. I thank Dr. Thomas Murray for serving on my research committee and for his continually effort to make me a better engineer. It would be virtually impossible to place a value on what he has taught me over the last year and a half. I would like to thank Dr. Richard Barker for serving on my research committee and for stimulating my interest in bridge engineering. I owe the majority of the credit for my success at Virginia Tech to these three generous and experienced men.

I would also like to thank my mother, Vickie Prince, and my father, William S. Prince, Jr. for their unheralded efforts in molded me into the person I am today. Finally, I would like to thank my girlfriend, Karen Lee. Karen, I appreciate you standing by me through thick and through thin. Mod, Dad, and Karen, I love you.
