

ACKNOWLEDGEMENTS

I would like to thank Waste Management Inc., especially Mr.Gary Hater for providing me an opportunity to work on this project apart from extending funding. It's my pleasure to express my thanks to the committee members, thanks to Dr.John Novak , Dr.Douglas Goldsmith and Dr.Clifford Randall for being supportive and considerate all through my research.

I think with the effort of Ms.Julie Petruska and Ms.Jody Smiley completion of all the experimental work has been fun and a success. I would specially thank Dr.John Novak for providing guidance in academics, research and personal issues which I have come across in the graduate life.

I would like to thank my parents for being brave in a situation like April 16th incident, I would like to thank the entire Virginia Tech community for offering the support to cope up with the mishap.

Lastly, I would like to thank all my seniors, lab mates and friends who have been critical and instrumental in getting the work done in a smooth manner.
