

Computational Thinking

CS 2984

August 19 - September 25
Newman Library 2nd floor commons
Opening Reception Wednesday, August 26, at 4 p.m.
Dennis Kafura, professor, Computer Science
kafura@vt.edu

Designed to introduce any student to computational thinking and fulfill the Area 5 requirement of the Curriculum for Liberal Education, this course presents the ideas and methodology central to computing. The course is open to all students and provides basic skills in programming through active group learning and individual big data projects.

Explore demonstrations of computational thinking in this exhibit as well as projects based on students' personal interests.
