

**Host-Guest Systems Based on Crown Ether, Cryptand, and  
Pseudocryptand Hosts with Paraquat, Diquat, Secondary Ammonium,  
and Monopyridinium Salt Guests**

*Feihe Huang*

Dissertation submitted to the Faculty of the Virginia Polytechnic Institute and State  
University in partial fulfillment of the requirements for the degree of

Doctor of Philosophy  
in  
Chemistry

Approved:

---

Dr. Harry W. Gibson, Chair

---

Dr. Richey M. Davis

---

Dr. Harry C. Dorn

---

Dr. Richard D. Gandour

---

Dr. James M. Tanko

*On March 16, 2005  
Blacksburg, VA*

Keywords: Pseudorotaxane, Supramolecular Polymer, Crown Ether, Cryptand,  
Pseudocryptand, Paraquat, Ammonium, Pyridinium, Diquat, Association Constant,  
Self-Assembly, X-ray Crystallography
