

List of Figures

Fig. 1.1	Aft Pressure Bulkhead on a Large Transport Airplane	1
Fig. 1.2	Mathematical Idealization of a Dome	4
Fig. 2.1	Surface in 3-Dimensional Space	13
Fig. 2.2	Additional Geometry of the Surface.....	13
Fig. 2.3	Derivatives of the Normal Vector	15
Fig. 2.4	Tangent and Normal Vectors of a Gaussian Coordinate Curve	17
Fig. 2.5	Geometry of a Surface of Revolution.....	20
Fig. 2.6	Parallel Surface Position Vector.....	21
Fig. 2.7	Deformed Basis Vectors.....	23
Fig. 2.8	Middle Surface Displacements and Rotations.....	25
Fig. 2.9	Shell Strains and Rotations.....	27
Fig. 2.10	Laminate Nomenclature	40
Fig. 3.1	Shell Stress Resultants and Stress Couples	44
Fig. 3.2	Reference Surface Displacements and Rotations	45
Fig. 4.1	Spline Coordinates.....	72
Fig. 5.1	Verification Case I: Spherical Dome Capping a Right Circular Cylinder, with Cover Plate	78
Fig. 5.2	Scaled Meridional Displacement, Case I.....	79
Fig. 5.3	Scaled Normal Displacement, Case I.....	80
Fig. 5.4	Rotation About Circumferential Axis, Case I	80
Fig. 5.5	Meridional Stress Resultant, Case I.....	81
Fig. 5.6	Circumferential Stress Resultant, Case I.....	81
Fig. 5.7	In-plane Shear Stress Resultant, Case I.....	82
Fig. 5.8	Meridional Stress Couple, Case I	82
Fig. 5.9	Circumferential Stress Couple, Case I.....	83
Fig. 5.10	In-plane Stress Couple, Case I.....	83
Fig. 5.11	Transverse Shear Stress Resultant on Meridional Face, Case I	84
Fig. 5.12	Transverse Shear Stress Resultant on Circumferential Face, Case I.....	84

Fig. 5.13	In-plane Shear Stress Resultant for Isotropic, Spherical Dome with Clamped Ends..	86
Fig. 5.14	Scaled Meridional Displacement, Case II (Quasi-isotropic).....	87
Fig. 5.15	Scaled Normal Displacement, Case II (Quasi-isotropic).....	88
Fig. 5.16	Rotation About the Circumferential Axis, Case II (Quasi-isotropic).....	88
Fig. 5.17	Scaled Meridional Displacement, Case II (Meridionally Stiff).....	89
Fig. 5.18	Scaled Normal Displacement, Case II (Meridionally Stiff)	90
Fig. 5.19	Rotation About the Circumferential Axis, Case II (Meridionally Stiff)	90
Fig. 5.20	Meridional Stress Resultant, Case II (Meridionally Stiff).....	91
Fig. 5.21	In-plane Shear Stress Resultant, Case II (Meridionally Stiff).....	91
Fig. 5.22	Transverse Shear Stress Resultant, Case II (Meridionally Stiff).....	92
Fig. 5.23	Meridional Stress Couple, Case II (Meridionally Stiff)	92
Fig. 5.24	In-plane Shear Stress Couple, Case II (Meridionally Stiff)	93
Fig. 5.25	Elliptical Meridian.....	94
Fig. 5.26	Scaled Meridional Displacement, Case IIIa	95
Fig. 5.27	Scaled Normal Displacement, Case IIIa.....	95
Fig. 5.28	Rotation About Circumferential Axis, Case IIIa.....	96
Fig. 5.29	Meridional Stress Resultant, Case IIIa	96
Fig. 5.30	In-plane Shear Stress Resultant, Case IIIa	97
Fig. 5.31	Transverse Shear Stress Resultant on Meridional Face, Case IIIa.....	97
Fig. 5.32	Meridional Stress Couple, Case IIIa.....	98
Fig. 5.33	In-plane Shear Stress Couple, Case IIIa	98
Fig. 5.34	Some Representative Results for Case IIIb	100
Fig. 5.35	Transverse Shear Stress Resultant, Case IV	101
Fig. 5.36	Gradient of the Transverse Shear Stress Resultant, Case IV.....	102
Fig. 6.1	Assumed Geometry of Test Specimens.....	104
Fig. 6.2	Circumferential Stress Resultant for Various Ellipticities, Quasi-isotropic Dome	108
Fig. 6.3	Meridional Stress Resultant for Various Ellipticities, Quasi-isotropic Dome	109
Fig. 6.4	Meridional Displacement, Quasi-isotropic Dome	110
Fig. 6.5	Circumferential Displacement, Quasi-isotropic Dome	110

Fig. 6.6	Normal Displacement, Quasi-isotropic Dome	111
Fig. 6.7	Rotation about the Circumferential Axis, Quasi-isotropic Dome	111
Fig. 6.8	Rotation about the Meridional Axis, Quasi-isotropic Dome	112
Fig. 6.9	In-plane Shear Stress Resultant, Quasi-isotropic Dome.....	112
Fig. 6.10	Transverse Shear Stress Resultant on Meridional Face, Quasi-isotropic Dome	113
Fig. 6.11	Transverse Shear Stress Resultant on Circumferential Face, Quasi-isotropic Dome	113
Fig. 6.12	Meridional Stress Couple, Quasi-isotropic Dome	114
Fig. 6.13	Circumferential Stress Couple, Quasi-isotropic Dome	114
Fig. 6.14	In-plane Shear Stress Couple, Quasi-isotropic Dome	115
Fig. 6.15	Circumferential Stress Resultant, $[\pm 45, 0_2]_s$ and $[\pm 45, 90_2]_s$ laminates.....	118
Fig. 6.16	Minimum Ellipticity vs. Orientation Angle, $[\pm \alpha]_{2s}$ laminates	118
Fig. 6.17	Circumferential Stress Resultant, $[\pm \alpha]_{2s}$ Laminates	119
Fig. 6.18	Meridional Displacement, $[\pm \alpha]_{2s}$ Laminates	119
Fig. 6.19	Normal Displacement, $[\pm \alpha]_{2s}$ Laminates	120
Fig. 6.20	Undeformed and Deformed Meridians, Ellipticity $e = 0.74$	122
Fig. 6.21	Meridional Displacement, Quasi-isotropic vs. Angle-ply Laminates	122
Fig. 6.22	Circumferential Displacement, Quasi-isotropic vs. Angle-ply Laminates.....	123
Fig. 6.23	Normal Displacement, Quasi-isotropic vs. Angle-ply Laminates.....	123
Fig. 6.24	Rotation about the Circumferential Axis, Quasi-isotropic vs. Angle-ply Laminates	124
Fig. 6.25	Rotation about the Meridional Axis, Quasi-isotropic vs. Angle-ply Laminates	124
Fig. 6.26	Meridional Stress Resultant, Quasi-isotropic vs. Angle-ply Laminates.....	125
Fig. 6.27	Circumferential Stress Resultant, Quasi-isotropic vs. Angle-ply Laminates	125
Fig. 6.28	In-plane Shear Stress Resultant, Quasi-isotropic vs. Angle-ply Laminates	126
Fig. 6.29	Transverse Shear Stress Resultant Q_1 , Quasi-isotropic vs. Angle-ply Laminates	126
Fig. 6.30	Transverse Shear Stress Resultant Q_2 , Quasi-isotropic vs. Angle-ply Laminates	127
Fig. 6.31	Meridional Stress Couple, Quasi-isotropic vs. Angle-ply Laminates	127
Fig. 6.32	Circumferential Stress Couple, Quasi-isotropic vs. Angle-ply Laminates.....	128
Fig. 6.33	In-plane Shear Stress Couple, Quasi-isotropic vs. Angle-ply Laminates	128
