

ACKNOWLEDGEMENTS

I would like to express my deep appreciation to Drs. Scott Hagood, Kriton Hatzios, David Orcutt, David Parrish and Henry Wilson for all of their insight and guidance throughout the progression of my studies and the preparation of my dissertation. Without their infinite knowledge, this dissertation would not have been possible. I would especially like to thank my major advisor, Dr. Henry Wilson for his financial and moral support throughout my Ph. D studies. I can only hope that I have lived up to his expectations and lived by the rule to “never embarrass your major professor.” I would also like to thank Syngenta Crop Protection, Inc., for providing us with the necessary material for our studies and Dr. Garry Schnappinger for his advice and hospitality as only Garry can provide. I feel extremely blessed to have had the friendship and support of many people throughout my graduate studies. A special thank you needs to be given to Dr. Jay Stipes and Ms. Jean Ratliff for their encouragement, friendship, and support. Thanks to Dr. Dan Poston for all of the weed science lessons and for introducing me to Dr. Wilson. It has been a great pleasure to know and work with Mr. Tommy Hines, captain of the world renowned spray tractor. I would also like to thank numerous individuals who were fellow graduate students, including but not limited to: Dr. Kevin Bradley, Prof. Art Graves, Andy Bailey, Brian Johnson, Steve King, Ivan Morozov, Brian Trader, and Corey Whaley. Also, I would like to thank Ms. Sue Meredith for her help in the laboratory, Mr. Jim Maitland for the cotton advice, and the Eastern Shore AREC staff for all of their help.

Last, but certainly not least, I would like to thank those who have put up with me away from work. I thank long-time friend and roommate Greg Armel for friendship through the years. I would also like to thank Mom, Dad, John, and the Beckerinks for their love and support. I definitely could not finish this without thanking my wonderful wife Bethany for her love, support, and friendship.
