

# Acknowledgments

First of all, all thanks are due to Allah. May His peace and blessings be upon all his prophets for granting me the chance and the ability to successfully complete this study, *Alhamdulillah*.

During the years I was working on this thesis I have been helped and influenced by many people, and it is a pleasure to use the opportunity here to express my gratitude to them.

I wish to express my sincere gratitude to my advisor, Professor Slimane Adjerid, for sharing his knowledge of numerical analysis and scientific computing, for his invaluable guidance throughout this work, for treating me like his son, and for everything he has done for me. He has always encouraged and supported me in the most positive of ways. I am very grateful to him for his deep commitment to teaching and learning. He has taught me many things, and this work would not have been possible without his patience and encouragement. I appreciate him greatly and I am blessed and honored to be his student.

I would also like to thank Professor Tao Lin, Professor Traian Iliescu, and Professor Shu-Ming Sun for agreeing to serve on my thesis committee, for their support and efforts in reviewing my work and dissertation. It is an honor to have worked and learned from them. Special thanks go to Professor Tao Lin for organizing weekly seminars where I learned many numerical methods.

I would like to thank all of the faculty, staff, students and friends I have met at Virginia Tech. I also thank everybody who provided references and otherwise helped me in my job search. Special thanks go to Hannah Swiger and Nicole Sutphin for everything they have done for me. Special thanks also go to my friend Amara Loulizi, Saher Lahwar, Helmi Temimi and Amine Chigani who have believed in me and encouraged me during my first two years in Blacksburg, I love you all.

Most importantly, I would like to thank my family without whose support and patience I would have never reached this point: my father, Mr. Ahmed Baccouch, and my mother, Mrs. Rebah Jetlaoui. I am forever grateful for their love, kindness, sensibility, and devotion. Without your love and support I would not have accomplished this work.

Special thanks are due to my future wife for her extreme patience. She has been and continues to be a constant source of inspiration, motivation, and strength. It was because of

her that I had the courage to pursue this project. We are ready to start our wonderful new life together. Thank you for all that you do and all that you are.

Finally, my work in this research area has been carried out at Virginia Tech; the home of the Hokies, to which I address my sincere acknowledgements and gratitude.

Once again, thanks to All Mighty God for giving me the ability, mindset, and perseverance to be where I am now.
