

Table Of Contents

CHAPTER 1 . INTRODUCTION.....	1
1.1 PLANE WAKES.....	3
<i>1.1.1 Self-preservation of Plane wakes</i>	3
<i>1.1.2 Turbulence Structure in the Far Plane wake</i>	8
<i>1.1.3 Small Scale Turbulence in the far wake</i>	11
<i>1.1.4 Higher Order Turbulent statistics</i>	12
1.2 AXISYMMETRIC WAKES	13
<i>1.2.1 Curved Wakes</i>	13
1.3 CONTEXT OF THE PRESENT STUDY	15
CHAPTER 2 APPARATUS AND INSTRUMENTATION.....	16
2.1 WIND TUNNEL.....	16
2.2 PRESSURE GRADIENT MEASUREMENT	17
2.3 WAKE GENERATOR MODELS	18
<i>2.3.1 Circular Cylinder Model</i>	18
<i>2.3.2 Ring Model</i>	18
2.4 PITOT-STATIC TUBE	18
2.5 HOT-WIRE ANEMOMETRY	19
2.6 TRAVERSE SYSTEM.....	20
2.7 MEASUREMENT LOCATIONS.....	21
CHAPTER 3 RESULTS AND DISCUSSION	22
3.1 TWO DIMENSIONALITY AND AXISYMMETRY OF THE FLOWS	23
3.2 EFFECT OF WIRE INTERFERENCE ON THE RING WAKE	23
3.3 SELF-PRESERVATION IN THE MEAN FLOW	24
3.4 SELF-PRESERVATION IN THE TURBULENT FLOW.....	26
<i>3.4.1 Reynolds Stresses</i>	26
<i>3.4.2 Third Order Turbulent Products</i>	30
3.5 TURBULENT KINETIC ENERGY	32
<i>3.5.1 Turbulent kinetic energy balance</i>	33

3.6 SPECTRA RESULTS	34
3.7 TWO-POINT TURBULENCE MEASUREMENTS	36
3.7.1 Measurement and data reduction	36
3.8 TWO-POINT RESULTS AND DISCUSSION	37
3.8.1 Form of correlation tensor	38
3.8.2 Linear Stochastic estimation	39
3.9 UNCERTAINTY ANALYSIS	40
CHAPTER 4 CONCLUSIONS	41
4.1 SINGLE POINT CONCLUSIONS.....	41
4.2 TWO-POINT MEASUREMENT CONCLUSION	43
REFERENCES	44
TABLES	48
FIGURES	49
