ANNUAL NARRATIVE REPORT
of
ROANOKE COUNTY
Mary Keenan
Home Demonstration Agent

4-H Clubs

For the year 1925¹ had in the county four 4-H clubs with a total membership of 56. These meetings were held monthly at the schools or in the woods, (picnics). Programs were rendered by appointed committees and consisted of club songs, yells, readings, talks, papers and demonstrations on the projects of the club. Especial emphasis was given the way to preside over a club and to the study of the parliamentary law. Three of the 4-H clubs raised the money to send representatives to the county and State short courses. A prize of \$5.00 was offered, to be used as a scholarship to the State short course next summer, to the club that made the best record, meeting the requirements given on the Secretary's minute book. This has caused much interest and competition between clubs. The winning club also gets the county banner.

Clothing

In 1925 there were 8 clothing clubs, carrying an enrollment of 79 members, 45 of these girls completed their years work and exhibited at the county fair. Demonstrations were given in plain sewing (hand and machine), cutting and fitting, mending and darning, some fancy stitches such as outline and chain stitch. Instructions and demonstrations were given by agent and club leaders in the selection of materials suitable for girls undergarments and in removing stains. The club girls themselves gave these demonstrations. The clothing demonstration team from Roanoke County won the clothing championship at the State short course and went to Camp Vail.

Bread

Twenty-three girls enrolled in bread work, 17 completed their year's work making baking powder and soda biscuit and corn muffins each 15 times, and writing a story and sending in weekly reports. These girls gave demonstrations at club meetings in biscuit making, testing ovens, testing 8 kinds of baking powder and biscuit judging.

A bread judging team of 3 girls representing three different clubs won the first honor in the district bread judging contest. There were eight counties competing in this contest. These girls were given a trip to Richmond and judged in the State Contest.

Canning

Nine girls enrolled in the canning club work with 4 completing the work. These girls were given demonstrations in canning fruits and vegetables and in jelly and preserves making. To awaken interest in canning I gave demonstrations to my bread club girls and offered prizes at the fair. These girls canned fruit and vegetables, had made preserves and jelly. There were 84 quarts of jelly, 72 quarts of preserves, 66 quarts of pickle, 221 quarts of canned fruit, 347 quarts of vegetables preserved by the club girls in the county this summer.

Poultry

Thirty-six girls and boys enrolled in the poultry club work this year. Twenty-three completed their work, and eleven communities were reached. Interest in poultry has grown and those who completed the year's work have been a real demonstration in their community. Exhibits were made at the Roanoke Poultry Show and the Roanoke Fair and \$130. won in prizes. Club members have had demonstrations in poultry calling, judging, feeding baby chicks, setting the hen, and canning; and in turn the boys and girls have given a number of demonstrations. One fourth year club boy is a member of the State farm flock egg laying contest. He is the only club member who entered this contest and has won second highest place in the contest.

Short Course

The county short course was given at Hollins College. There were 34 girls in attendance. There was a three day course and work was given in clothing, canning, bread making, table service, basket making, and bead making. One day was Visitors Day, and the girls entertained with a typical 4-H meeting. This meeting really showed the adults present what club work is and what is being done in club and project work in the county.

Home Demonstration Club Work

Work among the women in the county is scattered. The year was started with two home demonstration clubs, but one is now disorganized because of the loss of their leader. The other has 18 members, and hold monthly meetings. At each meeting there is a demonstration given either by the agent or a club member. Demonstrations have been given in various salads, cocoa making, yeast bread, the packing of the school lunch, renovation of garments, and the making of dress forms. This club has made for others 5 dress forms and has helped establish a hot lunch in the school in their community, buying the necessary equipment. Bread demonstrations have been given to the women in two communities. Hot lunches have been established in three schools reaching at least 500 children, giving more milk in the diet, better and more nourishing food, and lessening the mother's burden at home. Twelve calling demonstrations in poultry were given by the agent with 42 reports of flocks called sent in. Five are members of the State egg laying contest. These flocks have been real demonstrations in their communities, influencing others to improve their flock.

Anti-rat campaign

The anti-rat campaign extended over the county with 15,000 people cooperating. Fifty dollars was spent on poison, and \$140. given in prizes. There was the cooperation of the board of supervisors who appropriated \$100. for campaign and the school teachers who sent in a report of the actual number of rats killed. By actual county 4,855 rats were killed with an estimate of 20,000.

Poultry Housing and Feeding Campaign

Forty-two people took active part; 52 homes were reached; 200 people reached; 9 new houses in 7 different communities built. Twenty-two people are feeding balanced rations to flocks in 10 communities; twelve remodeled houses. I would consider 25 of these taking part a worth while demonstration in their respective neighborhoods.

SUGGESTIONS RELATIVE TO THE PREPARATION OF THE COUNTY EXTENSION AGENT'S ANNUAL REPORT.

The annual report should be a review, analysis, interpretation, and presentation to the people of the county, the State, and the Nation of the sum total of the extension activities in each county for the year and the results secured (including assistance rendered by subject-matter specialists). The making of such a report is of great value to the county extension agent and the county people in showing the progress made during the year as a basis for future plans. It is of vital concern also to the State and Nation as a measure of rural progress and a basis for intelligent legislation and financial support. This blank form covers simply the statistical phases of the report, and should be supplemented by a full report in narrative form.

NARRATIVE SUMMARY.

The narrative report should be a statement in orderly fashion and arranged under appropriate subheadings, of the work done, methods used, and results secured under each project, as well as of the general work accomplished. Every statement should be clear-cut, concise, forceful, and, where possible, reinforced with ample data from the statistical summary. In the preparation of the part of the report relative to each project, the results reported in the statistical summary for the project should be analyzed, conclusions drawn, and recommendations made. The report may well be illustrated with photographs, maps, diagrams, blue prints, or copies of charts and other forms used in demonstration work. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs, and reasonably good margins left. The pages should be numbered in consecutive order.

The following outline is suggestive of how the narrative report may be clearly and systematically presented:

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT.

- I. Cover and title page.
- II. Table of contents.
- III. Status of county extension organization.
 - (1) Form of organization—distinctive features.
 - (2) Function of local people, committee, or project leaders in developing the program of work.
 - (3) General policies, including relationships to other organizations.
- IV. Program of work, goals established, methods employed and results achieved.
 - (1) Factors considered and methods used in determining program of work.
 - (2) Project activities and results.
 - (a) Soils.
 - (b) Farm crops
 - (c) Horticulture (including diseases and insects).
 - (d) Forestry
 - (e) Animal husbandry
 - (f) Dairy husbandry (including diseases and pests).
 - (g) Poultry husbandry
 - (h) Rural engineering.
 - (i) Rodents, predatory animals, and birds.
 - (j) Agricultural economics—including farm management marketing, etc.
 - (k) Foods and nutrition.
 - (l) Clothing and millinery.
 - (m) Home health and sanitation.
 - (n) Household management and home furnishings.
 - (o) Community activities—other than those included under subject-matter headings.
 - (p) Miscellaneous.
- V. Outlook and recommendations, including suggestive program of work for next year.
- VI. Summary of activities and accomplishments in paragraph form, preferably of one or two typewritten pages only, placed at the beginning or end of the narrative report.

3

STATISTICAL SUMMARY.

To supplement the narrative part of the report, and in order that comparable State and National summaries may be made, it is necessary to include a statistical summary of the work in each county. The following form has been prepared to insure uniformity of reporting. In addition to the questions asked under each subdivision of the report, space is provided to add further data if it is desired. The statistical summary will grow naturally out of the field and office records.

DEFINITIONS OF TERMS USED IN THIS REPORT.

1. A PROGRAM OF WORK is a definitely outlined plan for extension work.
2. A PROJECT is a definite, systematic, organized plan for carrying out some phase of the extension program of work, providing for what is to be done, how much, when, where, and by whom.
3. MISCELLANEOUS WORK includes work which has not yet become a regular part of the program of work—work other than project work.
4. A DEMONSTRATION is an example designed to show the practical application of an established fact. Demonstrations may be of methods or of results.
Under method demonstrations include lecture demonstrations, practicums, etc., such as demonstrations of canning methods, home-mixing fertilizers, poultry culling, drum-form making, and the like, all involving short periods of time.
Under result demonstrations include demonstrations in which a substantial period of time is involved, records of results kept, and comparisons made, as in a child-feeding demonstration, corn-culture demonstration, pasture-improvement demonstration, and the like.
5. A DEMONSTRATOR is an adult or junior who, under the direction of the extension service, undertakes to show in his community by example the practical application of an established fact, and who keeps records and reports on the same.
6. A COMMUNITY, for the purposes of this report, may be any one of the several units into which the county is divided for purposes of conducting organized extension work.
7. A PROJECT LEADER OR LOCAL LEADER is a person, selected because of his or her special interest and fitness, who functions in advancing some phase of the local program of extension work.
8. A COMMUNITY CLUB is an organization of men, women, boys, and girls to further community interests and to promote community recreation.
9. AN OFFICE CALL is a visit or a telephone call by a farmer, or other person, seeking agricultural or home economics information, as a result of which some definite assistance or information is given.
10. A DEMONSTRATION MEETING is a meeting held to give, inspect, or further a demonstration.
11. A TRAINING MEETING is a meeting at which project leaders or local leaders are trained to carry on extension activities in their respective communities.
12. A FARM VISIT is a call at a farm by the agent at which some definite information is given or concrete plan of work outlined, or some valuable information obtained from the farmer regarding his work, or the better practice prevailing in his neighborhood.
13. A HOME VISIT is a call at a home by the agent at which some definite information is given or concrete plan of work outlined, or some valuable information obtained from the farm woman regarding her work, or the better practice prevailing in her neighborhood.
14. DAYS IN OFFICE should include time spent by the extension agent in office in connection with extension work.
15. DAYS IN FIELD should include all days spent on official duty other than those spent in office.
16. LETTERS WRITTEN should include all single letters on official business.
17. A FARMERS' INSTITUTE is one of a series of meetings of one to two days' duration, arranged by a central State farmers' institute agency, at which agricultural and home economics problems are discussed, usually by outside speakers employed for the purpose.
18. AN EXTENSION OR MOVABLE SCHOOL is an itinerant school usually of two to six days' duration where practical but systematic instruction is given to persons not resident at the college. A snow course differs from an extension school in that it is held at the college or other educational institution and usually for a longer period of time.
19. RECORDS consist of definite information filed in the county office that will enable the agent to verify the data on extension work included in this report.

GENERAL ACTIVITIES.

Report only results of extension activities that are supported by records.

1. List below the names, titles, and periods of service of all county extension agents whose work is included in this report. 1

Mary Thompson Co. Home Dem. Agt 1923-1924

199. Number of such demonstrations completed or carried through the year				199
200. Number of acres in those completed demonstrations				200
201. Total saving or profit on demonstrations resulting from better practices	\$30,000			201
202. Total number of farms adopting control measures				202
203. Number of acres involved				203
204. Number of pounds of poison bait used	1,000			204
[Use space below to include other important data relating to rodents and miscellaneous insect and animal pests.]				
Number of people taking part 2,000 People reached - 015,000 Actual count of rats killed 4,855 estimate 20,000.				

AGRICULTURAL ECONOMICS.

Report only results of extension activities that are supported by records.

FARM MANAGEMENT.

205. Number of farm account books distributed				205
206. Number of farmers keeping records in such account books throughout the year				206
207. Number of farmers assisted in summarizing and interpreting their accounts				207 ✓
208. Number of farmers making changes in their business as result of keeping accounts				208
209. Number of other farmers adopting cropping, live-stock, or complete farming systems according to recommendations				209
210. Number of boys' and girls' farm account clubs				210
211. Number of members enrolled	(a) Boys	(b) Girls		211
212. Number of members completing	(a) Boys	(b) Girls		212
213. Number of farmers advised relative to losses				213
214. Number of farm management and farm account schools held				214
215. Number of farmers assisted in keeping cost of production records				215
LABOR.				
216. Number of farmers making better use of labor				216
217. Number of farmers securing tractors, sprayers, milking machines, or other machinery to economize labor				217

* Do not include work reported under "Crop" and "Live Stock" headings.

† Indicate by name.

2-4000

HOME DEMONSTRATION WORK. FOODS AND NUTRITION.

Report only results of extension activities that are supported by records.

230.1. Number of members enrolled in food and nutrition work 230.1

	(a) Women 7		(b) Girls 29	
--	---	--	--	--

FOOD SELECTION.

Item.	Women.	Girls.	
230. Number of result demonstrations started or under way.			230
231. Number of such demonstrations completed or carried through the year.			231
231.1. Number of method demonstrations.			231.1
232. Total* number of homes influenced by extension service to serve better selected food (include demonstrators).	100		232 ✓
233. Number of homes using more fruits in the diet.			233
234. Number of homes using more green vegetables in the diet.	7		234
235. Number of homes using more milk and other dairy products in the diet.	100		235
237. Number of homes using more poultry products in the diet.			237
238. Number of homes using more unrefined cereal products in the diet.			238

[Use space below to include other important data relating to food selection.]

FOOD PREPARATION.

Item.	(a) Breadmaking.		(b) Meat preparation.		(c) School lunches.		(d) Other.
