Narrative Report

~~District~~ County

Negro Home Dem.

Virginia

I. Enrollment & Membership.

During the past year our membership and enrollment has increased from 42 to 83 organized members in Girls Club work and nineteen women.

The girls have responded more readily than the women, but whereas the girls clubs are formed, women show much interest, and I find it easier to reach them through the girls. In one community I organized a girls club. At the Second meeting two women came to the meeting to see what we were doing. One of the women had two girls in the club, and she invited the agent to her home to hold meetings. Our first canning Demo in that community was conducted in this home. Several other women in this community have done the same thing. Club meetings have been held in every

home in this community but one. We always find things neat and clean and sometimes even the out houses have been recently cleaned.

II

Garden Orchards and Groves

Nearly every home maker has a garden. In some sections where it is convenient to villages and towns the women do a great deal of marketing. Other sections more vegetables are conserved to be used when fresh vegetables are not available. One girl planted the seeds sent us by Mrs. Davis, our State Agent, and others planted the slips. They got lovely results. Ten women and five girls have gardens under the Agents directions.

III. Veg. and Fruit Canning.

The past year has been a very successful one to the vegetable and fruit growers of the county and the women and girls have certainly taken advantage of this by drying, canning, preserving and storing all that they possibly could. They have shown much interest in adopting new methods and exchanging ideas.

IV. Poultry

Twelve girls have enrolled in Poultry Club. Not any of them have all pure bred chicks so far. One put up one fire doz eggs in water glass. Three women have pure bred flocks. One of these already has a model poultry house. The other is to follow soon.

VI.

Meat Work

The average family raised from one to three hogs per family. and it is not often that I visit a home where I'm not asked to see the hogs. The best portion of the meat and lard is used in the home Usually the woman care for the hogs and are very proud of their jobs. Each woman trying to raise the finest hogs. Much time is spent weighing hogs and measuring lard, for comparison, when the hogs are killed.

VII.

Milk and Milk Products.

There are forty three women who keep cows for family use. We were fortunate to have Mr. N.P. Jackson of Hampton Inst. to talk to the women at our conference on "The Family Cow". After the meeting Mr. Jackson was taken to a home where a cow was off feed after

calving. He examined the cow and advised the owner what to do and the result was the cow resumed her normal appetite. The people are increasing the use of milk in the homes and two children have learned to drink milk who had always refused it. Now that they know the value of milk they are glad to drink it.

VIII Cereal Products

We have one bread club with an enrollment of five. These girls are doing nice work. At one meeting our District Agent was present and one of the girls brought hot rolls for exhibit. Four of these girls exhibited bread at the Co fair and three at the State fair. One girl was leaving for school two days before the fair. She baked her bread and left it to be sent because she wanted our District Agent to know she had sent it.

XI Textile Materials

This being an unusually hard year all of the girls did not have money to buy material for sewing. In order to save the feelings of those girls and to keep them in the club work. We decided to hold apron socials. Take the money buy necessary goods and divide it among the girls.
This proved a success as we were able to select creditable material. The result was more and better work was accomplished and nine girls won prizes on sewing at the State Fair.

X. Home and Lawns.

The people are improving their property in every community. Sixteen homes have been remodeled and repaired: Three lawns sown, ten homes screened and three unsightly buildings removed. Other homes have been whitewashed, fences repaired and other improvements made.

XI Conduct of Work.

There are thirty eight communities in the County. Nineteen have been visited by the agent 93 homes fifteen churches and fifteen schools. Fifteen other meetings, such as; school closings, Associations, Children's days and rallies. One County picnic held, one county fair and two club picnics.

Due January 1 192_

ANNUAL REPORT OF HOME DEMONSTRATION AGENT.

of

Amherst
County.

Rachel R. Carter
County Home Demonstration Agent.

Oct. 31
Date.

Amherst Virginia
Post Office State

Approved:

_____
Date.

_____
State Home Demonstration Agent.

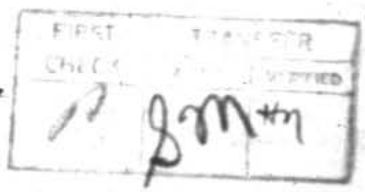
Approved and forwarded:

_____
Date.

_____
Director.

Form No. 753.

38-SRS.



To the County Home Demonstration Agents:

It is very important to send in accurate and complete Annual Reports. The future success and support of the Home Demonstration Work depends upon your activities now. It will aid the cooperating authorities greatly to have adequate records of what has been done. The law requires such reports and the lawmakers are greatly interested in the development of all of the extension work.

The statistical part of the Home Demonstration Work has been simplified and condensed. It is hoped that it will be easier for you to make a full and graphic showing of the achievements of your women and girls. Of course it is not expected that every agent will be conducting demonstrations upon every phase of work every year. Do not hesitate, therefore, to have spaces blank where you have no work being done. On the other hand, it will be unjust to your demonstrators and club members to fail to report all of their real results.

Please note that all reports are to be in the offices of the State agents by January 1 of each year. This enables them to prepare their reports promptly and forward copies to the Washington office in the new year. It makes it possible to prepare reports in the United States Department of Agriculture in time for them to do the most possible good.

Do not wait until January 1 to send in your report if it is ready before that time, It should contain data to December 1. It is impossible to fully show the actual development in statistics. It is therefore suggested that you write a narrative report on separate sheets and attach same to this blank.

Send with the report a map of your county showing the number of demonstrators and cooperative agencies. It is suggested that on this map the data for girls' work be recorded in red ink, for women's work in black ink.

Write numbers of girl demonstrators in red and of women demonstrators in black, and if the demonstrators are in organized clubs enclose the figures in a circle of the corresponding color. For example: Demonstrators not in clubs, 1; demonstrators in organized clubs, (3). If both women and girls have organized clubs in one community have two circles with figures enclosed, one in black, one in red ink.

Indicate "community clubs" with a square in black ink, with membership numbers inside, as [30].

Indicate headquarters of county councils and other supporting organizations with stars, showing membership; e. g.

These are minimum suggestions for the map. Other details may well be reported in this graphic form, but it is expected that every agent will send at least a simple map showing the fundamental and essential data indicated.
