Gail McMillan

Director, Digital Research and Scholarship Services

Anne Lawrence

DRSS Online Editor

University Libraries, Virginia Tech

Journal Publishing at VT since 1989

1. ALAN Review
2. Electronic Antiquity
3. International Colloquium on Communication
4. Journal of Career and Technical Education
5. *Journal of Research in Music Performance*
6. Journal of Technology Education
7. Journal of Technology Studies
8. Reports from the National Surface
Transportation Safety Center for Excellence
9. Virginia Libraries
10. WILLA: Women in Literacy and Life Assembly

Publishing Services

- Journals and Conference Proceedings
 - OJS: open journals systems
 - OCS: open conference systems
 - Editorial workflow
 - Solicitation, submission, peer review, editing, access
 - Long-term preservation and access
 - VTechWorks
 - Distributed digital preservation network strategy

Open Access

- Immediately or delayed
 - You decide.
- Benefits of OA
 - Increased citations (reputation)
 - Research widely available increases rate of progress in academic fields
 - Fulfilling the mission of our land grant university

Additional Publishing Services

- Persistent identifiers
 - Handles
 - DOIs
- Listing in Directory of Open Access Journals
- Indexing by Google and Google Scholar

This Memorandum of Understanding expresses the interest of the [journal] and Virginia Tech's University Libraries to ensure long-term public access to the journal. At the request of the [journal], the Digital Research and Scholarship Services (DRSS) agrees to host the [journal] and to provide online public access to its past, current, and future issues under the following terms:

1. The editors of [journal] agree to have their journal on the library's web domain.
2. DRSS agrees to maintain online public access to the [journal] on the library web domain at a stable web address (URL) and to preserve the JRMP for the indefinite future.
3. DRSS will provide the editors with the stable URL so that they may make use of the links and identifiers for citations and other purposes.
4. Once available on the library domain, [journal] transfers responsibility for the journal's files to the University Libraries to preserve and provide online public access to the journal.
5. It is understood that this joint effort is to ensure that the [journal] is available for public access as long as is practicable. Either party may terminate the agreement after giving one year's notice to the other party, though it is assumed that such action would only be taken after mutual consultation in order to avoid any possible inconvenience to the other organization.
6. The agreement shall become effective on the day representatives of both organizations affix their signatures and is subject to revision or modification by mutual agreement.

PKP is a multi-university initiative developing (free) open source software and conducting research to improve the quality and reach of scholarly publishing.

Public Knowledge Project > Open Journal Systems

Open Journal Systems

“Scholars need the means to launch a new generation of journals committed to open access, and to help existing journals that elect to make the transition to open access...”
Budapest Open Access Initiative, 2002

Open Journal Systems (OJS) is a journal management and publishing system that has been developed by the Public Knowledge Project through its federally funded efforts to expand and improve access to research.

OJS Features

1. OJS is installed locally and locally controlled.
2. Editors configure requirements, sections, review process, etc.
3. Online submission and management of all content.
4. Subscription module with delayed open access options.
5. Comprehensive indexing of content part of global system.
6. Reading Tools for content, based on field and editors' choice.
7. Email notification and commenting ability for readers.
8. Complete context-sensitive online Help support.

OJS assists with every stage of the refereed publishing process, from submissions through to online publication and indexing. Through its management systems, its finely grained indexing of research, and the context it provides for research, OJS seeks to improve both the scholarly and public quality of refereed research.

OJS is open source software made freely available to journals worldwide for the purpose of making open access publishing a viable option for more journals, as open access can increase a journal's readership as well as its contribution to the public good on a global scale (see [PKP Publications](#)).

OJS Download

Do you want to install Open Journal Systems on your server? Installing this program will allow you to host journals for you and your colleagues.

OJS Documentation

These documents have been prepared by the PKP team and are generally updated for every major OJS release.

OJS Demonstration

If you want to see the inner workings of OJS, you can also take OJS out for a test drive on our server.

OJS Languages

OJS is a multilingual system, allowing journals to publish in a variety of languages.

PKP is a multi-university initiative developing (free) open source software and conducting research to improve the quality and reach of scholarly publishing.

Public Knowledge Project > Development Partners

Development Partners

The Public Knowledge Project depends upon strong ties and support from others committed to alternative models of scholarly publishing. The following institutions have committed to serve as PKP Development Partners in order to ensure that we can continue to develop and improve our open source software and enhance the quality and research of scholarly publishing.

HELP SUPPORT PKP

Your donations fund continued Research and Software development!

[Donate](#)

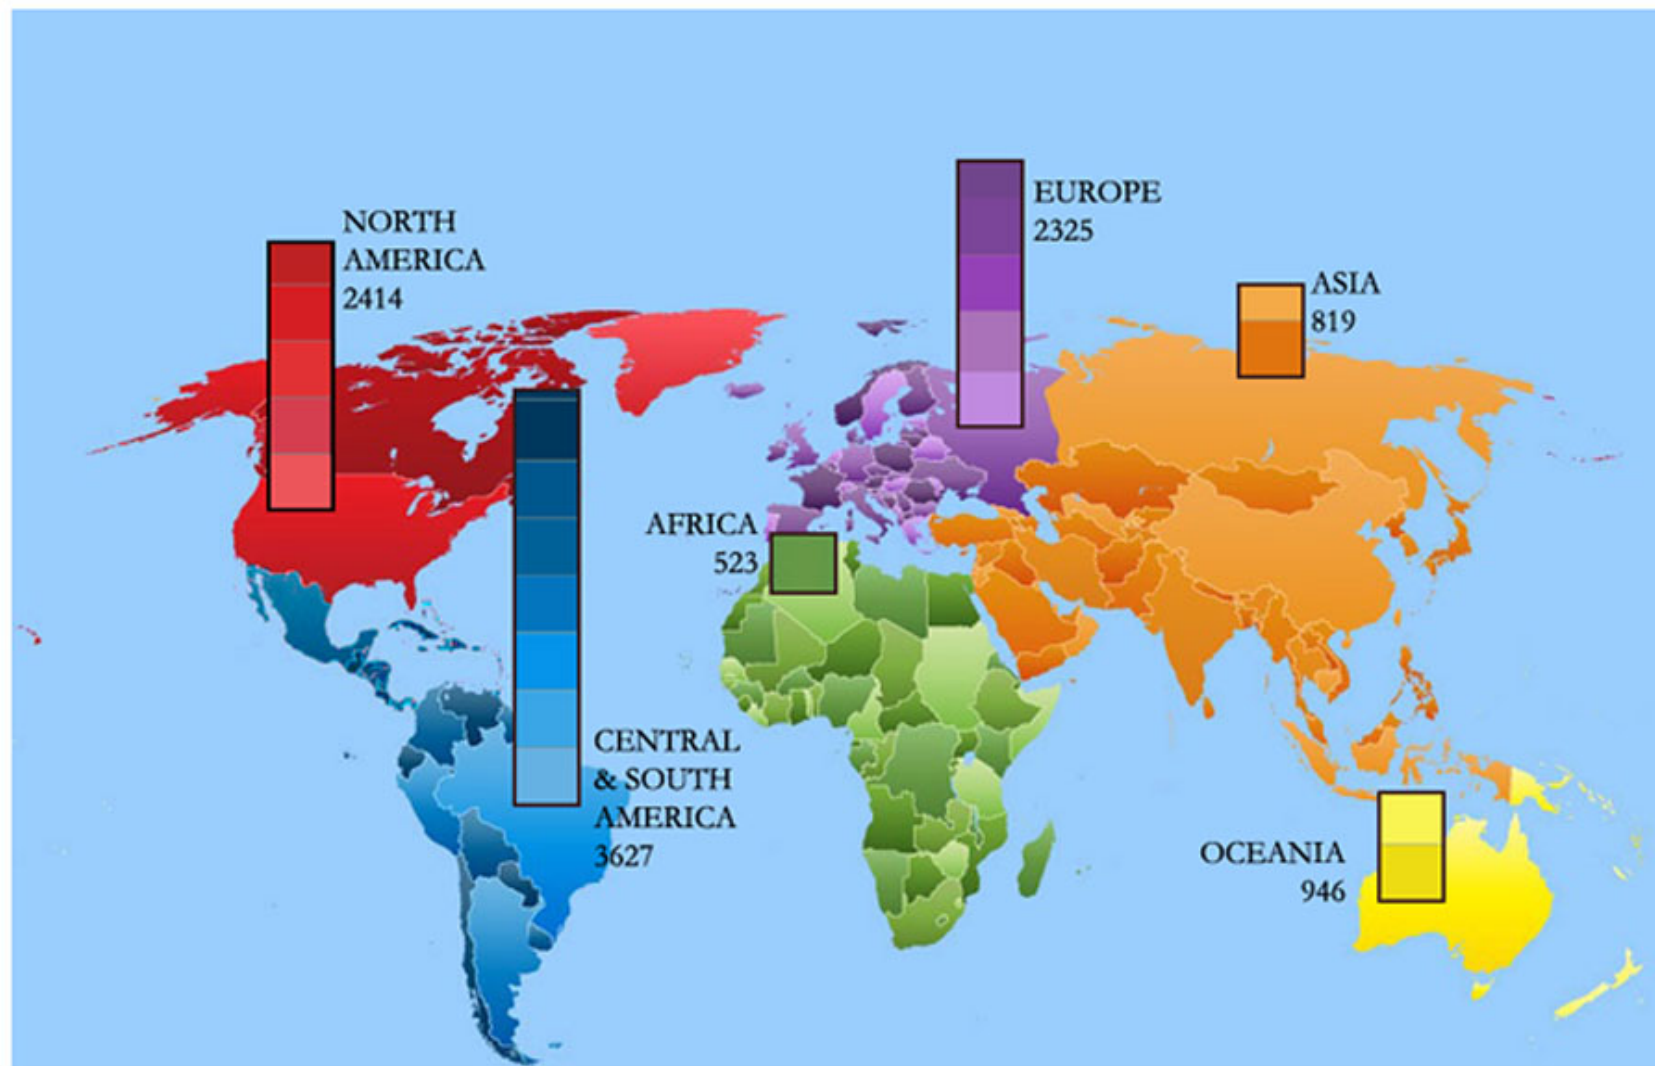

OJS User Numbers

As of October 2012, we have discovered over 14,700 OJS titles from around the world:

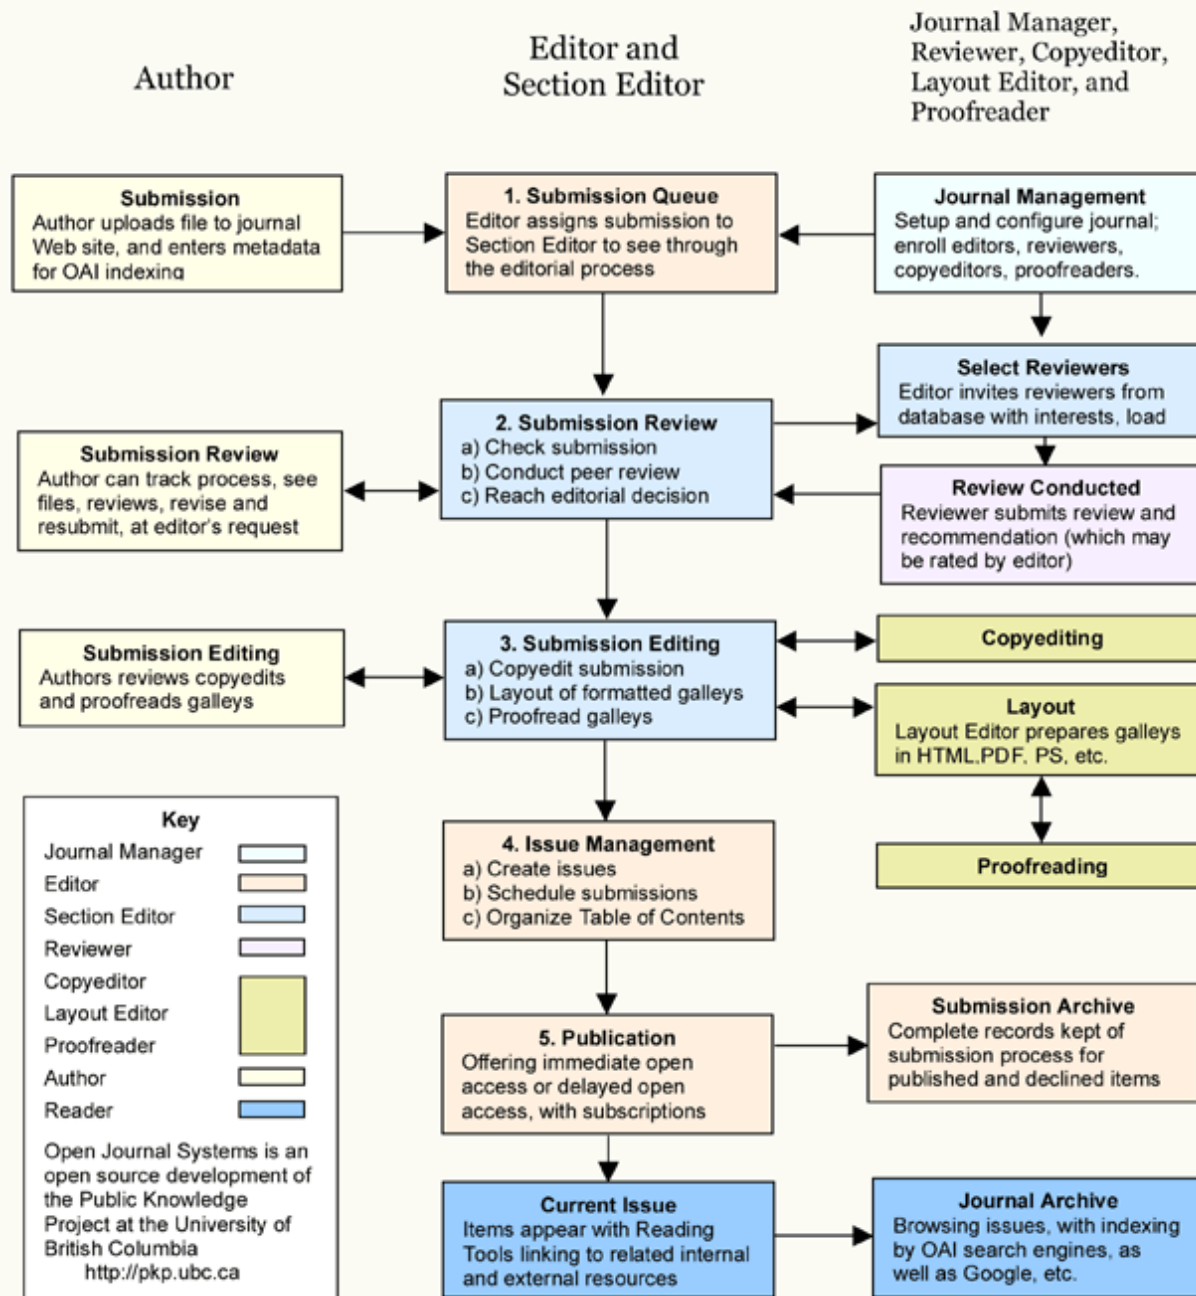

Technical Note: The data used in this table is automatically harvested from OJS installations around the world. The harvesting process does not capture all installations, while any duplicates or obvious test and demonstration installations are removed from this record. Although the vast majority of installations represent traditional peer-reviewed journals (see [Edgar & Willinsky, 2010](#)), OJS is also used, on occasion, for reports, monographs, learning management systems, graduate and undergraduate student journals, and a variety of other experiments and innovations in online publishing and knowledge sharing.

Journals Using Open Journal Systems by Continent

This map provides the international distribution of journals known to be using Open Journal Systems to manage and/or publish their contents as of January 2012. Journals using OJS are invited to [register with the PKP site](#) to help update these figures.

OJS Editorial and Publishing Process

PKP School is an online, open, self-paced collection of courses designed to help improve the quality of scholarly publishing around the world.

eJournal Publishing Services

New - eJournal Publishing Services Offered by the University Libraries

December 7, 2012 - The Digital Library and Archives now supports the full range of journal publishing services, from article submissions and peer review, to archiving and access.

The first journal to use the Libraries' new service is [Journal of Research in Music Performance](#), edited by Kelly Parkes, Associate Professor of Music Education at Virginia Tech.

DLA is now hosting the open source publishing platform, OJS: [Open Journal Systems](#). For more information contact: Gail McMillan, gailmac@vt.edu.

We continue to host many other post-peer review, open access journals.

[Complete List of DLA Ejournals](#)

Journal of Research in Music Performance

The Journal of Research in Music Performance is a peer-reviewed journal designed to provide presentation of a broad range of research that represents the breadth of an emerging field of study.

Blake/An Illustrated Quarterly is a peer-reviewed scholarly journal devoted to William Blake (1757-1827), the British poet, artist, and engraver, and his circle. We publish articles, notes, and book reviews, as well as two annual features: a review of sales of original works by Blake and his followers, and a checklist of publications on Blake.

Essential Concepts of Engineering Design Curriculum in Secondary Technology Education

Robert Wicklein, Phillip Cameron Smith, Jr., Soo Jung Kim

Abstract

Technology education is a field of study that seeks to promote technological literacy for all students. According to a recent study, in the United States, technology education is part of the state framework for 38 states, there are approximately 35,909 middle or high school technology teachers, and technology education is most frequently an elective course (Meade & Dugger, 2004). Indeed, students have an opportunity to learn about the processes and knowledge related to technology that are needed to solve problems and extend human capabilities through technology education. Wright and Lauda (1993) defined technology education as a program designed to help students "develop an understanding and competence in designing, producing, and using technological products and systems, and in assessing the appropriateness of technological actions" (p. 4).

Submission Checklist

Indicate that this submission is ready to be considered by this journal by checking off the following (comments to the editor can be added below).

- The submission has not been previously published, nor is it before another journal for consideration (or an explanation has been provided in Comments to the Editor).
- The submission file is in OpenOffice, Microsoft Word, RTF, or WordPerfect document file format.
- Where available, URLs for the references have been provided.
- The text is single-spaced; uses a 12-point font; employs italics, rather than underlining (except with URL addresses); and all illustrations, figures, and tables are placed within the text at the appropriate points, rather than at the end.
- The text adheres to the stylistic and bibliographic requirements outlined in the [Author Guidelines](#), which is found in About the Journal.
- If submitting to a peer-reviewed section of the journal, the instructions in [Ensuring a Blind Review](#) have been followed.

PKP is a multi-university initiative developing (free) open source software and conducting research to improve the quality and reach of scholarly publishing.

Public Knowledge Project > Open Conference Systems

Open Conference Systems

Open Conference Systems (OCS) is a free Web publishing tool that will create a complete Web presence for your scholarly conference. OCS will allow you to:

- create a conference Web site
- compose and send a call for papers
- electronically accept paper and abstract submissions
- allow paper submitters to edit their work
- post conference proceedings and papers in a searchable format
- post, if you wish, the original data sets
- register participants
- integrate post-conference online discussions

OCS Demonstration

PKP hosts an OCS installation for our own conference series.

OCS Languages

OCS is a multilingual system, allowing conferences to publish in a variety of languages.

OCS Download

Do you want to install Open Conference Systems on your server? Installing this program will allow you to host conference web sites for you and your colleagues.

Marine Energy Technology Symposium 2014

METS2014

April 15, 2014 – April 17, 2014

Welcome!

The 2nd Annual Marine Energy Technology Symposium (METS) will be held on April 15-17 in Seattle, WA in conjunction with the [Global Marine Renewable Energy Conference \(GMREC\)](#).

METS provides a venue where technical experts can publish and present wave and water current energy research that helps accelerate the pace of technology development. Holding METS in conjunction with GMREC provides researchers with the invaluable opportunity to interact with public and private industry stakeholders.

Last year's inaugural METS was a great success and consisted of over 40 technical presentations and 30 technical papers. All accepted papers were published in open-access format and are available [online](#).

Thank you to everyone who made last years METS a success. We look forward to seeing you in Seattle in 2014!

Call for Papers: Abstracts Due October 25th, 2013

The METS organizing committee is seeking papers that focus on the **design, analysis, and economic evaluation of wave energy and water current energy converter technologies**. This year, we are also adding an environmental
