Dear Sir/Madam,

I am writing to request the permission to reproduce my paper which got published today, "Radical remodeling of the Y chromosome in a recent radiation of malaria mosquitoes" as part of my dissertation work for my doctoral thesis. I am a co-first author on this paper which just got published today, and would appreciate an email reply/proof on your letterhead authorizing me to reproduce this work.

Thanks,
Atashi Sharma

Thank you for your message. Authors do not need to obtain permission for the following uses of material they have published in PNAS: (1) to use their original figures or tables in their future works; (2) to make copies of their papers for their own personal use, including classroom use, or for the personal use of colleagues, provided those copies are not for sale and are not distributed in a systematic way; (3) to include their papers as part of their dissertations; or (4) to use all or part of their articles in printed compilations of their own works.

Please cite the original PNAS article in full when re-using the material. Because this material published after 2008, a copyright note is not needed. Feel free to contact us with any additional questions you might have.

Best regards,
Kay McLaughlin for
Diane Sullenberger
