Chapter 1. Adaptive Strategies in Game Theory.

1 Introduction	1
2 Literature	2
2.1 Local Interactions, Groups, and Automata Networks	3
2.1.1 Groups	3
2.1.2 Local Interactions	5
2.2 Adaptive Strategies and Learning	7
3 Local Interactions	7
4 Adaptive Strategies	8
5 Building Adaptive Strategies and Adaptive Agents	10
6 An Example of a Formal Framework	11
7 General Meaning of Adaptation and Specific Adaptive Strategies	13
7.1 Decision Making by Adaptive Agents	13
7.2 Best Response vs. Imitation	14
7.2.1 Reasons for Imitation	14
7.2.2 Evolutionary Advantage of Imitation over Best Response	15
7.2.3 Interpretations of Imitation Dynamics	16
7.2.4 Modifications of Imitation Dynamics	16
8. Conclusions	17
References	18

Chapter 2. Cooperation and Local Interactions in the Prisoners' Dilemma Game.

1 Introduction	22
2 Group Interactions	25
3 Local Versus Global Interaction	29
4 Automata Networks	32
5 Prisoners' Dilemma Game	35
6 Imitation of the Locally Most successful Strategy	36
7 Choice of Playing Partners	47
8 Numerical Simulations	49
9 Conclusions	54
References	56

Chapter 3. Best Response Dynamics and Neural Networks

1 Introduction	60
2 Networked Models	62
3 A Synchronous Best Response Model	63
4 Majority Imitation and Its Relation to Best Response	66
4.1 Majority Imitation	67
4.2 Best Performance Imitation	68
5 Noisy best Response Dynamics	69
6 Logistic Noise	73
6.1 Long-Run Equilibria	74
6.2 Random Social Choice	78
7 Conclusions	80
References	80
Appendix	83
