

Dedication

To do or not to do, there is no try.

--Yoda

This dissertation is dedicated to my father P.M. Rajgopal (September 28, 1936-May 17, 1995), who gave me the courage to dream and the will to achieve.

ACKNOWLEDGEMENTS

I would like to express my deep gratitude to my advisor, Dr. Ruby Cox, for the guidance, encouragement, and support she has given me in completing the Ph.D program and this dissertation. Sincere thanks to the project director, Dr. Michael Lambur, for the leadership he provided, his patience during this trying research and the merriment he shared. I certainly enjoyed working with him! I also appreciate the efforts of committee members Dr. Mike Ellerbrock, Dr. Kathy Stadler and Dr. Mary Ann Novascone for their support, insight and recommendations during various parts of the study.

Many thanks to my research partner Edwin Lewis, who not only taught me the basics of economics but also contributed to a major part of the study. I would like to acknowledge Dr. Marilyn Prehm who was both a mentor and a friend to me and who helped me focus my research needs.

To Lesia Robertson, EFNEP support staff, a warm thank you for all the times I have rushed to her for help during the research. The same to the staff of the HNFED Department who had always lent a helping hand when needed. I gratefully acknowledge the Cooperative State Research, Education and Extension Service (CSREES) for funding this study through the Virginia Cooperative Extension. To my friends, both in the Graduate office and outside, I really appreciate the support, encouragement and laughter I have shared with you. Special thanks to Julie Willcox, Greg Shawver and Indira Konduri who have walked the extra mile with me through all the good times and bad.

No words are enough to acknowledge the loving support of my family, especially my mother, Rema Rajgopal and brother Rajiv, who fought all odds to let me “spread my wings and fly.” To my elders Indira and K. Gangadharan and Indu (Mama) & Harjit Singh (Papa), sincere gratitude for their love, support and prayers that has seen me through my doctoral studies.

Last, but not least, loving thanks to my husband and best friend, Nitish Singh, who has always believed in me and continues to help me through the ups and downs of life.
