

## **Acknowledgements**

First, I would like to thank Dr. Raymond Plaut, my advisor. His time and effort throughout the duration of my project have been greatly appreciated. I would also like to thank the other members on my committee, Dr. Thomas Cousins and Dr. Siegfried Holzer, for their time and input.

I am grateful for the financial support of this research by NSF Grant No. CMS – 9422248. I would also like to thank the Structural Engineering Program Area at Virginia Tech for a Graduate Teaching Assistantship.

I would also like to thank my family and all my friends at the University of Kentucky and Virginia Tech for their friendship and support.
