

## Acknowledgements

---

I would like to express my sincere appreciation to my academic advisor, Professor Dennis G. Sweeney, for his guidance, his support, and his help on all the mechanical fabrications for the radio. I would also want to thank Dr. Charles W. Bostian for giving me the opportunity to perform this project.

I wish to thank my colleagues, Scott Marshall and Ed Manning at the Center for Wireless Telecommunications for designing, building and testing the transmitter of this radio transceiver. I am very grateful to Punit Mukhija for reviewing my manuscript and helping me to correct grammatical errors.

I would also like to thank James Hicks for his inspiration to perform some of the simulations.

Finally, I would thank my wife, Wai Ling Lee, for her patience and endless support during my study.

This project has been sponsored by Texas Instruments.
