

TABLE OF CONTENTS

CHAPTER 1: Deregulation of Electricity Markets Around the World	1
Introduction	2
Background	2
Purpose of Research	3
Research Methodology	4
Scope and Limitations	5
Plan of Presentation	5
CHAPTER 2: Designing Electrical Power Districts in the Republic of Ghana	7
Introduction	8
Districting Problems	8
The Electrical Power Districting Problem	10
A General Mathematical Framework	11
Solving the Districting Problem	14
Simulated Annealing	14
Evolutionary Algorithms	17
The Genetic Algorithm	17
Creating Power Districts in the Republic of Ghana	19
Empirical Study – Single Criteria	22
Parameter Settings	24
Dynamic Analysis	24
Revenue Deviation	25
Compactness	27
Static Analysis	30
Revenue Deviation	31
Compactness	32
Summary	33
CHAPTER 3: The Multi-Criteria Electrical Power Districting Problem	34
Introduction	35
Multi-Criteria Decision Making Concepts	35
The Multi-Criteria Electrical Power Districting Model	36
Evolutionary Algorithms and MCDM	38
Pareto Ranking	39
A Hybrid Algorithm for the Multi-Criteria EPDP	39
Simulated Annealing Genetic Algorithm	40
Parallel Simulated Annealing	42
Empirical Study with Multiple Criteria – Part I	42
Non-dominated Solution Set	43

Equivalence Class Layers	46
Reliability	48
Summary – Part I	49
Empirical Study with Multiple Criteria – Part II	50
Random Test Problem Generator	50
An Analytical Foundation for the RTPG	50
Lower Complexity Bound for the EPDP	52
Upper Complexity Bound for the EPDP	54
Distribution of Data	55
Generating a Suite of Random Problems	55
Random Search	56
Comparing SAGA, PSA, and Random Search with Multiple Problems	56
The Non-dominated Solution Set	57
Equivalence Class Layers	59
False Domination	61
Conclusion	62
CHAPTER 4: A Decision Support System for Designing Electrical Power Districts in the Republic of Ghana	63
Introduction	64
A DSS for the EPDP	64
Evaluating Electrical Power Districts	64
Geographic Information Systems	65
The Map Object	68
The Bulk Supply Point Object	69
The Region Object	70
The Pareto Rank Scatter Plot	71
The GA and SAGA Interface	80
The SA and PSA Interface	81
Summary	83
CHAPTER 5: Future Research and Conclusions	84
Future Research	86
Human Organ Transplant Districts	86
Public School System Redistricting	86
Deregulation of Electricity Markets in the United States	87
Revolutionary Computing	87
Conclusions	88
BIBLIOGRAPHY	89

APPENDIX A: Simulated Annealing Procedure for the EPDP	97
Simulated Annealing Operators	98
The Swap Operator	98
The Split Operator	100
Simulated Annealing Pseudo-Code for the EPDP	101
APPENDIX B: Evolutionary Model for the EPDP	103
Genetic Algorithm Operators	104
GA Design Concepts	104
Toward a DNA Based Evolutionary Model	105
Major DNA Components	105
A DNA Based Evolutionary Model	106
The Classical Genetic Algorithm Model	106
Enforcing Connectivity with DNA Bonds	107
DNA Object Model	108
Encoding DNA	110
The Crossover Operator	111
Crossover Operator Pseudo-Code for the EPDP	112
The Mutation Operator	113
Mutation Operator Pseudo-Code for the EPDP	113
APPENDIX C: Random Problems – Equivalence Class Layer 1 – SAGA/PSA/Random	114
APPENDIX D: Random Problems – Graphical Solutions – SAGA/PSA/Random	125
APPENDIX E: Report on False Dominants	156
CURRICULUM VITA	159
