Janet Read, Stuart MacFarlane, Chris Casey,

As part of the literature review for my Masters thesis, I came across your paper on measuring fun. This paper was very helpful in the design of my user trials. As part of my literature review, I am interested in using figure 2 (the smileyometer) from your paper in my Masters thesis. Before I can use said image, I would like to ask for your permission. For what it is worth, the distribution of my thesis will largely be limited to the Computer Science department here at Virginia Tech.

Thank you,
David Machaj
Masters Student, Computer Science
