Dr. Silver,

I am writing to check on the status of my request to reproduce an article published in Freshwater Science as a part of my doctoral dissertation. I am the first author on the article, which contains data resulting from my dissertation research. The article citation is as follows:

Cheever, B. M, E. B. Kratzer, and J. R. Webster. 2012. Immobilization and mineralization of N and P by heterotrophic microbes during leaf decomposition. Freshwater Science 31 (1): 133-147.

The article will be reproduced as a chapter in a dissertation submitted to Virginia Polytechnic Institute and State University. Freshwater Science will be identified as the copyright owner.

Please let me know if you require additional information to process my request. Thank you for your time,

-beth cheever
